(Hearing site: Terre Haute, IN.)

[FR Doc. 78-28024 Filed 10-4-78; 8:45 am]

[7035-01]

[Decisions Volume No. 36]

DECISION-NOTICE

Decided: September 26, 1978.

The following applications are governed by special rule 247 of the Commission's rules of practice (49 CFR 1100.247). These rules provide, among other things, that a protest to the granting of an application must be filed with the Commission on or before November 6, 1978. Failure to file a protest on or before November 6, 1978, will be considered as a waiver of opposition to the application. A protest under these rules should comply with rule 247(e)(3) of the rules of practice which requires that it set forth specifically the grounds upon which it is made, contain a detailed statement of protestant's interest in the proceeding (as specifically noted below), and shall specify with particularity the facts, matters, and things relied upon, but shall not include issues or allegations phrased generally. A protestant should include a copy of the specific portions of its authority which protestant believes to be in conflict with that sought in the application, and describe in detail the method—whether by joinder, interline, or other means—by which protestant would use such authority to provide all or part of the service proposed. Protests not in reasonable compliance with the requirements of the rules may be rejected. The original and one copy of the protest shall be filed with the Commission, and a copy shall be served concurrently upon applicant's representative, or upon applicant if no representative is named. If the protest includes a request for oral hearing, such request shall meet the requirements of section 247(e)(4) of the special rules and shall include the certification required in that section.

Section 247(f) provides, in part, that an applicant which does not intend timely to prosecute its application shall promptly request that it be dismissed, and that failure to prosecute an application under the procedures of the Commission will result in its dismissal.

Further processing steps will be by Commission notice, decision, or letter which will be served on each party of record. Broadening amendments will not be accepted after October 5, 1978.

Any authority granted may reflect administratively acceptable restrictive amendments to the service proposed below. Some of the applications may have been modified to conform to the Commission's policy of simplifying grants of operating authority.

We find: With the exceptions of those applications involving duly noted problems (e.g., unresolved common control, unresolved fitness questions, and jurisdictional problems) we find, preliminarily, that each common carrier applicant has demonstrated that its proposed service is required by the public convenience and necessity, and that each contract carrier applicant qualifies as a contract carrier and its proposed contract carrier service will be consistent with the public interest and the national transportation policy. Each applicant is fit, willing, and able properly to perform the service proposed and to conform to the requirements of the Interstate Commerce Act and the Commission's regulations. This decision is not a major Federal action significantly affecting the quality of the human environment.

It is ordered, In the absence of legally sufficient protests, filed on or before November 6, 1978 (or, if the application later becomes unopposed), appropriate authority will be issued to each applicant (except those with duly noted problems) upon compliance with certain requirements which will be set forth in a notification of effectiveness of this decision-notice. To the extent that the authority sought below may duplicate an applicant's existing authority, such duplication shall not be construed as conferring more than a single operating right.

By the Commission, Review Board No. 3, Members Parker, Fortier, and Hill.

H. G. HOMME, Jr.,
Acting Secretary.

MC 4483 (Sub-24F), filed August 21, 1978. Applicant: MONSON DRAY LINE, INC., Rural Route No. 1, Red Wing, MN 55066. Representative: James E. Ballenthin, 630 Osborn Building, St. Paul, MN 55102. Condition: Prior receipt from applicant of an affidavit setting forth its complementary Canadian authority or explaining why no such Canadian authority is necessary. (Hearing site: Great Falls, MT.)

NOTE.—The restriction and conditions contained in the grant of authority in this proceeding are phrased in accordance with the policy statement entitled "Notice to Interested Parties of New Requirements Concerning Applications for Operating Authority to Handle Traffic to and From Points in Canada" published in the FEDERAL REGISTER on December 5, 1974, and supplemented on November 18, 1975. The Commission is presently considering whether the policy statement should be modified, and is in communication with appropriate officials of Canada regarding this issue. If the policy statement is changed, appropriate notice will appear in the FEDERAL REGISTER and the Commission will consider all restrictions or conditions which were imposed pursuant to the prior policy statement, regardless of when the condition or restriction was imposed, as being null and void and having no further force or effect. Dual operations may be involved in this proceeding.

MC 135152 (Sub-24F), filed June 20, 1978, and previously published in the FEDERAL REGISTER issue of August 15, 1978. Applicant: CASKET DISTRIBUTORS, INC., Rural Route 2, P.O. (Hearing site: San Francisco, CA.)

MC 135797 (Sub-140F), filed August 7, 1978. Applicant: J. B. HUNT TRANSPORT, INC., P.O. Box 200, Lowell, AR 72745. Representative: Paul R. Bergant (same address as applicant). To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Plastic articles*, from Humboldt, KS and points in MO, to points in the United States (except AK and HI). (Hearing site: Kansas City, MO.)

MC 135895 (Sub-22F), filed May 8, 1978, previously noticed in the FEDERAL REGISTER issue of July 6, 1978. Applicant: B & R DRAYAGE, INC., P.O. Box 8534, Battlefield Station, Jackson, MS 39204. Representative: Douglas C. Wynn, P.O. Box 1895, Greenville, MS 38701. Authority granted to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Sand, sand products, and mineral fillers* (except commodities in bulk), between the facilities of Radcliff Material, Inc., at or near Mobile, AL, and points in LA and MS. (Hearing site: Mobile, AL.)

NOTE.—This republication is to reflect a nonradial between movement.

MC 136315 (Sub-34F), filed August 21, 1978. Applicant: OLEN BURRAGE TRUCKING, INC., Route 9, Box 22-A, Philadelphia, MS 39350. Representative: Fred W. Johnson, Jr., 1500 Deposit Guaranty Plaza, P.O. Box 22628, Jackson, MS 39205. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) (a) *Pipe, fittings, valve boxes, water boxes, and castings*, and (b) *accessories* for the commodities in (1)(a) above, from the facilities of the Central Foundry Co., Inc., at or near Holt, AL, to points in AR, IL, IN, IA, KS, LA, MS, MO, OK, and TX, and (2) *equipment, materials, and supplies* used in the manufacture and distribution of the commodities in (1) above, in the reverse direction. (Hearing site: Jackson, MS, or Birmingham, AL.)

NOTE.—Dual operations may be at issue in this proceeding.

MC 136605 (Sub-66F), filed July 31, 1978. Applicant: DAVIS BROS. DIST., INC., P.O. Box 8058, Missoula, MT 59807. Representative: Allen P. Felton (same address as applicant). To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Asphalt composition roofing, shingles, rolled roofing, and asphalt impregnated sheathing board*, from the ports of entry on the international boundary line between the United States and Canada, at points in ID and MT, to points in WA, OR, ID, and MT, restricted to the transportation of traffic originating at points in the Province of Alberta, Canada. Condition: Prior receipt from applicant of an affidavit setting forth its appropriate complementary Canadian authority or explaining why no such Canadian authority is necessary. (Hearing site: Billings, MT, or Spokane, WA.)

NOTE.—The restriction and conditions contained in the grant of authority in this proceeding are phrased in accordance with the policy statement entitled "Notice to Interested Parties of New Requirements Concerning Applications for Operating Authority to Handle Traffic to and From Points in Canada" published in the FEDERAL REGISTER on December 5, 1974, and supplemented on November 18, 1975. The Commission is presently considering whether the policy statement should be modified, and is in communication with appropriate Canadian officials regarding this issue. If the policy statement is changed, appropriate notice will appear in the FEDERAL REGISTER and the Commission will consider all restrictions or conditions which were imposed pursuant to the prior policy statement, regardless of when the condition or restriction was imposed, as being null and void and having no force or effect.

MC 136897 (Sub-26F), filed August 7, 1978. Applicant: SWIFT TRANSPORTATION CO., INC., 335 West Elwood Road, P.O. Box 3902, Phoenix, AZ 85030. Representative: Donald E. Fernaays, Suite 320, 4040 East McDowell Road, Phoenix, AZ 85008. To operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Automatic machinery* used for storing or retrieving merchandise, between the facilities of Eaton-Kenway Corp., at (a) Bountiful, UT, and (b) Wichita Falls, TX, on the one hand, and, on the other, points in the United States (except AK and HI), under a continuing contract with Eaton-Kenway, of Bountiful, UT. (Hearing site: Salt Lake City, UT, or Phoenix, AZ.)

NOTE.—Dual operations are at issue in the proceeding

MC 138283 (Sub-6F), filed August 16, 1978. Applicant: DANA TRUCKING CORP., Round Lake, MN 56167. Representative: Michael J. Ogborn, P.O. Box 82028, Lincoln, NE 68501. To operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: (1) *Cookies*, from the facilities of Interbake Foods, Inc., at or near Battle Creek, MI, to points in AL, AZ, AR, CA, CO, GA, IL, IN, IA, KS, KY, LA, MD, MS, MO, MT, NE, NM, ND, OH, OK, PA, SC, TN, TX, WI, and WY, and (2) *materials, equipment, and supplies* used in the manufacture and distribution of cookies (except commodities in bulk), in the reverse direction, under a continuing contract with Interbake Foods, Inc., of Richmond, VA. (Hearing site: Richmond, VA.)

(Hearing site: Philadelphia, PA, or Omaha, NE.)

NOTE.—Dual operations are involved in this proceeding.

MC 143053 (Sub-5F), filed August 15, 1978. Applicant: B & B TRANSPORT, INC., P.O. Box 5310, Kent, WA 98031. Representative: Henry C. Winters, 235 Evergreen Building, Renton, WA 98055. To operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Gardening materials and gardening supplies*, (1) between Kent, WA, and Portland, OR; (2) from Kent, WA, to Boise, ID, and Salt Lake City, UT; and (3) from Chicago, IL, and points in Humboldt, Los Angeles, Mendocino, Orange, Riverside, and San Diego Counties, CA, to Kent and Spokane, WA, Boise, ID, Portland, OR, and Salt Lake City, UT, under a continuing contract with Cole's Plant Soils, Inc., of Kent, WA. (Hearing site: Seattle, WA.)

MC 143103 (Sub-4F), filed August 17, 1978. Applicant: CHEROKEE LINES, INC., P.O. Box 152, Cushing, OK 74023. Representative: Donald L. Stern, Suite 610, 7171 Mercy Road, Omaha, NE 68106. To operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Foodstuffs*, in vehicles equipped with mechanical refrigeration, from the facilities of Avoset Foods Corp., Gustine, CA, to points in IL, IN, MI, OH, KY, WV, VA, MD, DE, PA, NY, NJ, CT, RI, MA, VT, NH, MO, IA, MN, WI, NE, KS, CO, and DC, under a continuing contract with Avoset Foods Corp., Gustine, CA. (Hearing site: Oklahoma City, OK, or San Francisco, CA.)

NOTE.—Dual operations may be at issue in this proceeding.

MC 143910 (Sub-4F), filed May 10, 1978, previously noticed in the FEDERAL REGISTER issue of July 6, 1978. Applicant: NEW HAMPSHIRE CONTINENTAL EPRESS, INC., P.O. Box 4956, Manchester, NH 03108. Representative: Charles E. Creager, 1329 Pennsylvania Avenue, P.O. Box 1417, Hagerstown, MD 21740. To operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: (1) *Foodstuffs* and *materials, equipment, and supplies* used in the manufacture and distribution of foodstuffs (except commodities in bulk), and (2) *commodities*, the transportation of which are exempt from regulation under the provisions of section 203(b) of the Interstate Commerce Act, in mixed loads with the commodities in (1) above, (a) between Salinas, Gilroy, San Francisco, Vacaville, and San Fernando, CA, on the one hand, and, on the other, points in AL, GA, ID, IL, IN, IA, KS, LA, MS, MD, MI, MN, MO, NJ, NE, OK, OH, NY, OR, NC, SC, TN, TX, UT, VA, WI, and WA; (b) between Baltimore, MD, on the one hand, and, on the other, points in AL, GA, ID, IL, IN, IA, KS, LA, FL, MI, MN, MO, MS, OH, NC, SC, TN, TX, VA, and WI; (c) between South Bend and Bremen, IN, on the one hand, and, on the other, points in AZ, AR, CA, CO, CT, GA, ID, IL, IA, KS, KY, LA, MD, MI, MS, MA, MN, MO, MT, NE, NV, NJ, NM, NY, OH, OR, PA, TN, UT, WA, WV, WI, and WY; (d) from Atlanta, GA, to points in NJ, NY, PA, DE, VA, MD, and DC; and (e) between Baltimore, MD, on the one hand, and, on the other, points in VA, NJ, DE, NY, PA, MA, CT, ME, RI, NH, VT, and DC, under a continuing contract with McCormick & Co., Inc., of Baltimore, Md. (Hearing site: Washington, DC.)

NOTE.—The carrier must satisfy the Commission that its operations will not result in objectionable dual operations because of its authority under MC 143590. The purpose of this republication is to show the addition of part (2) above.

MC 144407 (Sub-2F), filed August 3, 1978. Applicant: DECKER TRANSPORT CO., INC., 412 Route 23, Pompton Plains, NJ 07444. Representative: George A. Olsen, P.O. Box 357, Gladstone, NJ 07934. To operate as a *common carrier*, over irregular routes, transporting: (1) *Such commodities* as are dealt in by do-it-yourself home

centers, (except foodstuffs and commodities in bulk), and (2) *materials, equipment, and supplies* used in the conduct of such business, (except foodstuffs and commodities in bulk), between Macedonia, Kent, and Cleveland, OH, on the one hand, and, on the other, points in the United States (except AK and HI). (Hearing site: Cleveland, OH, or Washington, DC.)

NOTE.—Dual operations are at issue in this proceeding.

MC 144437 (Sub-4F), filed August 7, 1978. Applicant: WALTERS ENTERPRISES, INC., 16935 Hummel Road, Brookpark, OH 44142. Representative: J. A. Kundtz, 1100 National City Bank Building, Cleveland, OH 44114. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Iron and steel articles*, between points in OH, on the one hand, and, on the other, points in KY and those in IN on and south of U.S. Hwy 24. (Hearing site: Cleveland or Columbus, OH.)

NOTE.—The person or persons it appears may be engaged in common control must either file an application under section 5(2) of the Interstate Commerce Act, or submit an affidavit indicating why such approval is unnecessary.

MC 144827 (Sub-2F), filed August 7, 1978. Applicant: DELTA MOTOR FREIGHT, INC., 2877 Farrisview, P.O. Box 18423, Memphis, TN 38118. Representative: Billy R. Hallum (same address as applicant). To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Such commodities* as are dealt in by department stores, and (2) *advertising materials*, from New York, NY, to Blytheville, Fort Smith, and Little Rock, AR, Evansville and Terre Haute, IN, Lexington and Louisville, KY, Springfield, MO, Cincinnati, OH, Oklahoma City and Tulsa, OK, and Cookeville, Jackson, Kingsport, Knoxville, Lebanon, Memphis, and Nashville, TN. (Hearing site: Nashville, TN.)

MC 144858 (Sub-4F), filed September 1, 1978. Applicant: DENVER SOUTHWEST EXPRESS, INC., a Nebraska corporation, P.O. Box 9950, 1310 Stagecoach Road, Little Rock, AR 72209. Representative: John T. Wirth, 2310 Colorado State Bank Building, 1600 Broadway, Denver, CO 80202. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Carbonated soft drink beverages* (except in bulk, in tank vehicles), from Camden, AR, to Anniston, AL, and Indianola, MS. (Hearing site: Little Rock, AR, or St. Paul, MN.)

NOTE.—Dual operations are involved in this proceeding.

MC 145005 (Sub-1F), filed August 4, 1978. Applicant: U & I INC., d.b.a. U & I INC., TRUCKING DIVISION, P.O. Box 2696, Pasco, WA 97302. Representative: Dick E. Jones (same address as applicant). To operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: (1) *Such commodities* as are dealt in by grocery and food business houses, (except commodities in bulk), from the facilities of Gourmet Food Products, Inc., at or near Boardman and Metolius, OR, to points in the United States on and west of a line beginning at the mouth of the Mississippi River, and extending along the Mississippi River to its junction with the western boundary of Itasca County, MN then northward along the western boundaries of Itasca and Koochiching Counties, MN, to the international boundary line between the United States and Canada, and those in IL, IN, MI, and WI, and (2) *equipment, materials, and supplies* used in the manufacture and distribution of the commodities in (1) above, (except commodities in bulk), in the reverse direction. (Hearing site: Portland, OR or Salt Lake City, UT.)

NOTE.—In view of the *Geraci* and *Toto* policies (*See* e.g., 43 FR 33945) (8-2-78), applicant must satisfy the Commission that its operations will not result in objectionable private and for-hire operations.

MC 145233F, filed August 10, 1978. Applicant: MORGAN TRUCKING CORP., P.O. Box 367, Gaston, IN 47342. Representative: Donald W. Smith, P.O. Box 40659, Indianapolis, IN 46250. To operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: (1) *Dairy products* (except in bulk), in vehicles equipped with mechanical refrigeration, (a) from the facilities of Dairy Farm Products Co., at Muncie, IN, to those points in the United States in and east of WI, IL, KY, TN, and MS, and (b) from Orville, Dayton, and Greenville, OH, to the facilities of Dairy Farm Products Co., at Muncie, IN, and (2) *materials, equipment, and supplies* used in the manufacture and distribution of dairy products, in the reverse direction, under a continuing contract with Dairy Farm Products Co., of Strongsville, OH. (Hearing site: Indianapolis, IN.)

PASSENGERS AUTHORITY

MC 143427 (Sub-2F), filed July 31, 1978. Applicant: WINSTON LIMOUSINE SERVICE, INC., 41 Pembrook Drive, Stony Brook, NY 11790. Representative: Sidney J. Leshin, 575 Madison Avenue, New York, NY 10022. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Passengers and their baggage*, in the same vehicle with passengers, in one-way and round-trip specials operations, in nonscheduled door-to-door service, between New York, NY, Newark, NJ, and points in Fairfield, New Haven, and Middlesex Counties, CT, restricted to the transportation of (1) not more than eleven (11) passengers in any one vehicle, and (2) passengers having an immediately prior or subsequent movement by air. (Hearing site: Stamford or New Haven, CT.)

NOTE.—The person or persons who appear to be engaged in common control must either file an application under section 5(2) of the Interstate Commerce Act, or submit an affidavit indicating why such approval is unnecessary.

[Volume No. 117]

PETITIONS, APPLICATIONS, FINANCE MATTERS (INCLUDING TEMPORARY AUTHORITIES), RAILROAD ABANDONMENTS, ALTERNATE ROUTE DEVIATIONS, AND INTRASTATE APPLICATIONS

Petitions for modification, interpretation or reinstatement of operating rights authority

SEPTEMBER 27, 1978.

The following petitions seek modification or interpretation of existing operating rights authority, or reinstatement of terminated operating rights authority.

All pleadings and documents must clearly specify the suffix (e.g. M1F, M2F) numbers where the docket is so identified in this notice.

An original and one copy of protests to the granting of the requested authority must be filed with the Commission within 30 days after the date of this notice. Such protests shall comply with special rule 247(e) of the Commission's General Rules of Practice (49 CFR 1100.247)[1] and shall include a concise statement of protestant's interest in the proceeding and copies of its conflicting authorities. Verified statements in opposition should not be tendered at this time. A copy of the protest shall be served concurrently upon petitioner's representative, or petitioner if no representative is named.

MC 8744 (M1F) (notice of filing of petition to modify certificate), filed July 19, 1978. Petitioner: CONSOLIDATED MOTOR EXPRESS, INC., P.O. Box 1160, Bluefield, WV 24701. Representative: John M. Friedman, 2930 Putnam Avenue, Hurricane, WV 25526. Petitioner holds a motor *common carrier* certificate in MC 8744 issued April 27, 1954, authorizing transportation, over irregular routes,

[1] Copies of special rule 247 (as amended) can be obtained by writing to the Secretary, Interstate Commerce Commission, Washington, D.C. 20423.

V 43/194
OCT 5 78

as pertinent, of (a) *General commodities* (except those of unusual value, Class A and B explosives, household goods as defined by the Commission, commodities in bulk, commodities requiring special equipment), (1) Between North Tazewell, VA, on the one hand, and, on the other, points in those parts of VA and WV located within 50 miles of North Tazewell, and (2) From Richlands, Tazewell, St. Paul, Norton, Pennington, Gap, and Haysi, VA, to points in Tazewell, Buchanan, Lee, Scott, Russell, Wise, and Dickenson Counties, VA.

By the instant petition, petitioner seeks an interpretation by the Commission that the 50 mile radius of North Tazewell, VA includes the points of Bristol and Radford, VA. In the alternative, petitioner seeks to modify the authority in (1) above to include Bristol and Radford, VA as radial points.

MC 41406 (Sub-52,53) (M-1F) (notice of filing of petition to modify certificates to add commodities), filed August 8, 1978. Petitioner: ARTIM TRANSPORTATION SYSTEM, INC., 7105 Kennedy Avenue, Hammond, IN 46323. Representative: E. Stephen Heisley, 805 McLachlen Bank Building, 666 11th Street NW., Washington, DC 20001. Petitioner holds motor *common carrier* certificates in MC 41406 (Sub-52 and 53), issued March 4, 1976 and March 15, 1978, respectively, authorizing transportation, over irregular routes, as follows: MC 41406 (Sub-52), authorizes transportation as pertinent, of: (1) *Steel, steel products,* and *machinery,* (a) from Pittsburgh, PA, and Youngstown, OH, and points within 50 miles of each, Cleveland, Lorain, Zanesville, Cambridge, Mansfield, Cincinnati, Middletown, and Portsmouth, OH, Buffalo, NY, Monroe and Detroit, MI, and those points in that part of KY within 5 miles of the Ohio River, to points in MI, OH, PA, NY, WV, and points in that part of KY within 5 miles of the Ohio River, (b) from Gibraltar, MI, to points in OH, PA, NY, WV, and points in that part of KY within 5 miles of the Ohio River, (c) from the site of the Ford Motor Co. plant located at the northeast intersection of Mound Road and 17-Mile Road in Sterling township, Macomb County, MI, to points in OH, PA, NY, WV, and points in that part of KY within 5 miles of the Ohio River, (d) between the site of the Kalsey-Hayes Co. plant located at the intersection of North Line Road and Huron River Drive in Romulus Township, Wayne County, MI, on the one hand, and, on the other, points in MI, OH, PA, NY, WV, and that part of KY within 5 miles of the Ohio River. (2) *Steel* and *steel products,* (a) from points in the Detroit, MI, Commercial Zone, as defined by the Commission, except Detroit, to points in NY, OH, PA, WV, and those in that part of KY within 5 miles of the Ohio River, (b) from points in the Cleveland, OH, Commercial Zone, defined by the Commission, except Cleveland, to points in MI, PA, NY, WV, and points in that part of KY within 5 miles of the Ohio River, (c) from points in Lackawanna and Hamburg Townships, Erie County, NY, to points in MI, OH, PA, WV, and those in that part of KY within 5 miles of the Ohio River. MC 41406 (Sub-53) authorizes transportation as pertinent, of: *Steel* and *steel products,* (1) from points in IL, IN, and St. Louis, MO, to points in OH, PA, NY, WV, and points in KY within 5 miles of the Ohio River, and (2) from Pittsburgh, PA, Youngstown, OH, and points within 50 miles of each, Lackawanna and Hamburg Townships, Erie County, NY, points in KY within 5 miles of the Ohio River, Cleveland, Lorain, Zanesville, Cambridge, Mansfield, Cincinnati, Middletown and Portsmouth, OH, Monroe and Detroit, MI, and Buffalo, NY, to points in IL, IN, IA, MO, and WI. Restriction: That portion of the operations authorized in part (2) involving traffic to points in MO, WI, and points in IA (except those points in IA on and east of a line beginning at Keokuk, IA, and extending along U.S. Hwy 218 to Cedar Rapids, then along U.S. Hwy 151 to junction IA Hwy 13, then along IA Hwy 13 to Marquette), is restricted to the transportation of traffic destined to those points. By the instant petition, petitioner seeks to modify the above certificates as follows: (A) Substitute "Iron and steel, iron and steel articles and products, pig iron, and machinery" for "Steel, steel products and machinery" in (Sub-52 part (1)). (B) Substitute "Iron and steel, iron and steel articles and products and pig iron" and "Steel and steel products" in (Sub-52 part (2) and in Sub-53).

MC 82735 (Sub-3) (M1F) (Correction) (Notice of filing of petition to modify permit), filed July 7, 1978, previously noticed in the FEDERAL REGISTER issue of September 7, 1978. Petitioner: HUDSON BERGEN TRUCKING CO., a corporation, 200 Central Avenue, Teterboro, NJ 07608. Representative: Charles Williams, 1815 Front Street, Scotch Plains, NJ 07076. Petitioner holds a *contract carrier* permit in MC 82735 (Sub-3), issued October 22, 1971, authorizing transportation over irregular routes, of *Such merchandise* as is dealt in by wholesale and retail grocery stores, from the facilities of Marschall Warehouse Co. at Teterboro, NJ, to points in NY, NJ, PA, CT, RI, and MA, under a continuing contract or contracts with Marschall Warehouse Co., of Teterboro, NJ. By the instant petition, petitioner seeks to delete the word "grocery", from the commodity description, and to modify the territorial description to read: Between the facilities of Marschall Warehouse Co., at Teterboro and South Hackensack, NJ, on the one hand, and, on the other, points in NY, NJ, PA, CT, RI, and MA.

NOTE.—The purpose of this correction is to indicate the modification of the territorial description as a between radial movement, and to add the facilities of Marschall Warehouse Co. at Hackensack, NJ.

MC 108859 (M1F) (Notice of filing of petition to modify certificate), filed August 7, 1978. Petitioner: CLAIRMONT TRANSFER CO., a corporation, 1803 Seventh Avenue North, Escanaba, MI 49829. Representative: John L. Bruemmer, 121 West Doty Street, Madison, WI 53703. Petitioner holds a motor *common carrier* certificate in MC 108859, issued April 4, 1969, authorizing transportation, over regular routes, as pertinent of *General commodities* (usual exceptions), between St. Ignace, MI and Cheboygan, MI, serving no intermediate points: From St. Ignace over Interstate Hwy 75 to junction U.S. Hwy 23, thence over U.S. Hwy 23 to Cheboygan, and return over the same route. Restriction: The operations granted above are subject to the following conditions: (1) Said operations are restricted to the transportation of traffic having prior or subsequent movement by carrier from or to points which it is authorized to serve in the Upper Peninsula of Michigan west of Interstate Hwy 75 and in Wisconsin north of U.S. Hwy 18; (2) Said operations are restricted against the transportation of traffic interlined in the Upper Peninsula of Michigan and said area of Wisconsin which did not originate at, or which is not destined to, points in the Upper Peninsula of Michigan and said area of Wisconsin; (3) Said operations are restricted against the transportation of traffic originating at or destined the Cheboygan, MI. By this petition, petitioner seeks to amend the first restriction above noted to read as follows: Said operations are restricted to the transportation of traffic having a prior or subsequent movement by carrier from or to points which it is authorized to serve, except those in the Upper Peninsula of Michigan on and east of Interstate Hwy 75; and to delete the second restriction.

MC 111307 (Sub-4) (M1F) (Notice of filing of petition to modify certificate), filed August 16, 1978. Petitioner: OVERLAND WESTERN LTD., Box 3030, station A, 5200 Maingate Drive, Mississauga, ON, CD L5A 3S3. Representative: Wilhelmina Boersma, 1600 First Federal Building, Detroit, MI 48226. Petitioner holds a motor *common carrier* certificate in MC

111307 (Sub-4), issued February 4, 1965, authorizing transportation, over regular routes, as pertinent, of *General commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), between Detroit, MI, and the port of entry at Port Huron, MI, serving no intermediate points: From Detroit over U.S. Hwy 25 to Port Huron, and return over the same route. Restriction: The authority granted herein is restricted to the transportation of traffic moving from or to points in Canada and against the transportation of shipments originating at or destined to Sarnia, ON, Canada. By the instant petition, petitioner seeks to modify the above authority by deleting the above restriction.

MC 113678 (Sub-533) (MIF) (Notice of filing of petition to modify certificate), filed August 21, 1978. Petitioner: CURTIS, INC., 4810 Pontiac Street, Commerce City, CO 80022. Representative: Roger M. Shaner (Same address as petitioner). Petitioner holds a motor *common carrier* certificate in MC 113678 (Sub-533), issued September 8, 1977, authorizing transportation, over irregular routes, of *General commodities* (except those of unusual value, classes A and B explosives, commodities in bulk, household goods as defined by the Commission, and those requiring special equipment), which are at the time moving on bills of lading of freight forwarders under Part IV of the Interstate Commerce Act, from the facilities of ABC-Trans National Transport at New York, NY, Boston, MA, Newark, NJ, and Chicago, IL, to Denver, CO. By the instant petition, petitioner seeks to modify the above authority by deleting the facility references in the territorial description.

MC 125910 (MIF) (Notice of filing of petition to modify certificate), filed August 14, 1978. Petitioner: CUSTOM TRANSPORT, INC., P.O. Box 310, Lincolnton, 28092. Representative: S. Harrison Kahn, 1511 K Street NW., Washington, D.C. 20005. Petitioner holds a motor *common carrier* certificate in MC 125910, issued August 4, 1975, authorizing transportation, over irregular routes, of (1) *Textile waste materials* and *used bagging,* and *textile waste materials,* and *cotton,* which are within the exemption of section 203(b)(6) of the Interstate Commerce Act, when transported in the same vehicle with the commodities specified herein, and (2) synthetic textile fibers, between points in NC, VA, TN, SC, GA, AL, AR, and MS. By the instant petition, petitioner seeks to have the commodity description read: "(1) Textile materials, (2) textile waste materials and used bagging, and textile waste materials, and cotton, which are within the exemption of section 203(b)(6) of the Interstate Commerce Act, when transported in the same vehicle with the commodities specified herein, and (3) synthetic fibers".

MC 138351 (Sub-2) (MIF) (Notice of filing of petition to modify permit), filed August 24, 1978. Petitioner: DENIS & ROBERT TRANSPORT, INC., 787 Denison Ouest, Granby, PQ, Canada J2G 8C8. Representative: David M. Marshall, 101 State Street, Suite 304, Springfield, MA 01103. Petitioner holds a motor *contract carrier* Permit in No. MC 138351 (Sub-1), issued December 2, 1975, authorizing transportation, over irregular routes, of *Paper and paper products, materials* used for packing, *parts and supplies* used in the maintenance and repair of packing machinery and *supplies, materials,* and *equipment* used in the printing of paper, between ports of entry on the United States-Canada Boundary Line located in New Hampshire, Vermont, and New York (except Niagara Falls and Buffalo, NY), on the one hand, and, on the other, points in NH, VT, MA, CT, RI, NY, NJ, PA, MD, DE, VA, WV, OH, and DC, Detroit, MI, and Chicago and East St. Louis, IL. Restriction: The operations authorized herein are limited to a transportation service to be performed under a continuing contract, or contracts, with the following shippers: Denis & Robert Engr., Granby, PQ, Canada, Imprimerie Montreal-Granby Press, Ltee, Granby, PQ, Canada. By the instant petition, petitioner seeks to add Scott Paper Co. as an additional contracting shipper.

MC 139206 (M3F), MC 139206 (Subs 1, 2, 3, 4, and 5) (M1F) (Notice of filing of petition to modify permits), filed August 8, 1978. Petitioner: F.M.S. TRANSPORTATION, INC., 2564 Harley Drive, Maryland Heights, MO 63043. Representative: E. Stephen Heisley, 805 McLachlen Bank Building, Washington, DC 20001. Petitioner holds motor *contract carrier* permits in MC 139206 and (Sub-Nos. 1, 2, 3, 4, and 5), issued December 6, 1977; March 10, 1978; July 5, 1978; March 30, 1978; March 30, 1978; and May 2, 1978, respectively, authorizing transportation, over irregular routes, as follows: MC 139206 authorizes transportation of: (1) *Textiles* and *textile products, chemicals,* and *materials, equipment, and supplies,* used in the sale, manufacture, processing, production, and distribution of textiles and textile products and chemicals (except commodities in bulk), between Arlington, Laredo, Brenham, and Houston, TX, Wellsville, MO, and Johnson City, TN, on the one hand, and, on the other, points in the United States (except AK and HI). MC 139206 (Sub-1) authorizes the transportation of *textiles, textile products, chemicals,* and *materials, equipment, and supplies* used in the sale, manufacture, processing, and distribution of textiles, textile products and chemicals (except commodities in bulk), between New Orleans and Houma, LA, on the one hand, and, on the other, points in the United States (except AK and HI).

MC 139206 (Sub-2) authorizes the transportation of *textiles* and *textile products, chemicals,* and *materials, equipment, and supplies* used in the sale, manufacture, processing, production, and distribution of textiles and textile products and chemicals (except commodities in bulk), between Graniteville, SC, on the one hand, and, on the other, points in the United States (except AK and HI). MC 139206 (Sub-3) authorizes the transportation of *textiles, textile products, chemicals,* and *materials, equipment, and supplies* used in the sale, manufacture, processing, and distribution of textiles, textile products, and chemicals (except commodities in bulk), between St. Louis, MO, on the one hand, and, on the other, points in the United States (except AK and HI). MC 139206 (Sub-4) authorizes the transportation of *textiles* and *textile products, chemicals,* and *materials, equipment, and supplies* used in the manufacture, sale, and distribution of textiles and textile products and chemicals (except commodities in bulk), between Pensacola, FL, and Charleston, TN, on the one hand, and, on the other, points in the United States (except AK and HI). MC 139206 (Sub-5) authorizes the transportation of *textiles* and *textile products, chemicals,* and *materials, equipment, and supplies* used in the sale, manufacture, processing, production, and distribution of textiles and textile products and chemicals (except in bulk), between Boston, MA, and Kearny, NJ, on the one hand, and, on the other, points in the United States (except AK and HI). All of the above permits are restricted to a transportation service to be performed under a continuing contract(s) with Chromalloy American Corp. By the instant petition, petitioner seeks to modify the above permits as follows: Add as additional contracting shippers in all of the above permits (1) Accron Chemical Distributors Houston/San Antonio, Inc. and (2) Accron Chemical Distributors Dallas/Ft. Worth, Inc., in order to reflect a change in the corporate structure of petitioner's contracting shipper, Chromalloy American Corp.

MC 141269 (MIF) (Notice to filing of petition of modify permit), filed August 22, 1978. Petitioner: CHAS. R. MORGAN, INC., 18574 South High-

V 4 3 / 1 9 4
OCT 5 78

way 99 East, Oregon City, OR 97045. Representative: Earle V. White, 2400 Southwest Fourth Avenue, Portland, OR 97201. Petitioner holds a motor *contract carrier* permit in MC 141269, issued April 25, 1977, authorizing transportation, over irregular routes, transporting: (1) *Malt beverages*, in bottles, (a) from the facilities of Pabst Brewing Co., at or near Los Angeles, CA, to the facilities of Morgan Distributing, Inc., at or near Oregon City, OR, and (b) from the facilities of Anheuser-Busch, Inc., at or near Los Angeles and Fairfield, CA, to the facilities of M.C. Distributing Co., at or near Oregon City, OR, and (2) *Wine*, in bottles, from the facilities of Browne Vintners, at or near San Francisco, CA, United Vintners, at or near Modesto, CA, Franzia Winery, at or near Lodi, CA, and Gibson Winery, at or near Elk Grove, CA, to the facilities of M.C. Distributing Co., at or near Oregon City, OR. Restriction: The authority granted under (1)(a) above are limited to a transportation service to be performed, under a continuing contract, or contracts, with Morgan Distributing, Inc., of Oregon City, OR, and (1) (b) and (2) above are limited to a transportation service to be performed, under a continuing contract, or contracts, with M.C. Distributing Co., of Oregon City, OR. By the instant petition, petitioner seeks to modify the above authority by (I) substituting "in containers" for "in bottles" in the commodity description in (1) above, (II) substitute Morgan Distributing Inc., for M.C. Distributing Co., as the facility destination in (1)(b), (III) add a third movement which reads: *Empty bottles* returned after a loaded movement, from Oregon City, OR, to Winters, CA, and (IV) modify the restriction to read: The authority granted under (1) (a) and (b) and (3) above are limited to a transportation service to be performed under a continuing contract(s) with Morgan Distributing, Inc., of Oregon City, OR, and in (2) above is limited to a transportation service to be performed, under a continuing contract(s) with M.C. Distributing Co., of Oregon City, OR.

REPUBLICATIONS OF GRANTS OF OPERATING RIGHTS AUTHORITY PRIOR TO CERTIFICATION

NOTICE

The following grants of operating rights authorities are republished by order of the Commission to indicate a broadened grant of authority over that previously noticed in the FEDERAL REGISTER.

An original and one copy of a petition for leave to intervene in the proceeding must be filed with the Commission within 30 days after the date of this FEDERAL REGISTER notice. Such pleading shall comply with Special Rule 247(e) of the Commission's General Rules of Practice (49 CFR 1100.247) addressing specifically the issue(s) indicated as the purpose for republication, and including copies of intervenor's conflicting authorities and a concise statement of intervenor's interest in the proceeding setting forth in detail the precise manner in which it has been prejudiced by lack of notice of the authority granted. A copy of the pleading shall be served concurrently upon the carrier's representative, or carrier if no representative is named.

MC 5227 (Sub-35) (republication), filed January 23, 1978, published in the FEDERAL REGISTER issue of March 2, 1978, and republished this issue. Applicant: ECKLEY TRUCKING, INC., P.O. Box 201, Mead, NE 68041. Representative: Gailyn L. Larsen, 521 South 14th Street, P.O. Box 81849, Lincoln, NE 68501. A Decision of the Commission, Review Board No. 1, decided August 30, 1978, and served September 18, 1978, finds that the present and future public convenience and necessity require operations by applicant in interstate or foreign commerce as a *common carrier*, by motor vehicle, over irregular routes, in the transportation of: (1) *Solar heating units, collectors, and duct work*, from Alamosa and Denver, Co, Manhattan, KS, and Janesville, WI, to points in the United States (except AK and HI); and (2) *equipment, materials and supplies* used in the manufacture, distribution, and installation of the commodities in (1) above, in the reverse direction, that applicant is fit, willing, and able properly to perform such service and to conform to the requirements of the Interstate Commerce Act and the Commission's rules and regulations. The purpose of this republication is to modify the commodity and territorial description.

MC 19193 (Sub-14F) (republication), filed March 13, 1978, published in the FEDERAL REGISTER issue of April 27, 1978, and republished this issue. Applicant: LAFFERTY TRUCKING CO., a corporation, 3703 Beale Avenue, Altoona, PA, 16601. Representative: S. Berne Smith, P.O. Box 1166, 100 Pine Street, Harrisburg, PA, 17108. A Decision of the Commission, Review Board No. 1, decided August 28, 1978, and served September 14, 1978, finds that the present and future public convenience and necessity require operations by applicant in interstate or foreign commerce as a *contract carrier*, by motor vehicle, over irregular routes, in the transportation of: *Such merchandise* as is dealt in by wholesale, retail, and chain grocery, and food business houses and in connection therewith, *equipment, materials and supplies*, used in the conduct of such business, (1) between points in Jefferson, OH, and Brooke, Doddridge, Hancock, Harrison, Lewis, Marshall, Ohio, Pleasants, Ritchie, Tyler, Upshur, Wetzel, and Wood Counties, WV; and (2) between points in part (1) above, on the one hand, and, on the other, points in Ashtabula, Columbiana, Cuyahoga, Erie, Geauga, Huron, Lake, Lorain, Mahoning, Ottawa, Portage, Sandusky, Stark, Summit, and Trumbull Counties, OH, Baltimore, MD, and those in Garrett, Allegany and Washington Counties, MD, those in Greene, Washington, Fayette, Westmoreland, Armstrong, Clarion, Forest, Elk, McKean, Cameron, Clinton, Lycoming, Union, Snyder, Junita, Perry, Dauphin, Cumberland, Franklin, Fulton, Bedord, Somerset, Cambria, Indiana, Jefferson, Clearfield, Centre, Blair, Huntingdon, and Mifflin Counties, PA, and those in Monogalia, Marion, Taylor, Preston, Barbour, Randolph, Tucker, Grant, Mineral, Hampshire, Morgan, and Hardy Counties, WV, under a continuing contract with The Great Atlantic & Pacific Tea Co., Inc., of Montvale, NJ, will be consistent with the public interest and the national transportation policy, that applicant is fit, willing, and able properly to perform such service and to conform to the requirements of the Interstate Commerce Act and the Commission's rules and regulations. The purpose of this republication is to modify the territorial description.

MC 29910 (Sub-183F) (republication), filed December 19, 1977, published in the FEDERAL REGISTER issue of February 24, 1978, and republished this issue. Applicant: ARKANSAS-BEST FREIGHT SYSTEM, INC., 301 South 11th Street, Fort Smith, AR 72901. Representative: Don A. Smith, P.O. Box 43, 510 North Greenwood, Fort Smith, AR, 72902. A Decision of the Commission, Review Board No. 1, decided August 30, 1978, and served September 7, 1978, finds that the present and future public convenience and necessity require operations by applicant in interstate or foreign commerce as a *common carrier*, by motor vehicle, over irregular routes, in the transportation of: *Prefabricated buildings, equipment, supplies, and building materials*, (1) from the facilities of Carolina Log Buildings, Inc., in Surry County, NC, to those points in the United States in and east of MT, WY, CO, and NM; and (2) from the plant-site of Carolina Log Buildings, Inc., at Fletcher, NC, to points in FL, AL, GA, SC, NC, VA, WV, MD, DE, NJ, PA, NY, CT, MA, RI, VT, NH, ME, and DC, that applicant is fit, willing, and able properly to perform such service and to conform to the requirements of the Interstate Commerce Act and the Commission's rules and regulations.

The purpose of this republication is to indicate the origin point in part (1) above, as Surry County, NC, in lieu of Yadkin County, NC.

MC 41635 (Sub-49), (2d republication), filed October 5, 1977, published in the FEDERAL REGISTER issue of December 8, 1977, and July 20, 1978, and republished this issue. Applicant: DEALERS TRANSPORT CO., a corporation, P.O. Box 482, Memphis, TN 38101. Representative: Richard D. Gleaves, 631 Stahlman Building, Nashville, TN 37201. A decision of the Commission, Review Board No. 3, decided June 12, 1978, and served August 28, 1978, finds that the present and future public convenience and necessity require operations by applicant in interstate or foreign commerce as a *common carrier*, by motor vehicle, over irregular routes, in the transportation of: *New motor vehicles*, in secondary movements, in truckaway service, from Baton Rouge, LA, to points in Angelina, Brazoria, Chambers, Fort Bend, Galveston, Hardin, Harris, Jasper, Jefferson, Liberty, Montgomery, Nacogdoches, Newton, Orange, Polk, Sabine, Shelby, San Jacinto, San Augustine, and Tyler Counties, TX, restricted to the transportation of shipments manufactured, assembled, imported, and distributed by Ford Motor Co., that applicant is fit, willing, and able properly to perform such service and to conform to the requirements of the Interstate Commerce Act and the Commission's rules and regulations. The purpose of this republication is to indicate the addition of San Augustine County, TX, as a destination point, modify the commodity and territorial description, and add a restriction.

MC 51146 (Sub-569), (republication), filed January 18, 1978, published in the FEDERAL REGISTER issue of March 2, 1978, and republished this issue. Applicant: SCHNEIDER TRANSPORT, INC., P.O. Box 2298, Green Bay, WI 54306. Representative: Wayne Downing (same address as applicant). A decision of the Commission, Review Board No. 3, decided August 25, 1978, and served September 21, 1978, finds that the present and future public convenience and necessity require operations by applicant in interstate or foreign commerce as a *common carrier*, by motor vehicle, over irregular routes, in the transportation of: (1) *Paper and paper products*, from Monroe, MI, to (a) points in NY west of a line beginning at the international boundary line between the United States and Canada and extending along U.S. Hwy 9 to its junction with NY Hwy 7, then along NY Hwy 7 to its junction with U.S. Hwy 11, and then along U.S. Hwy 11 to the NY-PA State line; (b) points in MD west of a line beginning at the PA-MD State line and extending along MD Hwy 45 to its junction with MD Hwy 2, then along MD Hwy 2 to the Chesapeake Bay and then north along the Chesapeake Bay and the Susquehanna River to the PA-MD State line; and (c) points in IL on and within an area bordered on the north by Interstate Hwy 64, on the west by the Mississippi River, on the south by IL Hwy 146, and on the east by the Wabash River; (2) *materials, equipment, and supplies* used in the manufacture and distribution of paper and paper products (except commodities in bulk), from points in the destination territory described in (1) above, to Monroe, MI; and (3) *wood products*, from New Freedom, PA, to points in IL, IN, MI, MN, and WI, that applicant is fit, willing, and able properly to perform such service and to conform to the requirements of the Interstate Commerce Act and the Commission's rules and regulations. The purpose of this republication is to modify territorial description in part 1(c); delete IA and add IN as a destination point in part (3) above.

MC 103993 (Sub-903) (republication), filed September 29, 1977, published in the FEDERAL REGISTER issue of December 8, 1977, and republished this issue. Applicant: MORGAN DRIVE-AWAY, INC., 28651 U.S. 20 West, Elkhart, IN 46515. Representative: Paul D. Borghesani (same address as applicant). A Decision of the Commission, Review Board Number 3, decided August 15, 1978, and served September 12, 1978, finds that the present and future public convenience and necessity require operations by applicant in interstate or foreign commerce as a *common carrier*, by motor vehicle, over irregular routes, in the transportation of *Motor homes*, in driveaway service, from Elkhart, Goshen, Middlebury, Nappanee, and Wakarusa, IN, to points in the United States (including AK, but excluding HI and IN), that applicant is fit, willing, and able properly to perform such service and to conform to the requirements of the Interstate Commerce Act and the Commission's rules and regulations. The purpose of this republication is to modify the commodity and territorial description.

MC 130477 (republication), filed February 2, 1978, published in the FEDERAL REGISTER issue of March 2, 1978, and republished this issue. Applicant: JEFFERY J. WELCH AND CODY F. WELCH, a partnership, d.b.a., ALPENA TRAVEL SERVICE, 118 West Washington, Alpena, MI 49707. Representative: Karl L. Gotting, 1200 Bank of Lansing Building, Lansing, MI 48933. A Decision of the Commission, Review Board Number 1, decided August 31, 1978, and served September 7, 1978, finds that the present and future public convenience and necessity require operations by applicant to operate as a *broker*, at Alpena, MI, in arranging for the transportation by motor vehicle, in interstate or foreign commerce, of *Passengers and their baggage*, in round-trip tours, in special or charter operations, between points in the United States (including AK, but excluding HI), restricted to the transportation of passengers in tour service originating at and destined to points in Cheboygan, Presque Isle, Montmorency, Alpena, Otsego, Oscoda, Alcona, Roscommon, Ogemaw, and Iosco Counties, MI, will be consistent with the public interest and the national transportation policy; that applicant is fit, willing, and able properly to perform such service and to conform to the requirements of the Interstate Commerce Act and the Commission's rules and regulations. The purpose of this republication is to modify the commodity and territorial description and add a restriction.

MC 134183 (Sub-5) (republication), filed December 22, 1977, published in the FEDERAL REGISTER issue of February 16, 1978, and republished this issue. Applicant: C. E. ZUMSTEIN, d.b.a. C. E. ZUMSTEIN CO., P.O. Box 27, Lewisburg, OH 45338. Representative: E. Stephen Heisley, 805 McLachlen Bank Building, 666 Eleventh Street, NW., Washington, DC 20001. A Decision of the Commission, Review Board Number 2, decided August 22, 1978, and served September 7, 1978, finds that the present and future public convenience and necessity require operations by applicant in interstate or foreign commerce as a *contract carrier*, by motor vehicle, over irregular routes, in the transportation of (1) *Pipe fittings;* and (2) *materials, equipment and supplies* used in the manufacture and distribution of pipe fittings (except commodities in bulk), between the facilities used by Parker-Hannifan Corp., at or near Eaton, and Lewisburg, OH, on the one hand, and, on the other, points in the United States (except AK, OH, and HI), under a continuing contract(s) with North Parker-Hannifan Corp., will be consistent with the public interest and the national transportation and to conform to the requirements of the Interstate Commerce Act and the Commission's rules and regulations. The purpose of this republication is to modify the commodity description, and indicate the applicant's actual grant of authority.

MC 138054 (Sub-22F) (republication), filed February 14, 1978, published in the FEDERAL REGISTER issue of April 20, 1978, and republished this issue. Applicant: CONDOR CONTRACT CARRIERS, INC., 656 Wooster Street, Lodi, OH 44254. Representative: Bradford E. Kistler, P. O. Box

V 43/194
OCT 5 1978

82028, Lincoln, NE 68501. A Decision of the Commission, Review Board Number 2, decided August 29, 1978, and served September 18, 1978, finds that the present and future public convenience and necessity require operations by applicant in interstate or foreign commerce as a *contract carrier*, by motor vehicle, over irregular routes, in the transportation of *Infant feeding equipment*, from Tionesta and Oil City, PA, and Ravenna, OH, to points in and west of ND, SD, NE, KS, OK, AND TX (except AK and HI), under continuing contract(s) with Questor Corp., of Toledo, OH, will be consistent with the public interest and the national transportation policy, that applicant is fit, willing, and able properly to perform such service and to conform to the requirements of the Interstate Commerce Act and the Commission's rules and regulations. The purpose of this republication is to indicate the addition of Ravenna, OH, as an origin point.

MC 138134 (Sub-9F) (republication), filed February 24, 1978, published in the FEDERAL REGISTER issue of April 6, 1978, and republished this issue. Applicant: DONALD HOLLAND TRUCKING, INC., 1300 Main Street, Keokuk, IA 52632. Representative: Kenneth F. Dudley, P.O. Box 279, 611 Church Street, Ottumwa, IA 52501. A decision of the Commission, Review Board Number 3, decided August 28, 1978, and served September 18, 1978, finds that the present and future public convenience and necessity require operations by applicant in interstate or foreign commerce as a *contract carrier*, by motor vehicle, over irregular routes, in the transportation of *Calcium carbide*, in containers, from Keokuk, IA, to points in AL, AR, AZ, FL, GA, KY, LA, MS, NM, OK, TN, and TX, under a continuing contract or contracts with Midwest Carbide Corporation of Keokuk, IA, will be consistent with the public interest and the national transportation policy, that applicant is fit, willing, and able properly to perform such service and to conform to the requirements of the Interstate Commerce Act and the Commission's rules and regulations. The purpose of this republication is to add AZ as a destination point.

MC 144025 (Sub-1) (republication), filed January 16, 1978, published in the FEDERAL REGISTER issue of March 2, 1978, and republished this issue. Applicant: THE BLUE DIAMOND CO., a corporation, 4401 East Fairmount Avenue, Baltimore, MD 21224. Representative: Chester A. Zyblut, 366 Executive Building, 1030 Fifteenth Street, NW., Washington, DC 20005. A Decision of the Commission, Review Board Number 2, decided August 10, 1978, and served August 25, 1978, finds that the present and future public convenience and necessity require operations by applicant in interstate or foreign commerce as a *common carrier*, by motor vehicle, over irregular routes, in the transportation of *Corrugated paper* and *paper products*, from the facilities of Union Camp Corporation, at Trenton, NJ, to points in NY, PA, MD, and DE, that applicant is fit, willing, and able properly to perform such service and to conform to the requirements of the Interstate Commerce Act and the Commission's rules and regulations. The purpose of this republication is to indicate the grant of common carrier authority in lieu of contract carrier authority.

MOTOR CARRIER, BROKER, WATER CARRIER AND FREIGHT FORWARDER OPERATING RIGHTS APPLICATIONS

NOTICE

The following applications are governed by Special Rule 247 of the Commission's *General Rules of Practice* (49 CFR § 1100.247). These rules provide, among other things, that a protest to the granting of an application must be filed with the Commission within 30 days after the date of notice of filing of the application is published in the FEDERAL REGISTER. Failure to seasonable file a protest will be construed as a waiver of opposition and participation in the proceeding. A protest under these rules should comply with section 247(e)(3) of the rules of practice which requires that it set forth specifically the grounds upon which it is made, contain a detailed statement of protestant's interest in the proceeding (including a copy of the specific portions of its authority which protestant believes to be in conflict with that sought in the application, and describing in detail the method—whether by joinder, interline, or other means—by which protestant would use a such authority to provide all or part of the service proposed), and shall specify with particularity the facts, matters, and things relied upon, but shall not include issues or allegations phrased generally. Protests not in reasonable compliance with the requirements of the rules may be rejected. The original and one copy of the protest shall be filed with the Commission, and a copy shall be served concurrently upon applicant's representative, or applicant if no representative is named. All pleadings and documents must clearly specify the "F" suffix where the docket is so identified in this notice. If the protest includes a request for oral hearing, such requests shall meet the requirements of section 247(e)(4) of the special rules, and shall include the certification required therein.

Section 247(f) further provides, in part, that an applicant who does not intend timely to prosecute its application shall promptly request dismissal thereof, and that failure to prosecute an application under procedures ordered by the Commission will result in dismissal of the application.

Further processing steps will be by Commission decision which will be served on each party of record. Broadening amendments will not be accepted after the date of this publication except for good cause shown, and restrictive amendments will not be entertained following publication in the FEDERAL REGISTER of a notice that the proceeding has been assigned for oral hearing.

Each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

MC 4810 (Sub-5F), filed September 11, 1978. Applicant: ROCKY MOUNTAIN TRUCKING CO., a corporation, P.O. Box 2131, Casper, WY 82601. Representative: Edward T. Lyons, Jr., 1600 Lincoln Center Building, 1660 Lincoln Street, Denver, CO 80264. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Machinery, equipment, materials and supplies*, used in, or in connection with, the discovery, development, production, refining, manufacture, processing, storage, transmission, and distribution of natural gas and petroleum, and their products and byproducts; and (2) *Machinery, equipment, materials and supplies*, used in, or in connection with, the construction, operation, repair, servicing, maintenance, and dismantling of pipelines, including the stringing and picking up thereof, (a) Between points in CO, MT, NE, ND, SD, and WY, on the one hand, and, on the other, points in ID, KS, NV, NM, OK, OR, TX, UT, and WA; (b) between points in NE, on the one hand, and, on the other, points in ND and SD; (c) between points in SD (except points west of the Missouri River and on and north of U.S. Hwy 14), on the one hand, and, on the other, points in that part of SD west of the Missouri River and on and north of U.S. Hwy 14, and points in CO, MT, ND, and WY; and (d) between points in ID, KS, NV, NM, OK, OR, TX, UT, and WA. (Hearing: November 28, 1978 (3 weeks), Denver, CO, hearing room to be designated.)

MC 94265 (Sub-261F), filed February 21, 1978. Applicant: BONNEY MOTOR EXPRESS, INC., P.O. Box 305, Windsor, VA 23487. Representative: Clyde W. Carver, Suite 212, 5299 Roswell Road NE., Atlanta, GA 30342. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meats, meat products and byproducts, and articles distributed by meat packinghouses*, as described in sections A and C of Appendix I to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 and 766 (except hides and commodities in bulk, in tank vehicles), from the facilities of Illini Beef Packers, Inc., at Joslin, IL, to points in MD, NJ, NY, NC, PA, SC, VA, and DC. (Hearing site: Chicago, IL, or Washington, DC.)

MC 114211 (Sub-367F), filed August 17, 1978. Applicant: WARREN TRANSPORT, INC., P.O. Box 420, Waterloo, IA 50704. Representative: Adelor J. Warren (same address as applicant). Authority sought to operate as a *common carrier*, over irregular routes, transporting: *Such commodities* as are dealt in, or used by agricultural equipment and industrial equipment dealers, and manufacturers (except commodities in bulk, Motor vehicles as defined in section 203(A)(13) of Part II of the Interstate Commerce Act, Foodstuffs, Paper and Paper Products, and Petroleum Products from Bradford, Emlenton, Farmers Valley, Freedom, Reno, Rouseville, Karns City and Petrolia, PA to IL and MI and from Cincinnati, OH to IL and IN, and truck cabs from Louisville, KY) between points in the United States (except AK and HI). Restriction: The above authority is restricted to movements from, to, or between the facilities of Ford Motor Co. (Tractor Operations) and its dealers and further restricted as follows: (A) On movements from the facilities of Ford Motor Co. (Tractor Operations) and its dealers to traffic originating at said facilities or dealers, (B) On movements to the facilities of Ford Motor Co. (Tractor Operations) or its dealers to traffic destined to said facilities or dealers, (C) On movements between the facilities of Ford Motor Co. (Tractor Operations) and/or its dealers to traffic originating at and destined to said facilities and/or dealers, (D) On all movements to traffic originating at and destined to points in the United States (except AK and HI), except on traffic moving in foreign commerce. (Hearing: October 30, 1978, at 9:30 a.m. local time at the Offices of the Interstate Commerce Commission, Washington, DC, for prehearing conference.)

MC 119641 (Sub-150F), filed August 30, 1978. Applicant: RINGLE EXPRESS, INC., 450 East Ninth Street, Fowler, IN 47944. Representative: Alki E. Scopelitis, 1301 Merchants Plaza, Indianapolis, IN 46204. Authority sought to operate as a *common carrier*, over irregular routes, transporting: *Such commodities* as are dealt in, or used by agricultural equipment and industrial equipment dealers, and manufacturers (except commodities in bulk, motor vehicles as defined in section 203(A)(13) of Part II of the Interstate Commerce Act, Foodstuffs, Paper and Paper Products, and Petroleum Products from Bradford, Emlenton, Farmers Valley, Freedom, Reno, Rouseville, Karns City and Petrolia, PA to IL and MI and from Cincinnati, OH to IL and IN, and truck cabs from Louisville, KY), between points in the United States (except AK and HI). Restriction: The above authority is restricted to movements from, to, or between the facilities of Ford Motor Co. (Tractor Operations) and its dealers and further restricted as follows: (A) On movements from the facilities of Ford Motor Co. (Tractor Operations) and its dealers to traffic originating at said facilities or dealers, (B) On movements to the facilities of Ford Motor Co. (Tractor Operations) or its dealers to traffic destined to said facilities or dealers, (C) On movements between the facilities of Ford Motor Co. (Tractor Operations) and/or its dealers to traffic originating at and destined to said facilities and/or dealers, (D) On all movements to traffic originating at and destined to points in the United States (except AK and HI), except on traffic moving in foreign commerce. (Hearing: October 30, 1978, at 9:30 a.m. local time at the Offices of the Interstate Commerce Commission, Washington, DC, for a prehearing conference.)

MC 120181 (Sub-11F), filed August 8, 1978. Applicant: MAIN LINE HAULING CO., INC., a corporation, P.O. Box C, St. Clair, MO 63077. Representative: William H. Shawn, 1730 M Street NW., Washington, DC. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, and commodities in bulk, in tank vehicles), between Memphis, TN and Parkway Village, MO: From Memphis over Interstate 55 to junction U.S. 63, then over U.S. 63, to junction U.S. 167, then over U.S. 167 to junction 62, then over U.S. 62 to junction U.S. 65, then over U.S. 65 to junction Interstate 44, then over Interstate 44 to junction MO 13, then over MO 13 to junction MO 7, then over MO 7 to junction MO 291, then over MO 291 to junction Interstate 70, then over Interstate 70 to junction MO 47, then over MO 47 to Parkway Village, serving the intermediate and off-route points within 15 miles of Grandview, MO (excluding Grandview), for the purposes of interchange or joinder only, and return over the same routes. (Hearing site: Kansas City, KS; St. Louis, MO; or Washington, D.C.)

MC 140241 (Sub-17F), filed August 7, 1978. Applicant: DALKE TRANSPORT, INC., Box 7, Moundridge, KS 67107. Representative: Larry E. Gregg, 641 Harrison Street, Topeka, KS 66603. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) Bentonite and lignite, from points in Phillips County, MT; Big Horn County, WY, and Crook County, WY, to points in AZ, AR, CA, CO, ID, IL, IA, KS, LA, MI, MN, MO, MT, NE, NV, NM, ND, OK, OR, SD, TX, UT, WA, WI and WY; and (2) lignite, from points in Bowman County, ND, to points in AZ, CA, LA, NM, OK and TX, restricted in (1) and (2) above to movements originating from the facilities of American Colloid Co.

NOTE.—Hearing October 10, 1978 (3 days) at Denver, CO, in a hearing room location to be later designated.

MC 144961 (Sub-1F), filed September 11, 1978. Applicant: REED TRANSPORTATION, a corporation, 4051 Gannett, Casper, WY 82601. Representative: Edward A. O'Donnell, 1004 29th Street, Sioux City, IA 51104. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, in the transportation of (1) *Machinery, equipment, materials, and supplies and facilities* used in, or incidental to, or in connection with, the discovery, development, production, refining, manufacture, processing, storage, transmission and distribution of natural gas and petroleum, and their products and by-products, electrical energy, ore, coal, geothermal and nuclear resources; and (2) *machinery, equipment, materials, and supplies*, used in, or in connection with, the construction, operation, repair, sevicing, maintenance and dismantling of pipelines, including the stringing and picking up thereof, between points in CO, ID, MT, NV, ND, SD, WY, and UT. (Hearing November 28, 1978 (3 weeks) at 9:30 a.m. local time, at Denver, CO, in a hearing room location to be later designated.)

FINANCE APPLICATIONS

NOTICE

The following applications seek approval to consolidate, purchase, merge, lease operating rights and properties, or acquire control through ownership of stock, of rail carriers or motor carriers pursuant to sections 5(2) or 210a(b) of the Interstate Commerce Act.

An original and two copies of protests against the granting of the requested authority must be filed with the Commission within 30 days after the date of this FEDERAL REGISTER notice. Such protest shall comply with Special Rules 240(c) or 240(d) of the Commission's *General Rules of Practice* (49 CFR 1100.240) and shall in-

V 43/194 OCT 5 78 UMI

clude a concise statement of protestant's interest in the proceeding. A copy of the protest shall be served concurrently upon applicant's representative, or applicant, if no representative is named.

MC-F-13708F. Authority sought for purchase by TIAGO, INC., 7725 De Palma, Downey, CA 90241, of the operating rights of Duqal, Ltd., 3308 Bandini Boulevard, Los Angeles, CA 90023. Representative: David P. Christianson, Knapp, Stevens, Grossman & Marsh, 1800 United California Bank Building, 707 Wilshire Boulevard, Los Angeles, CA 90017. Operating rights sought to be purchased: *Livestock*, as a common carrier, over irregular routes, from points in Arizona to points in Los Angeles, Orange, Kern, Tulare, San Bernardino, Riverside, San Diego, and Imperial Counties, CA, with no transportation for compensation on return except as otherwise authorized. *Farm products* (other than those suitable for human consumption), *grain, feeds, salt, potatoes*, and *fertilizer*, in lots of 10,000 pounds or over, and *cement*, in lots of 40,000 pounds or over, from points in Los Angeles, Orange, Kern, San Bernardino, Riverside, and Imperial Counties, CA, to points in AZ, except points located on and with 1 mile of U.S. Hwy 70 and U.S. Hwy 80 between the AZ-CA State line and Mesa, AZ; AZ Hwy 87 between Mesa and Picacho, AZ; AZ Hwy 84 between Gila Bend and Tucson, AZ; U.S. Hwy 89 between Tucson and Nogales, AZ; U.S. Hwy 80 between Tucson and Douglas, AZ; U.S. Hwy 66 between the AZ-CA State line and the AZ-NM State line; U.S. Hwy 89 and Alternate U.S. Hwy 89 between Wickenburg and Clarkdale, AZ; and AZ Hwy 287 between its junction with AZ Hwy 87 and Florence, AZ; and *Empty cement containers*, from the above-specified destination points to points in Los Angeles, Orange, Kern, San Bernardino, Riverside, and Imperial Counties, CA. *Box-shook* and *empty produce and vegetable crates*, from points in Los Angeles, CA, to points in AZ, except those located on and within 1 mile from the described portions of the above-specified highways, with no transportation for compensation on return except as otherwise authorized. *Feeds and fertilizer*, except liquids in bulk, from points in Los Angeles, Orange, Kern, San Bernardino and Riverside Counties, CA, (except Blythe, CA), to points in AZ, with no transportation for compensation on return except as otherwise authorized. *Fertilizer*, in bags, from San Diego, CA, to points in AZ, with no transportation for compensation on return except as otherwise authorized. *Potting soil* (except in bulk), *pesticides* (except in bulk) and *pottery*, in mixed loads with feeds and fertilizers, from points in Los Angeles, Orange, Kern, San Bernardino, and Riverside Counties, CA, (except Blythe, CA), to points in AZ, with no transportation for compensation on return except as otherwise authorized. *Fertilizer*, in bulk, from points in San Diego County, CA, to points in AZ, with no transportation for compensation on return except as otherwise authorized. Transferee holds authority to transport: *Dry manufactured fertilizer*, in bulk, from points in that part of CA lying in and south of San Luis Obispo, Kern, and San Bernardino Counties, CA, to points in AZ, with no transportation for compensation on return except as otherwise authorized. From points in Fresno County, CA, to points in AZ, with no transportation for compensation on return except as otherwise authorized. From points in Imperial County, CA, to San Diego, CA, and points in the Los Angeles Harbor, CA, Commerical Zone, as defined by the Commission, with no transportation for compensation on return except as otherwise authorized. From points in Yuma County, AZ, to points in Imperial County, CA, with no transportation for compensation on return except as otherwise authorized. *Aggregates* used in the manufacture of concrete and concrete products, between points in that part of CA lying in and south of San Luis Obispo, Kern, and Inyo Counties, CA, and points in AZ. *Aggregates* (except cement and pozzolan), from points in Inyo, Mono, San Bernardino, Ventura, and Riverside Counties, CA, to points in Nyé and Clark Counties, NE, with no transportation for compensation on return except as otherwise authorized. *Aggregates* (except cement and pozzolan), in bulk, from Las Vegas, NE, to points in Riverside, San Bernardino, San Diego, Ventura, Mono, and Inyo Counties, CA, with no transportation for compensation on return except as otherwise authorized. *Potash*, in bulk, from Trona, CA, to points in AZ, with no transportation for compensation on return except as otherwise authorized. Application has not been filed for temporary authority under section 210a(b) of the act.

MC-F-13716F. Transferee: S & C Transport Company, Inc., 1020 Sunshine Road, Kansas City, KS 66115. Transferor: Midwest Transport, Inc., 65 State Street (SH), Hutchinson, KS 67505 Representative: D. S. Hults, P.O. Box 225, Lawrence, KS 66044. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in Certificate No. MC 141912, issued October 1, 1976; Sub Nos. 1,2,3,4,5, issued October 1, 1976; Sub No. 7, issued December 9, 1977; and Sub No. 8, issued February 13, 1978, respectively, as follows: *Canned goods*, as a common carrier over irregular routes from Nebraska City and Plattsmouth, NE, to points in KS (except Wichita) on and east of KS Hwy. 14, with no transportation for compensation on return except as otherwise authorized; From Hutchinson and Wichita, KS, to Ada, Tulsa, Blackwell, Enid, Sapulpa, and Oklahoma City, OK; and, from Hutchinson, KS, to Lincoln, Superior, and Omaha, NE; and, *salt*, from Hutchinson, Lyons, and Kanopolis, KS, to points in OK, and points in that part of CO on and east of a line beginning at the WY-CO State line, and thence extending along U.S. Hwy 85 to junction unnumbered Hwy near Larkspur, CO, thence along unnumbered hwy. to junction CO Hwy. 105 at or near Palmer Lake, CO, thence along CO Hwy 105 via Monument, CO, to junction U.S. Hwy 85, thence along U.S. Hwy 85, to junction CO Hwy 165 near Crow, CO, thence along CO Hwy 165 to junction unnumbered Hwy at or near Crow, CO, thence along unnumbered Hwy to junction U.S. Hwy 85, thence along U.S. Hwy 85 to junction unnumbered hwy. (formerly portion U.S. Hwy 85), thence along unnumbered highway through Aguilar, CO, to junction U.S. Hwy 85, and thence along U.S. Hwy 85 to the CO-NM State line, with no transportation for compensation on return except as otherwise authorized. From South Hutchinson, KS, to points in NE and OK, and in that part of CO as specified immediately above, with no transportation for compensation on return except as otherwise authorized. From Hutchinson, KS, to points in NE, with no transportation for compensation on return except as otherwise authorized. From Hutchinson, South Hutchinson, and Lyons, KS, and points within one mile of each, to points in MN, ND, SD, and WY, with no transportation for compensation on return except as otherwise authorized. From Hutchinson and Lyons, KS, to points in AR, and points in Cochran, Bailey, Randall, Roberts, Crosby, Swisher, Potter, Sherman, Wichita, Lubbock, Castro, Oldham, Dallam, Cottle, Hall, Gray, Ochiltree, Yoakum, Dickens, Briscoe, Carson, Hansford, Floyd, Collingsworth, Hartley, Foard, Kent, Terry, Motely, Childress, Wheeler, Lipscomb, Lamb, Armstrong, Hutchinson, Wilbarger, Lynn, Hale, Donley, Moore, Hockley, Parmer, Deaf Smith, Hemphill, Hardeman, and Garza Counties, TX, and points in Curry, Bernalillo, Mora, Santa Fe, Colfax, Harding, Los Alamos, Taos, Quay, Guadalupe, Union, San Miguel, Torrance, and Rio Arriba Counties, NM, with no transportation for compensation on return except as otherwise authorized. *Grain*, from points in MN, ND, SD, and WY, to points in KS, with no transportation for compensation on return except as otherwise authorized. *Pepper*, in packages, in mixed shipments with salt, from Hutchinson, KS, to points in MN, AR, NE, OK, ND, SD, WY, points in that part of CO on and east of U.S. Hwy 85, points in Curry, Bernalillo, Mora, Santa Fe, Colfax, Harding, Los Alamos, Taos, Quay, Guadalupe, Union, San Miguel, Torrance, and Rio Arriba Counties, NM, and points in Cochran, Bailey, Randall, Roberts, Crosby, Swisher, Potter, Sherman, Wichita, Lubbock, Castro, Oldham, Dallas, Cottle, Hall, Gray, Ochiltree, Yoakum, Dickens, Briscoe, Carson, Hansford, Floyd, Collingsworth, Hartley, Foard, Terry, Motley, Childress, Wheeler, Lipscomb, Lamb, Armstrong, Hutchinson, Wilbarger, Lynn, Hale, Donley, Moore, Hockley, Parmer, Deaf Smith, Hemphill, Hardeman, Garza and Kent Counties, TX; and *empty containers or other such incidental facilities used transporting the above-specified commodity*, from the above specified destination territory to Hutchinson, KS. *Flour*, in sacks, from Hutchinson, KS, to Alva, Chickasha, Clinton, Duncan, Durant, Edmond, Lawton, Muskogee, and Oklahoma City, OK, with no transportation for compensation on return except as otherwise authorized. *Glass containers*, from Okmulgee and Muskogee, OK, to Hutchinson, KS, with no transportation for compensation on return except as otherwise authorized. *Products* used in the agricultural, water treatment, food processing, wholesale grocery, and institutional supply industries when shipped in mixed shipments with salt or salt products otherwise authorized, From points in the Hutchinson-South Hutchinson, KS, Commercial Zone as defied by the Commission, to points in MN, AR, NE, OK, ND, SD, and WY, points in that part of CO on and east of U.S. Hwy 85, points in Curry, Bernalillo, Mora, Santa Fe, Colfax, Harding, Los Alamos, Taos, Quay, Guadalupe, Union, San Miguel, Torrance, and Rio Arriba Counties, NM, and those in Cochran, Bailey, Randall, Roberts, Crosby, Swisher, Potter, Sherman, Wichita, Lubbock, Castro, Oldham, Dallas, Cottle, Hall, Gray, Ochiltree, Yoakum, Dickens, Briscoe, Carson, Hansford, Floyd, Collingsworth, Hartley, Foard, Terry, Motley, Childress, Wheeler, Lipscomb, Lamb, Armstrong, Hutchinson, Wilbarger, Lynn, Hale, Conley, Moore, Hockley, Parmer, Deaf Smith, Hemphill, Hardeman, Garza, and Kent Counties, TX, with no transportation for compensation on return except as otherwise authorized. *Foodstuffs*, not frozen, except dairy products, from the plantsite and storage facilities of Western Food Products Company, Inc., at or near Hutchinson, KS, to points in CO (except Denver), MO, NE, ND, and SD, with no transportation for compensation on return except as otherwise authorized. Restriction: The operations authorized immediately above are restricted to the transportation of shipments originating at the above-named origin points and destined to the above-named destination points. *Foodstuffs*, not frozen, except fresh meats and dairy products, from Hutchinson, KS, to points in AR, OK, and TX, with no transportation for compensation on return except as otherwise authorized. Restriction: The operations authorized under the three commodity descriptions next-above are restricted against the transportation of commodities in bulk. *Glass, glass containers*, and *glassware*, from Okmulgee and Muskogee, OK, to the plantsite and storage facilities of Western Food Products Company, Inc., at or near Hutchinson, KS, and the plantsite and storage facilities of Wichita Cider and Vinegar Works at or near Wichita, KS, with no transportation for compensation on return except as otherwise authorized. Restriction: The operations authorized immediately above are restricted to the transportation of shipments originating at the above-named origin points and destined to the above-named destination points. *Glass containers*, from the plantsite and storage facilities of Midland Glass Co., Inc., located at or near Henryetta, OK, to points in AR, CO, IL, IA, KS, LA, MN, MS, MO, NE, NM, ND, SD, TN, TX, WI, and WY, with no transportation for compensation on return except as otherwise authorized. *Paper and paper products*, from the facilities of Fort Howard Paper Co. at or near Muskogee, OK, to points in AR, CO, KS, LA, MO, NE, NM, OK, and TX; and, *equipment, materials and supplies* used in the manufacture and distribution of these commodities (except commodities in bulk, or those which because of size or weight require the use of special equipment), from the destinations named directly above to the facilities of Fort Howard Paper Co. at or near Muskogee, OK. Restriction: The authority granted herein is subject to the following restrictions: The authority granted in part (1) above is restricted to the transportation of shipments originating at the named origin. The authority granted in part (2) above is restricted to the transportation of shipments destined to the indicated destination. Vendee is authorized to operate as a common carrier in KS, OK, NB, MO, & CO. Application has been filed for temporary authority under section 210a(b).

MC 13734F. Authority sought for purchase by Cowen Truck Line, Inc., Rt. 2, Perrysville, OH 44864, a portion of the operating rights of Jesco Motor Express, Inc., 162 Columbus Road, Mt. Vernon, OH 43050, and for acquisition by Robert H. Cowen and LaVone F. Cowen (same address as transferee), in control of Cowen Truck Line, Inc., for control of the rights through purchase. Applicant's representative: Boyd B. Ferris, Muldoon, Pemberton & Ferris, 50 West Broad Street, Columbus, OH 43215. Operating rights sought to be purchased: (1) Under Permit No. MC-17211 (Sub-5), plumbing fixtures and supplies, from Perrysville, OH, and points in Ripley Township, Holmes County, OH, to Points in DE, IL, IN, IA, KY, MD, MI, MO, MN, NJ, NY, PA, TN, VA, WV, WI, and DC; and materials used in the manufacturing of plumbing fixtures and supplies from the above-specified destination points to Perrysville, OH, and points in Ripley Township, Holmes County, OH; (2) Under Permit No. MC-17211 (Sub-9), plumbing fixtures and supplies, from Perrysville, OH, and points in Ripley Township, Holmes County, OH, to points in CT, ME, MA, NH, RI, and VT; and materials used in the manufacture of plumbing fixtures and supplies, from the above-specified destination points, to Perrysville, OH, and points in Ripley Township, Holmes County, OH; and (3) Under Permit No. MC-17211 (Sub-12), plumbing fixtures and supplies (except commodities in bulk), from Perrysville, OH, and points in Ripley Township, Holmes County, OH, to points in AL, FL, GA, NC, and SC; and materials used in the manufacture of plumbing fixtures and supplies (except commodities in bulk), from points in AL, FL, GA, NC, and SC, to Perrysville, OH, and points in Ripley Township, Holmes County, OH. All of the above authority is restricted to a transportation service to be performed, under a continuing contract, or contracts, with Mansfield Sanitary, Inc. of Perrysville, OH. Approval of the transaction will not result in (a) dual operations; (b) splitting of operating authority; or (c) duplicating authority. Vendee is authorized to operate as a contract carrier in IL, OH, MS. Application has been filed for temporary authority under section 210a(b) of the Act. (Hearing sites: Columbus, OH or Washington, DC.)

MC-F-13735F. Authority sought for purchase by HYMAN FREIGHTWAYS, INC., 1745 University Avenue, St. Paul, MN 55104, of the operating rights of Blackwood's Motor Service, Inc., 319 Pearl St., Montgomery IL 60538, and for acquisition by Eugene Pikovsky, 1745 University Avenue, St. Paul, MN 55104, of control of such rights through the transaction. Applicants' representative: Donald A. Morken, 1000 First National Bank Building, Minneapolis, MN 55402

V 43/194 OCT 5 78

and Robert H. Levy, 29 South LaSalle Street, Chicago, IL 60603. Operating rights sought to be transferred: Under a certificate of registration in MC-85454 (Sub-1) issued September 22, 1966, as follows: "Commodities general within a fifty (50) mile radius of 848 Charles Street, Aurora, IL, and to transport such property to or from any point outside of such authorized area of operation for a shipper or shippers within such area." Transferee holds extensive regular route authority from this Commission to transport general commodities, over regular route, between Chicago and Minneapolis-St. Paul, MN, and from Minneapolis-St. Paul to points in IA, MN, MO, NE, ND, SD, and the Province of Manitoba, Canada. Application has been filed for temporary authority under section 210a(b). (Hearing site: Chicago, IL.)

NOTE.—MC 108835 (Sub-45F) is a directly related matter.

MC-F-13736F. Authority sought for purchase by HEMINGWAY TRANSPORT, INC., 438 Dartmouth Street, New Bedford, MA 02740 of the operating rights of Johnstown-Pittsburgh Express, Inc., 859 Progress Street, Pittsburgh, PA 15212. Attorneys: Francis W. McInerny, 1000 16th Street NW., Washington, DC 20036, and Arthur J. Diskin, 806 Frick Building, Pittsburgh, PA 15219. Operating rights sought to be purchased are set forth in Certificates MC-116506 and MC-116506 (Sub-2 and 4) and authorize the following: (A) Regular routes, *general commodities*, except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment, between Pittsburgh, PA, and Johnstown, PA, serving intermediate points and off-route points within 10 miles of Johnstown; (B) irregular routes, *general commodities*, except those of unusal value, classes A and B explosives, livestock, household goods as defined by the Commission, commodities in bulk, commodities requiring special equipment, and those injurious or contaminating to other lading, from Johnstown, PA, to points in Pennsylvania within 45 miles of Johnstown, with no transportation for compensation on return except as otherwise authorized, *petroleum products*, from Baltimore, MD, to Johnston, PA; and *empty petroleum product containers*, from Johnstown, PA, to Baltimore, MD, and (C) alternate routes for operating convenience only: *general commodities*, except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment, between junction U.S. Hwy 22 and PA Hwy 403, and Cresson, PA, in connection with carrier's authorized regular route operations, serving no intermediate points and serving the termini for purpose of joinder only, and between junction U.S. Hwys 22 and 219, and Johnstown, PA, in connection with carrier's authorized regular route operations, serving no intermediate points and serving the junction of U.S. Hwys 22 and 219 for purpose of joinder only. Vendee is a common carrier by motor vehicle authorized to conduct operations, pursuant to certificate No. 30204 and sub numbers thereunder, in the States of CT, DE, DC, ME, MD, MA, NH, NJ, NY, PA, RI, VT, VA, and WV, and the province of PQ, Canada. Application has been filed for temporary authority under section 210a(b) of the act.

MC-F—13742F. Authority sought for control by TRANSPORTATION CONSULTANTS, INC., P.O. Box 487, 5950 Fisher Road, East Syracuse, NY 13057 of operating authority of De Witt Transportation Corp., P.O. Box 487, 5950 Fisher Road, East Syracuse, NY 13057 through acquisition of the stock of De Witt Transportation Corp. and control of such rights by Frederic J. Durkin and John C. Durkin, Jr., through the acquisition. Applicant's representatives: Martin Werner, Esq. and Michael R. Werner, Esq. P.O. Box 1409, 167 Fairfield Road, Fairfield, NJ 07006. Motor *contract carrier* operating rights sought to be controlled: under MC-145029F (Pending). Irregular routes, *color cathode ray tubes, television sets, and materials, equipment, and supplies used in the manufacture and distribution of television sets*, between Syracuse, NY and Portsmouth, VA, under continuing contract(s) with General Television of America, Inc. of Syracuse, NY. Transportation Consultants, Inc. holds no authority from this Commission. However, it is in control of the following contract carriers: Food Haul, Inc. is authorized to operate as a contract carrier in AK, FL, GA, IL, IN, KY, MD, MI, MO, NC, OH, PA, SC, TN, TX, VA, and WV; J.C.D. Transportation Corp. is authorized to operate as a contract carrier in CT, MA, NY, and PA; Fleetwood Transportation Corp. is authorized to operate as a contract carrier in PA, NY, NJ, MD, DE, DC, VA, WV, CT, MA, RI, MI, OH, KY, and IN; Fairfield Transportation Corp. is authorized to operate as a contract carrier in NY, CT, MA, NJ, and PA; Barr Transportation Corp. is authorized to operate as a contract carrier in MA, CT, NH, MD, PA, NY, RI, VT, NJ, DE, OH, WV, and DC. Application has not been filed for temporary authority under section 210a(b).

NOTE.—This application is directly related to the pending proceeding in Docket No. MC-145029F, FEDERAL REGISTER date August 22, 1978.

MC-F-13743F. Authority sought for purchase by DAN GAICH TRUCKING, INC., P.O. Box 452, Rillton, PA 15678, of the operating rights of Irene H. Brindle and Florence B. Padule, d.b.a. Ralph L. Brindle Motor Freight, of 1105 Lakeview Drive, Latrobe, PA, and for acquisition of control of such rights by Dan Gaich, P.O. Box 452, Rillton, PA 15678, through the purchase. Representative: Jerome Solomon, 3131 United States Steel Building, Pittsburgh, PA 15219. Operating rights to be transfered are as a *common carrier* over regular routes general commodities (with the usual exception) between Latrobe, PA, and Pittsburgh, PA, serving the intermediate point of Greensburg, PA. Vendee is authorized to operate as a common carrier within PA. Application has been filed for temporary authority under section 210a(b). (Hearing site: Pittsburgh, PA).

MC-F-13745F. Authority sought for purchase by R-W SERVICE, INC., 20225 Goddard Road, Taylor, MI 48180, of a portion of the operating rights of KEY LINE FREIGHT, INC., 15 Andre Street SE., Grand Rapids, MI 49507, and for acquisition by McLouth Steel Corp., 300 South Livernois, Detroit, MI 48209, of control of such rights through the transaction. Applicants' representative: Martin J. Leavitt, 22375 Haggerty Road, P.O. Box 400, Northville, MI 48167. Operating rights sought to be purchased: *Iron and steel products*, as a *common carrier* over irregular routes between Gibralter, MI, on the one hand, and, on the others, Evansville and Vincennes, IN, points in IN on and north of U.S. Hwy 40, those in IL on and north of a line beginning at the IN-IL State line and extending along U.S. Hwy 36 to Springfield, IL, then along IL Hwy 124 to junction U.S. Hwy 67, then along U.S. Hwy 67 to junction IL Hwy 103, then along IL Hwy 103 to junction U.S. Hwy 24 to the IL-MO State line, and those in WI on and south of a line beginning at the MN-WI State line and extending along U.S. Hwy 12 to junction WI Hwy 29, then along WI Hwy 29 to Green Bay, WI, and then along U.S. Hwy 141 to Manitowoc, WI. Vendee is authorized to operate as a common carrier in OH, MI, IN, IL, WI, IA, MO, PA, and WV. Application has been filed for temporary authority under section 210a(b).

MC-F-13747F. Authority sought for purchase by IDEAL TRUCK LINE, INC., P.O. Box 330, Norton, KS 67654, of a portion of the operating rights of G & H Truck Line, Inc., 3930 Blake Street, Denver, CO 80205, and for acquisition by R. E. Blickenstaff (same address as applicant), of control of such rights through the transaction. Applicant's attorney: Donald L. Stern, Suite 610, 7171 Mercy Road, Omaha, NE 68106. Operating rights to be purchased: *General commodities*, except those of unusual value, high explosives, livestock, household goods as defined by the Commission, commodities in bulk, and those injurious or contaminating to other lading, as a *common carrier*, over regular routes, between Denver, CO and Pueblo, CO, serving the intermediate point of Colorado Springs, CO: from Denver over U.S. Hwy 85 to Pueblo, and return over the same route. (Hearing site: Denver, CO.)

NOTE.—Vendee is authorized to conduct operations in IA, KS, MO, NE and CO. No dual operations involved. Application has been filed for temporary authority under section 210a(b).

MC-F-13748F. Authority sought for purchase by KSS TRANSPORTATION CORP., P.O. Box 3052, North Brunswick, NJ 08902, of the operating rights of K.N.K. Transco, Inc., 930 South Grand Street, P.O. Box 1433, Spencer, IA 51301. Applicant's attorney: Daniel C. Sullivan, esq., Suite 1600, 10 South LaSalle Street, Chicago, IL 60603. Operating rights sought to be purchased: (1) *Meats, meat products, meat byproducts, and articles* distributed by meat packinghouses, as described in sections A and C of Appendix I to the report in Descriptions in Motor Carrier Certificates, 61 MCC 209 and 766 (except hides and commodities in bulk), as a *common carrier* over irregular routes, from the facilities used by Hygrade Food Products Corp., located at or near Storm Lake and Cherokee, IA, to points in CT, DE, MD, MA, NJ, NY, PA, RI, and VA. Restriction: The authority granted herein is restricted to the transportation of traffic originating at the named origin facilities, and destined to points within the named destination states; (2) *meats, meat products, and meat byproducts, dairy products, and articles* distributed by meat packinghouses, as described in sections A, B, and C of Appendix I to the report in Descriptions in Motor Carrier Certificates, 61 MCC 209 and 766, except hides and commodities in bulk, as a *common carrier* over irregular routes, from the plantsites and storage facilities of Spencer Foods, Inc., located at/or near Spencer, Hartley, and Cherokee, IA; Sioux Falls, SD; and Schuyler, NE, to points in CT DE, ME, MD, MA, NH, NJ, NY, PA, RI, VT, VA, WV, and DC, with no transportation for compensation on return, except as other wise authorized. Restriction: The authority granted herein is restricted to traffic originating at the above-named plantsites and storage facilities and destined to the above-named destinations; (3) *meats, meat products, and meat byproducts, and articles* distributed by meat packinghouses, as described in sections A and C of Appendix I to the report in descriptions in Motor Carrier Certificates, 61 MCC 209 and 766, (except hides and commodities in bulk), as a *common carrier* over irregular routes, from the plantsite and storage facilities utilized by Wilson-Sinclair Co. at Albert Lea, MN, to points in PA, NY, MD, DE, NJ, CT, RI, MA, VT, NH, ME, and DC, with no transportation for compensation on return except as otherwise authorized. Restriction: The operations authorized herein are restricted to the transportation of traffic originating at the plantsite or storage facilities utilized by Wilson-Sinclair Co. at Albert Lea, MN and destined to the above-named destination points; (4) *meats, meat products, and meat byproducts, and articles* distributed by meat packinghouses (except hides and commodities in bulk), as described in sections A and C of Appendix I to the report in Descriptions in Motor Carrier Certificates, 61 MCC 209 and 766, as a *common carrier* over irregular routes, from the plantsites and storage facilities of Wilson-Sinclair Co. at Cedar Rapids, IA, to points in PA, NY, MD, DE, NJ, CT, RI, MA, VT, NH, ME, and DC, with no transportation for compensation on return, except as otherwise authorized. Restriction: The operations authorized herein are restricted to the transportation of traffic originating at the above-named origin points and destined to the above-named destination points; (5) *meats, meat products, and meat byproducts, and articles* distributed by meat packinghouses, as described in sections A and C of Appendix I to the report in Descriptions in Motor Carrier Certificates, 61 MCC 209 and 766, (except hides and commodities in bulk or commodities in bulk in tank vehicles, as a *common carrier over* irregular routes, from the plantsite and storage facilities of Wilson Certified Foods, Inc., at or near Cherokee, IA and Omaha, NE, to points in CT, DE, ME, MD, MA, NH, NJ, NY, PA, RI, VT, VA, WV, and DC, with no transportation for compensation on return, except as otherwise authorized. Restriction: The operations authorized herein are restricted to the transportation of traffic originating at the above-named points and destined to the above-named destinations. Vendee is authorized to operate as a *contract carrier* from Metuchen, North Brunswick, Newark, and Linden, NJ, on the one hand, and, on the other, points in the United States (except AK and HI). Approval of this transaction will result in dual operations. Application has been filed for Temporary Authority under section 210a(b).

MC-F-13749F. Authority sought for purchase by EDSON EXPRESS, INC., 1270 Boston Avenue, Longmont, CO 80501, of a portion of the operating rights of RINGSBY TRUCK LINES, INC., P.O. Box 7240, Denver, CO 80207, and for acquisition by Jack E. Edson, Jack B. Edson, Marjorie J. Edson, and Jeffrey S. Edson, all of 1270 Boston Avenue, Longmont, CO 80501, of control of such rights through the transaction. Applicants' representatives: Richard P. Kissinger, Steele Park, Suite 330, 50 South Steele Street, Denver, CO 80209 and Russell R. Sage, Major, Sage & King, P.O. Box 11278, Alexandria, VA 22312. Operating rights sought to be purchased: A portion of Certificate MC 52709 authorizing the transportation of: *General commodities*, except those of unusual value, livestock, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment, over regular routes, between Fort Collins, CO, and Ault, CO, serving no intermediate points: from Fort Collins, CO over CO Hwy 14 to Ault, CO, and return over the same route; between Greeley, CO and Loveland, CO, serving no intermediate points: from Greeley, CO over U.S. Hwy 34 to Loveland, CO, and return over the same route; between Denver, CO and Cheyenne, WY, serving all intermediate points: from Denver, CO over U.S. Hwy 287 (formerly U.S. Hwy 87), to junction unnumbered highway approximately 2 miles north of Fort Collins, thence over unnumbered highway to junction U.S. Hwy 87, and thence over U.S. Hwy 87 to Cheyenne, WY, and return over the same route. Application has been filed for temporary authority under section 210a(b). Vendee is authorized to operate as a *common carrier* in Colorado.

MC-F-13752F. Authority sought for the continuance of common control and management by Gertrude Meier Watson, Robert S. Meier, Richard A. Meier, Calvin H. Meier and Ruth M. Schoenwetter, 200 West Beltline Highway, Madison, WI 53713 of BADGER COACHES, INC. and of BADGER BUS LINES, INC., both being *common motor carriers* of passengers and their baggage in interstate and intrastate commerce and both of 200 West Beltline Highway, Madison, WI 53713. Applicant's attorney, Adolph J. Bieberstein, 121 West Doty Street, Madison, WI. Operating rights sought to be continued in control: BADGER BUS LINES, INC. is a *motor carrier* authorized under MC 802 to transport passengers and their baggage between Madison, WI and Freeport, IL, serving all intermediate points. BADGER COACHES, INC. is a *common motor carrier* of passengers and their baggage authorized under MC 106120 and Subs 2 and 3 to transport passengers and their baggage between Madison, WI and Milwaukee, WI, serving the intermediate points of Lake Mills, Johnson Creek and Delafield, WI. It is also

V 43/194
OCT 5 1978

authorized to transport passengers and their baggage in special operations between Milwaukee, WI and Wonder Lake, IL and between points in Milwaukee County, WI and points in Cook County, IL. On June 8, 1978, the Commission granted BADGER COACHES, INC. authority to operate in interstate or foreign commerce as a *common carrier* by motor vehicle of passengers and their baggage in charter and special operations in round trip and sightseeing and pleasure tours beginning and ending at points in Dane, Jefferson, Waukesha and Milwaukee Counties, WI and extending to points in the United States, including Alaska, but restricted against the transportation of passengers to and from race tracks. Such grant was conditioned upon the persons engaged in the common control and management of BADGER COACHES, INC. and BADGER BUS LINES, INC. applying for approval thereof of the Interstate Commerce Commission as required by section 5(2) of the Interstate Commerce Act. The instant application is made to comply with that condition. Common control was previously exercised by H. E. Meier, who died on August 14, 1968. The applicants constitute the widow and children of the decedent, H. E. Meier, and are requesting authority to continue such common control.

OPERATING RIGHTS APPLICATION(S) DIRECTLY RELATED TO FINANCE PROCEEDINGS

NOTICE

The following operating rights application(s) are filed in connection with pending finance applications under section 5(2) of the Interstate Commerce Act, or seek tacking and/or gateway elimination in connection with transfer applications under section 212(b) of the Interstate Commerce Act.

An original and two copies of protests to the granting of the authorities must be filed with the Commission within 30 days after the date of this FEDERAL REGISTER notice. Such protests shall comply with Special Rule 247(e) of the Commission's *General Rules of Practice* (49 CFR 1100.247) and include a concise statement of protestant's interest in the proceeding and copies of its conflicting authorities. Verified statements in opposition should not be tendered at this time. A copy of the protest shall be served concurrently upon applicant's representative or applicant if no representative is named.

Each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

MC 108835 (Sub-45F), filed September 13, 1978. Applicant: HYMAN FREIGHTWAYS, INC., 1745 University Avenue, St. Paul, MN 55104. Representative: Donald A. Morken, 1000 First National Bank Building, Minneapolis, MN 55402. Authority sought to operate as a *common carrier* by motor vehicle, over irregular routes, transporting: General commodities (except those of unusual value, class A and B explosives, household goods as defined by the Commission, commodities in bulk, commodities requiring special equipment) (1) between points in IL on and east of a line beginning at the WI-IL boundary, then along IL Hwy 26 to its junction with IL Hwy 71, then along IL Hwy 2 to its junction with IL Hwy 26, then along IL Hwy 71 to its junction with U.S. Hwy 51, then along U.S. Hwy 51 to its junction with IL Hwy 17, then along IL Hwy 17 to its junction with the IL-IN State line, and (2) between points in (1) above, on the one hand, and, on the other, points in IL. (Hearing site: Chicago, IL.)

NOTE.—The purpose of this application is to convert a certificate of registration to a certificate of public convenience and necessity. This matter is directly related to a section 5(2) finance proceeding docketed MC-F-13735F, published in a previous section of this FEDERAL REGISTER issue.

MOTOR CARRIER INTRASTATE APPLICATION(S)

NOTICE

The following application(s) for motor common carrier authority to operate in intrastate commerce seek concurrent motor carrier authorization in interstate or foreign commerce within the limits of the intrastate authority sought, pursuant to section 206(a)(6) of the Interstate Commerce Act. These applications are governed by Special Rule 245 of the Commission's *General Rules of Practice* (49 CFR 1100.245), which provides, among other things, that protests and requests for information concerning the time and place of State Commission hearings or other proceedings, any subsequent changes therein, and any other related matters shall be directed to the State Commission with which the application is filed and shall *not* be addressed to or filed with the Interstate Commerce Commission.

California Docket 58344, filed September 8, 1978. Applicant: PINO FREIGHTWAYS, INC., 125 Piedmont Avenue, San Bruno, CA 94066. Representative: Daniel W. Baker, 100 Pine Street, San Francisco, CA 94111. Certificate of Public Convenience and Necessity sought to operate a freight service, as follows: Transportation of: *General commodities* (except the following): (a) Used household goods and personal effects not packed in accordance with the crated property requirements; (b) livestock; (c) liquids, compressed gases, commodities in semiplastic form and commodities in suspension in liquids in bulk, in tank trucks, tank trailers, tank semi-trailers and a combination of such highway vehicles; (d) commodities when transported in bulk in dump trucks or in hopper-type trucks; (e) commodities when transported in motor vehicles equipped for mechanical mixing in transit; (f) logs; (g) fresh fruits and vegetables; (h) articles of extraordinary value; (i) automobiles, trucks, busses, and trailer coaches and campers. Between all points and places in the San Francisco territory, as described in Note A, and between all points within 10 miles of any point therein. In performing the service, applicant may make use of any and all streets, roads, highways, and bridges necessary or convenient for the performance of the service.

NOTE A

SAN FRANCISCO TERRITORY

San Francisco territory includes all the city of San Jose and that area embraced by the following boundary: Beginning at the point the San Francisco-San Meteo County line meets the Pacific Ocean; thence easterly along said county line to a point 1 mile west of State Highway 82; southerly along an imaginary line 1 mile west of and paralleling State Highway 82 to its intersection with Southern Pacific Co. right-of-way at Arastradero Road; southeasterly along the Southern Pacific Co. right-of-way to Pollard Road, including industries served by the Southern Pacific Co. spur line extending approximately 2 miles southwest from Simla to Permanente; easterly along Pollard Road to West Parr Avenue; easterly along West Parr Avenue to Capri Drive; southerly along Capri Drive to Division Street; easterly along Division Street to the Southern Pacific right-of-way; southerly along the Southern Pacific right-of-way to the Campbell-Los Gatos city limits; easterly along said limits and the prolongation thereof to South Bascom Avenue (formerly San Jose-Los Gatos Road); northeasterly along South Bascom Avenue to Foxworthy Avenue; easterly along Foxworthy Avenue to Almaden Road; southerly along Almaden Road to Hillsdale Avenue; easterly along Hillsdale Avenue to State Highway 82; northwesterly along State Highway 82 to Tully Road; northeasterly along Tully Road and the prolongation thereof to White Road; northwesterly along White Road to McKee Road; southwesterly along McKee Road to Capitol Avenue; northwesterly along Capitol Avenue to State Highway 238 (Oakland Road); northerly along State Highway 238 to Warm Springs; northerly along State Highway 238 (Mission Boulevard) via Mission San Jose and Niles to Hayward; northerly along Foothill Boulevard and MacArthur Boulevard to Seminary Avenue; easterly along Seminary Avenue to Mountain Boulevard; northerly along Mountain Boulevard to Warren Boulevard (State Hwy 13); northerly along Warren Boulevard to Broadway Terrace; westerly along Broadway Terrace to College Avenue; northerly along College Avenue to Dwight Way; easterly along Dwight Way to the Berkeley-Oakland boundary line; northerly along said boundary line to the campus boundary of the University of California; westerly, northerly, and easterly along the campus boundary to Euclid Avenue; northerly along Euclid Avenue to Marin Avenue; westerly along Marin Avenue to Arlington Avenue; northerly along Arlington Avenue to San Pablo Avenue (State Hwy 123); northerly along San Pablo Avenue to and including the city of Richmond to Point Richmond; southerly along an imaginary line from Point Richmond to the San Francisco waterfront at the foot of Market Street; westerly along said waterfront and shoreline to the Pacific Ocean; southerly along the shoreline of the Pacific Ocean to point of beginning. Intrastate, interstate, and foreign commerce authority sought. Hearing: date, time, and place not yet fixed. Requests for procedural information should be addressed to California Public Utilities Commission, California State Building, 350 McAllister Street, San Francisco, CA 94102, and should not be directed to the Interstate Commerce Commission.

Georgia Docket 9186-M, filed May 9, 1978. Applicant: ATLANTA DISPATCH AND DISTRIBUTION, INC., 4779 Fulton Boulevard, Atlanta, GA 30326. Representative: Richard M. Tettelbaum, Suite 375, 3379 Peachtree Road NE., Atlanta, GA 30326. Certificate of Public Convenience and Necessity sought to operate a freight service, over regular routes, as follows: Transportation of: *General commodities*, (1) between Atlanta, GA and Toccoa, GA, serving all intermediate points, from Atlanta over U.S. Hwy 23 to junction U.S. 123 then over U.S. 123 to Toccoa, and return over the same route; (2) between Atlanta, GA and GA-SC State line serving all intermediate points, from Atlanta over I-65 to the GA-SC State line near Lavonia, GA, and return over the same route; (3) between Commerce, GA and Clarkesville, GA, serving all intermediate points, from Commerce over U.S. Hwy 441 to Clarkesville, and return over the same route; (4) between Hartwell, GA and Toccoa, GA, serving all intermediate points, from Hartwell over GA Hwy 77 to junction GA 17, then over GA 17 to Toccoa, and return over the same route; (5) between Atlanta, GA and Cornelia, GA, serving all intermediate points, from Atlanta over I-85 to junction GA Hwy 365, then over GA Hwy 365 to junction U.S. 23, then over U.S. 23 to Cornelia, and return over the same route; (6) between Atlanta, GA, and Gainesville, GA serving all intermediate points, from Atlanta over U.S. Hwy 19 to junction I-285 at Sandy Springs, GA, then over I-285 to junction GA Hwy 400, then over GA Hwy 400 to junction GA Hwy 141, then over GA Hwy 141 to U.S. Hwy 19, then over U.S. Hwy 19 to junction GA Hwy 369, then over GA Hwy 369 to Gainesville, and return over the same route; (7) between Sandy Springs, GA and Ducktown, GA, serving all intermediate points, from Sandy Springs over U.S. Hwy 19 to junction GA Hwy 20, then over GA Hwy 20 to Ducktown, GA, and return over the same route; (8) between Buford, GA and Cumming, GA, serving all intermediate points, from Buford over GA Hwy 20 to Cumming, and return over the same route; (9) between Jefferson, GA and Gainesville, GA, serving all intermediate points, from Jefferson over U.S. Hwy 129 to Gainesville, and return over the same route; (10) between Commerce, GA and Jefferson, GA, for operating convenience only, from Commerce over GA Hwy 15 to Jefferson, and return over the same route, serving no intermediate points; with the right to serve points in Hart, Franklin, Banks, Jackson, Stephens, Habersham, Rabun, White, and Hall Counties, as off-route points in connection with routes (1) through (9) above; also for corresponding authority to engage in interstate and foreign commerce within the limits of the intrastate authority granted, pursuant to section 206(a)(6) of the Interstate Commerce Act, as amended October 15, 1962. Intrastate, interstate, and foreign commerce authority sought. Hearing: October 24, 1978, at the Georgia Public Service Commission, Commissioner's Hearing Room, 177 State Office Building, 244 Washington Street SW., Atlanta, GA. Requests for procedural information should be addressed to Georgia Public Service Commission, 162 State Office Building, 244 Washington Street SW., Atlanta, GA 30334, and should not be directed to the Interstate Commerce Comission.

Tennessee Docket MC 933 (Sub-3), filed September 18, 1978. Applicant: MOUNT PLEASANT TRANSFER, INC., P.O. Box 267, Mount Pleasant, TN 38474. Representative: Stephen L. Edwards, 806 Nashville Bank and Truck Building, Nashville, TN 37201. Certificate of Public Convenience and Necessity sought to operate a freight service, as follows: Transportation of: *General commodities* (except class A and B explosives, household goods as defined by the Commission, commodities in bulk and commodities requiring special equipment or handling), (1) between all points in Maury County, TN, on the one hand, and, on the other, Nashville, TN, over U.S. Hwy 31 with alternate use of Intersate 65 for convenience, with closed doors between Maury County, TN, and Nashville, TN, and (2) between all points in Maury County, TN, on the one hand, and, on the other, Chattanooga, TN, over State Rte. 50 from Maury County, TN, to junction of U.S. Hwy 431; thence over U.S. Hwy 431 to junction of U.S. Hwy 64; thence over U.S. Hwy 64 to junction of Interstate 24; thence over Interstate 24 to junction of State Rte. 28; thence over State Rte. 28 to the junction of U.S. Hwys 41, 64, and 72; thence over U.S. Hwys 41, 64, and 72 to junction of Interstate 24; thence over Interstate 24 to Chattanooga, TN, and return over same route; with closed doors between Maury County, TN, and Chattanooga, TN; and co-extensive authority in interstate and foreign commerce pursuant to section 206(a)(6) of the Interstate Commerce Act; restricted against through service between Nashville, TN, and Chattanooga, TN. Intrastate, interstate, and foreign commerce authority sought. Hearing: October 13, 1978, at 9:30 a.m., C1-110 Cordell Hull Building, Nashville, TN. Requests for procedural information should be addressed to Tennessee Public Service Commission, C1-102 Cordell Hull Building, Nashville, TN 37219, and should not be directed to the Interstate Commerce Commission.

By the Commission.

H. G. HOMME, Jr.,
Acting Secretary.

[Notice No. 725]

ASSIGNMENT OF HEARINGS

OCTOBER 2, 1978.

Cases assigned for hearing, postponement, cancellation or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of can-

V 43 / 194 OCT 5 1978

cellation or postponements of hearings in which they are interested.

No. 36867, Nevada Power Co. v. Union Pacific Railroad Co., et al., now assigned for hearing on October 10, 1978, at Las Vegas, Nev., is postponed to October 30, 1978 (4 days), at Las Vegas, Nev., in a hearing room to be later designated.

No. 36874, Notice of Intent to File Divisions Complaint by Long Island Rail Road Co., now being assigned for continued prehearing conference on October 12, 1978, at the Offices of the Interstate Commerce Commission, Washington, D.C.

No. MC 59531 (Sub-107F), Auto Convoy Co., now assigned for hearing on October 10, 1978, at Denver, Colo., is postponed indefinitely.

No. MC-F-13434, Central Transfer Co.—Purchase (Portion)—Robert Emanuel and Margaret Emanuel and Margaret Emanuel d.b.a. Emanuel's Express and No. MC 1403 (Sub-No. 4), now being assigned for continued hearing on October 4, 1978 (3 days), at Philadelphia, Pa., Room 2609, Courthouse, 600 Market Street.

H. G. HOMME, JR.,
Acting Secretary.

[Disaster Decision No. 14; Sub-No. 1]

SOUTHERN PACIFIC TRANSPORTATION CO. AND NORTHWESTERN PACIFIC RAILROAD CO.

Decided October 2, 1978.

An application has been filed jointly by the Southern Pacific Transportation Co. (SP) and the Northwestern Pacific Railroad Co. (NWP) seeking authority under section 22 of the Interstate Commerce Act to publish allowances in order to provide reduced rates for persons who would normally ship via the NWP and AMR but who cannot do so because of a fire in a tunnel on the NWP at mileage post 195 near Island Mountain, Calif.

It is ordered: The applicant carriers are authorized to publish and file allowances to afford reduced rates under section 22 of the Interstate Commerce Act in the manner prescribed in section 6 upon not less than one day's notice and authority to publish in blanket supplements with relief from Rule 9(e) of Tariff Circular 20 [49 CFR 1300.9] to publish in a separate non-counting supplement, all the authority granted herein to expire with December 12, 1978.

The class of persons entitled to such allowances are shippers or receivers via the NWP and the AMR who, because of the fire in the tunnel, assume the cost of transporting freight by highway to or from the SP stations Girvan and Anderson, Calif.

During the period in which any reduced rates authorized by this order are effective the carriers may, notwithstanding the provisions of section 4 of the Interstate Commerce Act, maintain higher rates to directly intermediate points and maintain through rates in excess of the aggregate of intermediate rates over the same routes if one or more of the factors of such aggregate of intermediate rates is a reduced rate established under authority of this order.

Any tariffs or tariff provisions published under this authority shall make reference to this decision by number and date.

Notice to the affected railroads and the general public shall be given by depositing a copy of this decision in the Office of the Acting Secretary of the Commission and by filing a copy with the Director, Office of the Federal Register. Copies will be mailed to the Chairman of the Traffic Executive Association—Eastern Railroads, New York, N.Y.; the Chairman of the Southern Freight Association, Atlanta, Ga.; the Chairman of the Executive Committee, Western Railroad Traffic Association, Chicago, Ill., and the Vice-President, Economics and Finance Department of the Association of American Railroads, Washington, D.C.

By the Commission, Betty Jo Christian, Vice Chairman.

H. G. HOMME, JR.,
Acting Secretary.

[Finance Docket No. 28862]

WILLAMINA AND GRAND RONDE RAILROAD CO.

Acquisition and Operation

Willamina and Grand Ronde Railroad Co., P.O. Box 5724, San Bernardino, CA, represented by Mr. David P. Root, P.O. Box 5724, San Bernardino, CA, hereby give notice that on the 25th day of September, 1978, it filed with the Interstate Commerce Commission at Washington, DC an application under section 1(18) of the Interstate Commerce Act for a decision approving and authorizing the acquisition and operation of a line of railroad owned by the Longview, Portland and Northern Railway Co. extending westward from the Southern Pacific transportation Co. interchange trackage in Willamina, OR to the end of trackage at Grand Ronde, OR, a distance of 9.89 miles in Polk and Yamhill Counties, OR, which application is assigned Finance Docket No. 28862.

In the opinion of the applicant, the granting of the authority sought will not constitute a major Federal action significantly affecting the quality of he human environment within the meaning of the National Environmental Policy Act of 1969. In accordance with the Commission's regulations (49 CFR 1108.8) in Ex Parte No. 55 (Sub-No. 4), *Implementation—National Environmental Policy Act, 1969*, 352 I.C.C. 451(1976), any protests may include a statement indicating the presence or absence of any effect of the requested Commission action on the quality of the human environment. If any such effect is alleged to be present, the statement shall indicate with specific data the exact nature and degree of the anticipated impact. *See Implementation—National Environmental Policy Act, 1969*, supra, at p. 487.

Pursuant to the provisions of the Interstate Commerce Act, as amended, the proceeding will be handled without public hearings unless comments in support or opposition on such application are filed with the Secretary, Interstate Commerce Commission, 12th and Constitution Avenue NW., Washingon, D.C. 20423, and the aforementioned counsel for applicant, within 30 days after date of first publication in a newspaper of general circulation. Any interested person is entitled to recommend to the Commission that it approve, disapprove, or take any other specified action with respect to such applicaion.

H. G. HOMME, JR.,
Acting Secretary.

[Notice No. 111]

MOTOR CARRIER BOARD TRANSFER PROCEEDINGS

The following publications include motor carrier, water carrier, broker, and freight forwarder transfer applications filed under section 212(b), 206(a), 211, 312(b), and 410(g) of the Interstate Commerce Act.

Each application (except as otherwise specifically noted) contains a statement by applicants that there will be no significant effect on the quality of the human environment resulting from approval of the application.

Protests against approval of the application, which may include a request for oral hearing, must be filed with the Commission by November 6, 1978. Failure seasonably to file a protest will be construed as a waiver of opposition and participation in the proceeding. A protest must be served upon applicants' representative(s), or applicants (if no such representative is named), and the protestant must certify that such service has been made.

Unless otherwise specified, the signed original and six copies of the protest shall be filed with the Commission. All protests must specify with

particularity the factual basis, and the section of the act, or the applicable rule governing the proposed transfer which protestant believes would preclude approval of the application. If the protest contains a request for oral hearing, the request shall be supported by an explanation as to why the evidence sought to be presented cannot reasonably be submitted through the use of affidavits.

The operating rights set forth below are in synopses form, but are deemed sufficient to place interested persons on notice of the proposed transfer.

MC-FC-77768, filed July 11, 1978. Transferee: Ralph W. Southers, P.O. Box 988, Staunton, VA 24401. Transferor: W. J. Landes, d.b.a. Landes Garage, P.O. Box 2386, Staunton, VA 24401. Representative: Harry J. Jordan, Esquire, 1000-16th Street, NW., Washington, DC 20036. Authority sought for purchase by transferee of the operating rights of transferor as set forth in Certificate No. MC-124868 issued January 28, 1976, as follows: Wrecked and disabled motor vehicles and replacement vehicles therefor, by use of wrecker equipment only, in truckaway service, over irregular routes; between points in VA; and between points in VA on the one hand, and, on the other, points in DE, GA, MD (except points in the Baltimore, MD, commercial zone, as defined by the Commission), NJ, NY, NC, PA, SC, TN, VT, WV, and DC. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under section 210a(b).

MC-FC-77790, filed July 28, 1978. Transferee: Billie Orton, Memphis, MO 63555. Transferor: Cecil B. McCabe, d.b.a. McCabe Truck Line, Kahoka, MO 63445. Representative: Billie Orton, Memphis, MO 63555. Authority sought for purchase by transferee of the operating rights of transferor as set forth in Permit No. MC-109804 issued June 12, 1962, as follows: Malt beverages, in containers, over irregular routes, from St. Louis, MO to Grinnell, IA; and empty malt-beverage containers, from Grinnell, IA to St. Louis, MO. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under section 210a(b).

MC-FC-77810, filed August 15, 1978. Transferee: FRISELLA GLOBAL MOVING & STORAGE CO., 2517 Adie Road, Maryland Heights (St. Louis County) MO 63043. Transferor: Preslar Moving & Storage, Inc., 3344 Greenwood Boulevard, Maplewood, (St. Louis County) MO 63143. Representative: Donald A. Doheny, Attorney at Law, 2284 Weldon Parkway, St. Louis, MO 63141. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in Certificate No. MC-142902, issued April 6, 1978, as follows: *Household goods*, between St. Charles, MO and points within 50 miles thereof on the one hand, and, on the other, points in IL. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under section 210a(b).

MC-FC-77811, filed August 17, 1978. Transferee: KERMIT CONTRACTORS, INC., 1047 South Poplar (Box 751), Kermit, TX 79745. Transferor: Charles Wright and C. Weldon Wright, a partnership, d.b.a. Charles Wright Lease Work & Construction, South Highway (Drawer V), Kermit, TX 79745. Representative: Robert Scogin, 211 North Oak, P.O. Box 920, Kermit, TX 79745. Authority sought for purchase of the operating rights set forth in Certificate of Registration No. MC-99320 (Sub-1), issued January 7, 1970, as follows: Specified commodities, solely within the State of TX. Transferee presently holds no authority from this Commission. Application has not been filed for section 210a(b) authority.

MC-FC-77812, filed August 15, 1978. Transferee: CARL COLLINS, d.b.a. COLLINS WHOLESALE BUILDING MATERIALS, 4073 Hooker Road, Roseburg, OR 97470. Transferor: Herbert S. Watson, d.b.a. Herb's Trucking, Route 1, Box 225, Myrtle Creek, OR 97457. Representative: Robert R. Hollis, Attorney at Law, 400 Pacific Building, Portland, OR 97204. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in Certificate No. MC-140592 Sub 2 issued June 2, 1978, as follows: Abrasive grit (granulated slag), over irregular routes, from points in Douglas County, OR to points in CA, OR, and WA, with no transportation for compensation on return except as otherwise authorized. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under section 210a(b).

MC-FC-77819, filed August 21, 1978. Transferee: CTC VAN LINES INC., 134-41 Springfield Boulevard, Springfield Gardens, NY. Transferor: Columbus Moving & Shipping Co., Inc., 1029 East 167th Street, Bronx, NY 10459. Representative: Bruce J. Robbins, Esq., Robbins & Newman, 118-21 Queens Boulevard, Forest Hills, NY 11375. Authority sought for purchase of the operating rights set forth in Certificate No. MC-78926, issued November 27, 1972, as follows: Household goods, between New York, NY on the one hand, and, on the other points, in CT, NY, NJ, PA, and MA; between NY, NY on the one hand, and, on the other, points in DE, MD, VA, OH, and DC. Transferee presently holds no authority from this Commission. Application has not been filed for section 210a(b) authority.

MC-FC-77821, filed August 22, 1978. Transferee: EUGENE ALLEN KINCAID, 676A Main Street, Laconia, NH 03246. Transferor: Abraham Dadian, d.b.a. E. J. Pelletier & Son, 676A Main Street, Laconia, NH 03246. Representative: Eugene A. Kincaid, 108 Ridgefield Road, Wilton, CT 06879. Authority sought for purchase by transferee of the operating rights of transferor as set forth in Certificate No. MC-17814 issued November 27, 1974, as follows: Such merchandise as is dealt in by wholesale, retail, and chain grocery and business houses, from railroad and rail sidings in Laconia, NH to Wells River, and White River Junction, VT, with no transportation for compensation on return except as otherwise authorized. Restriction: The service authorized is subject to the condition that shipments transported by said carrier shall be confined to those having an immediately prior movement by railroad in carload lots. (2) Such merchandise as is dealt in by wholesale, retail, and chain grocery stores and food business houses, from Laconia, NH to points in Belknap, Carroll, Grafton, Merrimack, and Strafford Counties, NH, with no transportation for compensation on return except as otherwise authorized. (3) Household goods, between points in Belknap County, NH, on the one hand, and, on the other, points in VT, MA, RI, and CT. (4) Household goods, as defined by the Commission, between points in Belknap County, NH, on the one hand, and, on the other, points in ME and NY. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under section 210a(b).

MC-FC-77830, filed September 18, 1978. Transferee: HOWARD LARRIMORE, INC., Morgner Road, Chestertown, MD 21620. Transferor: Hollon Moving, Inc., Box 166A Earlville, MD 21919. Representative: Chester A. Zyblut, Esquire, 366 Executive Building, Washington, DC 20005. Authority sought for purchase by transferee of the operating rights of transferor as set forth in certificate No. MC-134116 and Sub-1, issued March 30, 1971, as follows: (1) Used household goods, between points in New Castle County, DE, Cecil and Harford Counties, MD, Chester, DE, Lancaster, Montgomery and Philadelphia Counties, PA, and Gloucester, Salem and Cumberland Counties, NJ; and (2) household goods between points in Carolina, Cecil, Dorchester, Kent, Queen Annes, Somerset, Talbot, Wicomico, and Worcester Counties, MD, on the one hand, and,

V 43/194
OCT 5 1978

on the other, points in DE, NJ, Philadelphia, PA, and those points in PA within 50 miles of Philadelphia. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under section 210a(b).

MC-FC-77833, filed August 28, 1978. Transferee: PHILIP K. EMPSON, R.D. No. 1, Ulysses, PA 16948. Transferor: Robert W. Gibson, R.D. No. 1, Ulysses, PA 16948. Representative: Thomas F. X. Foley, Esq., State Hwy 34, Colts Neck, NJ 07722. Authority sought by transferee to acquire all of the authority of transferor in MC-124795 issued July 22, 1977, as follows: *Wood*, from points in McKean, Potter, Cameron, and Tioga Counties, PA, to Niagara Falls, Buffalo, and Rochester, NY, with no transportation for compensation on return except as otherwise authorized. *Fertilizer and lime*, from Niagara Falls, Buffalo, Rochester, and Olean, NY, to points in McKean, Potter, Cameron, and Tioga Counties, PA, with no transportation for compensation on return except as otherwise authorized. Transferee is presently authorized to operate as a carrier under MC-142825. Application has not been filed for temporary authority under section 210a(b).

MC-FC-77839, filed September 5, 1978. Transferee: STORE WIDE DELIVERY CO., INC., 815 Jersey Avenue, Jersey City, NJ 07302. Transferor: A-1st Trucking & Leasing Corp., 311 17th Street, Jersey City, NJ 07302. Representative: Arthur J. Piken, Piken & Piken, Esqs., One Lefrak City Plaza, Flushing, NY 11368. Authority sought for purchase by transferee of a portion of the operating rights of the transferor, as set forth in Permit No. MC-135952 (Sub 4), issued October 5, 1977, as follows: *Such commodities* as are dealt in and used by retail department stores, between the facilities of Caldor, Inc., on the one hand, and, on the other, points in CT, MA, NY, NH, NJ, PA, RI, and VT. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under section 210a(b).

MC-FC-77846, filed September 8, 1978. Transferee: BROOKLYN MOVERS, INC., 4600 Winterlane, Brooklyn, OH 44144. Transferor: Roush & De Nardy Trucking, Inc., d.b.a. Parma Movers, 3584 West 67 Street, Cleveland, OH 44102. Representative: Earl N. Merwin, Attorney at Law, 85 East Gay Street, Columbus, OH 43215. Authority sought for purchase by transferee of a portion of the operating rights of the transferor, as set forth in Certificate No. MC-124714, issued July 25, 1968, as follows: *Household goods*, as defined by the Commission, between points in Cuyahoga County, OH, on the one hand, and, on the other, points in IL, IN, MI, MO, NJ, NY, OH, PA, WV, and DC. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under Section 210a(b).

IRREGULAR-ROUTE MOTOR COMMON CARRIERS OF PROPERTY ELIMINATION OF GATEWAY LETTER NOTICES

September 27, 1978.

The following letter-notices of proposals to eliminate gateways for the purpose of reducing highway congestion, alleviating air and noise pollution, minimizing safety hazards, and conserving fuel have been filed with the Interstate Commerce Commission under the Commission's *Gateway Elimination Rules* (49 CFR 1065), and notice thereof to all interested persons is hereby given as provided in such rules.

An original and two copies of protests against the proposed elimination of any gateway herein described may be filed with the Interstate Commerce Commission on or before October 16, 1978. A copy must also be served upon applicant or its representative. Protests against the elimination of a gateway will not operate to stay commencement of the proposed operation.

Successively filed letter-notices of the same carrier under these rules will be numbered consecutively for convenience in identification. Protests, if any, must refer to such letter-notices by number.

The following applicants seek to operate as a *common carrier*, by motor vehicles, over irregular routes.

MC 32882 (Sub-E25), filed August 29, 1978. Applicant: MITCHELL BROS. TRUCK LINES, P.O. Box 17039, Portland, OR 97217. Representative: Lex F. Page (same as above). *Machinery*, which because of size or weight, requires special equipment which is embraced within the term self-propelled vehicles, weighing 15,000 pounds or more (except motor vehicles as defined in section 203(a)(13) of the Interstate Commerce Act) transported on trailers, between points in Sedgwick County, CO, on the one hand, and, on the other, points in Washoe County, NV, and points in Humboldt County, NV, on and west of U.S. Hwy 95. (Gateways eliminated: Lake County, OR, and points in UT.)

MC 32882 (Sub-E26), filed August 29, 1978. Applicant: MITCHELL BROS. TRUCK LINES, P.O. Box 17039, Portland, OR 97217. Representative: Lex F. Page (same as above). (1) *Machinery* and (2) *contractors' equipment* restricted in (1) and (2) above to those articles embraced by the term self-propelled vehicles, weighing 15,000 pounds or more (except motor vehicles as defined in section 203(a)(13) of the Interstate Commerce Act), transported on trailers, between Lookout Pass, MT, on the one hand, and, on the other, points in Prowers, Brent, Otero, Baca, Kiowa, Los Animas, Cheyenne, and Kit Carson Counties, CO. (Gateways eliminated: points in UT and WA.)

MC 83539 (Sub-E354), filed May 31, 1977. Applicant: C & H TRANSPORTATION CO., INC., P.O. Box 5976, Dallas, TX 75222. Representative: Douglas Anderson (same as above). *Commodities*, the transportation of which, because of their size or weight, require the use of special equipment, and related machinery parts, materials and supplies when moving in connection with such commodities, between points in AR in and west of Boone, Carroll, Madison, and Crawford Counties, on the one hand, and, on the other, points in DC. (Gateways eliminated: Oil City or Braddock, PA, and Philadelphia, PA.)

MC 83539 (Sub-E385), filed May 31, 1977. Applicant: C & H TRANSPORTATION CO., INC., P.O. Box 5976, Dallas, TX 75222. Representative: Douglas Anderson (same as above). *Commodities*, the transportation of which, because of their size or weight, require the use of special equipment and, related machinery, parts, materials, and supplies when moving in connection with such commodities, between points in DC, on the one hand, and, on the other, points in RI. (Gateways eliminated: Philadelphia, PA, and points in PA.)

MC 83539 (Sub-E580), filed May 31, 1977. Applicant: C & H TRANSPORTATION CO., INC., P.O. Box 5976, Dallas, TX 75222. Representative: Douglas Anderson (same as above). *Heavy machinery*, between points in DE, on the one hand, and, on the other, points in VT. (Gateways eliminated: Philadelphia, PA, points in PA, Worcester, MA, and points within 25 miles of Worcester.)

MC 88368 (Sub-E44) (correction), filed May 15, 1974, published in the Federal Register issue of September 4, 1975, and partially republished, as corrected, this issue. Applicant: CARTWRIGHT VAN LINES, INC. 1109 Cartwright Ave., Grandview, MO 64030. Representative: Charles Ephraim, Attorney, Ste. 600, 1250 Connecticut Ave. NW., Washington, DC 20036. *Household goods*, as defined by the Commission, (21) from points in CO to points in AL; (22) from points in CO to points in AR; (23) from points in CO to points in CT; (24) from points in CO to points in DE; (25) from points in CO to points in FL; (26) from points in CO to points in GA; (27) from points in CO to points in IL; (28) from points in CO to points in IN; (29) from points in CO to points in LA; (30) from points in CO to points in ME; (31) from points in CO to points in MA; (32) from points in CO to points in MS; (33) from points in CO to points in NH; (34) from points in CO to points in NJ; (35) from points in CO to points in NC; (36) from points in CO to points in OH; (37) from points in CO to points in PA; (38) from points in CO to points in RI; (39) from points in CO to points in TN; (40) from points in CO to the DC. (Gateways eliminated: (21) Sharon Springs, KS, Houston, MS, and Florence, AL; (22) Newton, KS; (23) Newton, KS, Bloomington, IL, Steubenville, OH, Philadelphia, PA; (24) Newton, KS, Bloomington, IL, Steubenville, OH, Philadelphia, PA; (25) Hays, KS, Tupelo, MS, Birmingham, AL, Valdosta, GA; (26) Sharon Springs, KS, Corinth, MS, Tuscumbia, AL or Kinsley, KS, Grenada, MS, Eutaw, AL; (27) Marysville, MO, Bloomington, IL or Marysville, MO and Newton, KS; (28) Newton, KS; (29) Arkansas City, KS, Jacksonville, TX; (30) Newton, KS, Clinton, IL, Steubenville, OH, Philadelphia, PA, Lawrence, MA; (31) Newton, KS, Bloomington, IL, Steubenville, OH, Philadelphia, PA; (32) Arkansas City, KS; (33) Newton KS, Clinton, IL, Steubenville, OH, Philadelphia, PA, Lawrence, MA; (34) Newton, KS, Clinton, IL, Steubenville, OH, Philadelphia, PA; (35) Hutchinson, KS, Corinth, MS, Florence, AL; (36) Newton, KS, Clinton, IL, Newton, KS, Clinton, IL; (37) Newton, KS, Clinton, IL, Steubenville, OH; (38) Newton, KS, Clinton, IL, Steubenville, OH; (39) Newton, KS; (40) Newton, KS, Clinton, IL, Steubenville, OH, Philadelphia, PA.)

Note.—The purpose of this partial republication is to add the above sections, previously omitted. The remainder of this letter-notice remains as previously published.

MC 106644 (Sub-E58), filed February 10, 1975. Applicant: SUPERIOR TRUCKING CO., INC., 2770 Peyton Road NW., Atlanta, GA 30318. Representative: Guy H. Postell, Ste. 713, 3384 Peachtree Road NE., Atlanta, GA 30326. (1) *Self-propelled articles*, each weighing 15,000 pounds or more, and related machinery, tools, parts, and supplies moving in connection therewith and (2) *commodities*, the transportation of which because of size, weight or shape require the use of special equipment or special handling, with operations in (1) and (2) above restricted against the transportation of pipe, pipeline machinery, equipment, and supplies incidental to and used in connection with the construction, operation, repair, servicing and dismantling of pipelines and the stringing or picking up thereof, (a) between points in TX and points in the States of IL, IN, OH, and KY, (b) between points in TX and points in MO on and east of a line beginning at MO Hwy 15, then south along MO Hwy 15 to junction MO Hwy 22, then along MO Hwy 22 to junction MO Hwy 19, then south along MO Hwy 19 to junction MO Hwy 49, then southeast along MO Hwy 49 to junction MO Hwy 21, then south along MO Hwy 21 to the MO-AR State line, (c) between points in TX and points in IA on and east of U.S. Hwy 63, and (d) between points in TX and points in TN on and east of a line beginning at the TN-MS State line, and extending along U.S. Hwy 45 to the junction TN Hwy 20, then southwest along TN Hwy 20 to the TN-MO State line. (Gateway eliminated: points in MO on and east of U.S. Hwys 61 and 67.)

MC 106644 (Sub-E59), filed February 10, 1975. Applicant: SUPERIOR TRUCKING CO., INC., 2770 Peyton Road NW., Atlanta, GA 30318. Representative: Guy H. Postell, Ste. 713, 3384 Peachtree Road NE., Atlanta, GA 30326. *Electric controllers and instruments* which because of size or weight require the use of special equipment, from points in OK and TX, to points in DE, CT, VT, NH, ME, and DC. (Gateways eliminated: points in MO on and east of U.S. Hwy 61, TN, NC, and Roanoke, VA.)

MC 106644 (Sub-E60), filed February 10, 1975. Applicant: SUPERIOR TRUCKING CO., INC., 2770 Peyton Road NW., Atlanta, GA 30318. Representative: Guy H. Postell, Ste. 713, 3384 Peachtree Road NE., Atlanta, GA 30326. (1) *Self-propelled articles*, each weighing 15,000 pounds or more, and *related machinery, tools, parts, and supplies* moving in connection therewith and (2) *commodities*, the transportation of which because of size, weight or shape require the use of special equipment or special handling, with operations in (1) and (2) above restricted against the transportaion of pipe, pipeline machinery, equipment and supplies incidental to and used in connection with the construction, operation, repair, servicing and dismantling of pipelines and the stringing or picking up thereof, between points in TX on, west and north of a line beginning at the TX-OK State line extending along U.S. Hwy 287 to junction U.S. Hwy 87, then south along U.S. Hwy 87 to junction U.S. Hwy 80, then west and south along U.S. Hwy 80 to the TX-NM State line, and points in AL on and east of a line beginning at the AL-FL State line extending along U.S. Hwy 231 to junction I Hwy 65, then northwest along I Hwy 65 to the AL-TN State line. (Gateways eliminated: points in MO on and east of U.S. Hwy 61 and points in TN.)

MC 106644 (Sub-E61), filed February 10, 1975. Applicant: SUPERIOR TRUCKING CO., INC., 2770 Peyton Road NW., Atlanta, GA 30318. Representative: Guy H. Postell, Ste. 713, 3384 Peachtree Road, NE., Atlanta, GA 30326. (1) *Self-propelled articles*, each weighing 15,000 pounds or more, and *related machinery, tools, parts, and supplies*, moving in connection therewith and (2) *commodities*, the transportation of which because of size, weight or shape require the use of special equipment or special handling, with operations in (1) and (2) above restricted against the transportation of pipe, pipeline machinery, equipment, and supplies incidental to and used in connection with the construction, operations, repair, servicing and dismantling of pipelines and the stringing or picking up thereof, between points in TX on, west and north of a line beginning at the TX-OK State line extending along U.S. Hwy 287 to junction U.S. Hwy 87, then south along U.S. Hwy 87 to junction U.S. Hwy 80, then west along U.S. Hwy 80, to junction at the TX-NM State line, and points in MS on and east of a line beginning at the MS-TN State line extending along U.S. Hwy 45 to junction U.S. Hwy Alt 45, then south along U.S. Hwy Alt 45 to junction U.S. Hwy 45, then south along U.S. Hwy 45 to junction MS Hwy 16, then east along MS Hwy 16 to the MS-AL State line. (Gateways eliminated: points in MO on and east of U.S. Hwy 61 and points in TN.)

MC 112304 (Sub-E618), filed July 11, 1978. Applicant: ACE DORAN HAULING & RIGGING CO., 1601 Blue Rock Street, Cincinnati, OH 45223. Representative: Charles Tell, Suite 1800, 100 East Broad Street, Columbus, OH 43215. *Structural steel and iron and steel angles, bars, channels, conduit, lath, piling, pipe, posts, rails, rods, roofing, tubing and wire* in coils, between points in Indiana County, PA, on the one hand, and, on the other, points in VA on and south of a line beginning at the WV-VA State line, and extending along U.S. Hwy 250 to junction U.S. Hwy 360 at Richmond, then east along U.S. Hwy 360 to the Chesapeake Bay. Limitation: The certificate in MC 112304 Sub-65 shall be of no further force and effect after August 9, 1980. (Gateway eliminated: Clarksburg, WV and 50 miles within Clarksburg, WV.)

MC 112304 (Sub-E619), filed July 11, 1978. Applicant: ACE DORAN HAULING & RIGGING CO., 1601 Blue Rock Street, Cincinnati, OH 45223. Representative: Charles Tell, Suite 1800, 100 East Broad Street, Colum-

(Gateway eliminated: Danville, IL.)

MC 123407 (Sub-E528), filed July 25, 1978. Applicant: SAWYER TRANSPORT, INC., South Haven Square, U.S. Hwy 6, Valparaiso, IN 46383. Representative: Richard L. Loftus (same as above). *Materials*, used in the manufacture of joists, rafters, and roof trusses (except commodities in bulk and commodities requiring special equipment) in containers or in trailers, having an immediately prior or subsequent movement by water, or by water-rail or by air, from WA, OR, CA, NV, ID, UT, AZ, WY, CO, and NM, to the facilities of Trus Joist Corp. at Winchester, VA. (Gateway eliminated: Danville, IL.)

MC 123407 (Sub-E529), filed July 25, 1978. Applicant: SAWYER TRANSPORT, INC., South Haven Square, U.S. Hwy 6, Valparaiso, IN 46383. Representative: Richard L. Loftus (same as above). *Composition board and materials and accessories* used in the installation thereof (except commodities in bulk and commodities requiring special equipment), in containers or trailers, having an immediately prior or subsequent movement by water, or water-rail or by air, from points in WA, to points in IN, OH, PA, KY, TN, MS, AL, and MI and points in LA in and east of Union, Lincoln, Jackson, Winn, Grant, Rapides, Evangeline, Acadia, and Vermillion Parishes. (Gateway eliminated: Dubuque, IA.)

MC 123407 (Sub-E530), filed July 25, 1978. Applicant: SAWYER TRANSPORT, INC., South Haven Square, U.S. Hwy 6, Valparaiso, IN 46383. Representative: Richard L. Loftus (same as above). *Roofing and building materials* used in the installation and application of such commodities (except iron and steel, commodities in bulk and commodities requiring special equipment), in containers or trailers, having an immediately prior or subsequent movement by water, or by water-rail or by air, from points in NH, VT, RI, MA, ID, WA, WY, and OR, to points in MS. (Gateway eliminated: facilities of Certain-Teed Products Corp., at East St. Louis, IL.)

MC 123407 (Sub-E531), filed July 25, 1978. Applicant: SAWYER TRANSPORT, INC., South Haven Square, U.S. Hwy 6, Valparaiso, IN 46383. Representative: Richard L. Loftus (same as above). *Flat glass, glass glazing units and automotive glass* (except commodities requiring special equipment), in containers or in trailers having an immediately prior or subsequent movement by water or water-rail or by air, from the facilities of PPG Industries, Inc., at South Greensburg, PA, to points in WA, OR, ID, CA, NV, UT, and AZ; and those points in KS on and west of U.S. Hwy 54 and I Hwy 35. (Gateway eliminated: Jonesville, WI.)

MC 123407 (Sub-E532), filed July 25, 1978. Applicant: SAWYER TRANSPORT, INC., South Haven Square, U.S. Hwy 6, Valparaiso, IN 46383. Representative: Richard L. Loftus (same as above). *Flat glass, glass glazing units and automotive glass* (except commodities requiring special equipment), in containers or in trailers having an immediately prior or subsequent movement by water or water-rail or by air, from the facilities of PPG Industries, Inc., at Ford City, PA, to points in WA, OR, ID, CA, NV, UT, and AZ, those points in KS on and north and west of U.S. Hwy 54 and I Hwy 35; those points in OK on and west of I Hwy 35; and those points in MO on and north of U.S. Hwy 36. (Gateway eliminated: Jonesville, WI.)

MC 123407 (Sub-E534), filed July 25, 1978. Applicant: SAWYER TRANSPORT, INC., South Haven Square, U.S. Hwy 6, Valparaiso, IN 46383. Representative: Richard L. Loftus (same as above). *Wallboard, pulpboard and hardboard* (except commodities in bulk and commodities requiring special equipment), in containers or in trailers, having an immediately prior or subsequent movement by water, or by water-rail, or by air, from points in Crook, Weston, Campbell, Johnson, Sheridan, Big Horn, Teton, Washakie, Park, Hot Springs, Fremont and Sublette Counties, WY, to points in and south of Mason, Lake, Osceola, Clare, Midland, Bay, Tuscola and Huron Counties, MI (except points in south and west of U.S. Hwy 31-33 from St. Joseph to the MI-IN State line.) (Gateway eliminated: Superior, WI.)

MC 123407 (Sub-E535), filed July 25, 1978. Applicant: SAWYER TRANSPORT, INC., South Haven Square, U.S. Hwy 6, Valparaiso, IN 46383. Representative: Richard L. Loftus (same as above). *Composition board and materials and accessories* used in the installation thereof (except commodities in bulk and commodities requiring special equipment), in containers or trailers, having an immediately prior or subsequent movement by water, or water-rail or by air, from points in CA, NV, UT and WY, to points in IN, OH and PA, and the Lower Peninsula of MI. (Gateway eliminated: Dubuque, IA.)

MC 123407 (Sub-E536), filed July 25, 1978. Applicant: SAWYER TRANSPORT, INC., South Haven Square, U.S. Hwy 6, Valparaiso, IN 46383. Representative: Richard L. Loftus (same as above). *Iron and steel articles* (except in bulk and commodities requiring special equipment), in containers or in trailers having an immediately prior or subsequent movement by water, or by water-rail, or by air, from points in WA, OR, CA, ID, NV, WY, UT, CO, and AZ; and those points in NM on and north of U.S. Hwy 60. (Gateway eliminated: Beloit, WI.)

MC 123407 (Sub-E537), filed July 25, 1978. Applicant: SAWYER TRANSPORT, INC., South Haven Square, U.S. Hwy 6, Valparaiso, IN 46383. Representative: Richard L. Loftus (same as above). *Wallboard, pulpboard and hardboard* (except commodities in bulk and commodities requiring special equipment) in containers or in trailers, having an immediately prior or subsequent movement by water, or by water-rail or by air, from points in CA and NV, to points in MI. (Gateway eliminated: Superior, WI.)

MC 123407 (Sub-E538), filed July 25, 1978. Applicant: SAWYER TRANSPORT, INC., South Haven Square, U.S. Hwy 6, Valparaiso, IN 46383. Representative: Richard L. Loftus (same as above). *Composition board and materials and accessories* used in the installation thereof (except commodities in bulk and commodities requiring special equipment), in containers or in trailers, having an immediately prior or subsequent movement by water, or by water-rail, or by air, from points in NM, to points in MI and PA. (Gateway eliminated: Dubuque, IA.)

MC 123407 (Sub-E539), filed July 25, 1978. Applicant: SAWYER TRANSPORT, INC., South Haven Square, U.S. Hwy 6, Valparaiso, IN 46383. Representative: Richard L. Loftus (same as above). *Wallboard, pulpboard and hardboard* (except commodities in bulk and commodities requiring special equipment), in containers or in trailers, having an immediately prior or subsequent movement by water, or by water-rail, or by air, from to points in WI, to points in MI on and north of MI Hwy 55. (Gateway eliminated: Superior, WI.)

MC 123407 (Sub-E559), filed July 25, 1978. Applicant: SAWYER TRANSPORT, INC., South Haven Square, U.S. Hwy 6, Valparaiso, IN 46383. Representative: Richard L. Loftus (same as above). *Iron and steel; iron and steel articles* (except commodities in bulk and commodities requiring special equipment), in containers or in trailers, having an immediately prior or subsequent movement by water, or by water-rail, or by air, from the facilities of Continental Steel Corp. at Kokomo, IN, to points in WA, OR, CA, ID, NV, UT, WY, AZ, CO, NM, and points in KS on and west of U.S. Hwy 83 and points in TX and Cimmarron Counties, OK. (Gateway eliminated: Beloit, WI.)

MC 123407 (Sub-E561), filed July 25, 1978. Applicant: SAWYER TRANSPORT, INC., South Haven Square, U.S. Hwy 6, Valparaiso, IN 46383. Representative: Richard L. Loftus (same as above). *Wallboard, pulpboard, hardboard, insulation and insulation materials*, (2) *accessories and materials* used in the installation of the products in (1) above and (3) *padding and cushion materials and mulch* (except lumber, commodities in bulk and commodities requiring special equipment in containers or in trailers, having an immediately prior or subsequent movement by water, or by water-rail, or by air) from points in CA and NV

V 4 3 / 1 9 4

on and north of Interstate Hwy 80, to points in NC, SC, and Savannah, GA. (Gateway eliminated: Cloquet, MN.)

MC 123407 (Sub-E562), filed July 25, 1978. Applicant: SAWYER TRANSPORT, INC., South Haven Square, U.S. Hwy 6, Valaraiso, IN 46383. Representative: Richard L. Loftus (same as above). *Used construction forms* (except commodities requiring special equipment), in containers or in trailers, having an immediately prior or subsequent movement by water, or by water-rail, or by air, between points in WY, on the one hand, and, on the other, points in MI, PA, NY, NJ, VT, NH, ME, MA, CT, and RI. (Gateway eliminated: Chamberlain, SD.)

MC 123407 (Sub-E563), filed July 25, 1978. Applicant: SAWYER TRANSPORT, INC., South Haven Square, U.S. Hwy 6, Valaraiso, IN 46383. Representative: Richard L. Loftus (same as above). *Used construction forms* (except commodities requiring special equipment), in containers or in trailers, having an immediately prior or subsequent movement by water, or by water-rail, or by air, between points in WY, on the one hand, and, on the other, points in IN, OH, WV, MD, DE, DC, KY, VA, NC, SC, MO, AR, KS, OK, and TX. (Gateway eliminated: Sidney, NE.)

MC 123407 (Sub-E564), filed July 25, 1978. Applicant: SAWYER TRANSPORT, INC., South Haven Square, U.S. Hwy 6, Valaraiso, IN 46383. Representative: Richard L. Loftus (same as above). *Used construction forms* (except commodities requiring special equipment), in containers or in trailers, having an immediately by water, or by water-rail, or by air, between Portland, OR, on the one hand, and, on the other, points in Campbell, Crook, Weston, Converse, Niobrara, Platte, Goshen, and Laramie Counties, WY. (Gateway eliminated: Belle Fourche, SD.)

MC 123407 (Sub-E565), filed July 25, 1978. Applicant: SAWYER TRANSPORT, INC., South Haven Square, U.S. Hwy 6, Valaraiso, IN 46383. Representative: Richard L. Loftus (same as above). *Used construction forms* (except commodities requiring special equipment) in containers or in trailers, having an immediately prior or subsequent movement by water, or by water-rail, or by air, between Los Angeles, CA, on the one hand, and, on the other, points in Albany, Laramie, Platte, Goshen, Converse, Niobrara, Weston, Campbell and Crook Counties, WY. (Gateway eliminated: Bushnell, NE.)

MC 123407 (Sub-E566), filed July 25, 1978. Applicant: SAWYER TRANSPORT, INC., South Haven Square, U.S. Hwy 6, Valaraiso, IN 46383. Representative: Richard L. Loftus (same as above). *Plastic pipe and plastic products* (except commodities in bulk and commodities requiring special equipment), in containers or in trailers, having an immediately prior or subsequent movement by water, or by water-rail or by air, from points in MI on and north of a line beginning at Muskegon, MI, extending along Interstate Hwy 96 to junction MI Hwy 21, then along MI Hwy 21 to Port Huron; points in NY, NH and VT on and north of a line beginning at Sacket Harbor, NY, extending along NY Hwy 3 to Watertown, NY, then along NY Hwy 12 to junction NY Hwy 8, then along NY Hwy 8 to junction NY Hwy 30, then along NY Hwy 30 to junction NY Hwy 67, then along NY Hwy 67 to junction VT Hwy 67, then along VT Hwy 67 to junction VT Hwy 67-A, then along VT Hwy 67-A to Bennington, VT, then along VT Hwy 9 to the VT-NH State line, then along NH Hwy 9 to junction NH Hwy 49 to junction U.S. Hwy 202, then along U.S. Hwy 202 to the NH-ME State line, to points in TX, OK, KS, and CO on and west of a line beginning at Corpus Christi, TX, extending along Interstate Hwy 37 to San Antonio, TX, then along Interstate Hwy 35 to Wichita, KS, then along Interstate Hwy 81 to the KS-NE State line. Restriction: The authority granted herein is restricted against the transportation of oilfield commodities as described in *Mercer Extension-Oilfield Commodities*, 74 M.C.C. 459 and further restricted against the transportation of pipe incidental to, used in, or in connection with (a) the transportation, installation, removal, operation, repair, servicing, maintenance and dismantling of drilling machinery and equipment (b) the completion of holes or wells drilled, (c) the production, storage and transmission of commodities resulting from drilling operations at well or hole sites (d) the injection or removal of commodities into or from holes or wells. (Gateway eliminated: Hastings, NE.)

MC 123407 (Sub-E567), filed July 25, 1978. Applicant: SAWYER TRANSPORT, INC., South Haven Square, U.S. Hwy 6, Valaraiso, IN 46383. Representative: Richard L. Loftus (same as above). *Charcoal briquettes, lignite charcoal fireplace logs, lighter fluid and barbeque grill base material* (except commodities in bulk and commodities requiring special equipment), in containers or in trailers having an immediately prior or subsequent movement by water, water-rail or by air, from points in AZ, to points in MI. (Gateway eliminated: facilities of Husky Briquetting, Inc., at Isanti, MN.)

MC 123407 (Sub-E569), filed July 25, 1978. Applicant: SAWYER TRANSPORT, INC., South Haven Square, U.S. Hwy 6, Valaraiso, IN 46383. Representative: Richard L. Loftus (same as above). *Fabricated steel* (except commodities requiring special equipment) in containers or in trailers, having an immediately prior or subsequent movement by water, or by water-rail or by air, from the facilities of Henderson Steel Corp. at Lauderdale County, MS, to points in ME, MI, VT, NH, MA, RI, CT, WA, OR, CA, ID, NV, UT, WY, CO, KS, points in NJ on and north of NJ Hwy 33; points in AZ on and north of Interstate Hwy 40 and points in NM on and north of U.S. Hwy 64. (Gateway eliminated: Cairo, IL.)

MC 123407 (Sub-E570), filed July 25, 1978. Applicant: SAWYER TRANSPORT, INC., South Haven Square, U.S. Hwy 6, Valparaiso, IN 46383. Representative: Richard L. Loftus (Same as above). *Building materials* (except commodities in bulk and commodities requiring special equipment), in containers or in trailers, having an immediately prior or subsequent movement, by water, or by water-rail, or by air, between Detroit, MI, on the one hand, and, on the other, points in WA, OR, ID, CA, NV, UT, CO, NM, AZ, WY, KS, TX, OK, points in MO on and north of U.S. Hwy 24, and points in AR on and west of U.S. Hwy 71. (Gateway eliminated: Warren, IL.)

MC 123407 (Sub-E571), filed July 25, 1978. Applicant: SAWYER TRANSPORT, INC., South Haven Square, U.S. Hwy 6, Valparaiso, IN 46383. Representative: Richard L. Loftus (Same as above). *Building materials* (except commodities in bulk and commodities requiring special equipment, in containers or in trailers, having an immediately prior or subsequent movement by water, or by water-rail, or by air, between Burns Harbor, IN, on the one hand, and, on the other, points in WA, OR, ID, CA, NV, UT, WY, CO, AZ, NM, OK, TX, and KS (except Cherokee and Crawford Counties). (Gateway eliminated: Warren, IL.)

MC 123407 (Sub-E572), filed July 25, 1978. Applicant: SAWYER TRANSPORT, INC., South Haven Square, U.S. Hwy 6, Valparaiso, IN 46383. Representative: Richard L. Loftus (Same as above). *Used construction forms* (except commodities requiring special equipment and commodities in bulk) in containers or in trailers, having an immediately prior or subsequent movement by water, or by water-rail, or by air, between San Diego, CA, on the one hand, and, on the other, points in Albany, Laramie, Platte, Goshen, Niobrara, Converse, Weston, Crook and Campbell Counties, WY. (Gateway eliminated: Bushnell, NE.)

MC 123407 (Sub-E574), filed July 25, 1978. Applicant: SAWYER TRANSPORT, INC., South Haven Square, U.S. Hwy 6, Valparaiso, IN 46383. Representative: Richard L. Loftus (Same as above). *Building materials* (except commodities in bulk, lumber, chemicals, and commodities which because of their size or weight require the use of special equipment) in containers or in trailers, having an immediately prior or subsequent movement by water, or by water-rail or by air, from points in CA and NV on and north of Interstate Hwy 80, to points in WV, VA, NC, and KY on and east of U.S. Hwy 41. (Gateways eliminated: Warren, IL, and Brookville, IN.)

MC 123407 (Sub-E633), filed July 25, 1978. Applicant: SAWYER TRANSPORT, INC., South Haven Square, U.S. Hwy 6, Valparaiso, IN 46383. Representative: Richard L. Loftus (Same as above). *Materials used in the manufacture and distribution of widows, doors, building woodwork and the materials and accessories used in the installation thereof* (except commodities in bulk and commodities because of size or weight require the use of special equipment or special handling), in containers or in trailers, having an immediately prior or subsequent movement by water, or by water-rail, or by air, from Norfolk, VA, to points in WA, OR, CA, ID, NV, UT, WY, points in CO on and north of a line beginning at the CO–NE State line, and extending along Interstate Hwy 76 to junction Interstate Hwy 70, then along Interstate Hwy 70 to the CO–UT State line, and points in AZ on, west and north of a line beginning at the AZ–NM State line, and extending along Interstate Hwy 40 to junction Interstate Hwy 25, then along Interstate Hwy 25 to junction U.S. Hwy 60, then along U.S. Hwy 60 to the AZ–CA State line. (Gateway eliminated: Dubuque, IA.)

By the Commission.

ACTION

COMPETITIVE NATIONAL VISTA GRANTS

Proposed Procedures

AGENCY: ACTION.

ACTION: Proposed notice of competitive national VISTA grants.

SUMMARY: The following proposed notice sets out the competitive procedure under which applications for national VISTA grants will be accepted and reviewed in fiscal year 1979. The notice describes the program purpose, applicant eligibility, grant scope, selection criteria and application review process for national VISTA grants.

In accordance with ACTION's response to Executive Order 12044 ("Improving Government Regulations"), a working group met on August 25, 1978 and determined that a regulation was not necessary to accomplish the purposes of this notice, but that the alternative of a guideline was sufficient. In addition, because the group determined that the notice affects an important Agency program (VISTA) and imposed substantial compliance and reporting requirements, it was decided that the notice was significant and therefore should be published in proposed form for a 60-day period during which written comments would be accepted and regional meetings held for public discussion and input.

In order to allow sufficient time for an orderly and yet comprehensive review of all fiscal year 1979 applications, VISTA has set December 16, 1978 as the date by which all such applications must be submitted to ACTION. Under the 60-day comment period, however, this notice will not be finalized in time for that deadline. The working group therefore approved the use of the proposed notice as an interim guideline so that the December 16 date could remain intact and the VISTA program not be disrupted. The final guideline, with any changes that have been incorporated as a result of the public comment, will be utilized in all future fiscal years and in the event a second round of applications is solicited in fiscal year 1979.

DATE: Written comments should be submitted no later than December 4, 1978, to Ms. Diana London, VISTA, 806 Connecticut Avenue NW., Washington, D.C. 20525. For information as to dates and locations of regional meetings, contact the appropriate Regional Office listed below.

ACTION—Region I: John W. McCormack Federal Bldg., Room 1420, Boston, Mass. 02109.
ACTION—Region III: 320 Walnut St., Suite 600, Philadelphia, Pa. 19106.
ACTION—Region V: 1 North Wacker Dr., Third Floor, Room 322, Chicago, Ill. 60606.
ACTION—Region VII: II Gateway Center, Suite 330, 4th and State, Kansas City, Kans. 66101.
ACTION—Region IX: 211 Main St., Room 533, San Francisco, Calif. 94105.
ACTION—Region II: 26 Federal Plaza, 16th Floor, Suite 1611, New York, N.Y. 10007.
ACTION—Region IV: 101 Marietta St., NW., Room 2524, Atlanta, Ga. 30303.
ACTION—Region VI: Corrigan Tower Bldg., Suite 1600, 212 North St. Paul St., Dallas, Tex. 75201.
ACTION—Region VIII: Columbine Bldg., Room 201, 1845 Sherman St., Denver, Colo. 80203.
ACTION—Region X: 1601 Second Ave., Seattle, Wash., 98101.

FOR FURTHER INFORMATION CONTACT:

Ms. Diana London, VISTA, 806 Connecticut Avenue NW., Washington, D.C. 20525, 202-254-5195.

SUPPLEMENTARY INFORMATION: Notice is hereby given that pursuant to the authority contained in sections 103, 108 and 402(12) of the Domestic Volunteer Service Act of 1973, as amended, Pub. L. 93-113, title I, part A (42 U.S.C. sections 4953, 4958, 5042(12)), applications will be accepted from eligible organizations wishing to compete for grants in fiscal year 1979 to operate VISTA volunteer programs on a national or multi-regional basis.

Applications are due by close of business on December 16, 1978 in order to be competitively reviewed. Grant awards will be announced on or about April 16, 1979, subject to the availability of fiscal year 1979 funding.

Applications from current national VISTA grantees for second and third year continuation grants are not subject to the competitive procedures outlined below. Grantees applying for fourth year continuation grants will be required to follow the procedures outlined below.

A. *Program purpose.* National VISTA grants are made for the purpose of providing full-time VISTA volunteers to sponsoring organizations which are working to alleviate poverty and poverty-related human, social and environmental problems on a multi-regional or national basis. VISTA Volunteers are assigned to local offices or project affiliates of the national grantee which are joined together by commonality of program purpose. VISTA will use national grants to impact on the basic human needs of the poor.

The national grantee is required to identify, develop and provide technical assistance to local groups which will serve as project sponsors of the volunteers. The grantee will also provide overall training, technical assistance and management support for the projects' operations.

B. *Eligibility.* Applicants for national VISTA grants must be public or private nonprofit incorporated organizations with ability to program full-time volunteers in antipoverty efforts. Applicants must have local offices or project affiliates in two or more of the ten Federal domestic regions. Both the applicant organization and its affiliates must have goals that are in accord with VISTA's legislative mission, which is:

to strengthen and supplement efforts to eliminate poverty and poverty-related human, social and environmental problems in the United States by encouraging and enabling persons from all walks of life and all age groups, including elderly and retired Americans, to perform meaningful and constructive volunteer service in agencies, insti-

V 4 3 / 1 9 4 OCT 5 1978 UMI

tutions, and situations where the application of human talent and dedication may assist in the solution of poverty and poverty-related problems and secure and exploit opportunities for self-advancement by persons afflicted with such problems.

(Sec. 101, Pub. L. 93-113, 42 U.S.C. Sec. 4951.)

Applicants must be able to demonstrate sufficient administrative and fiscal expertise to manage a national grant as well as the capability of providing adequate training, technical assistance and supervision to the Volunteers and local project affiliates.

C. *General criteria for grant selection.* Grant applications will be reviewed and evaluated against the general criteria outlined below. Specific evaluation criteria are included in the application kit (see section F below).

1. The proposed project(s) operating at the local level must:

(a) Contribute to the creation of more self-reliant communities by developing in and among the poor the capability for leadership, problem-solving and active participation in the decisionmaking processes which affect their lives;

(b) Have as a method of attacking poverty-related problems (1) the organization of low-income community residents to bring long-term benefits to the community through their own collective efforts or the establishment of an advocacy system controlled and operated by those to be served; or (2) the support of efforts of low-income citizen participation or grassroots advocacy organization(s);

(c) Demonstrate that the goals, objectives, and volunteer tasks are attainable within the timeframe during which the volunteers will be working on the project and will produce a measureable result(s);

2. The applicant organization must:

(a) Provide assignments for volunteers which are consistent with the requirements and restrictions for VISTA volunteer service contained in the Domestic Volunteer Service Act of 1973 (Pub. L. 93-113) and applicable regulations and VISTA policies;

(b) To the maximum extent practicable, involve the low-income people to be served in the planning, development and implementation of the project(s);

(c) Identify resources needed and make them available for volunteers to perform their tasks;

(d) Demonstrate sufficient administrative, supervisory and fiscal expertise to manage a multiple-unit, geographically-dispersed grant and multiState volunteer payroll system;

(e) Demonstrate ability to recruit full-time volunteers into the project as appropriate;

(f) Demonstrate ability to provide pre- and in-service training and technical assistance appropriate to VISTA Volunteer assignments.

D. *Scope of grant.* Subject to the availability of fiscal year 1979 funding, approximately $1 million will be available for approximately 5 new national VISTA grants ranging in size from approximately $200,000 to $400,000. They will be awarded for a period of up to fifteen (15) months to allow for preoperational planning and volunteer recruitment prior to the twelve (12) months of volunteer service.

A national VISTA grant will cover only the direct costs of operating the project which are: Volunteer recruitment, volunteer allowances and stipends, volunteer payroll administration, volunteer transportation, provision of training and technical assistance, project management and supervisory staff salaries, fringe benefits, staff travel, and postage and reproduction expenses. All other direct costs, as well as all indirect costs, must be borne by the grantee. Grant applications must demonstrate ability of applicant organization to provide these types of support.

Publication of this announcement does not obligate ACTION to award any specific number of grants, or to obligate the entire amount of funds available, or any part thereof, for national VISTA grants. Awards will be made only to the extent that the Director of VISTA deems national grants as the most effective way of using available VISTA funds.

E. *Application review process.* All eligible applications which have been submitted by the deadline date (see G below) will be reviewed and rated by an ACTION headquarters rating panel composed of a minimum of five (5) ACTION staff members having expertise in volunteer programs operating within low-income communities. No more than two members of the Board shall be members of the VISTA program office appointed by the VISTA Director. The remaining panel members shall be appointed by the Director of ACTION.

The panel shall establish a best qualified list which shall consist of the highest rated applicants in ranked order. The number of applicants on this list may be less than, but may not exceed, twice the number of grants anticipated. To determine that number, the panel will use $250,000 as the average grant size. The Director of VISTA shall select the grantees from the best qualified list.

Prior to making that final selection, the VISTA Director will transmit to the ten ACTION Regional Directors and appropriate State Directors copies of the best qualified list grant applications along with the evaluation criteria used by the panel. The ACTION Regional and State Directors (or their designees) will review and comment on the grant applications with State Directors assessing local project affiliates within their jurisdictions. Regional and State Directors will submit written recommendations to the director of VISTA. These recommendations will be considered by the Director of VISTA in making the final selection of grantees as well as in determining the size and actual composition of each national VISTA grant.

The final selection of National VISTA grantees will be made in accordance with the purposes of the Act, ACTION/VISTA policies and regulations, and within the limits of available funds.

The notice of grant award (NGA) will be made by the chief of the Grants Branch, Contracts and Grants Management, ACTION. The NGA sets forth in writing the amount of funds granted, the terms and conditions of the grant award, the effective date of the award, and the budget period for which support is given. It also incorporates the project narrative submitted by the grantee and all subsequent project narratives and volunteer work plans related to local project sites as specified by the VISTA Grant Project Manager.

F. *Availability of forms.* To be eligible for consideration, an application must be prepared and submitted in accordance with this announcement and with forms, instructions, and program guidelines contained in the National VISTA grant application kit. The application kit may be obtained on October 16, 1978 or thereafter from the Chief, ACTION Grants Branch, Room P-315, 806 Connecticut Avenue NW., Washington, D.C. 20525. To expedite requests, please furnish a self-addressed gummed label, including "Request for Grant Application (RGA) No. 79-01" on the label. Telephone requests will not be honored.

G. *Application submission and deadline.* One signed original and two (2) copies of all completed applications must be submitted to the Chief, Grants Branch at the above address. Applications are due by close of business on December 11, 1978. All applications received by that date, or postmarked on or before December 8 by the U.S. Postal Service, will be considered.

Applications which do not conform to this announcement, or are received late, or are incomplete, will not be accepted for review.

SAM BROWN,
Director, ACTION.

COMMODITY FUTURES TRADING COMMISSION.

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: Vol. 43, No. 190, September 29, 1978, page 44965.

PREVIOUSLY ANNOUNCED TIME AND DATE OF THE MEETING: 10 a.m., October 3, 1978.

CHANGES IN THE MEETING: The meeting has been postponed until Wednesday, October 4, 1978, at 10 a.m.

[S-2016-78 Filed 10-3-78; 10:41 am]

[6714-01]

2

FEDERAL DEPOSIT INSURANCE CORPORATION.

NOTICE OF AGENCY MEETING

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 11:15 a.m. on September 29, 1978, the Board of Directors of the Federal Deposit Insurance Corporation met in closed session, by telephone conference call, to consider a recommendation regarding the liquidation of assets acquired by the Corporation from the Hamilton National Bank of Chattanooga, Chattanooga, Tenn. (Case No. 43,524-L).

In calling the meeting, the Board determined, on motion of Director William M. Isaac (Appointive), seconded by Action Chairman John G. Heimann, that Corporation business required its consideration of the matter on less than 7 days' notice to the public; that no earlier notice of the meeting was practicable; that the public interest did not require consideration of the matter in a meeting open to public observation; and, that the matter was eligible for consideration in a closed meeting pursuant to subsections (c)(6) and (c)(9)(B) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(6) and (c)(9)(B)).

Dated: September 29, 1978.

FEDERAL DEPOSIT INSURANCE CORPORATION,
ALAN R. MILLER,
Executive Secretary.

3

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION.

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENTS S-1935-78 and S-1989-78.

PREVIOUSLY ANNOUNCED TIME AND DATE OF MEETING: 9:30 a.m. (eastern time), Monday, October 2, 1978.

CHANGES IN THE MEETING: Litigation matters previously announced for consideration at the closed portion have been postponed and the entire meeting is open to the public.

The following items have been postponed:

Freedom of Information Act Appeal No. 78-7-F01A-154.
Proposed procedures to implement Executive Order 12044, and
Proposed EEO complaints appeals procedures for Federal employees.

The following item is added to the open portion:

Proposed resolution commending the Dallas District Office.

A majority of the entire membership of the Commission has determined by recorded vote that the business of the Commission required this change and that no earlier announcement was possible.

In favor of change.—Eleanor Holmes Norton, Chair; Daniel E. Leach, Vice Chair; and Ethel Bent Walsh, Commissioner.

Opposed.—None.

CONTACT PERSON FOR MORE INFORMATION:

Marie D. Wilson, Executive Officer, Executive Secretariat, at 202-634-6748.

This notice issued October 2, 1978.

4

FEDERAL ELECTION COMMISSION.

"FEDERAL REGISTER" NO. FR-S-1987.

PREVIOUSLY ANNOUNCED DATE AND TIME: Thursday, October 5, 1978, at 10 a.m.

CHANGE IN MEETING: The following item has been added to the open portion of the meeting:

Recordkeeping and reporting of particulars for expenditures—Presidential candidates and authorized committees.

PERSON TO CONTACT FOR INFORMATION:

Mr. David Fiske, Press Officer, telephone 202-523-4065.

MARJORIE W. EMMONS,
Secretary to the Commission.

[S-2018-78 Filed 10-3-78; 12:01 pm]

7

FEDERAL RESERVE SYSTEM (BOARD OF GOVERNORS).

TIME AND DATE: 11:30 a.m., Monday, October 2, 1978.

PLACE: 20th Street and Constitution Avenue NW., Washington, D.C. 20551.

STATUS: Closed.

MATTER CONSIDERED: Proposed Board position regarding a congressional amendment of the grandfather provisions of the Bank Holding Company Act. (This matter was originally announced for a meeting on Friday, September 29, 1978.)

CONTACT PERSON FOR MORE INFORMATION:

Mr. Joseph R. Coyne, Assistant to the Board, 202-452-3204.

Dated: October 2, 1978.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

8

NATIONAL TRANSPORTATION SAFETY BOARD.

TIME AND DATE: 9 a.m., Thursday, October 12, 1978 [NM-78-36].

PLACE: NTSB Board Room, National Transportation Safety Board, 800 Independence Avenue SW., Washington, D.C. 20594.

STATUS: The first four items on the agenda will be open to the public; the last item will be closed under exemption 10 of the Government in the Sunshine Act.

MATTERS TO BE CONSIDERED:

1. Marine accident report—Collision between Liberian tankship MV *Stolt Viking* and U.S. Crew Boat *Candy Bar* in the Gulf of Mexico, January 7, 1978.
2. Special study—Safe Service Life for Liquid Petroleum Pipelines.
3. Discussion—Lack of national standard for minimum skid number value.
4. Closeout - Aviation safety recommendations A-77-56, A-78-13, A-78 33, A-78-38, and A-78 39.
5. Opinion and order—*Administrator* v. *Ribler*, Dkt. SE 3593; disposition of Administrator's appeal.

CONTACT PERSON FOR MORE INFORMATION:

Sharon Flemming, 202-472-6022.

SECURITIES AND EXCHANGE COMMISSION.

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: 43 FR 44612, September 28, 1978.

STATUS: Closed meeting.

PLACE: Room 825, 500 North Capitol Street, Washington, D.C.

PREVIOUSLY ANNOUNCED DATE: Tuesday, October 3, 1978.

CHANGES IN THE MEETING: Deletion of items to be considered.

The following items will not be considered by the Commission at the closed meeting scheduled for Tuesday, October 3, 1978, at 10 a.m.:

Institution of injunctive action.
Personnel action.

Chairman Williams and Commissioners Loomis, Evans, Pollack, and Karmel determined that Commission business required the above change and that no earlier notice thereof was possible.

OPERATIONS REVIEW PROGRAM; AMENDMENT NO. 6

General Operating and Flight Rules and Related Airworthiness Standards and Crewmember Training

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The purpose of these amendments is to update and improve certain requirements applicable to aircraft, training programs, and airmen. These amendments are part of the operations review program.

DATES: Effective date December 4, 1978, except for section 121.417 which is September 29, 1978. Compliance dates for certain provisions are different than the effective date.

FOR FURTHER INFORMATION CONTACT:

Mr. D. A. Schroeder, Safety Regulations Division, Flight Standards Service, Federal Aviation Adminstration, 800 Independence Avenue SW., Washington, D.C. 20591, telephone 202-755-8715.

SUPPLEMENTARY INFORMATION:

HISTORY

These amendments are the sixth in a series of amendments to be issued as part of the operations review program. The following amendments of the series have previously been issued as part of the operations review program:

Title and FR Citation

Clarifying and Editorial Changes (41 FR 47227; Oct. 28, 1976).
Rotorcraft External-Load Operations (42 FR 24196; May 12, 1977 amended by 42 FR 32531; June 27, 1977).
Airspace, Air Traffic and General Operating Rules (to be issued at a later date).
Development of Major Repair Data (43 FR 3084; Jan. 23, 1978).
Miscellaneous Amendments (43 FR 22636; May 25, 1978).
Certification and Operations: Domestic, Flag, and Supplemental Air Carriers and Commerical Operators of Large Aircraft (43 FR 22643; May 25, 1978 amended by 43 FR 28403; June 29, 1978).

These amendments are based on a notice of proposed rule making (notice 77-20) published in the FEDERAL REGISTER on September 1, 1977 (42 FR 44204). All interested persons have been given an opportunity to participate in the making of these amendments and due consideration has been given to all matters presented. A number of substantive changes and changes of an editorial and clarifying nature have been made to the proposed rules based upon relevant comments received and upon further review by the FAA. Except for minor editorial and clarifying changes and the substantive changes discussed below these amendments and reasons for their adoption are the same as those contained in notice 77-20.

DISCUSSION OF COMMENTS

The following discussions are keyed to like-numbered proposals in notice 77-20 and amendments to §§ 121.417, 121.437 and 121.439. Since these amendments to §§ 121.417, 121.437 and 121.439 are clarifying and relaxatory in nature and do not impose a burden on the public, I find that notice and public procedure are unnecessary and that the amendments may be made effective without notice.

Proposal 6-1. Proposed § 91.33(b)(12) would require that safety belts have metal to metal buckles or latching devices. Implementation of this amendment necessitiates corollary amendments to the airworthiness provisions of §§ 23.1413, 25.1413, 27.1413 and 29.1413.

Most commenters favored the proposal with some of the commenters suggesting various effective dates for compliance, ranging from 1 to 5 years instead of the 2-year period proposed. These suggestions were based on consideration of equipment availability and the economic burden of purchasing the new type safety belts. Considering these comments, the FAA concluded that a 3-year period for compliance will suffice and the final rule is amended accordingly. One commenter asked whether the "metal to metal" requirement applied to both buckles and latching devices. After further review, the FAA believes that the requirement could be misinterpreted. Since a "buckle" is a "latching device", the word "buckle" is deleted in the rule.

One commenter noted that current § 91.33(b)(12) uses the plural form when referring to "occupants" and "belts". Since it was not FAA's intention to change the current rule in this regard, the plural form is retained.

Proposal 6-2. The proposed revision of § 25.1413 would reflect, in the airworthiness standards, amendments made to § 91.33. See the discussion for proposal 6-1.

Proposal 6-3. The proposed revision of § 27.1413 would reflect, in the airworthiness standards, amendments made to § 91.33. See the discussion for proposal 6-1.

Proposal 6-4. The proposed revision of § 29.1413 would reflect, in the airworthiness standards, amendments made to § 91.33. See the discussion for proposal 6-1.

Proposal 6-5. The proposed revision to § 91.4 would have required a person who releases an aircraft for flight to another person to first determine who intends to serve as pilot in command and to then determine that the pilot in command has current certificates and ratings as required in the regulations.

A large majority of the comments received were unfavorable. Many commenters objected to the proposal on the basis that current rules make the pilot responsible for being properly certificated and rated for the operation intended and the implementation of one regulation to assist in the enforcement of another is not only unnecessary but would impose an economic burden on the industry.One commenter said the added responsibility imposed upon the "releasor" would involve third parties in possible litigation and the additional inspections would not bring about an increase in safety commensurate with the effort required. Another commenter questioned whether, in light of the wording of § 61.3(h) which limits who can request a person to present his certificate for inspection, the Administrator can, in another rule, designate inspection responsibility to everyone who uses, causes to use, or authorizes the use of aircraft.

A few commenters called attention to the fact that it is just good business to assure that the person to whom they lease aircraft is properly certificated, but there is not sufficient justification to make the lessor responsible for determining all aspects of a pilot's currency.

After consideration of all of the comments received and after further review, the FAA believes that there exists insufficient justification to amend the regulations as proposed. Accordingly, the proposal to amend § 91.4 is withdrawn.

Proposal 6-6. Current § 91.14 requires the pilot in command to ensure that each person on board has been notified, before each takeoff and landing, to fasten that person's safety belt. The proposal would require the pilot in command of the aircraft to insure that each person on board is briefed on how to fasten and unfasten that person's safety belt.

A number of commenters incorrectly concluded that the proposed rule would require the pilot in command to personally conduct the briefing. The proposed rule would only require the

pilot in command to insure that the passengers are briefed.

One commenter stated that the pilot in command could brief the passengers in the event of an emergency. The FAA believes that, when an emergency develops, the pilot in command would not have the time to brief passengers on how to buckle and unbuckle their safety belts.

A few commenters stated that anybody familiar with automobile seat belts should know how to fasten and unfasten airplane safety belts and, therefore, the briefing is unnecessary. The FAA does not agree. Certain aircraft safety belts are different from those used in automobiles and it cannot be assumed that all passengers are familiar with automobile safety belts.

Since the pilot in command is currently responsible to ensure that persons are notified to fasten their safety belts, the FAA believes that little additional effort will be involved for the pilot in command to also ensure that persons on board are briefed on how to fasten and unfasten their safety belts. Accordingly, § 91.14 is amended as proposed.

Proposal 6-7. Current § 91.21 prohibits a person from operating a civil aircraft for flight instruction unless that aircraft has fully functioning dual controls. The proposed rule would allow the use of a single, functioning, throwover control wheel for instrument flight, instrument flight instruction and simulated instrument flight. The FAA received a large number of favorable responses to this proposal and it is adopted without change.

Proposal 6-8. This proposal would move the 30 minute VFR day fuel reserve requirement, now prescribed in § 91.207 (which applies to large and turbojet-powered multiengine airplanes), to a new § 91.22 so that this requirement would apply to all airplanes. Additionally, fuel requirements would be added for night VFR flight and rotorcraft operations.

Although a number of commenters supported the proposed amendment, a larger number disagreed. Some of those who disagreed stated that the proposed amendment was an attempt to legislate safety in an area which has been governed by common sense. Judging from the increasing number of fuel exhaustion accidents which occur each year, the FAA believes there must be a more precise means to determine an adequate fuel reserve for VFR flight.

A few commenters stated that the fuel requirements are already contained in § 91.5 and that proposed § 91.22 was, therefore, redundant. Section 91.5 requires the pilot to be informed regarding "fuel requirements". It does not, however, contain a requirement for fuel reserves beyond the first point of intended landing.

Three commenters favored simplification of the regulation by making the fuel reserves the same for both day and night. One of the commenters favored 1 hour and two favored 30 minutes for both. The FAA believes that the distance between adequately lighted airports warrants the additional fuel reserves for night VFR operation.

One commenter recommended that § 91.22 be made consistent with § 91.23 by using the term "civil aircraft" instead of "airplane" in § 91.22. The FAA agrees and the term "civil aircraft" is used in the title to § 91.22.

One commenter suggested that the phrase "normal cruising speed" be used rather than "normal cruising fuel consumption" to make the nomenclature the same as in § 91.23(c). The FAA agrees, and § 91.22, as adopted, is revised accordingly.

Proposal 6-9. The purpose of proposed § 91.23 was to simplify flight planning by eliminating the reference to minimum obstruction clearance altitude (MOCA) and minimum enroute IFR altitude (MEA). A number of commenters said that the proposed revision was somewhat simpler than the current rule but that it was still cumbersome. They suggested that it would be much simpler if criteria were established which would require the pilot to determine only that a certain ceiling and visibility would exist 1 hour before and 1 hour after the estimated time of arrival at the airport of first intended landing. Most commenters supported a ceiling of 2,000 feet above the airport elevation and 3 miles visibility. However, a number of commenters recommended ceilings of 2,500 and 3,000 feet and one commenter suggested a visibility of 4 miles. After further review, the FAA believes that, in the interest of simplicity, this proposal should be modified to require only a ceiling of 2,000 feet above the airport elevation and 3 miles visibility for the period 1 hour before and 1 hour after the estimated time of arrival at the first airport of intended landing.

Another commenter stated that the proposed rule would do little or nothing for safety and would be almost impossible to enforce. The FAA does not agree. The FAA believes that the amendment was designed to provide a simpler and less restrictive means for determining fuel requirements and that the amendment is enforceable.

Additionally, § 91.83(b) is amended to make the information required for a flight plan consistent with the ceiling and visibility requirements of § 91.23 as adopted. See proposal 6-16.

One commenter suggested that the word "applicable", as used in § 91.23(b)(2)(ii), should be explained. Since § 91.23, as adopted, deletes the reference "applicable visibility minimums", this no longer presents a problem. Section 91.23, as adopted, is revised accordingly.

Proposal 6-10. Current § 91.25(a)(2) requires an operational check of the VOR within the preceding 10 hours of flight time and within 10 days before flight. Proposed § 91.25(a)(2) and (d) would delete the 10-day requirement and predicate the VOR equipment check requirement on 10 hours of flight time. Numerous commenters pointed out that it would be inconsistent to refer to flight time in § 91.25(a)(2) and to refer, in § 91.25(d), to "tachometer time" and "aircraft time". A number of commenters suggested that only days be used as the guide and a period of 30 days to 90 days would be feasible considering the improved reliability of VOR equipment and the need to reduce the aircraft operator's recordkeeping burden. The FAA agrees. Accordingly, proposed § 91.25(a)(2) is revised to require that the VOR equipment be checked at least every 30 days rather than after 10 hours of flight time. Since § 91.25(a)(2), as adopted, no longer contains a reference to flight time, there is no longer a need to amend § 91.25(d) to require tachometer time, or, in its absence, aircraft time to date. Accordingly, these references are deleted. The FAA believes, after further consideration, that there would be no useful purpose in retaining a permanent record of the VOR equipment check. Therefore, the word "permanent" is deleted in both places where it appears in § 91.25(d) as adopted.

Proposal 6-11. Proposed § 91.29 would require the pilot in command of a civil aircraft to enter in the aircraft log and maintenance record of the aircraft any mechanical discrepancy noted during flight. The majority of commenters opposed the proposed amendment. They stated that the log and maintenance records are permanent records which should not be cluttered with discrepancies noted by the pilot, the term discrepancy is not defined and, as worded, the proposed amendment stipulates that the discrepancy must be entered in both the aircraft log and maintenance record. They also stated that the proposed rule is unenforceable, the proposed amendment would require the pilot/owners to write a note to themselves and persons operating under part 121, 123, 127, and 135 have established procedures for reporting mechanical irregularities.

After further review and careful consideration of all the comments, the FAA believes that the current regulations are adequate and proposed § 91.29 is withdrawn.

Proposal 6-12. This proposal would amend § 91.33(b)(12) to require safety

V 43 / 194
OCT 5 1978

belts to have metal to metal latching devices. See the discussion for proposal 6-1. One commenter called our attention to the fact that current § 91.33(b)(12) states "• • • approved seat belts for all occupants • • •" whereas the proposed amendment states "• • • for each occupant • • •". Since it was not our intention to make this change, the proposal has been amended to use the wording of the current rule.

Proposal 6-13. This proposal would amend § 91.36(b) to require that the equipment be tested to the maximum operating altitude of the aircraft. Almost all of the comments received were favorable. One commenter asked what is meant by maximum operating altitude and stated that a definition is needed somewhere. The definition is contained in §§ 23.1527, 25.1527, 27.1527, and 29.1527 which describe maximum operating altitude limitations. These limitations are also contained in the aircraft flight manual. The proposed amendment is adopted without change.

Proposal 6-14. Proposed § 91.45(a)(3)(ii) would allow a takeoff on a wet runway with one engine inoperative based solely on engineering findings. Several commenters objected to this proposal, contending that the initial approval must be based upon a demonstration under actual conditions. Other commenters stated that one engine inoperative takeoffs from a wet runway should not be allowed on the basis of analytical data alone. In view of these comments and after further review, this proposal is withdrawn.

Proposal 6-15. Proposed § 91.54(a)(2) would require a typed or printed name and address and the signature of the person responsible for operational control of large aircraft. Two commenters concurred with the proposal as written.

One commenter stated it was not necessary for the Government to regulate the manner in which a form is completed. The commenter further stated that, if the form is not completed in a manner acceptable to the FAA, it should be refused. The FAA believes that it should regulate the manner in which the form is completed and that the person making out the form should know in advance what is acceptable to the FAA. Accordingly, proposed § 91.54(a)(2) is adopted without substantive change.

Proposal 6-16. Proposed § 91.83(b), as adopted, makes the information required for a flight plan consistent with the ceiling and visibility requirements of amended § 91.23. See the discussion for proposal 6-9.

Proposal 6-17. The proposed change to § 91.193 would require a hand fire extinguisher in the passenger compartment of each airplane accommodating less than 31 passengers.

The commenters who opposed the rule change stated that the fire extinguisher would add unnecessary weight to the aircraft, would discharge all over the cabin when used, and would create a hazard if it became loose during turbulence. One commenter said that small airplanes which carry up to six passengers usually operate at lower altitudes and can, therefore, be landed readily if an in-flight fire starts.

Another commenter had never heard of an in-flight fire except an engine fire, and that a fire extinguisher in the cabin would be of no help in such a situation. In view of the comments and after review, this proposal is withdrawn.

Proposal 6-18. Proposed § 91.201(b) would require a sideward restraint for under seat baggage. Commenters who opposed the proposed amendment cited the installation costs, extra weight, and out-of-service time for installation of such restraining devices. The FAA believes the costs and added weight would be minimal and justified considering the improved safety provided. After further review, the FAA believes that the operator should be given additional time to install these restraint devices. Accordingly, this amendment provides a compliance date of 1 year from the effective date of this amendment. Since the operator has been given 1 year to make these installations, there should be little or no disruption of flight operations. Commenters also contended that since, in an emergency, most of the forces are forward, there is little tendency for the baggage to move sideward, and, in emergency evacuation demonstrations conducted by the airlines, items of mass placed in the aisle were found to create no delay. The FAA believes that these commenters limited their observations to crash landings where the motion would be forward. Severe turbulence may also create a potential hazard to passengers when large articles become dislodged. The FAA cannot agree that, in emergency evacuation demonstrations, items of mass cause no delay. They cause delay when placed in the aisles during evacuation tests to simulate actual conditions caused by unrestrained under seat items moving into the aisles during a crash landing. Several commenters in favor of the proposal stated that they had observed under seat baggage that moved sideward blocking the aisles during heavy turbulence or emergencies.

Accordingly, § 91.201(b) is adopted as proposed with the delayed compliance date as noted.

Proposal 6-19. The proposed deletion of § 91.207 is related to the proposal for a new § 91.22 (see the discussion for proposal 6-8) which would make the requirement for fuel reserves of 30 minutes for day VFR and 45 minutes for night VFR applicable to all airplanes operated under part 91. No commenters objected to the deletion of current § 91.207 if new § 91.22 is adopted. Since § 91.22 is adopted, § 91.207 is deleted.

Proposal 6-20. No opposing comments were received concerning proposed § 91.213(c). Accordingly, § 91.213(c) is adopted as proposed.

AMENDMENT TO § 121.417

Amendment No. 121-144 (43 FR 22643; May 25, 1978) amended the crewmember emergency training provisions of § 121.417 by requiring each crewmember to actually operate each item of equipment required for the deployment and use of emergency evacuation slides. However, as stated in notice No. 77-12 (42 FR 37417), while flight attendants would be required to operate the associated escape devices during initial and recurrent training, automatic and manual escape chutes need not be deployed each time that the associated exit is cycled.

However, since publication of amendment No. 121-144, it has come to the attention of the FAA that this amendment could be given an overly restrictive interpretation and that further clarification is necessary. Accordingly, this amendment revises § 121.417(c) to make it clear that the emergency drill requirements prescribed for crewmembers apply to both initial and recurrent training. Also, it more clearly specifies that each crewmember is not required to actually operate (removal, transfer, or inflation of the life raft, or slide/raft pack) the equipment specified in paragraphs (c)(6)(v), (c)(6)(vi), and (c)(6)(vii) during emergency drills. Additionally, this amendment clarifies the fact that the evacuation slide need be used only once during each training phase.

Finally, the phrase "or training device" has been inserted in §§ 121.417(c)(6) (v) and (vii) respectively to clarify the fact that the training specified may be conducted in a training device.

Since this amendment is relaxatory and clarifying in nature and does not impose a burden on the public, I find that notice and public procedure are unnecessary and this amendment may be made effective without notice.

AMENDMENT TO § 121.437

Amendment No. 121-144 (43 FR 22643; May 25, 1978) amended § 121.437(b) to require pilots to hold a category and class ratings appropriate for the type of aircraft being used. After the amendment to § 121.437(b) became effective, the FAA was informed by the Air Transportation Association (ATA) that this amendment would be extremely costly and very difficult for the airlines to comply within the specified time, as it would require the airlines to provide aircraft flight checks for more than 5,000 pilots to obtain the required category and class ratings. Consequently, the effective date of § 121.437(b) was extended to July 1, 1980, by amendment No. 121-146 (43 FR 28403; June 29, 1978).

In addition, ATA stated the training provided to pilots, other than pilots in command, under the provisions of part 121 and the proficiency checks requirements of § 121.441 are equivalent to the standards required for a commerical pilot to obtain an airplane category and class rating.

Accordingly, § 121.437(b) is amended to allow pilots who are currently employed by a certificate holder and have satisfactorily completed the approved training program under subpart O, including the proficiency flight check required by § 121.441, of this part, to be issued the appropriate category and class rating by presenting proof of compliance with those requirements to an Air Carrier or Flight Standards District Office. The FAA believes that this amendment would provide an equivalent level of safety.

To delay this amendment would pose an undue burden to the certificate holders and pilots affected by the amendment. For this reason, the FAA has determined notice and public procedure hereon are impractical and contrary to the public interest.

AMENDMENT TO § 121.439

Amendment No. 121-144 (43 FR 22643; May 25, 1978) amended § 121.439(c)(2) to require pilots to be currently qualified in another airplane of the same group prior to that pilot receiving recency of experience training in a visual simulator.

After further review, the FAA believes that this requirement is too restrictive in that it would not allow certificate holders that operate only one type of airplane in the same group to allow their pilots to use a visual simulator to reestablish recency of experience requirements, as it would be impossible for their pilots to be dual qualified, or currently qualified in another airplane of the same group. This amendment deletes § 121.439(c)(2) and allows use of the visual simulator to reestablish recency of experience requirements. As these changes are relaxatory and clarifying in nature and do not impose a burden on the public, notice and public procedure are unnecessary and these changes are adopted as noted.

ADOPTION OF THE AMENDMENTS

Accordingly, parts 23, 25, 27, 29, 91, and 121 of the Federal Aviation Regulations (14 CFR Parts 23, 25, 27, 29, 91, and 121 are amended as follows, effective December 4, 1978, except for § 121.417 which is effective September 29, 1978.

PART 23—AIRWORTHINESS STANDARDS; NORMAL, UTILITY, AND ACROBATIC CATEGORY AIRPLANES

1. By amending § 23.1413 by adding a new paragraph (c) to read as follows:

§ 23.1413 Safety belts and harnesses.

• • • • •

(c) Each safety belt must be equipped with a metal to metal latching device.

PART 25—AIRWORTHINESS STANDARDS; TRANSPORT CATEGORY AIRPLANES

2. By amending § 25.1413 by adding a new paragraph (d) to read as follows:

§ 25.1413 Safety belts.

• • • • •

(d) Each safety belt must be equipped with a metal to metal latching device.

PART 27—AIRWORTHINESS STANDARDS; NORMAL CATEGORY ROTORCRAFT

3. By amending § 27.1413 by adding a new paragraph (c) to read as follows:

§ 27.1413 Safety belts.

• • • • •

(c) Each safety belt must be equipped with a metal to metal latching device.

PART 29—AIRWORTHINESS STANDARDS; TRANSPORT CATEGORY ROTORCRAFT

4. By amending § 29.1413 by designating the current provision as paragraph (a) and by adding a new paragraph (b) to read as follows:

§ 29.1413 Safety belts; passenger warning device.

• • • • • •

(b) Each safety belt must be equipped with a metal to metal latching device.

PART 91—GENERAL OPERATING AND FLIGHT RULES

5. By amending § 91.14 by amending the heading; by redesignating paragraphs (a)(1) and (a)(2) as paragraphs (a)(2) and (a)(3) respectively; by amending paragraph (b) by deleting "(a)(2)" and substituting "(a)(3)"; and by adding a new paragraph (a)(1) to read as follows:

§ 91.14 Use of safety belts.

(a) Unless otherwise authorized by the Administrator—

(1) No pilot may take off a U.S. registered civil aircraft (except a free balloon that incorporates a basket or gondola and an airship) unless the pilot in command of that aircraft ensures that each person on board is briefed on how to fasten and unfasten that person's safety belt.

• • • • • •

6. By amending § 91.21 (a) and (b)(3) to read as follows:

§ 91.21 Flight instruction; simulated instrument flight and certain flight tests.

(a) No person may operate a civil aircraft (except a manned free balloon) that is being used for flight instruction unless that aircraft has fully functioning, dual controls. However, instrument flight instruction may be given in a single-engine airplane equipped with a single, functioning throwover control wheel, in place of fixed, dual controls of the elevator and ailerons, when:

(1) The instructor has determined that the flight can be conducted safely; and

(2) The person manipulating the controls has at least a private pilot certificate with appropriate category and class ratings.

(b) • • •

(3) Except in the case of lighter-than-air aircraft, that aircraft is equipped with fully functioning dual controls. However, simulated instrument flight may be conducted in a single-engine airplane, equipped with a single, functioning, throwover control wheel, in place of fixed, dual controls of the elevator and ailerons, when—

(i) The safety pilot has determined that the flight can be conducted safely; and

(ii) The person manipulating the control has at least a private pilot certificate with appropriate category and class ratings.

• • • • • •

7. By adding a new § 91.22 to read as follows:

V 43 / 194 OCT 5 1978

§ 91.22 Fuel requirements for flight under VFR.

(a) No person may begin a flight in an airplane under VFR unless (considering wind and forecast weather conditions) there is enough fuel to fly to the first point of intended landing and, assuming normal cruising speed—

(1) During the day, to fly after that for at least 30 minutes; or

(2) At night, to fly after that for at least 45 minutes.

(b) No person may begin a flight in a rotorcraft under VFR unless (considering wind and forecast weather conditions) there is enough fuel to fly to the first point of intended landing and, assuming normal cruising speed, to fly after that for at least 20 minutes.

8. By revising § 91.23 to read as follows:

§ 91.23 Fuel requirements for flight in IFR conditions.

(a) Except as provided in paragraph (b) of this section, no person may operate a civil aircraft in IFR conditions unless it carries enough fuel (considering weather reports and forecasts, and weather conditions) to—

(1) Complete the flight to the first airport of intended landing;

(2) Fly from that airport to the alternate airport; and

(3) Fly after that for 45 minutes at normal cruising speed.

(b) Paragraph (a)(2) of this section does not apply if—

(1) Part 97 of this subchapter prescribes a standard instrument approach procedure for the first airport of intended landing; and

(2) For at least 1 hour before and 1 hour after the estimated time of arrival at the airport, the weather reports or forecasts or any combination of them, indicate—

(i) The ceiling will be at least 2,000 feet above the airport elevation; and

(ii) Visibility will be at least 3 miles.

9. By revising § 91.25 (a)(2) and (d) to read as follows:

§ 91.25 VOR equipment check for IFR operations.

(a) • • •

(2) Has been operationally checked within the preceding 30 days and was found to be within the limits of the permissible indicated bearing error set forth in paragraph (b) or (c) of this section.

• • • • •

(d) Each person making the VOR operational check as specified in paragraph (b) or (c) of this section shall enter the date, place, bearing error, and sign the aircraft log or other record. In addition, if a test signal radiated by a repair station, as specified in paragraph (b)(1) of this section, is used, an entry must be made in the aircraft log or other record by the repair station certificate holder or the certificate holder's representative certifying to the bearing transmitted by the repair station for the check and the date of transmission.

10. By revising § 91.33(b)(12) to read as follows:

§ 91.33 Powered civil aircraft with standard category U.S. airworthiness certificates; instrument and equipment requirements.

• • • • •

(b) • • •

(12) Except as to airships, an approved safety belt for all occupants who have reached their second birthday. After December 4, 1980, each safety belt must be equipped with an approved metal to metal latching device. The rated strength of each safety belt shall not be less than that corresponding with the ultimate load factors specified in the current applicable aircraft airworthiness requirements considering the dimensional characteristics of the safety belt installation for the specific seat or berth arrangement. The webbing of each safety belt shall be replaced as required by the Administrator.

• • • • •

§ 91.36 [Amended]

11. By inserting the words "for altitudes from sea level to the maximum operating altitude of the aircraft" immediately before the semicolon and the word "or" at the end of § 91.36(b).

12. By revising § 91.54(a)(2) to read as follows:

§ 91.54 Truth in leasing clause requirement in leases and conditional sales contracts.

(a) • • •

(2) The name and address (printed or typed) and the signature of the person responsible for operational control of the aircraft under the lease or contract of conditional sale, and certification that each person understands that person's responsibilities for compliance with applicable Federal Aviation Regulations.

• • • • • •

13. By amending § 91.83(b) to read as follows:

§ 91.83 Flight plan; information required.

• • • • •

(b) *Exceptions to applicability of paragraph (a)(9) of this section.* Paragraph (a)(9) of this section does not apply if part 97 of this subchapter prescribes a standard instrument approach procedure for the first airport of intended landing and, for at least one hour before and one hour after the estimated time of arrival, the weather reports or forecasts or any combination of them, indicate—

(1) The ceiling will be at least 2,000 feet above the airport elevation; and

(2) Visibility will be at least 3 miles.

• • • • •

14. By revising § 91.201(b) to read as follows:

§ 91.201 Carry-on-baggage.

• • • • •

(b) Under a passenger seat in such a way that it will not slide forward under crash impacts severe enough to induce the ultimate inertia forces specified in § 25.561(b)(3) of this chapter, or the requirements of the regulations under which the airplane was type certificated. After December 4, 1979 restraining devices must also limit sideward motion of under-seat baggage and be designed to withstand crash impacts severe enough to induce sideward forces specified in § 25.561(b)(3) of this chapter.

§ 91.207 [Deleted]

15. By deleting § 91.207.

16. By amending § 91.213(c) to read as follows:

§ 91.213 Second in command requirements.

• • • • •

(c) No person may designate a pilot to serve as second in command nor may any pilot serve as second in command of an airplane required under this section to have two pilots, unless that pilot meets the qualifications for second in command prescribed in § 61.55 of this chapter.

"(or training device)" after the word "airplane".

5. By revising paragraph (c) to read as follows:

§ 121.417 Crewmember emergency training.

• • • • •

(c) Each crewmember must perform at least the following emergency drills and (except with respect to the equipment specified in paragraphs (c)(6)(v), (c)(6)(vi), and (c)(6)(vii) of this paragraph) actually operate the following emergency equipment during initial training and once each 24 calendar months during recurrent training on each type aircraft in which they are to serve. Each crewmember is only required to participate in one emergency evacuation using a slide during initial training and each 24 calendar months during recurrent training. (Alternate recurrent periods required by § 121.433(c) may be accomplished by approved pictorial presentation or demonstration).

• • • • •

18. By revising § 121.437(b) to read as follows:

§ 121.437 Pilot qualification: certificates required.

• • • • •

(b) After July 1, 1980, no certificate holder may use nor may any pilot act as a pilot in a capacity other than those specified in paragraph (a) of this section unless the pilot holds at least a commercial pilot certificate with appropriate category and class ratings for the aircraft concerned, and an instrument rating. Notwithstanding the requirements of §§ 61.63 (b) and (c), until July 1, 1980, a pilot who is currently employed by a certificate holder and meets applicable training requirements of subpart O, and the proficiency check requirements of § 121.441 of this part, may be issued the appropriate category and class ratings by presenting proof of compliance with those requirements to an Air Carrier or Flight Standards District Office.

§ 121.439 [Amended]

19. By amending § 121.439 as follows:

1. By deleting paragraph (c)(2).

2. By renumbering paragraph (c)(3) as (c)(2).

3. By inserting "(c)(2)" in place of "(c)(3)" in paragraph (d).

(Secs. 313, 314, and 601 through 610 of the Federal Aviation Act of 1958 (49 U.S.C. 1354, 1355, and 1421 through 1430) and section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).)

Issued in Washington, D.C., on September 28, 1978.

LANGHORNE BOND,
Administrator.

[FR Doc. 78-27963 Filed 10-4-78; 8:45 am]

PART 121—CERTIFICATION AND OPERATIONS: DOMESTIC, FLAG AND SUPPLEMENTAL AIR CARRIERS AND COMMERCIAL OPERATORS OF LARGE AIRCRAFT

17. By amending § 121.417 effective September 29, 1978 as follows:

1. By amending paragraph (c)(1) by deleting the words "and use of" and substituting the words "of the".

2. By amending paragraph (c)(4) by adding at the end the words "including the use of a slide."

3. By amending paragraphs (c)(6)(vii) by deleting the word "aircraft" and substituting the word "airplane".

4. By amending paragraphs (c)(6)(v) and (c)(6)(vii) by adding the phrase

TRANSPORT CATEGORY AIRPLANES

Fatigue Regulatory Review Program Amendments

V 43 / 194
OCT 5 78

[4910-13]

Title 14—Aeronautics and Space

CHAPTER I—FEDERAL AVIATION ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket No. 16280; Amdt. No. 25-45]

PART 25—AIRWORTHINESS STANDARDS: TRANSPORT CATEGORY AIRPLANES

Fatigue Regulatory Review Program Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The purpose of these amendments is to improve and update the airworthiness standards applicable to the type certification of transport category airplanes by revising the structural fatigue evaluation requirements. These revisions take into account state-of-the-art developments and accumulated service experience.

DATES: Effective date—December 1, 1978.

FOR FURTHER INFORMATION CONTACT:

Adolfo O. Astorga, Airworthiness Review Branch (AFS-910), Flight Standards Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591; telephone 202-755-8714.

SUPPLEMENTARY INFORMATION: During recent years, there have been significant state-of-the-art and industry-practice developments in the area of structural fatigue and fail-safe-strength evaluation of transport category airplanes. Recognizing that these developments could warrant some revision of existing fatigue requirements contained in §§ 25.571 and 25.573 of part 25 of the Federal aviation regulations, the FAA, on November 18, 1976, gave notice of its transport category airplane fatigue regulatory review program and invited interested persons to submit proposals to amend those requirements (see 41 FR 50956). Subsequently, the FAA convened a Transport Category Airplane Fatigue Regulatory Review Conference during March 15-17, 1977, in Arlington, Va., to obtain the views of all concerned on the proposals submitted for the review.

Participants in the Review Conference discussed the proposals submitted for the review. Those proposals and the related discussions formed the basis for the FAA's belief that a comprehensive revision of the structural fatigue evaluation standards of §§ 25.571 and 25.573 was warranted. To that end, on August 9, 1977, the FAA issued notice 77-15 (42 FR 41236; Aug. 15, 1977) which proposed regulatory changes directed at upgrading and improving those standards. These amendments are based on that notice.

Interested persons have been afforded an opportunity to participate in the making of these amendments and due consideration has been given to all matters presented. The more significant comments received in response to notice 77-15 are discussed below. A number of substantive, editorial, and clarifying changes have been made to the proposed rules based on relevant comments received and on further review within the FAA. Except for minor editorial and clarifying changes and the changes discussed below, these amendments and the reasons for their adoption are the same as those contained in notice 77-15.

Discussion of General Comments

Sixteen comments were received in response to notice 77-15. Several of the commenters were associations that presented the views of manufacturers and air carriers. In general the commenters concerned themselves with those areas of the proposal they believed could be improved and they raised no objection to the basic concept of the proposal.

Two commenters recommended that full-scale fatigue tests of the whole airplane structure be required, so as to insure reliable identification of those locations and detail design points at which a fatigue failure, if not detected in time, could cause catastrophic failure of the airplane. The FAA disagrees. Although full-scale testing can be useful in predicting possible locations of fatigue failures, the test results do not always correlate with service experience because of differences in the loading spectrum, varying environmental conditions, scatter in the test data, and unpredictable operational effects. Under the rules being adopted the manufacturer is required to: (1) Determine the probable locations and modes of damage due to fatigue, corrosion, and accidental damage; (2) support that determination by tests on either the whole structure or components of the structure and by reference (as applicable) to previous operational experience; and (3) establish a related inspection program. This practice has been used successfully in the past.

A commenter recommended that the applicant be required to determine the "time to first failure" of critical structural components, and to establish information on the frequency, extent, and methods of inspection, by repeating the fatigue test program on an appropriate number of identical samples of those components and by employing probabilistic evaluation and risk analysis. The FAA recognizes that this procedure may be necessary for some critical safe-life components but not for those evaluated by means of the damage-tolerance approach covered in this amendment. Damage-tolerance (fail-safe) evaluations take into account the possibility that structural damage can occur due to causes other than classical fatigue (for example: Corrosion, foreign-object impact, and maintenance errors) and recognizes that this damage can be detected before catastrophic failure by an adequate inspection procedure. The frequency, extent, and methods of inspection are determined by repeated load analyses and tests (including a statistical approach where necessary), by fracture mechanics analyses and tests, and by reference to service experience.

The same commenter, referring to damage-tolerance evaluation tests, suggested that such tests should be carried out to final failure to demonstrate the residual strength of the remaining structure and that the loading conditions for this purpose should take into account the effects of structural flexibility, the rate of loading, and the most unfavorable expected temperature in heavy gusts. This commenter also contended that simulation of cracks artificially should not be allowed since this method would predetermine the location of failure and would in many cases indicate a greater residual strength than a genuine fatigue crack. The FAA does not agree with these comments. The nature and extent of tests on complete structure, or on portions of the primary structure, will depend upon applicable previous design, construction, tests, and service experience. If previous experience with similar structure is available, an analytical approach rather than tests may be sufficient to show adequate residual strength. The applicant is required in either event to take into account the factors mentioned by the commenter. For example, § 25.571(a)(1)(i) of this amendment requires that each evaluation include the "typical loading spectra, temperatures, and humidities expected in service." And § 25.571(b) of this amendment requires that "if significant changes in structural stiffness or geometry, or both, follow from a structural failure, the effect on damage-tolerance must be further investigated." Concerning the matter of simulating cracks artificially, the FAA has found from past experience that it may not be practical to produce actual fatigue cracks. Artificial crack simulation has proven satisfactory in the past.

In addition, the commenter, referring to the proposed requirements for damage-tolerance (fail-safe) evaluation, contended that the pilot should be instantaneously warned of the occurrence of a failure of a single principal structural element, because no hidden strength reserves are required. The FAA questions whether the crack detection and monitoring system that would be needed for this purpose could be relied upon to detect all critical damage. In any event, the FAA believes such a warning system is unnecessary, for the following reasons. This amendment specifies a residual static strength level of 100 percent of limit load (up from the previously prescribed 80 percent) and requires residual repeated load strength consistent with crack growth analysis and with the anticipated inspection program, thereby raising the level of safety for structure in a "damaged" condition. Structure designed to these requirements remains capable of supporting static limit loads after partial failure until the failure is detected, since those loads are the maximum loads expected to occur in service. In addition, to account for the fatigue spectrum, the damage-tolerance evaluation must incorporate repeated load and static analyses supported by test evidence. On the basis of past experience, the FAA believes that these requirements provide an adequate level of safety when combined with a sound inspection program that insures detection of damage before catastrophic failure occurs.

Several commenters objected to the use of mandatory language in proposed appendix H contending that it was inconsistent with statements in the notice preamble, and in proposed § H25.1 of the appendix, that the appendix contained guidance material and that deviations from this guidance material may be necessary to take into account new design features and methods of fabrication, new evaluation approaches, and new configurations. The FAA agrees in principle with these comments. However, with the removal of the mandatory language objected to by the commenters, the proposed appendix would not be regulatory in nature. Placement in the Federal aviation regulations would therefore not be appropriate. In this connection, the FAA's advisory circular system is an effective vehicle for providing guidance information to the public relating to regulatory matters. Accordingly, proposed appendix H, with mandatory language removed and with additional changes as discussed below, is being issued concurrently with this amendment in the form of a new advisory circular. A reference to the new advisory circular is included in § 25.571(a), as adopted, and copies of the advisory circular may be obtained from U.S. Department of Transportation, Publications Section M443.1, Washington, D.C. 20590.

Discussion of Specific Comments

§ 25.571(a)

Several commenters objected to the wording of the first sentence of proposed § 25.571(a), contending that it would impose an absolute requirement that would be impossible to comply with. The purpose of the proposal was to establish an evaluation requirement rather than an absolute requirement for the strength, detail design, and fabrication of the airframe structure. Based on the comments, the first and second sentences of proposed § 25.571(a), as adopted, are revised to make this clear.

A commenter suggested that the term "engine mounting" be added to the examples of structure listed (in parentheses) in the second sentence of proposed § 25.571(a) since it is an important structural element that should be considered. The FAA agrees, and this change is incorporated in the adopted rule. In addition, the word "including" inside the parentheses is changed to "such as" to make it clearer that the structural elements listed are examples only.

A commenter objected to the sonic fatigue evaluation requirement in the third sentence of proposed § 25.571(a), contending that while such an evaluation is necessary for turojet-powered airplanes there has been no service experience indicating that it is also necessary for turbopropeller-powered airplanes. The FAA agrees. Based on a reevaluation of the information available to the FAA, the term "turbine-engine-powered" in the third sentence of proposed § 25.571 (fourth sentence as adopted) is changed to "turbojet-powered."

Several commenters objected to proposed § 25.571(a)(3) on the grounds that: (1) The required inspection or other procedures to prevent catastrophic failure are best developed after type certification by the combined efforts of the FAA, the manufacturers, and the operators, using the Maintenance Review Board (MRB) process described in advisory circular AC 121-22; and (2) if the inspection and other procedures were to be established as a certification requirement, operators would find it burdensome to have them adjusted in the light of operational experience after an airplane enters service. The FAA firmly believes that in this critical safety area (involving measures to prevent catastrophic failure) the initial set of inspection and other procedures must be established by the manufacturer under a type certification requirement. Since the manufacturer conducts the evaluation tests and analyses upon which those procedures must be based, it is appropriate that he take prime responsibility for establishing them. However, there is nothng in proposed § 25.571(a)(3) that would prevent later adjustments of the established inspection, or other procedures, based on operational experience after type certification. See also the related discussion under proposed appendix § H25.2(h). Accordingly, proposed § 25.571(a)(3) is adopted without change.

§ 25.571(b)

A commenter noted that the parenthetical term "(fail-safe)" in the title of proposed § 25.571(b) is not a synonym for "damage-tolerance." The FAA used the term "(fail-safe)" in the title merely to indicate that this was the previously accepted evaluation method. Some fail-safe design features may still be incorporated in a damage-tolerance approach. The term "(fail-safe)" is therefore retained in the title.

The same commenter recommended that the phrase "test evidence and service experience" in the second sentence of proposed § 25.571(b) be changed to "test evidence or service experience," contending that the proposed language would prevent designers from doing anything new. The FAA's intent is to require that the analysis be supported by test evidence in every instance and (if available) by service experience. To make this intent clear, the parenthetical phrase "(if available)" is inserted before the term "service experience" in the adopted rule.

The commenter also objected to the third sentence of proposed § 25.571(b) on the ground that it limits the concern to prior fatigue exposure only. No change to the proposal is being made based on this comment since the FAA believes the proposed language adequately reflects the intent.

In addition, the commenter contended that the fourth and fifth sentences of proposed § 25.571(b) were not sufficiently specific and suggested a general revision of the proposed language. The FAA does not agree. The FAA believes that the proposed language is clear and expresses the intent accurately.

Another commenter suggested that the words "at V_c" in proposed § 25.571(b)(1) be changed to "up to V_c", contending that maneuvers at speeds lower than V_c should also be covered. The FAA believes that the words "at V_c" provide for a realistic and adequate condition for residual strength evaluation that is consistent with a similar loading condition applied under the rule being amended.

This commenter also suggested that proposed § 25.571(b)(2) be revised to

V 4 3 / 1 9 4
OCT 5 78

insure that dynamic effects are covered for gust conditions. The FAA believes that the gust conditions in proposed § 25.571(b)(2), which are similar to those applied under the rule being amended, are adequate for residual strength evaluations.

In addition, the commenter noted that § 25.351(a), which is referenced in proposed § 25.571(b)(4), does not specify yaw maneuvers at speeds above V_A and suggested a revision to specify such maneuvers. The FAA, in airworthiness review notice No. 75-26 (40 FR 24802, June 10, 1975) has proposed changing the V_A in current § 25.351(a) to V_B. This issue will be considered as part of the airworthiness review program.

A commenter suggested that the term "normal operating pressure" used in proposed §§ 25.571(b)(5) (i) and (ii) be changed to "normal operating differential pressure" because it is more precise and is used elsewhere in part 25. The FAA agrees, and this change is incorporated in §§ 25.571(b)(5) (i) and (ii) as adopted.

A commenter recommended that the 1.1 factor in proposed § 25.571(b)(5)(ii) be changed to 1.15 to be consistent with existing design practice based on the present Federal Aviation regulations, and to cover variations in strength due to material properties and undetected corrosion. The FAA disagrees. The only purpose of the 1.1 factor is to take into account pressure relief valve tolerances. Material variations are covered elsewhere in the regulations. The FAA does not believe an increase to 1.15 is justifiable.

Two commenters suggested revisions to the flush paragraph at the end of proposed § 25.571(b) to make clear which effects are to be considered. The FAA believes that the proposed language adequately covers the range of effects to be considered.

§ 25.571(c)

Several commenters noted the typographical error in the title of proposed § 25.571(c). The parenthetical term "(safe-fail)" should be "(safe-life)." This error is corrected in the final rule.

A commenter objected to proposed § 25.571(c) on the ground that it would give the FAA new powers to overrule the manufacturer's judgement as to whether it would be impractical, for a given structure, to comply with the damage-tolerance requirements of proposed § 25.571(b). Under the rules being amended, the commenter noted, the manufacturer has the option of selecting either the "safe-life" or "fail-safe" approach. The FAA has considered this comment; however, service experience has shown conclusively that the damage-tolerance (fail-safe) approach is more reliable than the safe-life approach, particularly since the safe-life approach does not take into account the probability of damage due to foreign-object impact, corrosion, or improper maintenance. The FAA firmly believes that safety is best served by requiring the manufacturer to use the damage-tolerance approach unless he shows to the FAA's satisfaction that it would be impractical to do so.

Several commenters pointed out that the third sentence of proposed § 25.571(c) would improperly allow cracking to occur. The FAA agrees. As noted by the commenters, the intent of the proposal was to require that the structure be able to withstand the repeated loads of variable magnitude expected during its service life without detectable cracks. Accordingly, in the adopted rule, the third sentence of proposed § 25.571(c) is deleted, and the words "without detectable cracks" are added to its second sentence for clarification. One of these commenters suggested that the last sentence of proposed § 25.571(c) also be deleted since it is covered in the proposed appendix. The FAA believes that this sentence is necessary in the basic rule as well as in associated guidance material.

A commenter contended that proposed § 25.571(c) omitted a key requirement—that no reduction in strength be allowed. The FAA disagrees. Experience with transport airplane structure and materials has shown that there is no significant reduction in ultimate strength due to repeated load application unless detectable cracks have developed. Therefore, if it is shown that no detectable cracks will be initiated during the service life of the structure, the FAA considers that no reduction in ultimate strength will occur.

§ 25.571(d)

No adverse comments were received concerning proposed § 25.571(d). Accordingly, § 25.571(d) is adopted as proposed.

§ 25.571(e)

A commenter objected to proposed § 25.571(e), contending that it would be impossible to obtain a type certificate for a propeller-driven airplane under its provisions. This commenter stated that it is difficult to imagine designing airplanes strong enough to withstand a 200- to 300-pound propeller, or even a single propeller blade, coming loose and crashing through the fuselage. The FAA believes that a transport category airplane making use of structural design features such as slow crack growth, crack arrestment, and multiple-load-path construction, can be designed for discrete source damage, including propeller impact damage. This would require that the structure withstand the static loads expected during completion of the flight (on which the impact damage occurred). The extent of the damage would be determined on the basis of a rational assessment of operational experience and potential damage. The FAA has no reason to believe that designers of propeller-driven airplanes would not be able to comply with proposed § 25.571(e), as adopted.

Another commenter expressed concern lest interpretation of proposed § 25.571(e), insofar as it would apply to structural damage caused by propeller blade impact, might discourage the development of new advanced turboprop airplanes and, therefore, would not be in the public interest. The FAA anticipates no interpretation problem in administering § 25.571(e), as adopted, and has no reason to believe that designers of turboprop airplanes would not be able to comply with its provisions.

A commenter recommended that proposed § 25.571(e) be deleted on the ground that each of the items listed in subparagraphs (1) through (4) necessitates special consideration of the circumstances under which the event arises and that they therefore warrant separate treatment in the regulations, as is done currently in part 25. Moreover, this commenter contended, no detailed justification has been provided for proposed § 25.571(e), which in general represents an increase in severity over current regulations. The FAA believes that it is appropriate to consider the items in subparagraphs (1) through (4) together since the concern in each instance is the probability of structural damage. The need for these requirements is dictated by service experience. Modern damage-tolerance (fail-safe) techniques, such as slow crack growth, crack arrestment, and multiple-load-path construction, make it possible to provide a capability of surviving discrete source damage.

A commenter suggested that proposed § 25.571(e) be transferred to subpart D of part 25 since it covers more than structural implications. The FAA disagrees. The intent is to cover only the structural implications of the listed impacts and failures, as the proposed language makes clear. The FAA is concerned here only with structural damage.

A commenter considered that the word "likely" in the lead-in of proposed § 25.571(e) was not necessary. The FAA disagrees. The word "likely" has a substantive probability connotation in this context.

Two commenters noted that the bird strike condition in proposed § 25.571(e)(1) is different from those in current §§ 25.631 and 25.775, and one commenter suggested they be made

consistent. The FAA believes there may be merit in this suggestion but does not have sufficient information, at this time, on which to base any revision of current §§ 25.631 and 25.775. The FAA believes, however, that proposed § 25.571(e)(1) is a realistic condition for structural damage assessment in general.

A commenter suggested that the sources of structural damage listed in proposed § 25.571(e) include "faulty maintenance" and "faulty operation." The FAA disagrees. Likely sources of this kind are considered during damage-tolerance (fail-safe) evaluation.

A commenter suggested that the word "static" in the first sentence of the flush paragraph at the end of proposed § 25.571(e) is unnecessary and should be deleted. The FAA disagrees, since the word "static" is necessary to describe the internal ultimate design loads expected to occur.

Several commenters objected to the third sentence of the flush paragraph at the end of proposed § 25.571(e), contending that dynamic effects are adequately taken into account when determining the likely structural damage caused by the listed discrete-source impacts and failures and the magnitude of the static loads that would subsequently occur in flight. The FAA agrees, and the flush paragraph in the adopted rule is revised to make this point clear.

Two commenters suggested revisions to the last sentence of the flush paragraph at the end of proposed § 25.571(e) to make clear which effects are to be considered. The FAA believes the proposed language adequately covers the range of effects to be considered.

§ 25.573

There were no adverse comments on the proposal to delete § 25.573. Accordingly, § 25.573 is deleted.

§ 25.629(d)(4)(v)

A commenter, noting that the proposed amendment to § 25.629(d)(4)(v) referred only to proposed § 25.571(b), suggested that it also refer to proposed § 25.571(e), which could have an effect not only on flutter but also on handling characteristics. The FAA disagrees. The intent of proposed § 25.571(e) is to insure that the airplane, after receiving discrete-source damage, has sufficient residual static strength capability to successfully complete the flight. Evaluating flutter and handling characteristics goes beyond that intent.

APPENDIX H

As discussed previously, proposed appendix H is being adopted in the form of a new advisory circular. In addition to removing the inappropriate mandatory language proposed in the appendix, a number of changes have been incorporated based on the comments received and further review. Those comments and changes are discussed below.

APPENDIX H, § H25.1

A commenter suggested that the first sentence of the second lead-in paragraph of proposed § H25.1 be revised to allow the consideration of "good design practice" in determining whether an effective damage-tolerant structure can be achieved. The FAA agrees and the suggested change is incorporated in the new advisory circular.

A commenter suggested that "engine mounts" be added to the examples given in the last sentence of the second lead-in paragraph of proposed § H25.1 since it is not only in the attachments of these structures that difficulties may be experienced in achieving damage-tolerant designs. The FAA agrees, and this change is incorporated in the new advisory circular.

A commenter objected to the phrase "at critical regions in" as used in the first sentence of proposed § H25.1(c) because if stresses are of low order, the regions could hardly be called "critical." The FAA agrees, and in the new advisory circular the phrase "in specific regions of" is substituted for "at critical regions in".

A commenter objected to the reference to "probability" in the first sentence of proposed § H25.1(c), contending that it has an unfavorable connotation. The FAA disagrees. The use of probability terminology is appropriate in this context. However, the language in this sentence is editorially revised in the new advisory circular without substantive change.

A commenter noted that the words "tensile area" (modifying "cutouts") in the second sentence of proposed § H25.1(c) tend to restrict attention inappropriately since cutouts in shear and compression areas also warrant attention. The FAA agrees, and the words "tensile area" are deleted in the new advisory circular.

Two commenters contended that it was not always possible to complete the repeated load tests necessary to show compliance with the damage-tolerance evaluation requirements in proposed § 25.571(b) within a reasonable time. This would lead, it was asserted, to a burdensome and costly delay in obtaining type certificates for airplanes. One of these commenters suggested that proposed § H25.1(c) be revised so that an applicant can obtain the type certificate without having completed those tests if the applicant substantiates at least 1 year of safe operation. The other commenter suggested that a somewhat similar provision be added to proposed § H25.2(g). The FAA believes that the circumstances described by these commenters will occur only rarely and that the need for the suggested relief (and the proper extent of that relief) can only be judged on the merits of each individual case. For these reasons, the FAA believes that it would be inappropriate to incorporate the revision suggested. Instead, the FAA will consider requests for relief on an individual basis.

APPENDIX H, §§ H25.2 (a), (b), AND (c)

A commenter asserted that proposed §§ H25.2(a) (1), (2), and (3) were essentially variations of the same proposal and should be combined in a single general statement. The FAA agrees, and proposed §§ H25.2(a). (1), (2), and (3) are revised accordingly and appear in a combined form in the new advisory circular.

A commenter stated that, in the lead-in sentence of proposed § H25.2(a)(6), the phrase "due to fatigue" rules out concern for corrosion damage, and the phrase "high life conditions" is not a useful concept. This commenter suggested that the lead-in be revised to read: "Provision to limit the probability of concurrent multiple damage, particularly after long service, which could conceivably contribute to a common fracture path. Examples of such multiple damage are;". The FAA agrees and proposed § H25(a)(6), as contained in the new advisory circular, incorporates this change.

A commenter objected to proposed § H25.2(a)(6)(i), contending that the word "initial" implies the cracks were present when the structure was built, and that the phrase "each of which being less than the minimum detectable length" was unnecessarily restrictive, since cracks that small are not likely to cause major concern. The commenter suggested that proposed § H25.2(a)(6)(i) be revised to read "A number of small cracks which might coalesce to form a single long crack." The FAA believes the suggested language clarifies the intent. The new advisory circular incorporates this language.

The same commenter objected to proposed § H25.2(a)(6)(ii), contending that the word "initial" here implies the failure was built in and that the phrases "following an initial failure" and "due to redistribution of loading" should be in reverse order to avoid confusion. The commenter suggested that proposed § H25.2(a)(6)(ii), be revised to read "Failures, or partial failures, in adjacent areas due to the redistribution of loading following a failure of a single element." The FAA

V 4 3 / 1 9 4

0 C 5 7 8

agrees, and this language is used in the new advisory circular.

This commenter also objected to proposed § H25.2(c), contending that it deals with several reasonably simple concepts in a complex, obscure way. A specific revision was suggested. The FAA believes that the intent of this paragraph is clear as proposed.

APPENDIX H, §§ H25.2 (d), (e), AND (f)

A commenter suggested that the last sentence of proposed § H25.2(d) be placed at the beginning of the paragraph and revised (to emphasize the preference for damage-tolerance evaluation to read: "Every reasonable effort should be made to ensure inspectability of all structural parts, and to qualify them under the damage-tolerance provisions." The FAA agrees, and the suggestion has been followed in the new advisory circular. This change also responds to another commenter who suggested several changes to proposed § H25.2(d) which were aimed at emphasizing the preferability of avoiding completely uninspectable areas.

A commenter noted that in proposed § H25.2(e) the words "damage" and "failure," which were apparently intended to be synonymous, convey separate concepts. The FAA agrees, and in the new advisory circular the sentence is clarified.

APPENDIX H, §§ H25.2 (g) AND (h)

A commenter recommended a general revision of the lead-in paragraph of proposed § H25.2 (g), contending that: (1) The phrase "damage extent for residual strength" should convey a different idea than it does in proposed § H25.2(c); (2) the phrase "the time at which the damage becomes initially detectable" is not quite accurate since "initially detectable" implies a much smaller dimension than is likely to be appropriate; and (3) the second sentence appears to be a rather academic requirement. The FAA disagrees. The intent of proposed § H25.2(g) is to identify damage-tolerance criteria (analytical and test) with respect to residual strength, damage growth rate, inspection programs, repeated loads, damage-tolerance characteristics, and discrete source damage. The FAA believes this intent is clear in the language proposed. However, based in part on a comment concerning proposed §§ H25.2(g) (1), (2), and (3), the FAA believes that proposed § H25.2(g) (2) would be clearer if it read "By demonstrating that the damage would be detected before it reaches the value for residual strength evaluation." In addition, based on a review of proposed § H25.2(g)(3), the FAA believes that the previously verified design should also have a similar configuration. These changes are incorporated in the new advisory circular.

Two commenters suggested a revision to make it clear that the applicant can use any one of the methods listed in §§ H25.2(g) (1), (2), and (3) for showing damage-tolerance characteristics. The FAA agrees, and appropriate changes are incorporated in the new advisory circular.

A commenter suggested that a provision be added to proposed § H25.2(g) to enable an applicant to obtain a type certificate without having completed the repeated load tests necessary to support damage-tolerance evaluation (where practical) of structure. For a discussion of this and a similar suggestion submitted by another commenter, see the preamble discussion for proposed § H25.1.

A commenter agreed with proposed § H25.2(h), but suggested that it should contain a factor on inspection intervals to allow for scatter in structural behavior, operational usage, and inspection reliability. The FAA recognizes that the inspection interval should be conservative, but believes that it would be inappropriate to prescribe a specific factor. It is preferable that the factor be established by the manufacturer after all contributing parameters have been considered. Final approval would be by the FAA.

Several commenters objected to the last sentence of proposed § H25.2(h), contending that it should mention (as an example of a document that provides for revision as a result of operational experience) the operator's FAA-approved structural inspection program developed through the Maintenance Review Board (MRB) procedures for part 121 operators. The FAA agrees, and the new advisory circular references the MRB-generated programs. In addition, a reference to § 25.571(a)(3) is also added.

APPENDIX H, § H25.3

A commenter objected to the reference to "probability" in the first sentence, contending that it has an unfavorable connotation. The FAA disagrees. The use of probability terminology is appropriate in this context. However, the language in this sentence is editorially revised in the new advisory circular, without substantive change, for consistency with similar provisions elsewhere.

A commenter suggested that the words "consideration of" in the third sentence of proposed § H25.3(a) should be deleted. With the elimination of the mandatory language from the proposed appendix, these words are superfluous. They do not appear in the new advisory circular.

Three commenters objected to the phrase "to prevent catastrophic failure" in proposed § H25.3(a)(5). The FAA believes that the intent of proposed § H25.3(a) is adequately expressed in general terms in the first sentence of proposed § H25.3(a), and that this intent need not be repeated in § H25.3(a)(5). An appropriate revision is contained in the new advisory circular.

A commenter, referring to proposed § H25.3(c)(5), suggested that FAA specify approved methods and procedures (for rework or repair of the structure) that might gain further life. The FAA disagrees, since this suggestion, if adopted, would tend to unnecessarily dictate design.

ADOPTION OF THE AMENDMENT

Accordingly, part 25 of the Federal Aviation regulations (14 CFR Part 25) is amended as follows, effective December 1, 1978:

1. By revising § 25.571 to read as follows:

§ 25.571 Damage tolerance and fatigue evaluation of structure.

(a) *General.* An evaluation of the strength, detail design, and fabrication must show that catastrophic failure due to fatigue, corrosion, or accidental damage, will be avoided throughout the operational life of the airplane. This evaluation must be conducted in accordance with the provisions of paragraphs (b) and (e) of this section, except as specified in paragraph (c) of this section, for each part of the structure which could contribute to a catastrophic failure (such as wing, empennage, control surfaces and their systems, the fuselage, engine mounting, landing gear, and their related primary attachments). Advisory Circular AC No. 25.571-1 contains guidance information relating to the requirements of this section (copies of the advisory circular may be obtained from U.S. Department of Transportation, Publications Section M443.1, Washington, D.C. 20590). For turbojet-powered airplanes, those parts which could contribute to a catastrophic failure must also be evaluated under paragraph (d) of this section. In addition, the following apply:

(1) Each evaluation required by this section must include—

(i) The typical loading spectra, temperatures, and humidities expected in service;

(ii) The identification of principal structural elements and detail design points, the failure of which could cause catastrophic failure of the airplane; and

(iii) An analysis, supported by test evidence, of the principal structural elements and detail design points identified in paragraph (a)(1)(ii) of this section.

(2) The service history of airplanes of similar structural design, taking due account of differences in operating conditions and procedures, may be used in the evaluations required by this section.

(3) Based on the evaluations required by this section, inspections or other procedures must be established as necessary to prevent catastrophic failure, and must be included in the maintenance manual required by § 25.1529.

(b) *Damage-tolerance (fail-safe) evaluation.* The evaluation must include a determination of the probable locations and modes of damage due to fatigue, corrosion, or accidental damage. The determination must be by analysis supported by test evidence and (if available) service experience. Damage at multiple sites due to prior fatigue exposure must be included where the design is such that this type of damage can be expected to occur. The evaluation must incorporate repeated load and static analyses supported by test evidence. The extent of damage for residual strength evaluation at any time within the operational life must be consistent with the initial detectability and subsequent growth under repeated loads. The residual strength evaluation must show that the remaining structure is able to withstand loads (considered as static ultimate loads) corresponding to the following conditions:

(1) The limit symmetrical maneuvering conditions specified in § 25.337 at V_C and in § 25.345.

(2) The limit gust conditions specified in §§ 25.341 and 25.351(b) at the specified speeds up to V_C, and in § 25.345.

(3) The limit rolling conditions specified in § 25.349 and the limit unsymmetrical conditions specified in §§ 25.367 and 25.427, at speeds up to V_C.

(4) The limit yaw maneuvering conditions specified in § 25.351(a) at the specified speeds up to V_C.

(5) For pressurized cabins, the following conditions:

(i) The normal operating differential pressure combined with the expected external aerodynamic pressures applied simultaneously with the flight loading conditions specified in paragraphs (b) (1) through (4) of this section, if they have a significant effect.

(ii) The expected external aerodynamic pressures in 1 g flight combined with a cabin differential pressure equal to 1.1 times the normal operating differential pressure without any other load.

(6) For landing gear and directly-affected airframe structure, the limit ground loading conditions specified in §§ 25.473, 25.491, and 25.493.

If significant changes in structural stiffness or geometry, or both, follow from a structural failure, or partial failure, the effect on damage tolerance must be further investigated.

(c) *Fatigue (safe-life) evaluation.* Compliance with the damage-tolerance requirements of paragraph (b) of this section is not required if the applicant establishes that their application for particular structure is impractical. This structure must be shown by analysis, supported by test evidence, to be able to withstand the repeated loads of variable magnitude expected during its service life without detectable cracks. Appropriate safe-life scatter factors must be applied.

(d) *Sonic fatigue strength.* It must be shown by analysis, supported by test evidence, or by the service history of airplanes of similar structural design and sonic excitation environment, that—

(1) Sonic fatigue cracks are not probable in any part of the flight structure subject to sonic excitation; or

(2) Catastrophic failure caused by sonic cracks is not probable assuming that the loads prescribed in paragraph (b) of this section are applied to all areas affected by those cracks.

(e) *Damage-tolerance (discrete source) evaluation.* The airplane must be capable of successfully completing a flight during which likely structural damage occurs as a result of—

(1) Impact with a 4-pound bird at likely operational speeds at altitudes up to 8,000 feet;

(2) Propeller and uncontained fan blade impact;

(3) Uncontained engine failure; or

(4) Uncontained high energy rotating machinery failure.

The damaged structure must be able to withstand the static loads (considered as ultimate loads) which are reasonably expected to occur on the flight. Dynamic effects on these static loads need not be considered. Corrective action to be taken by the pilot following the incident, such as limiting maneuvers, avoiding turbulence, and reducing speed, must be considered. If signficant changes in structural stiffness or geometry, or both, follow from a structural failure or partial failure, the effect on damage tolerance must be further investigated.

§ 25.573 [Reserved]

2. By deleting § 25.573 and marking it "[Reserved]."

§ 25.629 [Amended]

3. By amending § 25.629(d)(4)(v) by deleting "§ 25.571(c)" and inserting in its place "§ 25.571(b)."

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)).)

Issued in Washington, D.C., on September 28, 1978.

LANGHORNE BOND,
Administrator.

THURSDAY, OCTOBER 5, 1978
PART IV

ENVIRONMENTAL PROTECTION AGENCY

NATIONAL AMBIENT AIR QUALITY STANDARD FOR LEAD

Final Rules and Proposed Rulemaking

V 4 3 / 1 9 4 OCT 5 1978

[6560-01]

Title 40—Protection of Environment

CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

SUBCHAPTER C—AIR PROGRAMS

[FRL 937-5]

PART 50—NATIONAL PRIMARY AND SECONDARY AMBIENT AIR QUALITY STANDARDS

National Primary and Secondary Ambient Air Quality Standards for Lead

AGENCY: Environmental Protection Agency.

ACTION: Final rulemaking.

SUMMARY: EPA is setting a national ambient air quality standard for lead at a level of 1.5 micrograms lead per cubic meter of air (μg Pb/m³), averaged over a calendar quarter. This final rulemaking follows a 1976 court order to list lead as a criteria pollutant for the development of an ambient standard, and the Agency's issuance of a proposed standard on December 14, 1977. In response to comments received on the proposed standard, EPA has changed the averaging period for the standard from a calendar month to a calendar quarter, and has clarified the health basis used in selecting the standard level.

In establishing the level of the final standard, EPA has determined that young children (age 1-5 years) should be regarded as a group within the general population that is particularly sensitive to lead exposure. The final standard for lead in air is based on preventing most children in the United States from exceeding a blood lead level of 30 micrograms lead per deciliter of blood (μg Pb/dl). Blood lead levels above 30 μg Pb/dl are associated with the impairment of heme synthesis in cells indicated by elevated erythrocyte protoporphyrin (EP), which EPA regards as adverse to the health of chronically exposed children. There are a number of other adverse health effects associated with blood lead levels above 30 μg Pb/dl, in children as well as in the general population, including the possibility that nervous system damage may occur in children even without overt symptoms of lead poisoning.

DATES: Effective: October 5, 1978. After promulgation, States will have nine months (until July 5, 1979), to prepare and submit to EPA plans for attainment of the standard by no later than October of 1982. EPA's final regulations for the development of State implementation plans appear elsewhere in this FEDERAL REGISTER.

FOR FURTHER INFORMATION CONTACT:

Mr. Joseph Padgett, Director, Strategies and Air Standards Division, Office of Air Quality Planning and Standards, U.S. Environmental Protection Agency, Research Triangle Park, N.C. 27711, telephone 919-541-5204.

AVAILABILITY OF RELATED INFORMATION

A docket (No. OAQPS-77-1) containing the information used by EPA in the development of the proposed standard is available for public inspection and copying between 8 a.m. and 4:30 p.m., Monday through Friday, at EPA's Central Docket Section, Room 2903B, Waterside Mall, 401 M Street SW., Washington, D.C. 20460.

The Federal reference method for collecting and measuring lead and its compounds in the ambient air is published in appendix G to this promulgation. This FEDERAL REGISTER also contains proposed regulations under 40 CFR Parts 51 and 53 for equivalent lead air monitoring methods, final rules for the development of State implementation plans promulgated under 40 CFR Part 51, and an advance notice of proposed rulemaking under 40 CFR Part 51 for ambient monitoring in the vicinity of certain industrial plants with lead emissions. Additional information for the development of the State implementation plans is contained in the document Supplementary Guidelines for Lead Implementation Plans. The environmental and economic impacts of implementing this standard are described in an environmental impact statement and an economic impact assessment. These documents are available for public inspection and copying at the Central Docket Section (address above). Copies may be obtained upon request from Mr. Joseph Padgett at the above address.

The documents Air Quality Criteria for Lead and Control Techniques for Lead Air Emissions were issued at the time of proposal. The Control Techniques Document is available upon request from Mr. Joseph Padgett at the above address. The Air Quality Criteria Document can be obtained from: Mr. Michael Berry, Environmental Criteria and Assessment Office, MD-52, Office of Research and Development, U.S. Environmental Protection Agency, Research Triangle Park, N.C. 27711, telephone 919-541-2266.

SUPPLEMENTARY INFORMATION:

BACKGROUND

Lead is emitted to the atmosphere by vehicles burning leaded fuel and by certain stationary sources. Lead enters the human body through ingestion and inhalation with consequent absorption into the bloodstream and distribution to all body tissues. Clinical, epidemiological, and toxicological studies have demonstrated that exposure to lead adversely affects human health.

EPA's initial approach to controlling lead in the air was to limit the lead emissions from automobiles, the principal source of lead air emissions. Regulations for the phasedown of lead in the total gasoline pool were promulgated in 1973, and, following litigation, modified and put into effect in 1976. The Agency has also established regulations requiring the availability of no-lead gasoline for catalyst-equipped cars. EPA also intended to control emissions from certain categories of industrial point sources under section 111 of the Clean Air Act.

In 1975, the Natural Resources Defense Council (NRDC) and others brought suit against EPA to list lead under section 108 of the Clean Air Act as a pollutant for which air quality criteria would be developed and a national ambient air quality standard established under section 109 of the Act. The Court ruled in favor of NRDC. (*NRDC, Inc. et al.* v. *Train*, 411 F. Supp. 864 (S.D.N.Y., 1976) aff'd 545 F. 2d 320 (2d Cir. 1976).) EPA listed lead on March 31, 1976, and proceeded to develop air quality criteria and the proposed standard.

On December 14, 1977, EPA proposed a standard of 1.5 μg Pb/m³, calendar month average, proposed the Federal reference method for monitoring air lead levels, issued the documents Air Quality Criteria for Lead and Control Techniques for Lead Air Emissions and proposed regulations for State implementation plans. EPA invited public comments during the period from December 14, 1977, to March 17, 1978, on the standard, reference method, and the SIP regulations. Additional comments on these matters were provided to EPA at a public hearing held on February 15-16, 1978.

LEGISLATIVE REQUIREMENTS FOR NATIONAL AMBIENT AIR QUALITY STANDARDS

Sections 108 and 109 of the Clean Air Act govern the development of national ambient air quality standards. Section 108 instructs EPA to document the scientific basis for the standard:

> Section 108(a)(2). The Administrator shall issue air quality criteria for an air pollutant within 12 months after he has included such pollutant in a list under paragraph (1). Air quality criteria for an air pollutant shall accurately reflect the latest scientific knowledge useful in indicating the kind and extent of all identifiable effects on public health or welfare which may be expected from the presence of such pollutant in the ambient air, in varying quantities. The criteria for an air pollutant, to the extent practicable, shall include information on—
>
> (A) Those variable factors (including atmospheric conditions), which of themselves or in combination with other factors may alter the effects on public health or welfare of such air pollutant;
>
> (B) The types of air pollutants which, when present in the atmosphere, may interact with such pollutant to produce an adverse effect on public health or welfare; and
>
> (C) Any known or anticipated adverse effects on welfare.

Section 109 addresses the actual setting of the standard:

> Section 109(b)(1). National primary ambient air quality standards, prescribed under subsection (a) shall be ambient air quality standards the attainment and maintenance of which in the judgment of the Administrator, based on such criteria and allowing an adequate margin of safety, are requisite to protect the public health. Such primary standards may be revised in the same manner as promulgated.
>
> (2) Any national secondary ambient air quality standard prescribed, under subsection (a) shall specify a level of air quality the attainment and maintenance of which in the judgment of the Administrator, based on such criteria, is requisite to protect the public welfare from any known or anticipated adverse effects associated with the presence of such air pollutant in the ambient air. Such secondary standards may be revised in the same manner as promulgated.

In order to conform to the requirements of section 109, EPA has based the level of the lead air quality standard on information presented in the criteria document pertaining to the health and welfare implications of lead air pollution. This is in contrast to other sections of the Act under which EPA considers economic costs and technical availability of air pollution control systems in determining emissions limitations. It is clear from section 109 that the Agency should not attempt to place the standard at a level estimated to be at the threshold for adverse health effects, but should set the standard at a lower level in order to provide a margin of safety. EPA believes that the extent of the margin of safety represents a judgment in which the Agency considers the severity of reported health effects, the probability that such effects may occur, and uncertainties as to the full biological significance of exposure to lead.

Comments resulting from external review of the air quality criteria and the proposed standard highlight disagreements on a number of areas critical to EPA's rationale for the standard. However, the scientific data base provided in the document Air Quality Criteria for Lead is as extensive as that for any other regulated air pollutant. Also, at every stage of development of the air quality criteria and the standard, EPA has facilitated and received broad external participation.

EPA regards as inevitable the presence of scientific disagreement and uncertainty about key factors relevant to environmental standards. Provisions of the Act requiring timely promulgation of the standard, and requirements for periodic future review of air quality criteria and standards indicate congressional intent that the Agency proceed even where scientific knowledge is not complete or full scientific consensus is absent.

SUMMARY OF GENERAL FINDINGS FROM AIR QUALITY CRITERIA FOR LEAD

Following the listing of lead as a criteria pollutant, EPA developed the document, Air Quality Criteria for Lead. In the preparation of this document, EPA provided opportunities for external review and comment on three successive drafts. The document was reviewed at three meetings of the Subcommittee on Scientific Criteria for Environmental Lead of EPA's Science Advisory Board. Each of these meetings was open to the public and a number of individuals presented both critical review and new information for EPA's consideration. The final criteria document was issued on December 14, 1977.

From the scientific information in the criteria document, EPA draws conclusions in several key areas with particular relevance for the ambient air quality standard for lead.

1. There are multiple sources of lead exposure. In addition to air lead, these sources include: Lead in paint and ink, lead in drinking water, lead in pesticides, and lead in fresh and processed food.

2. Exposure to air lead can occur directly by inhalation, or indirectly by ingestion of lead contaminated food, water, or nonfood materials including dust and soil.

3. There is significant individual variability in response to lead exposure. Even within a particular population, individual response to lead exposure may vary widely from the average response for the same group. Certain subgroups within the general population are more susceptible to the effects of lead or have greater exposure potential. Of these, young children represent a population of foremost concern.

4. Three systems within the human body appear to be most sensitive to the effects of lead—the blood-forming or hematopoietic system, the nervous system, and the renal system. In addition, lead has been shown to affect the normal functions of the reproductive, endocrine, hepatic, cardiovascular, immunologic, and gastrointestinal systems.

5. The blood lead level thresholds for various biologic effects range from the risk of permanent, severe, neurological damage or death as blood leads approach and exceed 80 to 100 μg Pb/dl in children down to the inhibition of an enzymes system as low as 10 μg Pb/dl.

6. Lead is a stable compound, ubiquitously distributed, which persists and accumulates both in the environment and in the human body. In developing the proposed standard, EPA used these findings to arrive at a standard level of 1.5 μg Pb/m³, calendar month average. This level was derived from the Agency's judgment that the maximum safe blood lead level (geometric mean) for a population of young children was 15 μg Pb/dl and, of this amount, 12 μg Pb/dl should be attributed to nonair sources. The difference of 3.0 μg Pb/dl was estimated to be the allowable safe contribution to mean population blood lead from lead in the air. With epidemiological data indicating a general relationship of 1:2 between air lead (μg Pb/m³) and blood lead (μg Pb/dl), EPA determined that the level for the proposed standard should be 1.5 μg/m³.

SUMMARY OF ANTICIPATED IMPACTS

While the level of the standard is based on health considerations, EPA has conducted economic and environmental studies to assess the potential impacts of the standard selected. EPA estimates that the existing regulations for the phase-down of lead in gasoline, combined with the increasing use of no-lead gasoline for catalyst-equipped cars, will result in attainment of the standard in urban areas where automobile exhaust is the dominant source of air lead. No additional pollution controls are anticipated for these areas.

EPA's economic analysis does indicate that there may be significant problems in attainment of the standard in the vicinity of nonferrous smelters and other large industrial sources of lead emissions. This assessment is based, however, on studies using general emission factors and plant configurations, combined with dispersion modeling. In the development of State plans to implement the standard, EPA is encouraging affected industries and State agencies to gather plant-specific technical data, ambient air quality data, and assessments of alternative engineering controls. With this information, the Agency will be able to more accurately evaluate the impact of the standard and better consider approval of alternative approaches to emission control in the State plans.

Also, EPA is encouraging affected firms and State agencies to evaluate in the early design phase, strategies which take into consideration the workplace standard for airborne lead which will be promulgated by the Occupational Health and Safety Admin-

V 4 3 / 1 9 4
0 C 5 7 8

istration (OSHA). EPA believes that this approach will facilitate application of control technologies which meet the requirements of both agencies. In working with OSHA to estimate the combined impact of the OSHA and EPA standards, in coordinating compliance strategies, and in reviewing State plans implementing the ambient standard, EPA intends to avoid an approach which would foster uncertainty in the investment decisions of affected firms.

The Agency will make every effort to insure that all opportunities to avoid plant closures are examined, while at the same time assuring protection from clear risks to the public health.

Summary of Comments Received

During the comment period from December 14, 1977, to March 17, 1978, and at the public meeting on February 15-16, 1978, EPA received 95 written and oral comments addressing the proposed standard or the requirements for State implementation plans. All comments opposing the standard as excessively stringent (25) came from representatives of affected industries, and 20 of these counter-proposed 5.0 μg Pb/m³, calendar quarter average, as the appropriate level for the standard.

Comments Received Opposing the Proposed standard of 1.5 μg/m³ Calendar Month Average as Excessively Stringent

In addition, EPA has received numerous comments and correspondence on the proposed standard after the official end of the comment period. Though EPA does not have a legal obligation to review these documents, it has, in the interest of fostering full public participation in the rulemaking process, reviewed these comments and correspondence as time permitted. As with all other documents considered or examined by EPA as part of its decision process, these documents have been placed in the public docket and have become part of the administrative record of this decision.

The comments received by EPA did not challenge three aspects of the proposed standard:

1. The basic structure of the rationale used by the Agency in deriving the level of the proposed standard.
2. The selection of young children as a population particularly at risk to lead exposure.
3. The attribution of 12 μg Pb/dl out of the target mean population blood lead level of 15 μg Pb/dl to nonair sources of lead for the purposes of setting the air standard.

Significant comments were received, however, on the following key areas relating to the standard:

1. The elevation of erythrocyte protoporphyrin (EP) as the first adverse health effect with increasing lead exposure rather than the decline of hemoglobin levels.
2. The blood lead threshold level for elevated EP.
3. The incidence of health effects in populations residing in the vicinity of industrial sources of lead particulate emissions.
4. The relationship describing the response of lead in the blood to lead in the air.
5. The statistical form and averaging period for the standard.
6. The appropriate margin of safety.
7. The limitation of the standard to the respirable fraction of total air lead particles.
8. The economic impact of the standard.
9. The State implementation plan regulations.
10. The Federal reference method for monitoring lead air quality.
11. The administrative procedures employed by EPA in the development of the standard and the provision for public participation.

A review of the comments received and their disposition has been placed in the rulemaking docket (OAQPS-77-1) for public inspection. The following paragraphs summarize the significant comments and present the Agency's findings.

The Health Significance of Erythrocyte Protoporphyrin Elevation

Ten commenters disagreed with EPA's conclusion that the impairment of heme synthesis indicated by elevated erythrocyte protoporphyrin (EP) constituted an adverse health effect. Reasons for this disagreement included:

1. An elevated level of EP is not itself toxic to the cells in blood or other tissues.
2. EP elevation, while indicating a change in heme synthesis, does not indicate an insufficient production of heme, or hemoglobin.
3. EP elevation and the alteration of heme synthesis does not imply impairment of other mitochondrial functions.
4. EP elevation is not associated with impairment of other heme proteins, particularly cytochrome P-450.
5. Elevated EP may be caused by conditions other than exposure to lead, particularly iron deficiency.

Five commenters agreed with EPA's conclusions about the health significance of elevated EP citing the following arguments:

1. The interference of lead in a fundamental cellular metabolic function to the extent that there is accumulation of a substrate is physiological impairment, even without the presence of clinical evidence of disease.
2. It is prudent medical practice to intervene where subclinical indicators of physiological impairment are present.
3. The impairment of heme synthesis resulting from genetic or dietary factors places a child at enhanced risk to lead exposure.
4. There is evidence to suggest that impaired heme synthesis may affect the function of neural or hepatic tissue even at levels where heme production is sufficient for hematopoiesis.

Agency Response

EPA agrees with the comments received that the initial elevation of EP as a result of exposure to lead, while indicating an impairment of heme synthesis, may not be a disease state or be seen as a clinically detectable decline in performance. However, the criteria document points out (p. 1-13) that this impairment does increase progressively with lead dose.

The hematological effects described above are the earliest physiological impairments encountered as a function of increasing lead exposures as indexed by blood lead elevations; as such, those effects may be considered to represent critical effects of lead exposure. Although it may be argued that certain of the initial hematological effects (such as ALAD inhibition) constitute relatively mild, nondebilitating symptoms at low blood lead levels, they nevertheless signal the onset of steadily intensifying adverse effects as blood lead elevations increase. Eventually, the hematological effects reach such magnitude that they are of clear-cut medical significance as indicators of undue lead exposure.

The fact that other conditions, such as iron deficiency may also impair heme synthesis, does not obviate concern that lead is interfering with an essential biological function. There is the possibility that a nutritional deficiency is an additional stress to the heme synthetic system which may increase the sensitivity of a child to the adverse effects of lead exposure.

EPA notes that there is general agreement that heme and heme-containing proteins play important roles in the oxygen fixation pathways in all cells. While the effects of low-level lead exposure on the heme synthetic pathway in erythroid tissue have been extensively studied in part because of the ease with which this tissue may be obtained, other cellular metabolic systems utilizing heme are less well understood. EPA does not have sufficient information to conclude that impairment of heme synthesis in other tissues is not of concern until blood lead levels are reached greater than those associated with hematological effects. The air quality criteria document does point out that this effect has been established in other tissues and that other dose-response factors may apply.

The effect of lead on the formation of heme is not limited to the hematopoietic system. Experimental animal studies have shown a lead effect on the heme-requiring protein, cytochrome P-450, an integral part of the hepatic mixed-function oxidase (chapter 11), the systemic function of which is detoxification of exogenous substances. Heme synthesis inhibition also takes place in neural tissue. (P. 13-5.)

In summary, the criteria document states:

Elevation in protoporphyrin is considered not only to be a biological indicator of impaired mitochondrial function of erythroid tissue but also an indicator of accumulation of substrate for the enzyme ferrochelatase. It therefore has the same pathophysiological meaning as increased urinary δ-ALA (vide supra). For these reasons, accumulation of protoporphyrin has been taken to indicate physiological impairment in humans, and this clinical consensus is expressed in the 1975 Statement of the Center for Disease Control (CDC), USPHS. The criterion used by CDC to indicate an effect of lead on heme function is an FEP level of 60 μg/dl in the presence of a blood lead level above 30 μg/dl whole blood.

More recent information relating to threshold of lead effects indicates that FEP levels begin to increase at a blood lead value of 15 to 20 μg Pb/dl blood in children and women and, at a somewhat higher value, 20 to 25 μg Pb/dl blood, in adult men. (P. 13-5.)

EPA concludes that the state of elevated EP must be regarded as potentially adverse to the health of young children. While the onset or a mild experience of this condition may be tolerated by an individual, as with other subclinical manifestations of impaired function, it is a prudent public health practice to exercise corrective action prior to the appearance of clinical symptoms. The criteria document reports that symptoms of anemia in children may occur at blood lead levels of 40 μg/dl. EPA has adopted 30 μg Pb/dl as a maximum safe blood lead level for individual children.

The Blood Lead Threshold for Elevated Erythrocyte Protoporphyrin

Comments provided by ten organizations challenged EPA's conclusion that the threshold for the elevation of EP occurs in children at a blood lead level of 15 μg/dl. Evidence offered for a higher threshold included:

1. The threshold accepted by EPA is based on a study in which an inappropriate statistical technique, probit analysis, was employed.
2. Application of a more appropriate technique, segmented line analysis, results in a higher threshold.
3. The study in question excluded data on children with blood lead levels in excess of 30 μg/dl.
4. Other investigators have reported higher thresholds.

Comments in support of the 15 μg/dl threshold maintained:

1. It is proper to exclude values considered abnormal if the intent of the analysis is to determine an unbiased effect threshold.
2. Other studies have reported thresholds with error bands which include 15 μg/dl.
3. Probit analysis is an appropriate technique and differs only slightly from the results obtained from segmented line analysis.

Agency Response

EPA agrees that the segmented line technique provides a more accurate estimate of the correlation threshold of EP elevation with increasing blood lead, about 16.7 μg Pb/dl, and for this reason considered changing its judgments as to the maximum safe blood lead level for a population of children. However, as the target geometric mean for a population is increased, a greater percentage of children in the population will exceed the maximum safe individual level of 30 μg Pb/dl. EPA estimates that at a population geometric mean of 15 μg Pb/dl, 99.5 percent of children will be below 30 μg Pb/dl. At 16.7 μg Pb this percentage falls to 98.7. EPA regards the number of children predicted to be below 30 μg Pb/dl as the critical health consideration. For this reason, EPA has maintained its estimate of a geometric mean of 15 μg Pb/dl as the target for population blood lead.

The Incidence of Health Effects in Populations Residing in the Vicinity of Industrial Sources of Lead Particulate Emissions

Several comments cited situations in which proximity to significant point sources of airborne lead emissions appear to have little or no health impact on resident populations. This was taken to imply that the air standard was not necessary to protect public health.

Agency Response

EPA acknowledges the variability of the impact of exposure to air lead on the potential for adverse health consequences. It is clear that direct exposure to air lead is only one of the

V 4 3 / 1 9 4
OCT 5 1978

routes through which human exposure occurs. It is for this reason that the Agency has accepted the concept that only a portion of the safe population mean blood lead level should be attributable to air lead exposure. The presence or absence of health effects in an exposed population is influenced by a variety of factors including: Meteorology, terrain characteristics, geological and anthropological history, personal and domestic hygiene, the occupations of the population members, and the food and nonfood materials with which they come into contact. Taking into account such variability, it remains the Agency's belief that airborne lead directly and indirectly contributes to the risk of adverse health consequences and that sufficient clinical and epidemiological evidence is available to form a judgment as to the extent of this contribution. This evidence includes epidemiological studies showing higher blood lead levels in urban areas where air lead levels were elevated in comparison to rural areas. There have also been a number of studies linking elevated blood lead levels to industrial sources of lead emissions. With regard to the 1972 study at El Paso, Tex., by the Center for Disease Control, the criteria document reports:

> It was concluded that the primary factor associated with elevated blood lead levels in the children was ingestion or inhalation of dust containing lead. Data on dietary intake of lead were not obtained because the climate and proximity to the smelter prevented any farming in the area. It was unlikely that the dietary lead intakes of the children from near the smelter and farther away were significantly different. (P. 12-15.)

With regard to the report of Yankel et al. at Kellogg, Idaho, the criteria document states:

> Five factors influenced, in a statistically significant manner, the probability of a child developing an excessive blood lead level:
> 1. Concentrations of lead in ambient air ($\mu g/m^3$).
> 2. Concentration of lead in soil (ppm).
> 3. Age (years).
> 4. Cleanliness of the home (subjective evaluation coded 0, 1, and 2, with 2 signifying dirtiest).
> 5. General classification of the parents' occupation (dimensionless).
>
> Although the strongest correlation found was between blood lead levels and air lead level, the authors concluded that it was unlikely that inhalation of contaminated air alone could explain the elevated blood lead levels observed. (P. 12-16.)

THE APPROPRIATE RELATIONSHIP BETWEEN LEAD IN AIR AND LEAD IN BLOOD

Several commenters questioned the Agency's estimate that, for children, one microgram of lead per cubic meter air (μg Pb/m^3 results in an increase of two micrograms lead per deciliter blood (μg Pb/dl).

AGENCY RESPONSE

EPA has reviewed the studies discussed in the criteria document which report changes in blood lead levels with different air lead levels. The Agency believes that one of the strongest epidemiological studies is that by Azar et al. in which personal dosimeters were used to measure lead intake. This eliminated some of the uncertainty about the extent to which air quality observations accurately reflect actual exposure. From the Azar data, the relationship of lead in the air to lead in the blood, evaluated at 1.5 μg Pb/m^3 was 1:1.8. The Azar study was, however, limited to an adult population.

A clinical study of adults, Griffin et al., gives roughly the same conclusion for a group of adults confined to a chamber with controlled exposure to lead aerosol. This study was conducted over a three month period with control over lead ingestion. As air lead levels in the chamber were increased from 0.15 μg Pb/m^3 to 3.2 μg Pb/m^3, the air lead to blood lead relationship was 1:1.7.

Because children are known to have greater net absorption and retention of lead than adults, it is reasonable to assume that the air lead to blood lead relationship for this sensitive population, exposed to air lead levels in the range of the proposed standard, is equal to if not greater than for adults. EPA also notes that the air lead to blood lead relationship is nonlinear and may result in a higher ratio at lower air levels.

In an epidemiological study of children near a smelter, Yankel et al., the response of blood lead to air lead, averaged over the exposure range, was 1.9. EPA believes that these studies as well as others reported in the criteria document, support the criteria document's conclusion that:

> Ratios between blood lead levels and air lead exposures were shown to range generally from 1:1 to 2:1. These were not, however, constant over the range or air lead concentrations encountered. There are suggestive data indicating that the ratios for children are in the upper end of the range and may even be slightly above it. There is also some slight suggestion that the ratios for males are higher than those for females. (P. 12-38.)

THE STATISTICAL FORM AND PERIOD OF THE STANDARD

One commenter expressed the view that, due to the lognormal distribution of measured air lead, a not-to-be-exceeded standard of 1.5 $\mu g/m^3$, calendar month average, would require sources of air lead to achieve control of their emissions to a geometric monthly mean of 0.41 $\mu g/m^3$ in order to prevent the occurrence of a violation. Another comment expressed the opinion that, with the normal operation of a 6-day sampling schedule, the number of samples which could be collected in the course of a calendar month would not provide a statistically valid estimate of the actual lead air quality for the period.

Several comments questioned the health basis for the selection of the calendar month averaging period.

EPA RESPONSE

EPA accepts the consensus of comments received on the scientific and technical difficulties presented by the selection of a calendar month averaging period. The Agency believes that the key criterion for the averaging period is the protection of health of the sensitive population. In proposing the 1.5 $\mu g/m^3$ standard, EPA concluded that this air level as a ceiling would be safe for indefinite exposure of young children. The critical question in the determination of the averaging period is the health significance of possible elevations of air lead above 1.5 $\mu g/m^3$ which could be sustained without violation of the average of 1.5 $\mu g/m^3$. In the proposed standard, EPA chose a monthly averaging period on the basis of a study showing an adjustment period of blood lead level with a change of exposure (Griffin et al.). Because of the scientific and technical difficulties of the monthly standard, EPA has reexamined this question and concludes that there is little reason to expect that the slightly greater possibility of elevated air lead levels within the quarterly period is significant for health. This conclusion is based on the following points:

(1) From actual ambient measurements, the distribution of air lead levels is such that where the quarterly standard is achieved, there is little possibility that there could be sustained periods greatly above the average value.

(2) While it is difficult to relate the extent to which a monitoring network actually represents the exposure situation for young children, it seems likely that where elevated air lead levels do occur, they will be close to point of mobile sources of lead air pollution. Typically, young children will not encounter such levels for the full 24-hour period reported by the monitor.

(3) There is medical evidence indicating that blood lead levels reequilibrate slowly to changes in air exposure. This serves to dampen the impact of a short-term period of exposure to elevated air lead.

(4) Direct exposure to air is only one of several routes of total exposure. This lessens the impact of a change in air lead on blood lead levels.

On balance, the Agency concludes that a requirement for the averaging of air quality data over calendar quarter will improve the validity of air quality data gathered without a significant reduction in the protectiveness of the standard.

THE APPROPRIATE MARGIN OF SAFETY

Several comments received by the Agency criticized the proposed standard for incorporating an excessive margin of safety. This criticism was based either on the view that the critical health effect, impaired heme synthesis, was not of health significance or on the view that EPA had employed conservative estimates of the several factors used in calculating the standard which, when combined, resulted in an excessively stringent standard.

Other comments were received which expressed concern that the standard had little or no margin of safety, particularly for certain subgroups within the general population of young children.

AGENCY RESPONSE

EPA does not agree that the impairment of heme synthesis is a physiological response to lead exposure that is without health significance. While EPA does not find that this impairment is necessarily serious to health at the point at which it first can be detected by the elevation of erythrocyte protoporphyrin, at a threshold in a range of 15-20 μg Pb/dl, the Agency does believe that above blood levels of 30 μg Pb/dl this effect has progressed to the extent that it should be regarded as an adverse health effect.

In determining the final ambient air standard for lead, EPA has used margin of safety considerations principally in establishing a maximum safe blood lead level for individual children at 30 μg Pb/dl and in determining the percentage of children to be placed below this maximum level, about 99.5 percent. Using these factors, results in a target geometric mean population blood lead of 15 μg Pb/dl.

In establishing other factors used in calculating the standard, EPA has used margin of safety in the sense of making careful judgments based on available data, but these judgments have not been at the precautionary extreme of the range of data available to the Agency. In the case of the geometric standard deviation (GSD), studies reviewed in the criteria document showed a range of 1.3 to 1.5. A standard based on a 1.5 GSD would be far more stringent than using 1.3, EPA took the 1.3, however, because of its concern that the total geometric standard deviation contains variation attributable to monitoring and analytical methodology. In estimating the relationship between air lead and blood lead to be 1:2, the Agency used an epidemiological study of children near a smelter, Yankel et al., where response of blood lead to air lead averaged over the exposure range was 1 to 1.9. In adopting 12 μg Pb/dl as the part of blood lead attributable to nonair sources, EPA is concerned that typical levels for this component may be much greater, and that regulatory actions by other public health programs may be necessary to achieve a 12 μg level.

Because of the variability between individuals in a population experiencing a given level of lead exposure, EPA finds it is impossible to provide the same amount of margin of safety for all members in the sensitive population, or to define the margin of safety in the standard as a simple percentage. EPA does believe that the factors it has used in designing the standard provide an adequate margin of safety for a large proportion of the sensitive population. The Agency does not believe that this margin is excessively large or on the other hand that the air standard can protect everyone from elevated blood lead levels.

THE IMPORTANCE OF THE RESPIRABLE FRACTION OF TOTAL AIR LEAD LEVEL

The Agency received a number of comments expressing concern that, because only a fraction of airborne particulate matter is respirable, an air standard based on total air lead is unnecessarily stringent.

AGENCY RESPONSE

EPA agrees that some lead particles are too small or too large to be deposited in the respiratory system. EPA cannot conclude, however, that particles outside of the respirable range do not represent an exposure hazard. A significant component of exposure can be ingestion of materials contaminated by deposition of lead from the air. In addition to the indirect route of ingestion and absorption from the gastrointestinal tract, nonrespirable lead in the environment may, at some point, become respirable through weathering or mechanical action. EPA concludes, therefore, that total airborne lead, both respirable and nonrespirable fractions, should be addressed by the air standard.

THE ECONOMIC IMPACT OF THE PROPOSED STANDARD

A number of commenters were critical of the Agency's economic impact assessment, and argued that the forecast underestimated the severity of the economic impact to certain lead industries.

AGENCY RESPONSE

The comments critical of the draft impact statement did not include data which would allow EPA to confirm the possibility of more severe economic impacts on certain source categories including primary and secondary lead smelters which could have difficulty in limiting emissions sufficiently to assure attaining the standard in their immediate vicinity. Under the Clean Air Act, the primary responsibility for implementing the standard is assigned to the States and each State is required to submit a plan to EPA demonstrating how attainment is to be achieved. The actual economic impacts of implementation are difficult to estimate at this time since, following promulgation, States will have 9 months to develop and submit these plans to EPA. The plans must demonstrate attainment as soon as practicable, but no later than 3 years following the date of plan approval. However, under certain circumstances, States may request up to a 2-year extension of this deadline. Other sections of the Clean Air Act may be used with the Administrator's discretion to grant further extensions of compliance deadlines for impacted industrial facilities.

EPA cannot at this time accurately predict the impact of this standard, but with the timetable in the Act, sees no reason to expect imminent closure of any facility. The Agency is committed to developing accurate data for specific plants in cooperation with the industry and State agencies in order to avoid the imposition of unnecessary controls. EPA's principal concern, however, must be to follow the mandate of the Clean Air Act relating to the protection of the public health.

EPA believes that the economic impact assessment is a reasonable forecast of the economic consequences of implementation of the standard.

THE PROPOSED STATE IMPLEMENTATION PLAN (SIP) REGULATIONS

A summary of comments and the Agency response is included in the preamble to the final regulations published elsewhere in this FEDERAL REGISTER.

THE FEDERAL REFERENCE METHOD FOR MONITORING LEAD AIR QUALITY

A summary of comments and the Agency's disposition is included in the preamble to the final method published elsewhere in this FEDERAL REGISTER.

THE ADMINISTRATIVE PROCEDURES EMPLOYED BY EPA IN THE DEVELOPMENT OF THE PROPOSED STANDARD AND THE PROVISION FOR PUBLIC PARTICIPATION

Two commenters requested that cross examination of witnesses be al-

V 4 3 / 1 9 4

0 C 5 7 8

lowed in the post-proposal public hearing on the proposed standard and implementation regulations. EPA also received a request to postpone the public hearing and to extend the comment period, citing the need to complete ongoing studies.

AGENCY RESPONSE

Both the request for cross-examination and the extension of the comment period were denied by the Agency. With regard to the request for cross-examination, the Agency determined that, in light of the extensive review already conducted, cross-examination was not likely to produce new information or results that would justify such a significant departure from the normal rulemaking process. Also the existence of the normal comment period was sufficient to allow interested members of the public to raise questions concerning the Agency's determinations. Further, due to the extensive review opportunities available at all stages of the regulatory development, an extension of the comment period was not believed to be sufficiently necessary to further delay the schedule for preparation of the final rule.

CLARIFICATION OF ELEMENTS OF THE STANDARD

From reviewing the comments received, EPA wishes to clarify the following points in the presentation of the rationale for the final standard:

(1) EPA is making a distinction between the blood lead level that is the threshold for detection of the biological effect, impaired heme synthesis, and the blood lead level at which this effect has progressed to an extent that it is regarded as adverse to health.

(2) EPA is making a distinction between estimating a maximum safe blood lead level for an individual child, and establishing a population target geometric mean blood lead level for the sensitive population.

(3) EPA is making a distinction between what the contribution to blood lead levels from nonair sources actually may be, and attributing a contribution from nonair sources for the purpose of standard setting.

DERIVATION OF THE NUMERICAL LEVEL OF THE FINAL STANDARD

EPA's objective in setting the level of the standard is to estimate the concentration of lead in the air to which all groups within the general population can be exposed for protracted periods without an unacceptable risk to health.

This estimate is based on EPA's judgment in four key areas:

(1) Determining the "sensitive population" as that group within the general population which has the lowest threshold for adverse effects or greatest potential for exposure. EPA concludes that young children, aged 1 to 5, are the sensitive population.

(2) Determining the safe level of total lead exposure for the sensitive population, indicated by the concentration of lead in the blood. EPA concludes that the maximum safe level of blood lead for an individual child is 30 μg Pb/dl and that population blood lead, measured as the geometric mean, must be 15 μg Pb/dl in order to place 99.5 percent of children in the United States below 30 μg Pb/dl .

(3) Attributing the contribution to blood lead from nonair pollution sources. EPA concludes that 12 μg Pb/dl of population blood lead for children should be atttributed to nonair exposure.

(4) Determining the air lead level which is consistent with maintaining the mean population blood lead level at 15 μg Pb/dl. Taking into account exposure from other sources (12 μg Pb/dl) EPA has designed the standard to limit air contribution after achieving the standard to 3 μg Pb/dl. On the basis of an estimated relationship of air lead to blood lead of 1 to 2, EPA concludes that the ambient air standard should be 1.5 μg Pb/m³.

Each of these four areas is discussed further in the following sections.

SENSITIVE POPULATION

EPA believes that the health of young children is at particular risk from lead exposure. This is because children have a greater physiological sensitivity to the effects of lead than do adults and may have greater exposure to environmental lead from playing in contaminated areas. Other sensitive populations identified by EPA include those occupationally exposed, and pregnant women and their fetuses. Comments received on the proposed standard did not challenge EPA's position that young children are the most sensitive population for determining the standard. A number of comments did point out that within the general population of children there were subgroups with enhanced risk due to genetic factors, dietary deficiencies, or residence in urban areas. EPA acknowledges the higher risk status of such groups but does not have information either in the air quality criteria or in the comments received for estimating a threshold for adverse effects separate from that of all young children. Concern about these high risk subgroups has, however, influenced EPA's determination of the percentage of the population of children (99.5 percent) to be maintained below 30 μg Pb/dl.

EPA continues to be concerned about the possible health risk of lead exposure for pregnant women and their fetuses. The stress of pregnancy may place pregnant women in a state more susceptible to the effects of lead, and transplacental transfer of lead may affect the prenatal development of the child. There is, however, insufficient scientific information for EPA to either confirm or dismiss this suggestion, or to establish that pregnant women and fetuses are more at risk than young children.

THE MAXIMUM SAFE EXPOSURE FOR CHILDREN

In determining the maximum safe exposure to lead for children, EPA has taken the measurement of blood lead as the indicator of total lead dose. There are other possible indicators of exposure, for example the level of zinc protoporphyrin (ZPP), but most health studies reported in the criteria document utilize blood lead levels as indications of the mobile body burden of lead. The criteria document reports the following table of effect thresholds for children with increasing blood lead levels.

SUMMARY OF LOWEST OBSERVED EFFECT LEVELS IN YOUNG CHILDREN

	μg Pb/dl
δ-ALAD inhibition	10
Erythrocyte protoporphyrin elevation	15–20
Increased urinary δ-ALA excretion	40
Anemia	40
Coproporphyrin elevation	40
Cognitive (CNS) deficits	50–60
Peripheral neuropathies	50–60
Encephalopathic symptoms	80–100

(P. 13–8.)

The first physiological effect associated with increasing blood lead levels is the inhibition of the enzyme δ-aminolevulinic acid dehydratase (δ-ALAD), both in red blood cells (erythrocytes), and in cells in other tissues. This enzyme catalyzes the condensation of two molecules of δ-aminolevulinic acid (δ-ALA) to form porphobilinogen, one of the components involved in the cellular synthesis of heme. The criteria document reports that the threshold for δ-ALAD inhibition in children is 10 μg Pb/dl.

At blood lead levels above 10 μg Pb/dl, the function of δ-ALAD is increasingly inhibited by lead. The criteria document states that 40 μg Pb/dl is the threshold for elevation of δ-ALA recognized as δ-ALA in the urine or δ-ALA-U, an indication that δ-ALA has begun to accumulate in cells.

EPA does not regard the inhibition of δ-ALAD above 10 μg Pb/dl as adverse to health because of the absence of evidence that there is an impairment of heme synthesis until a threshold of 40 μg Pb/dl is reached. The accumulation of δ-ALA above normal levels, indicated by δ-ALA-U, is regarded as adverse to health, both because of impaired heme synthesis, and

the possibility that δ-ALA accumulation is itself toxic to cells.

The criteria document reports that above a threshold of 15–20 μg Pb/dl there is an elevation of protoporphyrin in erythrocytes. Protoporphyrin is an organic chemical compound used by all cells in the production of heme. In the final stage of heme synthesis, erythorocyte protoporphyrin (EP) and iron are brought together in the cell mitochondria. In the presence of lead, this step is blocked, possibly by inhibition of the enzyme ferrochelatase or by interference in the transport of iron across the mitochondrial membrane. Without incorporation into heme, the levels of protoporphyrin in the cell become elevated.

From review of the information provided by the air quality criteria document as well as the evidence and arguments offered by medical professionals commenting on the proposed standard, EPA has concluded that the effects of lead on the cellular syntheis of heme, as indicated by elevated erythrocyte protoporphyrin, are potentially adverse to the health of young children. This appears, however, to be a question of the degree to which the effect has progressed. EPA does not believe that there is significant risk to health at the point where the elevation of EP can first be correlated with an increase in blood lead (15 to 20 μg Pb/dl). On the other hand, EPA regards as clearly adverse to health the impairment of heme synthesis, and other effects of lead which result in clinical symptoms of anemia above 40 μg Pb/dl. These effects are followed quickly by the risk of nervous system deficits for some children with blood lead levels of 50 μg Pb/dl.

EPA has concluded that the maximum safe blood lead level for an individual child is 30 μg Pb/dl. This is based on the following factors:

(1) The maximum safe blood lead level should be somewhat lower than the threshold for a decline in hemoglobin levels (40 μg Pb/dl).

(2) The maximum safe blood lead level should be at an even greater distance below the threshold for risks of nervous system deficits (50 μg Pb/dl).

(3) The maximum safe blood lead level should be no higher than the blood lead range characterized as undue exposure by the Center for Disease Control of the Public Health Service, as endorsed by the American Academy of Pediatrics, because of elevation of erythrocyte protoporphyrin (above 30 μg Pb/dl).

(4) The maximum safe blood lead level for an individual need not be as low as the detection point for the initial elevation of EP (15–20 μg Pb/dl).

The criteria document points out that data from epidemiological studies show that the log values of measured individual blood lead values in a uniformly exposed population are normally distributed with a geometric standard deviation (GSD) of 1.3 to 1.5. Using standard statistical techniques, it is possible to use the geometric standard deviation to calculate the mean population blood lead level which would place a given percentage of the population below the level of an effects threshold. A GSD of 1.5 would result in a lower geometric mean, and a more stringent standard. However, because some of the variability in the GSD is from measurement systems, EPA has used a GSD of 1.3.

Recently, analysis of the data collected by New York City's Bureau of Lead Poisoning has shown that populations of children in the New York area consistently have distributions of blood lead values with a GSD of 1.4 to 1.5. With a geometric mean of 15.0 μg Pb/dl, a GSD of 1.4 results in about two percent of the population over levels of 30 μg Pb/dl. A GSD of 1.5 would place more than four percent over 30 μg Pb/dl. EPA is concerned that such results may imply that the standard is not as precautionary as it would be if the actual GSD was 1.3. However, the Agency's best estimate is that some of the GSD is from analytical and monitoring variance, and for this reason, EPA is using the 1.3 value in calculating the final standard.

In EPA's view, use of the 99.5 percent range is not excessive. From 1970 statistics, there are approximately 20 million children in the United States below the age of 5 years, 12 million in urban areas, and 5 million in center cities where lead exposure may be high. Again, knowledge that there are special high risk groups of children within the general population deters EPA from considering lower percentages.

CONTRIBUTION TO TOTAL LEAD EXPOSURE FROM NONAIR SOURCES

In the proposed standard, EPA argued that the air standard should take into account the contribution to blood lead levels from lead sources unrelated to air pollution. No comments were received challenging this argument. EPA continues to base its calculation of the ambient air standard on the assumptions that, to an extent, the lead contribution to blood lead from nonair sources should be subtracted from the estimate of safe mean population blood lead. Without this subtraction, the combined exposure to lead from air and nonair sources would result in a blood lead concentration exceeding the safe level.

EPA notes that the level of the standard is strongly influenced by judgments about nonair contribution to total exposure, and that there are difficulties in attempting to estimate exposure from various lead sources. Studies reviewed in the criteria document do not provide detailed or widespread information about the relative contribution of various sources to children's blood lead levels. Estimates can only be made by inference from other empirical or theoretical studies, usually involving adults. Also, it can be expected that the contribution to blood lead levels from nonair sources can very widely, is probably not in constant proportion to air lead contribution, and in some cases may alone exceed the target mean population blood lead level.

In spite of these difficulties, EPA has attempted to assess available information in order to estimate the general contribution to population blood lead levels from air and nonair sources. This has been done with evaluation of evidence from general epidemiological studies, studies showing decline of blood lead levels with decrease in air lead, studies of blood lead levels in areas with low air lead levels, and isotopic tracing studies.

Studies reviewed by the criteria document show that the geometric mean blood lead levels for populations of children are frequently above 15 μg Pb/dl. In studies reported, the range of mean population blood lead levels for children was from 16.5 μg Pb/dl to 46.4 μg Pb/dl with most studies showing mean levels greater than 25 μg Pb/dl (Fine, 1972; Landrigan, 1975; von Lindern, 1975). EPA believes that, for many of these populations, the contribution to blood lead levels from nonair sources may exceed the desired target mean blood lead level.

In a number of studies, reduction in air lead levels resulted in a decline in children's blood lead levels. A study of blood lead levels in children in New York City showed that children's mean blood lead levels declined from 30.5 μg Pb/dl from 1970 to 1976, while during the same period air lead levels at a single monitoring site fell from 2.0 μg Pb/dl to 0.9 μg/Pb (Billick, 1977). Studies at Omaha, Nebr. (Angle, 1977) and Kellogg, Idaho (Yankel, von Lindern, 1977) also show a drop in mean blood lead levels with declines in air lead levels. As air lead levels decline there appears to be a rough limit to the drop in blood lead levels.

EPA has also examined epidemiological studies in the criteria document where air lead exposure is low, and can be assumed to be a minor contributor to blood lead. These studies provide an indication of blood lead levels resulting from a situation where nonair sources of lead are predominant.

STUDIES REPORTING BLOOD LEAD LEVELS IN CHILDREN EXPOSED TO MODERATE TO LOW AIR LEAD LEVELS

Investigator	Blood lead[1]	Air lead[2]	Comment
Hammer, 1972	11.6	0.1	Children in Helena, Mont.
Angle, 1974	14.4	0.14	Suburban Children ages 1 to 4 in Omaha, Nebr.
Goldsmith, 1974	13.7	0.2 to 0.7 0.3 to 0.6	Children in Benecia, Calif. Children in Crocket, Calif..
Johnson, Tillery, 1975	10.2	0.6	Female children—mean age 9 in Lancaster, Calif.

[1] In micrograms of lead per deciliter.
[2] In micrograms of lead per cubic meter.

The range of mean blood lead levels in those studies is from 10.2 μg Pb/dl to 14.4 μg Pb/dl, with an average at 12.7 μg Pb/dl.

In addition to epidemiological investigations, EPA has reviewed studies that examine the source of blood lead by detecting characteristic lead isotopes. A study using isotopic tracing (Manton, 1977) suggests that for several adults in Houston, Tex., 7 to 41 percent of blood lead could be attributed to air lead sources. An earlier isotopic study (Rabinowitz, 1974) concluded that for two adult male subjects studied, approximately one-third of total daily intake of lead could be attributed to exposure to air lead levels of 1–2 μg Pb/m³. While these results cannot be directly related to children, it is reasonable to assume that children may exhibit the same or higher percentages of air lead contribution to blood lead level because of a greater potential for exposure to indirect air sources, soil and dust.

From reviewing these areas of evidence, EPA concludes that:

1. In studies showing mean blood lead levels above 15 μg Pb/dl, it is probable that both air and nonair sources of lead contribute significantly to blood lead with the possibility that contributions from nonair sources exceed 15 μg Pb/dl.

2. Studies showing a sustained drop in air lead levels show a corresponding drop in blood lead levels, down to an apparent limit in the range of 10.2 to 14.4 μg Pb/dl.

3. Isotopic tracing studies show air contribution to blood lead to be 7–41 percent in one study and about 33 percent in another study.

In considering this evidence, EPA notes that if, from the isotopic studies, approximately two-thirds of blood lead is typically derived from nonair sources, a mean blood lead target of 15 μg Pb/dl would attribute 10 μg Pb/dl to non-air sources. On the other hand, the average blood lead level from the limited studies available where air exposure was low is 12.7 μg Pb/dl. In the absence of more precise information, EPA is calculating the lead standard based on the attribution of 12 μg Pb/dl of the blood lead level in children to lead sources unaffected by the lead air quality standard. EPA is aware that actual population blood lead levels, either individually or as a population mean, may exceed this benchmark. However, if EPA were to use a larger estimate of non-air contribution to blood lead, the result would be an exceptionally stringent standard, which would not address the principal source of lead exposure.

THE RELATIONSHIP BETWEEN AIR LEAD EXPOSURE AND RESULTING BLOOD LEAD LEVEL

EPA has reviewed the studies discussed in the criteria document which report changes in blood lead levels with different air lead levels. The Agency believes that one of the strongest epidemiological studies is that by Azar et al., which used personal dosimeters to measure lead intake. This eliminated some of the uncertainty about the extent to which air quality observations accurately reflect actual exposure. From the Azar data, the relationship of lead in the air to lead in the blood, evaluated at 1.5 μg Pb/m³, was 1:1.8. The Azar study was, however, limited to an adult population.

A clinical study of adults, Griffin et al., gives roughly the same conclusion for a group of adults confined to a chamber with controlled exposure to lead aerosol. This study was conducted over a three month period with control over lead ingestion. As air lead levels in the chamber were increased from 0.15 μg Pb/m³ to 3.2 μg Pb/m³, the air lead to blood lead relationship was 1:1.7.

Because children are known to have greater net absorption and retention of lead than adults, it is reasonable to assume that the air lead to blood lead relationship for this sensitive population, exposed to air lead levels in the range of the proposed standard, is equal to if not greater than for adults. EPA also notes that the air lead to blood lead relationship is nonlinear which will result in a higher ratio at lower air levels.

In an epidemiological study of children near a smelter, Yankel et al., the response of blood lead to air lead, averaged over the exposure range, was 1.95. This study provided information on the relationship of blood lead to air lead over a very large range of air lead values. The air lead values in the study are the result of a model calibrated by monitoring data. The relative error of the individual values, especially in the low range is larger than in the Azar study.

The authors of the study, Yankel and von Lindern, chose a log-linear model which provided a good fit to the data and gave an estimated slope of about 1.2 at an air lead of 1.5. However, EPA sees a problem with a log-linear model in that it forces a lower slope at low air lead values and a higher slope at higher lead values. This is in direct contradiction to the Azar and the Griffin studies, both of which indicate higher slopes at lower air lead values.

Because of the uncertainties in the low air lead values in the Idaho study, EPA felt that the calculation of an average slope or ratio over the entire range of data would be a moderate compromise. The calculation of an average slope gives a value of 1.95. EPA believes that these studies as well as others reported in the criteria document support the document's conclusion that:

> ratios between blood lead levels and air lead exposures were shown to range generally from 1:1 to 2:1. These were not, however, constant over the range of air lead concentrations encountered. There are suggestive data indicating that the ratios for children are in the upper end of the range and may even be slightly above it. There is also some slight suggestion that the ratios for males are higher than those for females. (pp. 12-38.)

CALCULATION OF THE AIR STANDARD

EPA has calculated the standard based on the conclusions reached in the previous sections;

1. Sensitive population: Children, ages 1–5.
2. Health basis: Maximum safe blood lead level for individual children is 30 μg Pb/dl based on concern for impaired heme synthesis above 30 μg Pb/dl and margin of safety for anemia above 40 μg Pb/dl and nervous system deficits above 50 μg Pb/dl.
3. Maximum safe geometric mean blood lead for children based on placing 99.5 percent of the sensitive population below the 30 μg Pb/dl level of concern: 15 μg Pb/dl.
4. Estimate of blood lead level attributed to non-air sources: 12 μg Pb/dl.
5. Allowable contribution to blood lead from air sources after achieving the standard: 15 μg Pb/dl–12 μg Pb/dl=3 μg Pb/dl.
6. Air lead concentration consistent with blood lead contribution from air sources: 3 μg Pb/dl×1 μg Pb/m³ air/2 μg Pb/dl blood=1.5 μg Pb/m³.

SELECTION OF THE AVERAGING PERIOD FOR THE STANDARD

Based on comments received and consideration by the Agency, the proposed averaging period of a calendar month is extended to a calendar quarter. EPA believes that this change will significantly improve the validity of lead air quality data which will be gathered to monitor progress toward attainment without placing an undue burden of State and local environmental agencies, or significantly reducing the protectiveness of the standard.

The Agency believes that the key criteria for the averaging period is the protection of the health of the sensitive population. In proposing the 1.5 μg Pb/m³ standard, EPA concluded that this air level was safe for young children with an indefinite exposure period. The critical factor in the determination of the averaging period is the health significance of possible elevations of air lead above 1.5 μg Pb/m³ which could be encountered for short periods without causing average levels to exceed the standard. In the proposed standard, EPA chose a calendar month averaging period on the basis of a study (Griffin et al.) showing an adjustment period of blood lead level with a change in exposure. Because of the scientific and technical difficulties of the monthly standard, EPA has reexamined this question and concluded that there is little reason to expect that the slightly greater possibility of elevated air lead levels sustainable by the calendar quarter standard is significant for health. This conclusion is based on the following factors:

(1) From actual ambient measurements, there is evidence that the distribution of air lead levels is such that if the quarterly average was achieved there is little possibility that there could be sustained periods greatly above the average value.

(2) While it is difficult to relate the extent to which a monitoring network actually represents the exposure situation for young children, it seems likely that where elevated air lead levels do occur, they will be close to point or mobile sources. Typically, young children will not encounter such levels for the full 24-hour period reported by the monitor.

(3) There is medical evidence indicating that blood lead levels reequilibrate slowly to changes in air exposure. This serves to dampen the impact of a short-term period of exposure to elevated air lead.

(4) Direct exposure to air is only one of several routes of total exposure. This lessens the impact of a change in air lead on blood lead levels.

On balance, the Agency concludes that a requirement for the averaging of air quality data over a calendar quarter will improve the validity of air quality data gathered without a significant reduction in the protectiveness of the standard.

MARGIN OF SAFETY

The Clean Air Act instructs EPA to set the level of an ambient air quality standard at a level which protects the public health with a margin of safety. One approach to using margin of safety is to estimate the air concentration of a pollutant that is the threshold for the first adverse effect detected with increasing air levels, and then set the air standard at a somewhat lower level. The extent of the safety margin between the standard and the estimated threshold for adverse effects is influenced by such factors as the severity or irreversibility of effects, the degree of uncertainty about known or suspected health effects, the size of the population at risk, and possible interactions of several pollutants in potentiating health effects. While the margin of safety is based on available scientific information, this factor is judgmental in that the Administrator must weigh the acceptability of estimated risk.

Estimating an appropriate margin of safety for the air lead standard in complicated by the multiple sources and media for lead exposure. Because of this, EPA has elected to use margin of safety considerations in estimating the maximum safe level for blood lead, and the percentage of the sensitive population to be placed below this level, rather than making a final adjustment to concentration of lead in the air. EPA has adopted 30 μg Pb/dl as the maximum safe blood lead level for individual children, and the air standard is calculated to maintain most children below this target. On the basis of information developed in the criteria document and from public comment, blood lead levels between 30 and 40 μg Pb/dl are associated with impairments of the heme synthetic pathway which EPA regards as adverse to health. Blood lead levels above 40 μg Pb/dl are associated with a decline in hemoglobin levels, and levels above 50 μg Pb/dl are associated with the risk of nervous system deficits for some children. With a geometric mean population blood of 15 μg Pb/dl lead, most children will be well below these thresholds, but a small percentage can be expected to have blood lead levels of concern.

Because of the variability between individuals in a population experiencing a given level of lead exposure, EPA finds that it is not possible to provide the same amount of margin of safety for all members in the sensitive population, or to define a margin of safety in this standard as a simple percentage. In developing the numerical level of the standard, EPA used evidence in the criteria document that the blood lead levels for individuals in a given population of children are log-normally distributed. The statistical properties of this distribution make it possible to calculate the percentage of the population which will fall below any given blood lead level. Individuals at each of these levels would have a different margin of safety below the maximum safe blood lead level. As a rough example, with a population of children with a geometric mean blood lead of 15 μg Pb/dl, 86 percent of the children would be below 20 μg Pb/dl, 97.5 percent would be below 25 μg Pb/dl and 99.5 percent would be below 30 μg Pb/dl. Assuming a population of children in central urban areas where air lead was at the standard level, 693,000 children would be over 20 μg Pb/dl, 126,500 over 25 μg Pb/dl, and 20,605 above 30 μg Pb/dl.

In determining the appropriate margin of safety, the Agency has also included consideration of the following factors:

(1) In addition to the health effects discussed, the "Air Quality Criteria for Lead" report multiple biological involvements of lead in practically all cell types, tissues, and organ systems. The significance for health of these has not been fully studied.

(2) There are no beneficial effects of lead at current environmental levels.

(3) EPA has incomplete data about the extent to which children are indirectly exposed to lead from air lead which moves to other environmental media, such as water, soil and dirt, and food.

(4) Lead is chemically persistent and with continued uncontrolled emissions will continue to accumulate both in human tissue and in the environment.

(5) There is a possibility that lead exposure resulting in blood lead levels previously considered safe may in fact influence the neurological development and learning abilities of the young child. EPA does not have evidence, however, that provides more than a suggestion that this could occur at blood lead levels below 30 Pb/dl for individual children.

IMPACT OF LEAD DUSTFALL ON BLOOD LEAD

In the preamble for the proposed air standard for lead, EPA pointed out that the significance of dust and soil lead as indirect routes of exposure has been of particular concern in the case of young children. Play habits and mouthing behavior between the ages of 1 and 5 have led to the conclusion that greater potential may exist in these children for ingestion and inhalation of the lead available in contaminated dust and soil. EPA is also concerned that the deposition of lead particles can lead to general contamination of the environment and increased

V 4 3 / 1 9 4

lead exposure from surface waters and foodstuffs.

Studies reviewed in the criteria document indicate a correlation between soil and dust levels and childrens' blood lead levels in highly contaminated environments (Yankel and von Lindern, 1977; Baritrop, 1974; Galke, in press). The lead threshold for concern has been reported as 1,000 parts per million (ppm) in soil (Yankel and von Lindern, 1977). At levels of between 500 and 1,000 ppm in soil, the criteria document concludes that blood lead levels begin to increase. A twofold increase in soil concentration in this range is predicted to result in a 3–6 percent rise in blood lead levels. Below 500 ppm lead in soil, no correlation has been observed with blood lead levels.

The normal background for lead in soil is cited in the criteria document as 15 ppm. Due to human activities, the average levels in most areas of the United States are considerably higher. Soil studies conducted by EPA's Office of Pesticides Programs from 1974 to 1976 in 17 urban areas reported only 3 cities with arithmetic mean concentrations in excess of 200 ppm, with the highest value 537 ppm. Concentrations in the soils surrounding large point sources of lead emissions, or heavily travelled roads may reach many thousand ppm.

Because of the many factors involved, EPA is unable to predict the relationship between air lead levels, dustfall rates, and resulting soil accumulation. Complicating factors include: Particle size distribution, rainout, other meteorological factors, topographical features affecting deposition, and removal mechanisms.

EPA believes, however, that significant impacts on blood lead of soil and dust lead are mainly limited to areas of high soil concentration (in excess of 1,000 ppm) around large point sources and heavily travelled roads. Evidence suggests that soil lead levels in areas with air lead levels in the range of the standard are below the threshold for lead health impact (Johnson, Tillery, 1975; Johanson, 1972; EPA, 1975 Air Quality Data and Soil Levels).

Comments received on the proposed standard argued that the lead air standard should be limited to respirable size lead particulate matter, as larger particles would fall to the ground without being deposited or absorbed in the lung. EPA has decided not to accept this recommendation because, as discussed above, larger particles can contribute to lead dose by human ingestion of airborne particles, by contamination of other environmental media, or by eventual reduction to respirable size by mechanical action or weathering.

Welfare Effects

Comments received on the proposed lead air quality standard did not address the issue of welfare effects or the need for a secondary air quality standard more restrictive than the primary standard. EPA maintains its position that the primary air quality standard will adequately protect against known and anticipated adverse effects on public welfare. EPA does not have evidence that a more restrictive secondary standard would be justified.

Available evidence cited in the criteria document indicates that animals do not appear to be more susceptible to adverse effects from lead than man, nor do adverse effects in animals occur at lower levels of exposure than comparable effects in humans.

Lead is absorbed but not accumulated to any great extent by plants from soil. Lead is either unavailable to plants or is fixed in the roots and only small amounts are transported to the above ground portions. Lead may be deposited on the leaves of plants and present a hazard to grazing animals. Although some plants may be susceptible to lead in the natural environment, it is generally in a form that is largely nonavailable to them.

There is no evidence to indicate that ambient levels of lead result in significant damage to manmade materials. Effects of lead on visibility and climate are minimal.

Based on such data, EPA promulgates the secondary air quality standard for lead at 1.5 μg Pb/m^3, calendar quarter average.

Economic Impact Assessment

As required by Executive Orders 11821 and 12044, EPA has conducted a general analysis of the economic impact which might result from the implementation of the lead regulations. This analysis was not intended for nor was it used in the development or promulgation of the standard, and was issued for informational purposes only.

The economic impact assessment points out that the categories of sources likely to be affected by control of lead emissions are primary lead and copper smelters, secondary lead smelters, gray iron foundries, gasoline lead additive manufacturers, and lead storage battery manufacturers. This analysis further indicates that some primary and secondary lead smelters and copper smelters may be severly strained economically in achieving emission reductions that may be required in implementing the proposed air quality standard.

There are, however, uncertainties associated with evaluating the impact of attaining the standard. For smelters and foundries, attaining the standard may require control of fugitive lead emissions, i.e., those emissions escaping from individual process operations, other than emissions from smoke stacks. Fugitive emissions are difficult to estimate, measure, and control; and it is also difficult to predict their impact on air quality near the facility. From the information available to EPA, nonferrous smelters may have great difficulty in achieving lead air quality levels consistent with the proposed standard in areas immediately adjacent to the smelter complex.

The change in averaging time from a monthly average to a calendar quarter average will affect the economic impacts associated with the lead standard because for a given level of the standard, a longer averaging period is theoretically less stringent than a shorter averaging period.

Other Lead Regulatory and Control Programs

EPA's ambient air quality standard is only one of a number of Federal, State, and local programs designed to limit exposure to lead.

In 1975, EPA promulgated the national interim primary drinking water regulation, setting a maximum contaminant level for lead. The standard, aimed at protecting children from undue lead exposure, was set at 50 μg Pb/liter. In 1977, the National Academy of Sciences concluded that a lead level at which adverse health effects are observed cannot be set with assurance at any value greater than 25 μg Pb/liter. The Office of Drinking Water is currently considering the need to revise the interim drinking water standard for lead.

Based on its toxicity, EPA has included lead on its list of priority water pollutants for which effluent guidelines are being developed under the Clean Water Act. Effluent guidelines are being developed for lead for nonferrous smelters, based on achievement of best available technology.

EPA's Office of Pesticide Programs has promulgated regulations based on the toxicity of lead which require the addition of coloring agents to the pesticide lead arsenate and specify disposal procedures for lead pesticides. Use of lead in pesticides is a small and decreasing proportion of total lead consumption in the United States.

The Resource Conservation and Recovery Act (RCRA) of 1976, through which EPA is to establish standards on how to treat, dispose, or store hazardous wastes, provides a means for specifying how used crankcase oil and other waste streams containing lead should be recycled or safely disposed of. Regulatory actions related to wastes containing lead are currently being developed under subtitle C of RCRA.

0 C 5 7 8

EPA has regulations for reducing the average lead content in the total gasoline pool to 0.5 grams/gallon by October 1, 1979, and regulations providing for lead-free gasoline required for cars equipped with catalytic converters and other vehicles certified for use of unleaded fuel. The former regulations are based on reducing exposure to airborne lead to protect public health. Other EPA actions which result in the reduction of airborne lead levels include ambient standards and State implementation plans for other pollutants such as particulate matter and sulfur dioxide and new source performance standards limiting emissions of such pollutants. Existing and new sources of particulate matter emissions generally use control techniques which reduce lead emissions as one component of particulate matter.

The Occupational Safety and Health Administration proposed regulations in 1975 to limit occupational exposure to lead to 100 μg Pb/m^3, 8-hour time-weighted average. The exposure limit was based on protecting against effects, clinical or subclinical, and the mild symptoms which may occur below 80 μg Pb/dl, providing an adequate margin of safety. The level of 100 μg Pb/m^3 is anticipated to limit blood lead levels in workers to a mean 40 μg Pb/dl and a maximum of 60 μg Pb/dl. OSHA is presently reviewing the latest information on lead exposure and health effects in preparation for promulgation of the workplace standard for lead.

The Department of Housing and Urban Development (HUD) has requirments for reducing human exposure to lead through the prevention of lead poisoning from ingestion of paint from buildings, especially residential dwelling. Their activities include (1) prohibition of the use of lead-based paints on structures constructed or rehabilitated through Federal funding and on all HUD-associated housing; (2) the elimination of the immediate hazard from lead-based paint; (3) notification of purchases of HUD-associated housing constructed prior to 1950 which may contain lead-based paint; and (4) research activities to develop improved methods of detection and elimination of lead-based paint hazards, and the nature and extent of lead poisoning.

The Consumer Product Safety Commission (CPSC) promulgated regulations in September 1977 which ban: (1) Paint and other surface coating materials containing more than 0.06 percent lead; (2) toys and other articles intended for use by children bearing paint or other similar surface coating material containing more than 0.06 percent lead; and (3) furniture coated with materials containing more than 0.06 percent lead. These regulations are based on CPSC's conclusion that it is in the public interest to reduce the risk of lead poisoning to young children from ingestion of paint and other similar surface-coating materials.

The Food and Drug Administration (FDA) adopted in 1974 a proposed tolerance for lead of 0.3 ppm in evaporated milk and evaporated skim milk. This tolerance is based on maintaining children's blood lead levels below 40 μg Pb/dl. FDA has also proposed an action level of 7 μg Pb/ml for leachable lead in pottery and enamelware, although the exact contribution of such exposure to total human dietary intake has not been established.

The Center for Disease Control (CDC) concluded in 1975 that undue or increased lead absorption exists when a child has confirmed blood lead levels of 30–70 μg Pb/dl or an EP elevation of 60–189 μg Pb/dl except where the elevated EP level is caused by iron deficiency.

In developing the lead air standard, EPA has estimated both individual and population blood lead levels which it regards as safe targets. The Agency believes that these targets do not necessarily serve as precedents for other regulatory programs. There are three reasons for this view:

(1) These targets were selected on the basis of what the Clean Air Act requires. Other programs have other legislative requirements which would lead to adoption of different but equally legitimate goals.

(2) The scientific data provided by the air quality criteria allow comparison of air levels with blood lead levels, but analogous information is not available for other media. At this time, there does not appear to be the same extent of information about the impact on blood lead of lead in food, water, and nonfood ingested items. Because of this, FDA, CPSC and other EPA standards have been based on estimates of acceptable daily dose rather than on blood lead targets.

(3) Studies currently underway may provide new information relevant to estimating safe levels of lead exposure.

Comments by Other Federal Agencies

Comments on the proposed lead air quality standard were received from eight Federal Agencies. Five of the Agencies endorsed the air standard while three of the Agencies commented on specific issues and neither endorsed nor opposed the standard. The Center for Disease Control and the U.S. Public Health Service voiced support for the proposed standard of 1.5 μg Pb/m^3 and urged basing the decision on the standard solely on considerations of public health. CDC is fully satisfied that EP elevation does indeed represent a subclinical manifestation of lead toxicity and that young children are the population most at risk from lead exposure, while some subgroups of children are at special risk to lead because of conditions such as malnutrition, genetic factors, or iron deficiency.

The Consumer Product Safety Commission endorsed the approach and some of the judgments made in arriving at the proposed air standard. CPSC concurred with the position that children are the population at enhanced risk to lead exposure, and that the goal of a mean population blood lead level for children of 15 μg Pb/dl is sufficiently low to be protective of the population at enhanced risk of exposure. CPSC views the selection of EP elevation as the adverse health effect of concern as open to challenge and suggests basing the standard on a more generally recognized severe health effect. CPSC concurs that the contribution of nonair sources to lead body burden must be evaluated in setting the air standard and suggests that a larger nonair contribution, such as 13.5 μg Pb/dl used in the California standard, might be considered.

The Food and Drug Administration commended EPA's proposal of an ambient air quality standard for lead. FDA agrees that children aged 1-5 years old comprise the most critically sensitive population. FDA concurs that 15 μg Pb/dl is a reasonable maximum blood lead level to use as an average national goal for children aged 1 to 5, although FDA suggests that for young children the margin of safety is disturbingly narrow. The division of the 15 μg Pb/dl into 12 μg Pb/dl for nonair sources and 3 μg Pb/dl for air sources was not unreasonable in FDA's view.

The Occupational Safety and Health Administration endorsed EPA's proposed standard for lead and agrees with EPA that 15 μg Pb/dl as an average national blood lead level goal for young children is reasonable. OSHA views their proposed standard of 100 μg Pb/m^3, 8-hour time-weighted average, and their establishment of 40 μg Pb/dl as the threshold effect level for workers as consistent with the EPA proposed standard.

The Department of Transportation (DOT) endorsed the proposed standard of 1.5 μg Pb/m^3. Based on an analysis of the impact of the proposed standard on the highway program, DOT concluded that it is highly probable that transportation-related violations of the proposed standard would be limited to large urban areas.

In commenting on the proposed standard, the Department of the Interior (DOI) expressed concern that the burden for meeting the proposed standard will fall primarily on lead and copper smelters and battery manufacturers, and commented on the

V 4 3 / 1 9 4

impact of lead dustfall on ground water quality. The Tennessee Valley Authority provided specific comments on the proposed State implementation plan regulations and the proposed Federal reference method. The Department of Commerce offered comments on the potential impacts of the standard, pointing out that more consideration should be given to the potential impact of the standard on the petroleum industry.

THE FEDERAL REFERENCE METHOD

The reference method for the determination of lead in suspended particulate matter collected from ambient air describes the appropriate techniques for determining the concentration of lead and its compounds as measured as elemental lead in the ambient air. A total of eight organizations submitted written comments on the method and two persons made comments at EPA's February public hearing on the proposed air quality standard. Since proposal of the Federal reference method for lead, EPA has completed additional testing of the method and added new information on the precision of the extraction analysis procedure.

Two of the commenters recommended the addition of a nitric plus hydrochloric acid extraction procedure. The extraction procedure of the proposed method contains only nitric acid. Use of a mixed acid procedure would permit the analyst to quantitatively extract more metals than just lead, thereby allowing him to analyze the same extract for more than one metal. The analysis for lead would not be affected. EPA agrees that a mixed acid extraction procedure should be added, and the revised method contains a mixed nitric-hydrochloric acid extraction procedure.

One commenter questioned the reliability of the air volume measured in the sampling procedure because of differences between initial and final flow rates caused by buildup of particulate matter on the collecting filter. The method of sampling specifies that initial and final flow rates must fall between 40 and 60 cubic feet per minute and variations within this range cause only a slight error. If the flow rate specification is not met, the sample should be voided. For these reasons, EPA believes the air volume measurement does not suffer unduly from inaccuracies.

A question was raised as to the effect of variation in lead content across the filter of the collected sample on lead analysis, since the method calls for analysis of only one strip or one-twelfth of the filter. Our work has shown that strips taken from different positions within the filter can, on occasion, produce different lead values, but the effect appears to be significant only when sampling near a heavily traveled roadway. The proposed method recommends analyzing additional strips, when sampling near a roadway, to minimize this error.

One commenter pointed out that the proposed sampling procedure does not collect gaseous (organic) lead compounds and recommended that EPA consider requiring the use of a method for monitoring gaseous lead. As the criteria document states, reported ambient levels of gaseous lead are very low and EPA has determined that the effort required to carry out the difficult task of monitoring for ambient gaseous lead is not justified in view of the extremely low concentration.

It was pointed out in the preamble to the proposed method that other analytical principles would probably be handled by provision for approval of the equivalent methods (40 CFR Part 53) proposed elsewhere in this FEDERAL REGISTER. Two organizations submitted requests that alternate methods (X-ray fluorescence and anodic stripping voltametry) for lead analysis be declared equivalent to the reference method. These requests will be considered when the procedures for determining equivalency are promulgated.

The final Federal reference method is based on measuring the lead content of suspended particulate matter on glass fiber filters using high volume sampling. The lead is then extracted from the particulate matter with nitric acid facilitated by heat or by a mixture of nitric acid and hydrochloric acid facilitated by ultrasonication. Finally, the lead content is measured by atomic absorption spectrometry.

The reference method specified for lead measures the lead for a single sampling period by extraction of a portion of a high-volume glass fiber filter used to collect particulate matter over a 24-hour period. Some agencies may prefer to composite filter strips from a number of sampling periods and extract and analyze it for lead. This procedure is acceptable provided the Agency shows that the compositing procedure results in the same average lead value as would be obtained from averaging individual values.

Dated: September 29, 1978.

APPENDIX G—REFERENCE METHOD FOR THE DETERMINATION OF LEAD IN SUSPENDED PARTICULATE MATTER COLLECTED FROM AMBIENT AIR

1. *Principle and applicability.*

1.1 Ambient air suspended particulate matter is collected on a glass-fiber filter for 24 hours using a high volume air sampler.

1.2 Lead in the particulate matter is solubilized by extraction with nitric acid (HNO_3), facilitated by heat or by a mixture of HNO_3 and hydrochloric acid (HCl) facilitated by ultrasonication.

1.3 The lead content of the sample is analyzed by atomic absorption spectrometry using an air-acetylene flame, the 283.3 or 217.0 nm lead absorption line, and the optimum instrumental conditions recommended by the manufacturer.

1.4 The ultrasonication extraction with HNO_3/HCl will extract metals other than lead from ambient particulate matter.

2. *Range, sensitivity, and lower detectable limit.* The values given below are typical of the methods capabilities. Absolute values will vary for individual situations depending on the type of instrument used, the lead line, and operating conditions.

2.1 Range. The typical range of the method is 0.07 to 7.5 μg Pb/m³ assuming an upper linear range of analysis of 15 μg/ml and an air volume of 2,400 m³.

2.2 *Sensitivity.* Typical sensitivities for a 1 percent change in absorption (0.0044 absorbance units) are 0.2 and 0.5 μg Pb/ml for the 217.0 and 283.3 nm lines, respectively.

2.3 Lower detectable limit (LDL). A typical LDL is 0.07 μg Pb/m³. The above value was calculated by doubling the between-laboratory standard deviation obtained for the lowest measurable lead concentration in a collaborative test of the method.(*15*) An air volume of 2,400 m³ was assumed.

3. *Interferences.* Two types of interferences are possible: chemical and light scattering.

3.1 *Chemical.* Reports on the absence (*1, 2, 3, 4, 5*) of chemical interferences far outweigh those reporting their presence, (*6*) therefore, no correction for chemical interferences is given here. If the analyst suspects that the sample matrix is causing a chemical interference, the interference can be verified and corrected for by carrying out the analysis with and without the method of standard additions.(*7*)

3.2 Light scattering. Nonatomic absorption or light scattering, produced by high concentrations of dissolved solids in the sample, can produce a significant interference, especially at low lead concentrations. (*2*) The interference is greater at the 217.0 nm line than at the 283.3 nm line. No interference was observed using the 283.3 nm line with a similar method.(*1*)

Light scattering interferences can, however, be corrected for instrumentally. Since the dissolved solids can vary depending on the origin of the sample, the correction may be necessary, especially when using the 217.0 nm line. Dual beam instruments with a continuum source give the most accurate correction. A less accurate correction can be obtained by using a nonabsorbing lead line that is near the lead analytical line. Information on use of these correction techniques can be obtained from instrument manufacturers' manuals.

If instrumental correction is not feasible, the interference can be eliminated by use of the ammonium pyrrolidinecarbodithioate-methylisobutyl ketone, chelation-solvent extraction technique of sample preparation.(*8*)

4. *Precision and bias.*

4.1 The high-volume sampling procedure used to collect ambient air particulate matter has a between-laboratory relative standard deviation of 3.7 percent over the range 80 to 125 $\mu g/m^3$.(*9*) The combined extraction-analysis procedure has an average within-laboratory relative standard deviation of 5 to 6 percent over the range 1.5 to 15 μg Pb/ml, and an average between laboratory relative standard deviation of 7 to 9 percent over the same range. These values include use of either extraction procedure.

4.2 Single laboratory experiments and collaborative testing indicate that there is no significant difference in lead recovery between the hot and ultrasonic extraction procedures.(*15*)

5. *Apparatus.*

5.1 Sampling.

5.1.1 High-volume sampler. Use and calibrate the sampler as described in reference 10.

5.2 Analysis.

5.2.1 Atomic absorption spectrophotometer. Equipped with lead hollow cathode or electrodeless discharge lamp.

5.2.1.1 Acetylene. The grade recommended by the instrument manufacturer should be used. Change cylinder when pressure drops below 50–100 psig.

5.2.1.2 Air. Filtered to remove particulate, oil, and water.

5.2.2 Glassware. Class A borosilicate glassware should be used throughout the analysis.

5.2.2.1 Beakers. 30 and 150 ml. graduated, Pyrex.

5.2.2.2 Volumetric flasks. 100-ml.

5.2.2.3 Pipettes. To deliver 50, 30, 15, 8, 4, 2, 1 ml.

5.2.2.4 Cleaning. All glassware should be scrupulously cleaned. The following procedure is suggested. Wash with laboratory detergent, rinse, soak for 4 hours in 20 percent (w/w) HNO_3, rinse 3 times with distilled-deionized water, and dry in a dust free manner.

5.2.3 Hot plate.

5.2.4. Ultrasonication water bath, unheated. Commercially available laboratory ultrasonic cleaning baths of 450 watts or higher "cleaning power," i.e., actual ultrasonic power output to the bath have been found satisfactory.

5.2.5 Template. To aid in sectioning the glass-fiber filter. See figure 1 for dimensions.

5.2.6 Pizza cutter. Thin wheel. Thickness <1mm.

5.2.7 Watch glass.

5.2.8 Polyethylene bottles. For storage of samples. Linear polyethylene gives better storage stability than other polyethylenes and is preferred.

5.2.9 Parafilm "M".* American Can Co., Marathon Products, Nennah, Wis., or equivalent.

6. *Reagents.*

6.1 Sampling.

6.1.1 Glass fiber filters. The specifications given below are intended to aid the user in obtaining high quality filters with reproducible properties. These specifications have been met by EPA contractors.

6.1.1.1 Lead content. The absolute lead content of filters is not critical, but low values are, of course, desirable. EPA typically obtains filters with a lead content of <75 μg/filter.

It is important that the variation in lead content from filter to filter, within a given batch, be small.

6.1.1.2 Testing.

6.1.1.2.1 For large batches of filters (>500 filters) select at random 20 to 30 filters from a given batch. For small batches (<500 filters) a lesser number of filters may be taken. Cut one ¾"x8" strip from each filter anywhere in the filter. Analyze all strips, separately, according to the directions in sections 7 and 8.

6.1.1.2.2 Calculate the total lead in each filter as

$$F_b = \mu g\ Pb/ml \times \frac{100\ ml}{strip} \times \frac{12\ strips}{filter}$$

where:

F_b = Amount of lead per 72 square inches of filter, μg.

6.1.1.2.3 Calculate the mean, F_b, of the values and the relative standard deviation (standard deviation/mean × 100). If the relative standard deviation is high enough so that, in the analysts opinion, subtraction of F_b, (section 10.3) may result in a significant error in the μg Pb/m³ the batch should be rejected.

6.1.1.2.4 For acceptable batches, use the value of F_b to correct all lead analyses (section 10.3) of particulate matter collected using that batch of filters. If the analyses are below the LDL (section 2.3) no correction is necessary.

6.2 Analysis.

6.2.1 Concentrated (15.6 *M*) HNO_3. ACS reagent grade HNO_3 and commercially available redistilled HNO_3 has found to have sufficiently low lead concentrations.

6.2.2 Concentrated (11.7 *M*) HCl. ACS reagent grade.

6.2.3 Distilled-deionized water. (D.I. water).

6.2.4 3 *M* HNO_3. This solution is used in the hot extraction procedure. To prepare, add 192 ml of concentrated HNO_3 to D.I. water in a 1 *l* volumetric flask. Shake well, cool, and dilute to volume with D.I. water. *Caution:* Nitric acid fumes are toxic. Prepare in a well ventilated fume hood.

6.2.5 0.45 *M* HNO_3. This solution is used as the matrix for calibration standards when using the hot extraction procedure. To prepare, add 29 ml of concentrated HNO_3 to D.I. water in a 1 *l* volumetric flask. Shake well, cool, and dilute to volume with D.I. water.

6.2.6 2.6 *M* HNO_3+0 to 0.9 *M* HCl. This solution is used in the ultrasonic extraction procedure. The concentration of HCl can be varied from 0 to 0.9 *M*. Directions are given for preparation of a 2.6 *M* HNO_3+0.9 *M* HCl solution. Place 167 ml of concentrated HNO_3 into a 1 *l* volumetric flask and add 77 ml of concentrated HCl. Stir 4 to 6 hours, dilute to nearly 1 *l* with D.I. water, cool to room temperature, and dilute to 1 *l*.

6.2.7 0.40 *M* HNO_3 + X *M* HCl. This solution is used as the matrix for calibration standards when using the ultrasonic extraction procedure. To prepare, add 26 ml of concentrated HNO_3, plus the ml of HCl required, to a 1 *l* volumetric flask. Dilute to nearly 1 *l* with D.I. water, cool to room temperature, and dilute to 1 *l*. The amount of HCl required can be determined from the following equation:

$$y = \frac{77\ ml \times 0.15 \times}{0.9\ M}$$

*Mention of commercial products does not imply endorsement by the U.S. Environmental Protection Agency.

0 C 5 7 8 UMI

V 4 3 / 1 9 4

where:

y = ml of concentrated HCl required.
x = molarity of HCl in 6.2.6.
0.15 = dilution factor in 7.2.2.

6.2.8 Lead nitrate, $Pb(NO_3)_2$. ACS reagent grade, purity 99.0 percent. Heat for 4 hours at 120° C and cool in a desiccator.

6.3 Calibration standards.

6.3.1 Master standard, 1000 μg Pb/ml in HNO_3. Dissolve 1.598 g of $Pb(NO_3)_2$ in 0.45 *M* HNO_3 contained in a 1 *l* volumetric flask and dilute to volume with 0.45 *M* HNO_3.

6.3.2 Master standard, 1000 μg Pb/ml in HNO_3/HCl. Prepare as in 6.3.1 except use the HNO_3/HCl solution in 6.2.7.

Store standards in a polyethylene bottle. Commercially available certified lead standard solutions may also be used.

7. *Procedure.*

7.1 Sampling. Collect samples for 24 hours using the procedure described in reference *10* with glass-fiber filters meeting the specifications in 6.1.1. Transport collected samples to the laboratory taking care to minimize contamination and loss of sample. (*17*).

7.2 Sample preparation.

7.2.1 Hot extraction procedure.

7.2.1.1 Cut a ¾" x 8" strip from the exposed filter using a template and a pizza cutter as described in figures 1 and 2. Other cutting procedures may be used.

Lead in ambient particulate matter collected on glass fiber filters has been shown to be uniformly distributed across the filter (*1, 3, 11*) suggesting that the position of the strip is unimportant. However, another study (*12*) has shown that when sampling near a road-way lead is not uniformly distributed across the filter. The nonuniformity has been attributed to large variations in particle size. (*16*) Therefore, when sampling near a road-way, additional strips at different positions within the filter should be analyzed.

7.2.1.2 Fold the strip in half twice and place in a 150-ml beaker. Add 15 ml of 3 *M* HNO_3 to cover the sample. The acid should completely cover the sample. Cover the beaker with a watch glass.

7.2.1.3 Place beaker on the hot-plate, contained in a fume hood, and boil gently for 30 min. Do not let the sample evaporate to dryness. *Caution:* Nitric acid fumes are toxic.

7.2.1.4 Remove beaker from hot plate and cool to near room temperature.

7.2.1.5 Quantitatively transfer the sample as follows:

7.2.1.5.1 Rinse watch glass and sides of beaker with D.I. water.

7.2.1.5.2 Decant extract and rinsings into a 100-ml volumetric flask.

7.2.1.5.3 Add D.I. water to 40 ml mark on beaker, cover with watch glass, and set aside for a minimum of 30 minutes. This is a critical step and cannot be omitted since it allows the HNO_3 trapped in the filter to diffuse into the rinse water.

7.2.1.5.4 Decant the water from the filter into the volumetric flask.

7.2.1.5.5 Rinse filter and beaker twice with D.I. water and add rinsings to volumetric flask until total volume is 80 to 85 ml.

7.2.1.5.6 Stopper flask and shake vigorously. Set aside for approximately 5 minutes or until foam has dissipated.

7.2.1.5.7 Bring solution to volume with D.I. water. Mix thoroughly.

7.2.1.5.8 Allow solution to settle for one hour before proceeding with analysis.

7.2.1.5.9 If sample is to be stored for subsequent analysis, transfer to a linear polyethylene bottle.

7.2.2 Ultrasonic extraction procedure.

7.2.2.1 Cut a ¾" x 8" strip from the exposed filter as described in section 7.2.1.1.

7.2.2.2 Fold the strip in half twice and place in a 30 ml beaker. Add 15 ml of the HNO_3/HCl solution in 6.2.6. The acid should completely cover the sample. Cover the beaker with parafilm.

The parafilm should be placed over the beaker such that none of the parafilm is in contact with water in the ultrasonic bath. Otherwise, rinsing of the parafilm (section 7.2.2.4.1) may contaminate the sample.

7.2.2.3 Place the beaker in the ultrasonication bath and operate for 30 minutes.

7.2.2.4 Quantitatively transfer the sample as follows:

7.2.2.4.1 Rinse parafilm and sides of beaker with D.I. water.

7.2.2.4.2 Decant extract and rinsings into a 100 ml volumetric flask.

7.2.2.4.3 Add 20 ml D.I. water to cover the filter strip, cover with parafilm, and set aside for a minimum of 30 minutes. This is a critical step and cannot be omitted. The sample is then processed as in sections 7.2.1.5.4 through 7.2.1.5.9.

NOTE.—Samples prepared by the hot extraction procedure are now in 0.45 *M* HNO_3. Samples prepared by the ultrasonication procedure are in 0.40 *M* HNO_3 + X *M* HCl.

8. *Analysis.*

8.1 Set the wavelength of the monochromator at 283.3 or 217.0 nm. Set or align other instrumental operating conditions as recommended by the manufacturer.

8.2 The sample can be analyzed directly from the volumetric flask, or an appropriate amount of sample decanted into a sample analysis tube. In either case, care should be taken not to disturb the settled solids.

8.3 Aspirate samples, calibration standards and blanks (section 9.2) into the flame and record the equilibrium absorbance.

8.4 Determine the lead concentration in μg Pb/ml, from the calibration curve, section 9.3.

8.5 Samples that exceed the linear calibration range should be diluted with acid of the same concentration as the calibration standards and reanalyzed.

9. *Calibration.*

9.1 Working standard, 20 μg Pb/ml. Prepared by diluting 2.0 ml of the master standard (6.3.1 if the hot acid extraction was used or 6.3.2 if the ultrasonic extraction procedure was used) to 100 ml with acid of the same concentration as used in preparing the master standard.

9.2 Calibration standards. Prepare daily by diluting the working standard, with the same acid matrix, as indicated below. Other lead concentrations may be used.

Volume of 20 μg/ml working standard, ml	Final volume, ml	Concentration μg Pb/ml
0	100	0
1.0	200	0.1
2.0	200	0.2
2.0	100	0.4
4.0	100	0.8
8.0	100	1.6
15.0	100	3.0
30.0	100	8.0
50.0	100	10.0
100.0	100	20.0

9.3 Preparation of calibration curve. Since the working range of analysis will vary depending on which lead line is used and the type of instrument, no one set of instructions for preparation of a calibration curve can be given. Select standards (plus the reagent blank), in the same acid concentration as the samples, to cover the linear absorption range indicated by the instrument manufacturer. Measure the absorbance of the blank and standards as in section 8.0. Repeat until good agreement is obtained between replicates. Plot absorbance (y-axis) versus concentration in μg Pb/ml (x-axis). Draw (or compute) a straight line through the linear portion of the curve. Do not force the calibration curve through zero. Other calibration procedures may be used.

To determine stability of the calibration curve, remeasure—alternately—one of the following calibration standards for every 10th sample analyzed: concentration ≤ 1μg Pb/ml; concentration ≤ 10 μg Pb/ml. If either standard deviates by more than 5 percent from the value predicted by the calibration curve, recalibrate and repeat the previous 10 analyses.

10. *Calculation.*

10.1 Measured air volume. Calculate the measured air volume as

$$V_m = \frac{Q_i + Q_f}{2} \times T$$

where:

V_m = Air volume sampled (uncorrected), m^3.
Q_i = Initial air flow rate, m^3/min.
Q_f = Final air flow rate, m^3/min.
T = Sampling time, min.

The flow rates Q_i and Q_f should be corrected to the temperature and pressure conditions existing at the time of orifice calibration as directed in addendum B of reference *10*, before calculation V_m.

10.2 Air volume at STP. The measured air volume is corrected to reference conditions of 760 mm Hg and 25° C as follows. The units are standard cubic meters, sm^3.

$$V_{STP} = V_m \times \frac{P_2 \times T_1}{P_1 \times T_2}$$

V_{STP} = Sample volume, sm^3, at 760 mm Hg and 298° K.
V_m = Measured volume from 10.1.
P_2 = Atmospheric pressure at time of orifice calibration, mm Hg.
P_1 = 760 mm Hg.
T_2 = Atmospheric temperature at time of orifice calibration, °K.
T_1 = 298° K.

10.3 Lead concentration. Calculate lead concentration in the air sample.

$$C = \frac{(\mu g\ Pb/ml \times 100\ ml/strip \times 12\ strips/filter) - F_b}{V_{STP}}$$

where:

C = Concentration, μg Pb/sm^3.
μg Pb/ml = Lead concentration determined from section 8.
100 ml/strip = Total sample volume.
12 strips/filter = Useable filter area, 7" × 9"/Exposed area of one strip, ¾" × 7".
F_b = Lead concentration of blank filter, μg, from section 6.1.1.2.3.
V_{STP} = Air volume from 10.2.

11. *Quality control.*

¾" × 8" glass fiber filter strips containing 80 to 2000 μg Pb/strip (as lead salts) and blank strips with zero Pb content should be used to determine if the method—as being used—has any bias. Quality control charts should be established to monitor differences between measured and true values. The frequency of such checks will depend on the local quality control program.

To minimize the possibility of generating unreliable data, the user should follow practices established for assuring the quality of air pollution data, (*13*) and take part in EPA's semiannual audit program for lead analyses.

12. *Trouble shooting.*

1. During extraction of lead by the hot extraction procedure, it is important to keep the sample covered so that corrosion products—formed on fume hood surfaces which may contain lead—are not deposited in the extract.

2. The sample acid concentration should minimize corrosion of the nebulizer. However, different nebulizers may require lower acid concentrations. Lower concentrations can be used provided samples and standards have the same acid concentration.

3. Ashing of particulate samples has been found, by EPA and contractor laboratories, to be unnecessary in lead analyses by atomic absorption. Therefore, this step was omitted from the method.

4. Filtration of extracted samples, to remove particulate matter, was specifically excluded from sample preparation, because some analysts have observed losses of lead due to filtration.

5. If suspended solids should clog the nebulizer during analysis of samples, centrifuge the sample to remove the solids.

13. *Authority.*

PART 51—PREPARATION, ADOPTION, AND SUBMITTAL OF IMPLEMENTATION PLANS

Implementation Plans for Lead National Ambient Air Quality Standard

AGENCY: Environmental Protection Agency.

ACTION: Final rulemaking.

SUMMARY: The regulations promulgated below, together with the current requirements of 40 CFR Part 51, set forth the requirements for States to follow in developing, adopting, and submitting acceptable implementation plans for the lead national ambient air quality standards (NAAQS'), promulgated elsewhere in the FEDERAL REGISTER. The implementation plans are required under section 110 of the Clean Air Act. Amendments to the existing regulations for implementation plans are necessary because lead differs from other pollutants for which the existing regulations were designed. The amendments address the following topics: definitions of point source and control strategy; control strategy requirements; and air quality surveillance.

EFFECTIVE DATE: This rulemaking is effective October 5, 1978; State implementation plans for lead are due by July 5, 1979.

ADDRESSES: U.S. Environmental Protection Agency, Office of Air Quality Planning and Standards, Control Programs Development Division (MD 15), Research Triangle Park, N.C. 27711.

FOR FURTHER INFORMATION CONTACT:

Joseph Sableski, Chief, Plans Guidelines Section, at the above address or at 919-541-5437 (commercial) or 629-5437 (FTS).

SUPPLEMENTARY INFORMATION:

1. BACKGROUND

On December 14, 1977, EPA proposed regulations for the preparation, adoption, and submission of implementation plans to achieve the national ambient air quality standards for lead, which were also proposed on that same date (42 FR 63087). EPA invited comments from interested persons and held a hearing on the proposed NAAQS and State implementation plan (SIP) regulations on February 15 and 16, 1978. EPA received comments on the proposed lead implementation plan requirements from 25 commenters. Of these, there were 10 representatives from industry, 9 from State and local governmental agencies, 4 from citizens' organizations and private citizens, and 2 from other federal agencies.

2. SUMMARY OF COMMENTS AND RESPONSES

The following discussion summarizes most of the comments received on the proposal. There were a few other comments that EPA felt were not significant to warrant discussion in the FEDERAL REGISTER and that did not affect the final regulation. A summary of all the comments received and EPA's response is available for public inspection during normal business hours in EPA's Public Information Reference Unit (PM 215), 401 M Street SW., Washington, D.C. 20460, telephone 202-755-0707.

2.1 POINT SOURCE DEFINITION

There were several comments concerning the definition of a point source. One commenter indicated that the definition of a point source is confusing and differs from that used in the provisions in the Clean Air Act concerning prevention of significant deterioration (PSD). Parts of that comment were directed toward the existing definition of point source in § 51.1(k), which, as the commenter acknowledged, is not the subject of the proposal and will not be discussed here.

Currently, § 51.1(k) defines point sources in terms of emissions per year and location of the source, as well as a listing of individual source categories. Currently, point sources of other pollutants for which NAAQS' exist that are located in urban areas are defined as those that emit pollutants in excess of 100 tons per year; point sources in less urbanized areas are defined as those that emit pollutants in excess of 25 tons per year. In light of the low level of the lead standard in relation to the other standards (e.g., for particulate matter), good reason exists to define point sources for lead at a lower level of emissions than that for the current set of pollutants for which EPA has established NAAQS'. Based on an analysis contained in EPA's "Supplementary Guidelines for Lead Implementation Plans," (1) EPA is defining a point source of lead as "any stationary source causing emissions in excess of 4.54 metric tons (5 tons) per year of lead or lead compounds measured as elemental lead." This represents a slight change from the proposal, which failed to account for lead compounds.

The significance of the definition of § 51.1(k) is that the emission inventory, which is used to determine the extent of possible violations of the air quality standard and determine the effectiveness of control strategies, must include a determination of emissions from each point source. All emissions from sources other than point sources may be grouped together as area (or line) sources.

The definition of point source, which was intended to be based on actual emissions, differs from the definition in section 169 of the Clean Air Act (which pertains to prevention of significant deterioration), which is based on potential emissions. The reason for the difference is that for planning purposes, the inventory of existing sources must be based on an actual situation to be used as a baseline upon which one develops a plan. For new source review (including review for prevention of significant deterioration), one must be aware of the emissions that could be emitted from the proposed source as well as actual emissions; hence, the source size criteria for selection of new sources to be reviewed under the recently promulgated PSD regulations incorporate potential, as well as actual, emissions. The definitions of point source in § 51.1(k) for all pollutants have been revised from the proposal to clarify that the size criteria are based upon actual emissions. This implies the emissions that are emitted after any control is applied.

2.2 CONTROL STRATEGY

A number of persons provided comments concerning the control strategy aspects of the proposed regulations.

One commenter correctly noted a discrepancy between the list of source categories in §§ 51.80 ("Demonstration of attainment") and 51.84 ("Areas around significant point sources"), for which the State must perform an analysis. The lists should have been identical—§ 51.84(a) should have also included lead-acid storage battery manufacturing plants that produce 1,200 or more batteries per day. The rulemaking promulgated below incorporates this change. The criterion for production of batteries, which was based on a monthly standard, has been raised to 2,000 batteries per day, however, to account for the slightly less stringent quarterly lead ambient standard.

Several commenters indicated that the requirements in §§ 51.83 ("Certain urbanized areas") and 51.85 ("Other areas") appeared identical and therefore one of the sections was redundant. The difference between the two sections lies in the required geographical scope of the analysis. Section 51.83 requires that the plan contain an analysis of each urbanized area that has a measured lead air concentration that is in excess of 4.0 $\mu g/m^3$ quarterly mean (monthly mean in the proposal). The distinguishing provision is that

the analysis must cover at least the entire urbanized area. Section 51.85, on the other hand, requires that for any area (urbanized or not) with a recorded lead concentration that does not meet the national standard of 1.5 $\mu g/m^3$ quarterly mean (monthly mean in the proposal), the plan must contain an analysis of at least the area in the vicinity of the monitor that has recorded the concentration. Therefore, the analysis may be restricted to an evaluation of only those sources within a relatively small radius from the monitor.

Several commenters suggested that the control strategy requirements insure that the burden for solving the lead air problem be equitably distributed between mobile and stationary sources. The commenters realized that either kind of control is expensive and difficult to implement. In response, EPA maintains that the allocation of the burden of control in the SIP is the primary responsibility of the States, and therefore EPA will avoid setting criteria in 40 CFR 51 that favor control of one source category over another. EPA acknowledges that measures that are expensive and difficult to implement may have to be adopted in order to demonstrate attainment of the lead standard.

Two commenters indicated that the regulations did not provide a satisfactory treatment to problems related to background concentration. They claimed that a facility in an area of high background concentrations may be unduly penalized in efforts to attain the standard. EPA acknowledges that this problem may exist. In most cases, however, the high background air concentrations are generally due to other sources in the vicinity. It is the primary responsibility of the State to allocate the burden of emmission control to the various sources causing the problem. Sources will have an opportunity to comment on the plan at the public hearing that is required before the plan is submitted to EPA.

One commenter suggested that EPA recommend analysis of fugitive dust and on-premise soil before a State initiates a program of prolonged monitoring in the vicinity of gray iron foundries. As mentioned in the preamble to the proposed regulations, EPA identified gray iron foundries as having the potential for causing violations of the national standard for lead, but this identification was based on limited data concerning the amount of fugitive emissions from the facilities. Although EPA does not feel that the degree of confidence in this identification justifies a requirement for States to analyze all gray iron foundries (of which approximately 1,500 exist), EPA encourages States to consider analysis of these sources to the extent that time and resources permit. The commenter's suggestion concerning the analysis of fugitive dust and on-premise soil before undertaking extensive monitoring and analysis appears to offer the potential for conserving scarce resources in that States may want to restrict their monitoring and analysis efforts to those plants with relatively high lead levels in dust and soil.

The same commenter also indicated that secondary lead smelters and similar sources probably cannot be modeled because of fugitive dust and low stacks. EPA recognizes the difficulty in quantifying fugitive dust and fugitive emissions and recognizes that low stacks will generally cause higher concentrations closer to the stack than will higher stacks. The Clean Air Act requires that an approved plan must demonstrate attainment of the standard, however. EPA has, based upon preliminary analyses, determined that secondary lead smelters and other sources listed in § 51.84 have the potential for causing violations of the lead standard. EPA also believes that attainment of the lead standard around such sources can best be demonstrated by the use of an atmospheric dispersion model. In many cases, States will not have the time or resources to perform detailed studies to quantify the fugitive dust and fugitive emissions from individual facilities and may have to rely on factors that were based on limited studies of other facilities or best estimates. In complying with § 51.84, for cases where no ambient lead data were collected in the vicinity of the source and where a State must thus estimate the air quality impact of the sources, the State will have to decide for itself what level of control is warranted by the confidence in the data upon which the analysis is based.

In another comment concerning modeling, one commenter from a State agency claimed that the models used for assessing the monthly impact of point sources are not accessible to most air pollution control agencies. In the initial analysis of the impact of the proposed standard on point sources, it is true that EPA used the Oak Ridge National Laboratory model, "Atmospheric Transport and Dispersion Model" (ATM), (2) which is probably not available to most agencies. That analysis was revised subsequently, and another model was used, however. Also, EPA is recommending the use of other models, specifically those models for particulate matter described in EPA's "Guideline on Air Quality Models," (3) for modeling point sources for SIP development. These models are generally available.

The same commenter indicated that only ambient monitoring or upwind-downwind sampling can give a reliable assessment of the impact of sources with a large fugitive emission component. EPA acknowledges that monitoring studies generally give a more reliable estimate of the air quality impact of sources that emit fugitive emissions because no estimate need be made of the fugitive emissions, which are difficult to measure directly. Such studies cannot be done for many areas within the time and resource constraints facing the States, however, and therefore EPA regulations require the use of modeling around such point sources. States will have to make estimates of the fugitive emissions based on whatever information may exist. EPA is, however, in another part of this FEDERAL REGISTER giving advance notice of proposed rulemaking to require the installation of ambient monitors in the vicinity of three categories of point sources that have major fugitive emissions—Primary and secondary lead smelters and primary copper smelters. Presumably, after these monitors have been in place for a few years, the data yielded will provide more accurate information concerning the nature and magnitude of the lead problem from these sources. After those data become available, EPA may require States to revise their implementation plans. Furthermore, EPA intends to develop fugitive lead emission factors that are more accurate than those that currently exist.

One commenter recommended that the regulations place the proof of compliance with emission regulations on the stationary source. The commenter claimed that local enforcement agencies do not have the funds for continuous monitoring. In response, EPA has found that there are no techniques for continuous monitoring of lead emissions. The State will be required under existing regulations (40 CFR 51.19) to carry out a source surveillance program which generally consists of visual inspection of the installation of control equipment and testing of stack emissions.

Several comments addressed issues concerning control of lead in gasoline. One commenter indicated that any reduction of the lead content of gasoline or any other similar kinds of programs (presumably meaning control of fuels or the control of lead emissions from individual vehicles) that may be needed in the SIP over and above the current Federal program should be done through Federal rather than local regulation. EPA has already taken steps to control the amount of lead in gasoline through the phasedown of lead in leaded gasoline and the requirement that cars equipped with catalyst mufflers must burn un-

V 4 3 / 1 9 4

leaded gasoline. The level of control of lead in leaded gasoline was based on average conditions concerning lead air quality concentrations. Areas that have unique problems and that will find it impossible to demonstrate attainment of the lead standard through stationary source control or through transportation control measures may have to adopt measures such as requirements for further reduction of lead in gasoline or control of lead emissions from the tailpipe of vehicles. Currently, EPA does not foresee the need for additional mobile source control strategies and does not intend to require further nationally applicable lead-in-gasoline reductions.

Other comments concerning further reductions of the lead content of gasoline suggested that such reductions be undertaken only after sufficient data is available to indicate that the lead air quality problem is geographically broad enough and only after a finding that such a limitation is necessary to achieve a national ambient air quality standard. The commenters enumerated the problems with instituting further control of the lead content of gasoline. The commenters contended that application of more stringent local limitations of lead in gasoline could seriously disrupt the nation's gasoline distribution system, resulting in severe spot shortages, especially during the summer months when gasoline demand is at its highest.

EPA recognizes this problem and advises the States to consider the comment. Also, under section 211(c)(4)(C) of the Clean Air Act, EPA will not approve State or regional programs for further reductions of lead content of gasoline unless the State demonstrates that no other reasonable measures are available.

Also, two of the commenters recommended that 40 CFR Part 51 regulations be modifed to reflect the restrictions in section 211(c)(4)(C) of the Act regarding State limitation of the lead content of gasoline. In response, EPA has incorporated the intent of the Act into the definition of "control strategy" as it pertains to restrictions on fuel additives.

Two commenters representing primary lead smelting companies recommended an alternative approach to protecting the health of persons from the ambient lead levels in the vicinity of primary lead smelters. They recommended that sources that cannot control emissions so that the lead standard will be met be allowed to conduct a public health screening and hygiene program aimed at reducing the amount of lead that children in the vicinity of the source take in and insuring that safe blood lead levels are satisfactorily maintained.

EPA believes that there are legal, technical, and equity problems with the programs that render it unacceptable as the sole means of implementation of the national standard for lead.

Concerning the legal problem, such a program assumes that the air quality standard will be violated, and presumably, the plan will not contain a demonstration that the air quality standard will be attained. Under the Clean Air Act, EPA must disapprove a plan that does not contain a demonstration that the air quality standard will be attained by the mandatory attainment date. The Act provides for the protection of health through the standard setting, planning, and implementation processes; it does not allow for a surrogate procedure whereby public health may be protected even though the ambient standards are not met.

Concerning technical problems, the relationship between emissions from a source and blood lead levels is not quantitatively certain. Even assuming a biological monitoring system were to be established, it is unclear what the source would have to do concerning its operation or emissions if the monitoring program revealed unacceptable blood lead levels. Even if a course of action were clear, the damage would have already been done, while the basic purpose of the standard setting and implementation process envisioned by section 110 of the Act is prevention of public health problems.

Concerning equity, the biological monitoring program would inconvenience the very people that are supposed to benefit from the Act. The Act envisioned that all people have an equal right to healthy air. The commenters who recommended that biological monitoring approach apparently believe that people who happen to live in areas with elevated lead levels should not be accorded equal protection, but should be made to pay extra for their health through presumably continuous participation in a blood sampling program. If a person did not want to participate, it is doubtful whether he could be forced to, so therefore his health could be placed in jeopardy.

One commenter representing a primary lead smelter warned that enclosure of smelter operations to control fugitive lead emissions may present a severe occupational health hazard to employees who must work within the enclosed space. EPA realizes these potential problems. If a source installs such enclosures, it must of course also meet any applicable regulations set forth by the Occupational Safety and Health Administration as well as control emissions to the extent specified in the applicable implementation plan.

One other commenter expressed concern that there appears to be nothing that can be done in areas where a source is employing best available control technology, yet the standard is still not being met. The Act requires that for approval, an implementation plan must demonstrate that the control strategy contained in the plan is adequate to attain and maintain the NAAQS. EPA realizes, however, that a plan which meets this criterion may, even after full implementation, not actually result in attainment by the attainment date. This would generally indicate that assumptions concerning the amount of emissions and the relationship between emissions reductions and air concentrations that were made when the plan was developed eventually were proven erroneous. If an approved plan is later found to be inadequate to attain the standard, EPA will require the State to revise the plan. If that plan has already required all measures short of those that would force significant source closures, EPA will at that time decide whether the closure must be effected or whether there are alternatives to this in the discretion given to EPA under the Act in sections 110 or 113. States should make every effort to develop and submit plans that demonstrate attainment of the standard using the best data available.

Several commenters from State air pollution control agencies indicated that the development of lead SIP's will be difficult within the timeframe provided. EPA realizes that the development of the lead plans will be competing in priorities and resources with the development of plan revisions by title I, part D, of the Clean Air Act for nonattainment areas. Where a State needs additional assistance in the development of its lead plan, or where it is unsure as to the priority of development of its lead plan, the State should consult with the appropriate EPA regional office.

2.3 AIR QUALITY MONITORING

Several commenters recommended that a minimum number of samples be taken to determine whether the standard is being attained. Also, several persons commented that the sampling should be performed more frequently, such as daily. One person indicated that determination of the attainment status should be done by annual rather than monthly averaging. At least a 3-month average would be more desirable. Another person indicated that the shorter the averaging period, the more the number of samples should be.

Concerning the minimum number of valid samples needed to determine an average, it is general practice to require at least 75 percent of the scheduled samples to be valid. EPA will prepare a guideline on this and other issues concerning the determination of attainment of the standard. Concerning the frequency of sampling, EPA is promulgating a national ambient air quality standard for lead in this FEDERAL REGISTER that is based on a calendar quarter, rather than calendar month as had been proposed. EPA has determined that a sampling schedule of once every 6 days is adequate to give a representative sample for a quarter.

One commenter indicated that monitoring the inner city area should be given top priority because the vehicle mix in these areas favors older cars that burn leaded gasoline. EPA's response is that if maximum exposures occur in these areas, then monitoring these areas should in fact receive first priority. The determination of acceptability of the sites will be the joint responsibility of the States and the cognizant EPA regional office.

One commenter recommended that EPA change the recommendation in the draft "Supplementary Guidelines for Lead Implementation Plans" (*1*) for locating lead monitors near roadways that are at or below grade level rather than near elevated roadways. The commenter suggested that the guideline require measurements to be representative of emissions and environmental exposure. The commenter indicated that the proposed guidance would exclude monitoring play areas that are located beneath elevated roadways. EPA agrees with this comment. The purpose behind excluding below grade level monitoring and monitoring near elevated roadways was to insure adequate exposure at the monitoring site. If significant population exposures consistent with the averaging time of the NAAQS were encountered in these situations, then monitoring in these locations would meet the intent of the guidance. EPA has revised the siting guidance to account for these considerations.

Several comments were directed toward the recommended location of a monitor at a given location. Two persons indicated that the allowance of 5 meters in elevation of lead air monitors is too high and that it should be changed or should allow for numerical adjustment of the data. One person suggested that the monitors be required to be placed closer to roadways because he felt that would be more representative of exposure; another suggested that the monitors are required to be placed too close to the street already in some cases and that the data from the monitors would be unrepresentative. EPA proposed a range of heights for lead monitors from 0 to 5 meters above ground level. The proposed required distance from major roadways for the peak concentration site was 5 to 15 meters. The intent was to sample ambient air to which significant portions of the population are being exposed over the averaging time of the standard. During a typical day, even the most susceptible population group does not spend more than one-half of their time in the ambient air below the 2-meter level or within 15 meters of a major roadway. They are indoors or at considerable distances from roadways for the remainer of their time. Consequently, requiring samplers to be placed below 2 meters above the ground or closer than 5 meters to a roadway would lead to concentration measurements that would be unrepresentative of lead exposures. Further, some range of heights and distances is necessary due to practicalities involved in finding suitable sites, power availability, protection against vandalism, allowing free pedestrian movement along sidewalks, etc.

One commenter recommended that the criteria for monitoring in the vicinity of roadways not include specific distance restrictions, such as the requirement for placement of monitors between 5 and 15 meters from the traffic lane. The commenter indicated that many areas do not have housing that close to major roadways and therefore the numerical restrictions would be counterproductive to insuring accurate monitoring of maximum population exposure. EPA's response is that even though housing may not exist that close to roadways in all cases, the public has access to many such areas.

One commenter recommended that the monitoring guidelines require monitoring lead below ground level in public places such as subway stations and underground shopping areas. In response, EPA's monitoring guidance was written for purposes of determining attainment of a standard. Locating monitors in subways to determine exposures would be considered special purpose monitoring and thus could be performed if desired by the State or local agency. EPA however, does not feel that monitors placed in these situations would yield data suitable for developing implementation plans or determining national trends and strategies and thus will not require it. Furthermore, since no member of the public spends more than perhaps 8 hours out of 24 hours in such locations, monitoring there would not be representative of population exposure for a standard based upon 24-hour sampling for an entire quarter.

One commenter recommended that the regulations require ambient monitoring in the vicinity of major point sources. Not doing so may allow potentially significant public health impacts that result from fugitive emissions at major point sources to be ignored. As mentioned above, in another part of this FEDERAL REGISTER, EPA is giving advance notice of proposed rulemaking to modify the regulations to require source owners or operators to monitor in the vicinity of primary and secondary lead smelters and primary copper smelters. EPA chose these source categories because they are considered to have the potential for causing the greatest concentrations of air lead in their vicinity and because the nature and magnitude of their fugitive emissions are relatively unknown compared to other source categories. The regulations will continue to vest authority in the regional administrators to require monitors in the vicinity of other sources. EPA will prepare guidance concerning the recommended number and siting of monitors in the vicinity of lead point sources.

Another commenter claimed that the regulations do not adequately address the locations where air quality samples will be taken and at what distance from a facility they will be taken. As mentioned above, EPA will develop guidance on the placement of lead monitors in the vicinity of point sources. The guidance for locating monitors elsewhere is highly specific in that the distances from obstructions and interferences are quantitatively described. It is not possible from a national perspective, however, to develop general regulations that would cover every conceivable situation that could occur without making the regulations unduly complex.

One commenter suggested that the lead monitors should not be required to be permanent until the State has more experience in sampling and monitoring lead. Also, several commenters recommended that EPA require initial monitoring by mobile vans or other procedures to locate the most critical sites. EPA does not intend that the required monitoring stations would remain at one place in perpetuity. EPA does, however, need some stability in monitoring site locations to allow for trends analysis. If a station once established is later found to be unrepresentative, it should be moved to a new location. EPA agrees with the intent of the comments and has always encouraged special purpose monitoring prior to establishing a permanent monitoring station. EPA will not require resource-intensive procedures to locate critical sites, however.

Several commenters recommended that the regulations require more than a minimum of two monitors per area. EPA's response is that the regulations do not preclude placing out more than two monitors. EPA is interested nationally in obtaining only enough data to establish a data trend,

OCT 5 1978

V 4 3 / 1 9 4

OCT 5 78

determine if the Federal programs that result in the reduction of automobile lead emission are causing decreases in lead air concentrations, and determine the approximate attainment status of areas. Furthermore, the regulations would allow EPA to require additional monitors on a case-by-case basis where EPA believes that two monitors are insufficient to determine whether the national standard is being attained and maintained.

One of the commenters who recommended that the regulations require more than two monitors per area objected to placing responsibility on the EPA regional offices to require additional monitors and determine their location. The commenter claimed that this precludes both accountability of the State's actions and public participation. EPA's response is that requiring a limited number of samplers specifically to meet data needs at the national level and leaving the determination of the number and location of the remaining stations in the State network to the State and the regional office is consistent with the recommendations of EPA's Standing Air Monitoring Work Group (SAMWG). (4) In a recent action (43 FR 34892, published Aug. 7, 1978), EPA proposed that the locations of stations (for all pollutants) need not actually be included in the implementation plan, but the plan must contain a monitoring program which includes a monitoring network that is based upon negotiations between the State and the EPA regional office. The plan would also have to contain a commitment to annually review the adequacy of the network and to establish new stations and relocate or terminate existing stations as needed in order to keep the network responsive to data needs. EPA feels that if the entire system were part of the SIP, the only way the State could make modifications would be to propose the change, hold a public hearing, and submit the change to EPA as a plan revision. EPA would then have to propose to approve the revision, entertain public comment, and then finally promulgate its approval. EPA feels that this process is too time-consuming and would defeat the purpose of the annual review, which is to make timely adjustments to the network. Also, EPA feels that the potential benefits from this process would be too few to warrant its implementation. The proposed requirements concerning air quality monitoring, however, would require that the locations of the monitors be available at all times for public inspection. Therefore, when the State revises its SIP in order to implement the forthcoming air quality monitoring requirements, the public can at that time comment on the State system. The public can also comment on changes to the networks at any time by submitting written comment on changes to the State or EPA regional office.

One commenter indicated that the low-volume sampler compares favorably in measurement with the high-volume sampler, which is the reference method for collection of the sample, and excludes larger particles that are not respirable and which the commenter feels are not significant from a health standpoint. The commenter implies that EPA should allow the use of the low-volume sampler. Low-volume sampling will be allowed if the agency that wishes to use it demonstrates that the method is equivalent to the reference method, using the procedures that EPA is proposing in another portion of this FEDERAL REGISTER.

3.0 OTHER CHANGES FROM PROPOSAL

3.1 AIR QUALITY SURVEILLANCE REQUIREMENTS

EPA has revised the air quality surveillance requirements for lead slightly from the proposal to render them clearer and more consistent with the general air quality surveillance requirements currently under revision that will apply to all pollutants. These revised general requirements will closely follow and implement the recommendations of EPA's Standing Air Monitoring Work Group. (4) The significant revisions of the lead requirements from the proposal include the following: A change of the date by which the entire monitoring system must be established; deletion of the references to the terms, "National Air Quality Trends Stations" (or "NAQTS") (which are now called "National Air Monitoring Stations") (or "NAMS") and "State and Local Air Monitoring Stations" (or "SLAMS"). These terms have not yet been defined by regulation, so reference to them is meaningless. Modification to the requirement that the plan contain a description of the monitoring system; and revision of the "Supplementary Guidelines on Lead Implementation Plans" to account for location of monitoring stations in urban street canyons.

As mentioned in the preamble to the proposal, EPA will eventually incorporate the lead monitoring requirements into the air quality monitoring requirements that apply to all pollutants for which NAAQS' exist.

3.2 REPORTING OF DATA BASE

Under the proposal in § 51.86(c), the State would have been required to submit the air quality data collected since 1974 in the format of EPA's storage and retrieval of aerometric data (SAROAD) system. The final regulation below retains this requirement, but provides the regional administrator with the authority to waive the requirement concerning the format of the data.

3.3 LISTS OF URBANIZED AREAS

There were several errors in the two tables of areas in the preamble to the proposal. In table 2, "Urbanized areas with lead air concentrations exceeding or equal to 1.5 $\mu g/m^3$, maximum monthly mean (1975)", the Norfolk, Va. AQCR number should have read 223 instead of 233. Table 3, "Urbanized areas with lead air concentrations equal to or exceeding 4.0 $\mu g/m^3$, maximum monthly mean (1975)" should have read as follows:

*AQCR	Urbanized area
15	Phoenix, Ariz.
24	Los Angeles—Long Beach, Calif.
29	San Diego, Calif.
30	San Francisco—Oakland, Calif.
30	San Jose, Calif.
67	Chicago, Ill.—northwestern Indiana.
215	Dallas, Tex.

SOURCE: Data from EPA's Environmental Monitoring Support Laboratory, Statistical and Technical Analysis Branch."

These corrections, however, are now academic, since the averaging time of the lead standard is now quarterly. Therefore, tables 2 and 3 are revised to reflect the quarterly average. Table 2 (renumbered table 1) appears at the end of the preamble. Table 3, revised to reflect the quarterly average, now contains only one area, the Los Angeles—Long Beach, Calif., urbanized area. The list reflects only the data currently available to EPA, and generally the quarterly averages available are not truly representative due to insufficient data. There are other data available to State and local air pollution control agencies, however, that may indicate that other areas have concentrations in excess of the concentrations specified in the criteria for performing the analysis.

3.4 EXAMPLE LEAD CONTROL STRATEGY

The preamble to the proposal indicated that EPA was developing an example lead control strategy to assist the States in developing their lead implementation plans. The preamble indicated that the example was scheduled for completion by March 1978. Because EPA has received an extension for promulgating the national ambient air quality standard for lead, because the example control strategy would be based on the final implementation plan regulations promulgated below, and because of other delays, the example controls strategy will probably not be available until November or December of 1978.

SOURCE: Data from EPA's Environmental Monitoring Support Laboratory, Statistical and Technical Analysis Branch.

Dated: September 29, 1978.

DOUGLAS M. COSTLE,
Administrator.

The Code of Federal Regulations, Title 40, Chapter I, Part 51, is amended as follows:

1. In § 51.1, paragraph (k) is revised and paragraph (n) is amended by adding paragraph (11) as follows:

§ 51.1 Definitions.

* * * * *

(k) "Point source" means the following:

(1) For particulate matter, sulfur oxides, carbon monoxide, hydrocarbons, and nitrogen dioxide—

(i) Any stationary source the actual emissions of which are in excess of 90.7 metric tons (100 tons) per year of the pollutant in a region containing an area whose 1970 "urban place" population, as defined by the U.S. Bureau of the Census, was equal to or greater than 1 million;

(ii) Any stationary source the actual emissions of which are in excess of 22.7 metric tons (25 tons) per year of the pollutant in a region containing an area whose 1970 "urban place" population, as defined by the U.S. Bureau of the Census was less than 1 million; or

(iii) Without regard to amount of emissions, stationary sources such as those listed in appendix C to this part.

(2) For lead, any stationary source the actual emissions of which are in excess of 4.54 metric tons (5 tons) per year of lead or lead compounds measured as elemental lead.

* * * * *

(n) * * *

(11) Control or prohibition of a fuel or fuel additive used in motor vehicles, if such control or prohibition is necessary to achieve a national primary or secondary air quality standard and is approved by the Administrator under § 211(c)(4)(C) of the Act.

* * * * *

2. Section 51.12, paragraph (e) is amended by adding subdivision (3) as follows:

§ 51.12 Control strategy: General.

* * * * *

(e) * * *

(3) This paragraph covers only plans to attain and maintain the national standards for particulate matter, sulfur oxides, carbon monoxide, photochemical oxidants, hydrocarbons, and nitrogen dioxide.

* * * * *

3. Section 51.17 is amended by (1) revising the heading to read "Air quality surveillance: Particulate matter, sulfur oxides, carbon monoxide, photochemical oxidants, hydrocarbons, and nitrogen dioxide," and (2) adding paragraph (d) as follows:

§ 51.17 Air quality surveillance: Particulate matter, sulfur oxides, carbon monoxide, photochemical oxidants, hydrocarbons, and nitrogen dioxide.

* * * * *

(d) This section covers only plans to attain and maintain the national standards for particulate matter, sulfur oxides, carbon monoxide, photochemical oxidants, hydrocarbons, and nitrogen dioxide.

4. A new § 51.17b is added as follows:

§ 51.17b Air quality surveillance: Lead.

(a) This section covers only plans to attain and maintain the national standards for lead.

MONITORING IN CERTAIN AREAS

(b) The plan must provide for the establishment of a monitoring system that contains at least two permanent lead ambient air quality monitoring stations in each urbanized area (as defined by the U.S. Bureau of the Census)—

(1) That has a 1970 population greater than 500,000; or

(2) Where lead air quality concentrations currently exceed or have exceeded 1.5$\mu g/m^3$ quarterly arithmetic mean measured since January 1, 1974.

(c) The EPA Regional Administrator may specify more than two monitoring stations if he finds that two stations are insufficient to adequately determine if the lead standard is being attained and maintained. He may also specify stations in areas outside the areas covered in paragraph (b) of this section.

(d) The monitoring system must contain at least one roadway type monitoring site and at least one neighborhood site and be sited in accordance with the procedures specified in EPA's "Supplementary Guidelines for Lead Implementation Plans."

(e) The monitors must be operated on a minimum sampling frequency of one 24-hour sample every 6 days.

(f) Existing sampling sites being used for sampling particulate matter may be designated as sites for sampling lead if they meet the siting criteria of "Supplementary Guidelines for Lead Implementation Plans."

(g) The plan must provide that all lead air quality monitoring stations will be established and operational as expeditiously as practicable but no later than 2 years after the date of the Administrator's approval of the plan for the stations specified under paragraph (b) of this section.

(h) The analysis of the 24-hour samples may be performed for either individual samples or composites of the samples collected over a calendar month or quarter.

(i) [Reserved]

V 4 3 / 1 9 4

REQUIREMENTS APPLICABLE TO ALL MONITORS

(j) The plan must provide for having a description of the system available for public inspection and submission to the Administrator at his request. The description must be available at all times after the date the plan is made available for public inspection. The description must include the following information:

(1) The SAROAD site identification form.

(2) The sampling and analysis method.

(3) The sampling schedule.

(k) The monitoring method used in any station in the monitoring systems required in this section must be a reference or equivalent method for lead as defined in § 50.1 of this chapter.

5. A new subpart E is added as follows:

Subpart E—Control Strategy: Lead

Sec.
51.80 Demonstration of attainment.
51.81 Emissions data.
51.82 Air quality data.
51.83 Certain urbanized areas.
51.84 Areas around significant point sources.
51.85 Other areas.
51.86 Data bases.
51.87 Measures
51.88 Data availability.

AUTHORITY: Secs. 110, 301(a), Clean Air Act as amended (42 U.S.C. 7410, 7601).

Subpart E—Control Strategy: Lead

§ 51.80 Demonstration of attainment.

(a) Each plan must contain a demonstration that the standard will be attained and maintained in the following areas:

(1) Areas in the vicinity of the following point sources of lead:

Primary lead smelters.
Secondary lead smelters.
Primary copper smelters.
Lead gasoline additive plants.
Lead-acid storage battery manufacturing plants that produce 2,000 or more batteries per day.
Any other stationary source that actually emits 25 or more tons per year of lead or lead compounds measured as elemental lead.

(2) Any other area that has lead air concentrations in excess of the national standard concentration for lead, measured since January 1, 1974.

(b) The plan must demonstrate that the measures, rules, and regulations contained in the plan are adequate to provide for the attainment of the national standard for lead within the time prescribed by the Act and for the maintenance of that standard for a reasonable period thereafter.

(c) The plan must include the following:

(1) A summary of the computations, assumptions, and judgments used to determine the reduction of emissions or reduction of the growth in emissions that will result from the application of the control strategy.

(2) A presentation of emission levels expected to result from application of each measure of the control strategy.

(3) A presentation of the air quality levels expected to result from application of the overall control strategy presented either in tabular form or as an isopleth map showing expected maximum concentrations.

§ 51.81 Emissions data.

(a) The plan must contain a summary of the baseline lead emission inventory based upon measured emissions or, where measured emissions are not available, documented emission factors. The point source inventory on which the summary is based must contain all sources that emit 5 or more tons of lead per year. The inventory must be summarized in a form similar to that shown in appendix D.

(b) The plan must contain a summary of projected lead emissions for—

(1) At least 3 years from the date by which EPA must approve or disapprove the plan if no extension under section 110(e) of the Clean Air Act is granted;

(2) At least 5 years from the date by which EPA must approve or disapprove the plan if an extension is requested under section 110(e) of the Clean Air Act; or

(3) Any other longer period if required by the appropriate EPA Regional Administrator.

(c) The plan must contain a description of the method used to project emissions.

(d) The plan must contain an identification of the sources of the data used in the projection of emissions.

§ 51.82 Air quality data.

(a) The plan must contain a summary of all lead air quality data measured since January 1974. The plan must include an evaluation of the data for reliability, suitability for calibrating dispersion models (when such models will be used), and representativeness. When possible, the air quality data used must be for the same baseline year as for the emission inventory.

(b) If additional lead air quality data are desired to determine lead air concentrations in areas suspected of exceeding the lead national ambient air quality standard, the plan may include data from any previously collected filters from particulate matter high volume samplers. In determining the lead content of the filters for control strategy demonstration purposes, a State may use, in addition to the reference method, X-ray fluorescence or any other method approved by the Regional Administrator.

(c) The plan must also contain a tabulation of, or isopleth map showing, maximum air quality concentrations based upon projected emissions.

§ 51.83 Certain urbanized areas.

For urbanized areas with measured lead concentrations in excess of 4.0 $\mu g/m^3$, quarterly mean measured since January 1, 1974, the plan must employ the modified rollback model for the demonstration of attainment as a minimum, but may use an atmospheric dispersion model if desired.

§ 51.84 Areas around significant point sources.

(a) The plan must contain a calculation of the maximum lead air quality concentrations and the location of those concentrations resulting from the following point sources for the demonstration of attainment:

Primary lead smelters.
Secondary lead smelters.
Primary copper smelters.
Lead gasoline additive plans.
Lead-acid storage battery manufacturing plants that produce 2,000 or more batteries per day.
Any other stationary source that actually emits 25 or more tons per year of lead or lead compounds measured as elemental lead.

(b) In performing this analysis, the State shall use an atmospheric dispersion model.

§ 51.85 Other areas.

For each area in the vicinity of an air quality monitor that has recorded lead concentrations in excess of the lead national standard concentration, the plan must employ the modified rollback model as a minimum, but may use an atmospheric dispersion model if desired for the demonstration of attainment.

§ 51.86 Data bases.

(a) For interstate regions, the analysis from each constituent State must, where practicable, be based upon the same regional emission inventory and air quality baseline.

(b) Each State shall submit to the appropriate EPA Regional Office with the plan, but not as part of the plan, emissions data and information related to point and area source emissions as identified in the "Supplementary Guidelines for Lead Implementation Plans."

(c) Air quality data.

(1) Each State shall submit to the appropriate EPA Regional Office with the plan, but not as part of the plan, all lead air quality data measured since January 1, 1974. This requirement does not apply if the data has already been submitted.

(2) The data must be submitted in accordance with the procedures and data forms specified in chapter 3.4.0 of the "AEROS User's Manual" concerning storage and retrieval of aerometric data (SAROAD) except where the Regional Administrator waives this requirement.

§ 51.87 Measures.

(a) The lead control strategy must include the following:

(1) A description of each control measure that is incorporated into the lead plan.

(2) Copies of or citations to the enforceable laws and regulations to implement the measures adopted in the lead plan.

(3) A description of the administrative procedures to be used in implementing each selected control measure.

(4) A description of enforcement methods including, but not limited to, procedures for monitoring compliance with each of the selected control measures, procedures for handling violations, and a designation of agency responsibility for enforcement or implementation.

§ 51.88 Data availability.

(a) The State shall retain all detailed data and calculations used in the preparation of the lead analyses and plan, make them available for public inspection, and submit them to the Administrator at his request.

(b) The detailed data and calculations used in the preparation of the lead analyses and control strategies are not considered a part of the lead plan.

(Secs. 110, 301(a), Clean Air Act as amended (42 U.S.C. 7410, 7601).)

[FRL 937-7]

AMBIENT AIR MONITORING REFERENCE AND EQUIVALENT METHODS FOR LEAD

Notice of Proposed Rulemaking

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rulemaking.

SUMMARY: On December 14, 1977, new national primary and secondary ambient air quality standards for lead were proposed (42 FR 63076). Atmospheric lead is proposed to be measured as elemental lead, either by the proposed reference method or "by an equivalent method." The amendments proposed below would provide the necessary and appropriate changes in the existing equivalent method regulations (primarily contained in 40 CFR Part 53) to allow the designation of equivalent methods for measuring atmospheric lead concentrations.

DATES: Comments relative to these proposed regulations must be received by November 20, 1978.

ADDRESS: Send comments to Mr. Larry J. Purdue, Department E (MD-76), Environmental Monitoring and Support Laboratory, U.S. Environmental Protection Agency; Research Triangle Park, N.C. 27711.

FOR FURTHER INFORMATION CONTACT:

Mr. Larry Purdue, telephone 919-541-3076 (FTS 629-3076).

Incidental information: The proposed reference method for measuring atmospheric lead, as well as much associated information, was published in the December 14, 1977, issue of the FEDERAL REGISTER (vol. 42), starting on page 63076.

SUPPLEMENTARY INFORMATION:

BACKGROUND

When the first national ambient air quality standards were promulgated in 1971 (36 FR 8186, Apr. 30, 1971), EPA established the concept that measurements of ambient air pollutants used to determine compliance with the standards must be made with either a specified "reference method" or with an alternate method which could be shown to be "equivalent" to the reference method. The air quality standards are now contained in part 50 of title 40 of the Code of Federal Regulations (40 CFR Part 50). Appendixes to part 50 specify either a prescribed reference method, or a measurement principle and calibration procedure applicable to reference methods, for each pollutant for which a standard has been promulgated.

On February 18, 1975, EPA promulgated regulations to establish definitive requirements and procedures by which methods for measuring specified air pollutants may be designated "reference methods" or "equivalent methods" (40 FR 7044, Feb. 18, 1975). These regulations are contained in 40 CFR Part 53. Originally these "equivalency" regulations were applicable only to methods for measuring SO_2, CO, and photochemcial oxidants (O_3), but were subsequently amended to cover methods for NO_2 as well (41 FR 52692, Dec. 1, 1976).

On December 14, 1977, EPA proposed amendments to 40 CFR Part 50 to establish new national primary and secondary ambient air quality standards for lead. Also proposed was a new appendix to part 50 specifying a reference method for measuring atmospheric lead. The method proposed measures the lead content of suspended particulate matter collected on glass fiber filters using high volume samples. The lead is extracted from the particulate matter and measured by atomic absorption spectroscopy. The procedure proposed is necessarily very restrictive and specific in order to maintain the high level of accuracy and reproducibility and the low level of variability requisite for a reference method. However, other procedures are available for measuring lead which are likely to be as good as the reference method and may be advantageous to particular users. For example, using the same sampling procedure as the reference method (high volume sampler), several alternate analytical principles (flameless atomic absorption, optical emission spectrometry, and anodic stripping voltametry) are known to be suitable for lead analysis. If these alternate procedures can be designated as "equivalent" methods, then users would have much more flexibility in selecting a method for lead measurements which fits their own circumstances of available equipment, personnel, and expertise.

Also, EPA sees no reason why lead measurements must be restricted to a particular sampling technique, such as the high volume sampler. For example, low volume particulate samples can be analyzed for lead by X-ray fluorescence. Other non-high-volume techniques may also be available or under development. By allowing for the possibility of qualifying such alternate methods as equivalent methods, EPA hopes to permit and encourage continued advancement in the technology of measuring atmospheric lead.

For the reasons given above, EPA believes it is advantageous to propose appropriate amendments to 40 CFR Part 53 to extend the equivalent method regulations to cover methods for measuring lead in the atmosphere. Since most, if not all, candidate equivalent methods for lead are likely to be manual methods, EPA expects relatively little initial incentive for commercial organizations to apply for equivalent method determinations. Consequently, most equivalent method applications for lead methods will have to be originated by EPA under § 53.7 "Testing of Methods at the Initiative of the Administrator." Specifically, EPA intends to pursue designation of some of the methods noted earlier, which are already in use among some monitoring agencies. These would include methods which use the same sampling procedure as the reference method, but use alternate analytical principles such as flameless atomic absorption, optical emission spectrometry, and anodic stripping voltametry. Direct analysis of high volume filters by X-ray fluorescence is also a likely candidate method for early designation by EPA.

GENERAL APPROACH

As suggested above, any method which purports to measure atmospheric lead could be considered as a candidate equivalent method, regardless of the sampling procedure or analytical technique used. To be designated as an equivalent method, the candidate method must demonstrate a "consistent relationship" to the reference method. This is done by taking simultaneous measurements with both methods in accordance with the procedures and requirements to be specified in 40 CFR Part 53. In addition, the candidate method must also demonstrate adequate precision among repeated analyses of the same sample.

Since the proposed reference method provides 24-hour integrated measurements, candidate methods would have to be compared on that basis. Shorter term integrated methods or even automated methods could be considered as candidate methods. But only 24-hour averages could be compared to the reference method. Therefore, any subsequent designation of such a method as an equivalent method would apply only to 24-hour averages.

AMENDMENTS TO 40 CFR PART 51

Paragraph (a) of § 51.17a provides general requirements for air quality monitoring methods used by States in their implementation plan monitoring networks. Subparagraph (1) requires use of reference or equivalent methods for SO_2, CO, O_3, and NO_2, and would be amended to also include lead. Subparagraph (3) provides certain "grandfather" periods for use of existing methods for SO_2, CO, O_3, and NO_2. It would be amended by adding a similar "grandfather" provision allowing existing methods for lead to be used until February 18, 1980—the same expiration date as that for existing methods for SO_2, CO, and O_3.

AMENDMENT TO PART 53

Subpart C of part 53 contains the test procedures prescribed for determining a consistent relationship between the reference method and a candidate equivalent method. Since these tests procedures were originally designed for gaseous pollutants, several significant changes and additions are required to adapt the procedures for lead.

DETERMINATION OF CONSISTENT RELATIONSHIP

Section 53.30, paragraph (a) pertaining to the determination of a consistent relationship would be changed to indicate that the specifications for lead appear in a separate table (table C-3) than the specifications for SO_2, CO, O_3, and NO_2.

TEST SITE

Section 53.30, paragraph (b), pertaining to test sites would be changed in several ways. First, the paragraph would be subdivided to differentiate the various requirements applicable to: (1) All methods, (2) methods for gaseous pollutants, and (3) methods for lead. Multiple test sites would be allowed for lead methods in order to facilitate measurements in the required range, since pollutant augmentation would not be feasible for particulate methods. Also, a new provision would allow an applicant to request approval of the test site or sites from EPA prior to conducting the tests.

A final minor change proposed for paragraph (b) would delete the stipulation that test sites be "* * * away from large bodies of water * * *." This change has nothing to do with lead, but is prompted by general confusion among applicants as to its specific meaning. Since the requirement is not essential, the current revision of the paragraph provides a good opportunity to eliminate both the stipulation and the confusion.

OTHER GENERAL PROVISIONS

Paragraphs (c), (d), and (e) of § 53.30 would also be revised and reorganized to reflect the differences in requirements for methods for gaseous pollutants and for lead particulates. Revised paragraph (c) specifies the general requirement for simultaneous measurements at the test site in each of the required concentration ranges indicated by tables C-1 or C-3. Paragraph (d) would be revised and subdivided to clarify the different requirements for sample collection. Subparagraph (1) indicates the general requirement for homogenous samples. Subparagraph (2) specifies the use of a common distribution manifold and allows artificial pollutant augmentation for gaseous pollutants. Subparagraph (3) specifies the relative location requirements for lead samplers. And paragraph (4) would specifically allow the use of a common sample when the candidate method uses a sampling procedure identical to that of the reference method. Finally, the present paragraph (d) on "Submission of Test Data * * *" would be changed to paragraph (e).

TEST CONDITIONS

In § 53.31 on "Test Conditions," paragraphs (a), (c), and (d) would be revised slightly to clarify certain differences between gaseous and particulate methods, and to clarify the requirements pertaining to calibration and range.

TEST PROCEDURE

Because the test procedures being proposed for lead differ considerably from those for gaseous pollutants, existing § 53.32 would be retitled "Test Procedures for Gaseous Pollutants" and a new § 53.33, "Test Procedures for Lead," would be added. The proposed new § 53.33 is similar in form to § 53.32, but the specific requirements for lead methods differ in several ways from the requirements for gaseous pollutant methods. First, a new table C-3 summarizes the test specifications pertinent to methods for lead. Only one concentration range is specified, into which five or more of the measurements must fall. The difference specification for lead is specified as a percent of the reference method measurement, as opposed to the fixed, absolute values specified for gaseous pollutant methods. An accuracy specification for the reference method based on analysis of audit samples supplied by EPA is specified. In addition, a performance specification for analytical precision is also being proposed to apply to lead methods.

Because most methods for lead provide a result only after collected samples are analyzed in a laboratory, the test acceptance criteria are based on a single sampling plan rather than the double sampling plan prescribed for gaseous pollutant methods. Ten or more (simultaneous) samples are collected and analyzed to provide at least five samples which fall into the required range of 0.5 to 4.0 $\mu g/m^3$. Each sample is analyzed three times and the results of all samples in the range are subjected to both the precision test prescribed in paragraph (e) and the consistent relationship test prescribed in paragraph (f). For the candidate method to qualify for designation, no test failures would be permitted in either test.

PUBLIC PARTICIPATION

Interested persons are invited to comment on any aspect of these proposed amendments. Comments should be submitted in duplicate and must be received by November 20, 1978. Address comments to Mr. Larry Purdue, Department E (MD-76), Environmental Monitoring and Support Laboratory, U.S. Environmental Protection Agency, Research Triangle Park, N.C. 27711.

Dated: September 29, 1978.

DOUGLAS M. COSTLE,
Administrator.

It is proposed to amend chapter I, title 40, Code of Federal Regulations, as follows:

PART 51—REQUIREMENTS FOR PREPARATION, ADOPTION, AND SUBMITTAL OF IMPLEMENTATION PLANS

1. In § 51.17a, paragraph (a) is amended by revising the first sentence of paragraph (a)(1) and adding a sentence to the end of paragraph (a)(3) to read as follows:

§ 51.17a Air quality monitoring methods.

(a) *General requirements.* (1) Except as otherwise provided in this paragraph (a), each method for measuring SO_2, CO, O_3, NO_2, or lead used for purposes of § 51.17a shall be a reference method or equivalent method as defined in § 53.1 of this chapter. * * *

(2) * * *

(3) * * * Any manual method for lead in use before (date of promulgation of these amendments) may be used for purposes of § 51.17(a) until February 18, 1980.

PART 53—AMBIENT AIR MONITORING REFERENCE AND EQUIVALENT METHODS

2. In § 53.30 the last sentence of paragraph (a) is deleted and new subparagraphs (1) and (2) are added; and paragraphs (b), (c), (d), and (e) are revised to read as follows:

§ 53.30 General provisions.

(a) * * *

(1) A consistent relationship is shown for SO_2, CO, O_3, and NO_2 methods when the differences between: (i) Measurements made by a candidate manual method or by a test analyzer representative of a candidate automated method, and (ii) measurements made simultaneously by a reference method are less than or equal to the value specified in the last column of table C-1.

(2) A consistent relationship is shown for lead methods when the dif-

V 4 3 / 1 9 4

OCT 5 1978

ferences between: (i) Measurements made by a candidate method, and (ii) measurements made simultaneously by the reference method are less than or equal to the value specified in table C-3.

(b) *Selection of test sites.*—(1) *All methods.* Each test site shall be in a predominately urban area which can be shown to have at least moderate concentrations of various pollutants. The site shall be clearly identified and shall be justified as an appropriate test site with suitable supporting evidence such as maps, population density data, vehicular traffic data, emission inventories, pollutant measurements from previous years, concurrent pollutant measurements, and wind or weather data. If desired, a request for approval of the test site or sites may be submitted prior to conducting the tests. The Administrator may in his discretion select a different site (or sites) for any additional tests he decides to conduct.

(2) *Methods for gaseous pollutants.* All test measurements are to be made at the same test site. If necessary, the concentration of pollutant in the sampled ambient air may be augmented with artificially generated pollutant to facilitate measurements in the specified ranges. (See paragraph (d)(2) of this section.)

(3) *Methods for lead.* Test measurements may be made at any number of test sites. Augmentation of pollutant concentrations is not permitted, hence an appropriate test site or sites must be selected to provide lead concentrations in the specified range. Test sites for lead measurements must be between 5 and 100 meters from the edge of a heavily traveled roadway.

(c) *Test atmosphere.* Ambient air sampled at an approriate test site shall be used for these tests. Simultaneous concentration measurements shall be made in each of the concentration ranges specified in table C-1 or table C-3.

(d) *Sample collection.*—(1) *All methods.* All test concentration measurements or samples shall be taken in such a way that both the candidate method and the reference method receive air samples that are homogenous or as nearly identical as practical.

(2) *Methods for gaseous pollutants.* Ambient air shall be sampled from a common intake and distribution manifold designed to deliver homogenous air samples to both methods. Precautions shall be taken in the design and construction of this manifold to minimize the removal of particulates and trace gases, and to insure that identical samples reach to two methods. If necessary, the concentration of pollutant in the sampled ambient air may be augmented with artificially generated pollutant. However, at all times the air sample measured by the candidate and reference methods under test shall consist of not less than 80 percent ambient air by volume. Schematic drawings, physical illustrations, descriptions, and complete details of the manifold system and the augmentation system (if used) shall be submitted.

(3) *Methods for lead.* The intake points of the candidate and reference samplers for lead shall be located between 3 and 5 meters apart, and between 1.5 and 5 meters above ground level.

(4) *Methods employing a common sampling procedure.* Candidate methods which employ a sampler and sample collection procedure which are identical to the sampler and sample colection procedure specified in the reference method may be tested by analyzing common samples in accordance with the candidate and reference analysis procedures. The common samples are to be collected according to the sample collection procedure specified by the reference method, and must be divided such that identical portions are analyzed by the analysis procedures of the two methods.

(e) *Submission of test data and other information.* All recorder charts, calibration data, records, test results, procedural descriptions and details, and other documentation obtained from (or pertinent to) these tests shall be identified, dated, signed by the analyst performing the test, and submitted.

3. In § 53.31, paragraphs (a), (c), and (d)(1) are revised to read as follows:

§ 53.31 Test conditions.

(a) *All methods.* All test measurements made or test samples collected by means of a sample manifold as specified in § 53.30(d)(2) shall be at a room temperature between 20° and 30° C, and at a line voltage between 105 and 125 volts. All methods shall be calibrated as specified in paragraph (c) of this section prior to initiation of the tests.

(b) • • •

(c) *Calibration.* The reference method shall be calibrated according to the appropriate appendix to part 50 of this chapter (if it is a manual method) or according to the applicable operation manual(s) (if it is an automated method). A candidate manual method (or portion thereof) shall be calibrated if such calibration is a part of the method. • • •

(d) *Range.* (1) Except as provided in paragraph (d)(2) of this section, each method shall be operated in the range specified for the reference method in the appropriate appendix to part 50 (for manual reference methods), or specified in table B-1 of this part (for automated reference methods).

4. In § 53.32, the title of the section is revised to read as follows:

§ 53.32 Test procedures for gaseous pollutants.

• • • • •

5. Section 53.33 is added to read as follows:

§ 53.33 Test procedure for lead methods.

(a) *Sample collection.* Collect simultaneous 24-hour samples (filters) of lead at the test site or sites with both the reference and candidate methods until at least 10 filter pairs have been obtained. If the conditions of § 53.30(d)(4) apply, collect at least 10 common samples (filters) in accordance with § 53.30(d)(4) and divide each to form the filter pairs.

(b) *Audit samples.* Three audit samples must be obtained from the Director, Environmental Monitoring and Support Laboratory, Department E, U.S. Environmental Protection Agency, Research Triangle Park, N.C. 27711. The audit samples are ¾ × 8-inch glass fiber strips containing known amounts of lead at the following nominal levels: 100 μg/strip; 300 μg/strip; 750 μg/strip. The true amount of lead in total μg/strip will be provided with each audit sample.

(c) *Filter analysis.* (1) For both the reference method and the audit samples, analyze each filter extract 3 times in accordance with the reference method analytical procedure. The analysis of replicates should not be performed sequentially (i.e., and single sample should not be analyzed three times in sequence). Calculate the indicated lead concentratons for the reference method samples in μg/m³ for each analysis of each filter. Calculate the indicated total lead amount for the audit samples in μg/strip for each analysis of each strip. Lable these test results as R_{1A}, R_{1B}, R_{1C}, R_{2A}, R_{2B}, . . ., Q_{1A}, Q_{1B}, Q_{1C}, . . ., where R denotes results from the reference method samples; Q denotes results from the audit samples; 1, 2, 3 indicates filter number and A, B, C indicates the first, second, and third analysis of each filter, respectively.

(2) For the candidate method samples, analyze each sample filter or filter extract three times and calculate, in accordance with the candidate method, the indicated lead concentration in μg/m³ for each analysis of each filter. Label these test results as C_{1A}, C_{1B}, C_{1C}, . . ., where C denotes results from the candidate method. (For candidate methods which provide a direct measurement of lead concentrates without a separable procedure, $C_{1A} = C_{1B} = C_{1C}$, $C_{2A} = C_{2B} = C_{2C}$, etc.)

(d) For the reference method, calculate the average lead concetration for each filter by averaging the concentrations calculated from the three analyses:

$$R_{i\ ave} = \frac{R_{iA} + R_{iB} + R_{iC}}{3}, \text{ where i is the filter number.}$$

(e) Disregard all filter pairs for which the lead concentration as determined in the previous paragraph (d) by the average of the three reference method determinations, falls outside the range of 0.5 to 4.0 μg/m³. All remaining filter pairs must be subjected to both of the following tests for precision and consistent relationship. At least five filter pairs must be within the 0.5 to 4.0 μg/m³ range for the tests to be valid.

(f) *Test for precision.* (1) Calculate the precision (P) of the analysis (in percent) for each filter and for each method, as the maximum minus the minimum divided by the average of the three concentration values, as follows:

$$P_{Ri} = \frac{R_i\ max - R_i\ min}{R_i\ ave} \times 100\%, \text{ or } P_{Ci} = \frac{C_i\ max - C_i\ min}{C_i\ ave} \times 100\%,$$

where i indicates the filter number.

(2) If any reference mthod precision value (P_{Ri}) exceeds 15 percent, the precision of the reference method analytical procedure is out of control. Corrective action must be taken to determine the source(s) of imprecision and the reference method determinations must be repeated according to paragraph (c) of this section, or the entire test procedure (starting with paragraph (a)) must be repeated.

(3) If any candidate method precision value (P_{Ci}) exceeds 15 percent, the candidate method fails the precision test.

(4) The candidate method passes this test if all precision values (i.e., all P_{Ri}'s and all P_{Ci}'s) are less than 15 percent.

(g) *Test for accuracy.* (1) For the audit samples calculate the average lead concentration for each strip by averaging the concentrations calculated from the three analyses:

$$Q_{i\ \ ave} = \frac{Q_{iA} + Q_{iB} + Q_{iC}}{3},$$

where i is audit sample number.

Calculate the percent difference (D_{qi}) between the indicated lead concentration for each audit sample and the true lead concentration (T_{qi}) as follows:

$$D_{qi} = \left(\frac{Q_i\ ave - T_{qi}}{T_{qi}} \times 100\right)$$

(2) If any difference value (D_{qi}) exceeds ±5 percent the accuracy of the reference method analytical procedure is out of control. Corrective action must be taken to determine the source of the error(s) (e.g., calibration standard discrepancies, extraction problems, etc.) and the reference method and audit sample determinations must be repeated according to paragraph (c) of this section or the entire test procedure (starting with paragraph (a)) must be repeated.

(h) *Test for consistent relationship.* (1) For each filter pair, calculate all nine possible percent differences (D) between the reference and candidate methods, using all nine possible combinations of the three determinations (A, B, and C) for each method, as:

$$D_{in} = \frac{C_{ij} - R_{ik}}{R_{ik}} \times 100\%, \text{ where i is the filter number, and n}$$

numbers from 1 to 9 for the nine possible difference combinations for the three determinations for each method (j= A, B, C, candidate; k= A, B, C, reference).

(2) If none of the percent differences (D) exceeds ±20 percent, the candidate method passes the test.

(3) If one or more differences (D) exceeds ±20 percent, the candidate method fails the test for consistent relationship.

(i) The candidate method must pass both the precision test and the consistent relationship test to qualify for designation as an equivalent method.

IMPLEMENTATION PLANS FOR LEAD NATIONAL AMBIENT AIR QUALITY STANDARD

Proposed Requirements for Ambient Air Quality Monitoring in the Vicinity of Certain Lead Point Sources; Advance Notice of Proposed Rulemaking

AGENCY: Environmental Protection Agency.

ACTION: Advance notice of proposed rulemaking.

SUMMARY: This is an advance notice of EPA's intent to propose regulations that would require the State implementation plans (SIP's) for attainment and maintenance of the national ambient air quality standard (NAAQS) for lead to provide for the owner or operator of each primary or secondary lead smelter or primary copper smelter to establish a lead air quality monitoring system in the vicinity of the source and report the data to the State. EPA intends to propose this requirement partly in response to a comment received on the proposed lead implementation plan requirements of December 14, 1977 (42 FR 62087), but mainly as the initiation of a procedure for obtaining information concerning the nature, extent, and impact of fugitive lead emissions from the smelters since very little accurate information is currently available. The intended effect of this requirement would be to obtain sufficient air quality data around the subject sources to determine if they are causing violations of the lead NAAQS. If violations are recorded, the States and EPA will determine whether additional or alternative control strategies would be adequate to attain and maintain the NAAQS for lead.

DATES: Comments on this advance notice must be received on or before December 4, 1978. Comments submitted in duplicate will facilitate internal distribution and public availability.

ADDRESSES: Persons may submit written comments on this advance notice to: U.S. Environmental Protection Agency, Office of Air Quality Planning and Standards, Control Programs Development Division (MD 15), Research Triangle Park, N.C. 27711, attention: Mr. Joseph Sableski. EPA will make all comments received on or before December 4, 1978, available for public inspection during normal business hours at: EPA Public Information Reference Unit, 401 M Street SW., Room 2922, Washington, D.C. 20460.

V 4 3 / 1 9 4

FOR FURTHER INFORMATION CONTACT:

Mr. John Silvasi, U.S. Environmental Protection Agency, Office of Air Quality Planning and Standards, Control Programs Development Division (MD 15), Research Triangle Park, N.C. 27711, telephone: Commercial—919-541-5437; FTS—629-5437.

SUPPLEMENTARY INFORMATION:

BACKGROUND

In another part of this FEDERAL REGISTER, EPA promulgated the national ambient air quality standards (NAAQS) for lead and requirements for the preparation, adoption, and submission of State implementation plans (SIP's) for the attainment and maintenance of those standards. Further information about the standards and the SIP's appears in those notices.

States must now prepare and submit to EPA within 9 months SIP's that demonstrate that the NAAQS will be attained. In doing so, the States will have to quantify the lead emissions from sources and determine the effect of those emissions on the ambient air concentrations. For emissions that originate from stacks or tailpipes, the quantification can be done with a fair degree of accuracy. For emissions that originate from other than a primary exhaust system, such as through a plant's doors, windows, leaks in equipment, and so forth, the quantification is far more difficulat. Such emissions are commonly called fugitive emissions. Fugitive emissions are difficult to quantify accurately since they are dependent on a wide range of site-specific parameters, such as the lead content of the raw materials used in the process; number and size of open windows, doors and vent; wind speed and direction; rainfall; and so on—factors other than process throughput or production rates.

Furthermore, there has not been much lead air quality data gathered around sources of these fugitive emissions. Also, there have never been any specific requirements in the regulations that apply to SIP's for requiring such data to be collected around individual sources. Consequently, there is little accurate information concerning the amounts of fugitive emissions and the ambient air lead levels in the vicinity of sources of large amounts of lead emissions. EPA's assessments of the environmental and economic impacts of the lead NAAQS' *1,2* indicate that several categories of sources that emit predominantly fugitive lead emissions have the potential for the greatest air quality impacts. The categories of concern are primary and secondary lead smelters and primary copper smelters.

NATURE OF PROPOSAL

EPA intends to propose regulations to enable the States and EPA to obtain an air quality data base needed to determine compliance with the NAAQS' around sources in the abovementioned categories. The regulation would require the subject sources to establish an operate an air quality monitoring system in the vicinity of the sources. If the ambient data reveals tht concentrations are not as high as had originally been predicted when the State developed its initial lead SIP, and the source has not yet implemented the control called for in that SIP, the State may wish to revise its SIP to require less stringent control, thereby requiring a lesser burden on the source. Conversely, if the ambient data reveals that concentrations greater than the NAAQS occur after the control strategy in the SIP has been implemented, EPA could require the State to revise the SIP to require additional control of the sources.

The regulations would require that the method of sample collection be the reference method as defined in 40 CFR Part 50; this method is the high-volume sampler. No other collection methods woud be allowed for monitoring in the vicinity of point sources, since it appears that other samplers would not sample the same quantity of larger particles that the high-volume sampler would collect. The analysis method could be the reference method or an equivalent method as defined in 40 CFR Part 50. The sources would also have to obtain certain meteorological data to properly locate the samplers.

EPA intends to restrict this requirement only to primary and secondary lead smelters and primary copper smelters because EPA modeling studies (*3*) of the six major lead point source categories (the other three being gasoline additive plants, lead-acid battery manufacturing plants, and gray iron foundries) indicate that these three categories have a potential for an air quality impact that far esceeds that of the sources in the other categories.

EPA would require the States to place the requirement for monitoring directly on the source owners and operators, using the authority of section 114(a)(1)(C) of the Clean Air Act. This section authorizes the Administrator to require any source subject to a requirement of the Act to "* * * install, use, and maintain such monitoring equipment or methods * * *" The implementation plan would have to require the source owners or operators to periodically report a summary of the data to the States and EPA. The data would then be used to determine whether a future plan revision is indicated.

The amount of ambient point source monitoring needed would vary and depend on the number of emission points at the source, the emission patterns, the topography, and the meteorology. EPA will develop a guidance manual on the number, siting, and operation of monitors around point sources. EPA estimates that the guidance will recommend that a network of about five samplers be placed in the vicinity of each source to which the regulation applies. States would have 9 months after the promulgation of this requirement to revise their lead implementation plans to require the monitoring around the selected point sources. The sampling network would then have to be in place within 1 year after the date required for submission of the plan revision to account for this requirement if sufficient meteorological data were available for use in siting the monitors. If the meteorological data were not available, the source may have to collect a year's worth of data before siting the air quality monitors.

EPA solicits comments on any issues concerning the intended proposed rulemaking and particularly solicits comments on the following topics:

The need for the requirement for ambient monitoring in the vicinity of the lead point sources mentioned above or alternatives to this requirement that will accomplish the objective of obtaining more accurate data concerning these sources.

Other sources around which EPA should require ambient monitoring.

The criteria for the number, operation, and location of the samplers.

The criteria for the length of period of each sampler, sampling frequency, and duration of the existence of the sampling system.

Procedures for accounting for other sources in the vicinity of the source, including roadways.

Procedures for accounting for complex topography.

Procedures for accounting for meteorological conditions and obtaining meteorological data.

Procedures for accounting for the nature and magnitude of fugitive emissions.

Procedures for accounting for background concentrations.

Procedures for accounting for source configuration.

Procedures for reporting the collected data to the State and EPA.

The time allowed for revision of the State implementation plan to account for the requirement.

Time allowed for compliance with the requirement contained in the implementation plan.

Whether the burden of responsibility should lie with the State agency or with the source.

The cost to the States or the sources for compliance with these requirements.

EPA intends to propose rulemaking on this matter by December 1978, and intends to make available for public review at the same time a draft of the detailed guidance on ambient lead monitoring in the vicinity of lead point sources.

FUGITIVE EMISSION FACTORS

Also, EPA intends to develop more accurate emission factors that relate the operation of a source to the amount of fugitie emissions the source generates. These factors will not be available, however, until some time after the States must submit their implementation plans. Therefore, the States will have to rely on available fugitive emission factors to perform their air quality analyses in support of their implementation plans or develop their own factors based on any data that may be available, such as emission factors for total particulate matter and information concerning the lead content of that particulate matter.

Alternatively, States could develop their own emission factors based on field studies. There are several methods for doing this. (*3,4,5*)

After EPA develops emission factors for fugitive lead emissions, States could then determine whether their initially developed plans require too much or too little control; they could then make any necessary adjustments to their implementation plans through revisions of those plans. The initial plan could require that sources phase in their control fairly slowly so that significant resources are not expended by the sources before EPA develops its fugitive emission factors.

Title 32—National Defense

CHAPTER XX—INTERAGENCY CLASSIFICATION REVIEW COMMITTEE

[Directive No. 1]

INFORMATION SECURITY OVERSIGHT OFFICE

National Security Information

AGENCY: Interagency Classification Review Committee (ICRC).

ACTION: Implementing directive.

SUMMARY: The Interagency Classification Review Committee is publishing this directive to implement Executive Order 12065, relating to the classification, downgrading, declassification and safeguarding of national security information. This directive was approved by the National Security Council for publication and issuance on September 29, 1978. The Executive order is intended to increase openness in Government by limiting classification and accelerating declassification but at the same time, providing improved protection against unauthorized disclosure for that information that requires such protection in the interest of national security. This directive sets forth guidelines to agencies on original and derivative classification, downgrading, declassification and safeguarding of national security information.

EFFECTIVE DATE: December 1, 1978.

FOR FURTHER INFORMATION CONTACT:

Robert W. Wells, Executive Director, ICRC, Telephone: 202-724-1578.

SUPPLEMENTARY INFORMATION: This directive is issued pursuant to the provisions of section 6-204 of Executive Order 12065. The purpose of the directive is to assist in the implementation of Executive Order 12065, and users of the directive shall refer concurrently to the Executive order for guidance.

I. ORIGINAL CLASSIFICATION

A. *Definition.* "Original classification" as used in the order means an initial determination that information requires protection against unauthorized disclosure in the interest of national security, and a designation of the level of classification (1).[1]

B. *Classification authority.* In the absence of an authorized classifier, anyone designated to act in that person's absence may exercise the classifier's authority (1-204).

C. *Request for classification authority.* Requests for original classification authority for agencies not listed in section 1-2 of the order shall be submitted to the President through the Information Security Oversight Office. Requests shall include: (1) The designation of the officials for whom or positions for which authority is sought, (2) the level of authority requested, and (3) the justification for such requests, including a description of the type of information that is anticipated to require original classification (1-2).

D. *Record requirements.* Agencies and officials granted original classification authority pursuant to section 1-2 of the order shall maintain a current listing, by classification designation, of individuals to whom or positions to which original classification authority has been delegated (1-2).

E. *Classification procedure.* Except as provided in section 1-303 of the order, the fact that the information concerns one or more of the qualifying criteria or categories of information shall not create any presumption as to whether the information meets the damage tests (1-302 and 1-303).

F. *Foreign government information.*—1. *Identification.* "Foreign government information" is:

a. Information provided to the United States by a foreign government or international organization of governments in the expectation, express or implied, that the information is to be kept in confidence; or

b. Information produced by the United States pursuant to a written joint arrangement with a foreign government or international organization of governments requiring that either the information or the arrangement, or both, be kept in confidence. Such a written joint arrangement may be evidenced by an exchange of letters, a memorandum of understanding, or other written record (1-303 and 6-103).

2. *Duration of classification.* Unless the guidelines developed pursuant to section 3-404 of the order or other guidelines prescribe dates or events for declassification or for review for declassification:

a. Foreign government information shall not be assigned a date or event for automatic declassification unless such is specified or agreed to by the foreign government or international organization of governments.

b. Foreign government information classified after the effective date of the order shall be assigned a date for review for declassification up to 30 years from the time the information was classified or acquired. (1-402 and 3-404).

G. *Standard identification and markings.* At the time of original classification, the following shall be shown on the face of paper copies of all classified documents:

1. *Identity of classifier.* The identity of the classifier, unless also the signer or approver of the document, shall be shown on a "classified by" line; e.g., "Classified by John Doe" or "Classified by Director, XXX" (1-501(a)).

2. *Date of classification and office of origin.* The date and office of origin on a document at the time of its origination may be considered the date of classification and identification of the office of origin (1-501(b)).

3. *Date or event for declassification or review.* The date for automatic declassification or for declassification review shall be shown on a "declassify on" or a "review for declassification on" line; e.g., "Declassify on 1 November 1984," "Declassify on completion of State visit," or "Review for declassification on 1 November 1998" (1-501(c)).

4. *Downgrading markings.* When it is determined (e.g., in a classification guide) that a classified document should be downgraded automatically

[1] Parenthetical references are to related sections of Executive Order 12065.

at a certain date or upon a certain event, that date or event shall be recorded on the face of the document; e.g., "Downgraded to Secret on 1 November 1990" or "Downgraded to Confidential on 1 December 1985" (1-5).

5. *Identity of extension authority.* The identity of the official who authorizes a date for declassification or for review for declassification that is more than 6 years beyond the date of the document's classification shall be shown on the document, unless that official also is the classifier, signer, or approver of the document. This marking shall be shown substantially as follows: "Extended by (Insert name or title of position of agency head or Top Secret classification authority)" (1-502).

6. *Reason for extension.* When classification is extended beyond 6 years, the reason shall be stated on the document either in narrative form or by reference to an agency regulation that states the reason for extension in narrative form. The reason shall be shown substantially as follows: "Reason for extension: (State reason or applicable reference)" (1-502).

7. *Overall and page marking of documents.* The overall classification of a document shall be marked, stamped, or affixed permanently at the top and bottom of the outside of the front cover (if any), on the title page (if any), on the first page, and on the outside of the back cover (if any). Each interior page of a classified document shall be marked or stamped at the top and bottom either according to the highest classification of the content of the page, including the designation "Unclassified" when appropriate, or according to the highest overall classification of the document. In any case, the classification marking of the page shall not supersede the classification marking of portions of the page marked with lower levels of classification (1-501(d)).

8. *Subject and titles.* Whenever practicable, subjects and titles shall be selected so as not to require classification. When the subject or title is classified, an unclassified identifier may be assigned to facilitate receipting and reference (1-5).

9. *Mandatory portion marking.* Classifiers shall identify the level of classification of each classified portion of a document (including subjects and titles), and those portions that are not classified. Portion marking shall be accomplished by placing a parenthetical designator immediately preceding or following the text that it governs. The symbols "(TS)" for top secret, "(S)" for secret, "(C)" for confidential, and "(U)" for unclassified shall be used for this purpose. If individual portion marking is impracticable, the document shall contain a description sufficient to identify the information that is classified and the level of such classification. A waiver of the portion marking requirement may be granted by the Director of the Information Security Oversight Office. Requests for such waivers shall be made by the head of an agency or designee to the Director and shall include: (a) Identification of the information or classes of documents for which such waiver is sought, (b) a detailed explanation of why the waiver should be granted, (c) the agency's best judgment as to the anticipated dissemination of the information or class of documents for which waiver is sought, and (d) the extent to which the information subject to the waiver may form a basis for classification of other documents (1-504).

10. *Material other than documents.* The classification and associated markings prescribed by this directive of documents shall, where practicable, be affixed to material other than documents by stamping, tagging, or other means. If this is not practicable, recipients shall be made aware of the classification and associated markings by notification or other means as prescribed by the agency (1-5).

11. *Transmittal documents.* A transmittal document shall indicate on its face the highest classification of the information transmitted by it and the classification, if any, of the transmittal document. For example, an unclassified transmittal document should bear a notation substantially as follows: "Unclassified When Classified Enclosure is Detached" (1-5).

12. *Marking foreign government information.* Except in those cases where such markings would reveal intelligence information, foreign government information incorporated in United States documents shall, whenever practicable, be identified in such manner as to ensure that the foreign government information is not declassified prematurely or made accessible to nationals of a third country without consent of the originator. Documents classified by a foreign government or an international organization of governments shall, if the foreign classification is not in English, be marked with the equivalent U.S. classification. Foreign government information not classified by a foreign government or an international organization of governments but provided to the United States in confidence by a foreign government or by an international organization of governments shall be classified at an appropriate level and shall be marked with the U.S. classification accordingly (1-5).

H. *Additional markings required.* In addition to the marking requirements in paragraph G, the following markings shall, as appropriate, be displayed prominently on classified information. When display of these additional markings is not practicable, their applicability to the information shall be included in the written notification of the assigned classification (1-5).

1. *Restricted data or formerly restricted data.* For classified information containing restricted data or formerly restricted data as defined in the Atomic Energy Act of 1954, as amended, such markings as may be prescribed by the Department of Energy in regulations issued pursuant to the act shall be applied.

2. *Intelligence sources and methods information.* For classified information involving intelligence sources or methods: "Warning Notice—Intelligence Sources and Methods Involved".

3. *Dissemination and reproduction notice.* For classified information that the originator has determined, pursuant to section 1-506 of the order, should be subject to special dissemination or reproduction limitations, or both, a statement placing the user on notice of the restrictions shall be included in the text of the document or on its cover sheet; e.g., "Reproduction requires approval of originator," or "Further dissemination only as directed by (Insert appropriate office or official)" (1-506).

I. *Abbreviations.* Classified documents that are transmitted electrically may be marked with abbreviations or codes in a single line to satisfy the requirements of each subsection of paragraphs G and H in a manner consistent with economic and efficient use of electrical transmission systems, provided that the full text represented by each such abbreviation or code and its relation to each subsection of paragraphs G and H is readily available to each expected user of the classified documents affected.

II. DERIVATIVE CLASSIFICATION

A. *Definition.* "Derivative classification" as used in the order means a determination that information is in substance the same as information that is currently classified, and a designation of the level of classification (2-1).

B. *Responsibility.* Derivative application of classification markings is a responsibility of those who incorporate, paraphrase, restate, or generate in new form information that is already classified, and of those who apply markings in accordance with instructions from an authorized classifier or in accordance with an authorized classification guide. Persons who apply derivative classification markings should take care to determine whether their paraphrasing, restating, or summarizing of classified information has removed the basis for classification. Where checks with originators or other appropriate inquiries show that

V 43/194
OCT 5 78

no classification or a lower classification than originally assigned is appropriate, the derivative document shall be issued as unclassified or shall be marked appropriately (2-101 and 2-102).

C. *Marking derivatively classified documents.* Paper copies of derivatively classified documents shall be marked at the time of origination as follows:

1. The classification authority shall be shown on a "classified by" line; e.g., "Classified by (Insert identity of classification guide)" or "Classified by (Insert source of original classification)." If the classification is derived from more than one source, the single phrase "multiple sources" may be shown, provided that identification of each such source is maintained with the file or record copy of the document (2-102(c));

2. The identity of the office originating the derivatively classified document shall be shown on the face of the document (2-102);

3. Dates or events for declassification or review shall be carried forward from the source material or classification guide and shown on a "declassify on" or "review for declassification on" line. If the classification is derived from more than one source, the latest date for declassification or review applicable to the various source materials shall be applied to the new information (2-102(c));

4. The classification marking provisions of sections I.G. 7 through 9 and I.G. 12 are also applicable to derivatively classified documents (2-102(c));

5. Any additional marking under section I.H. of this directive appearing on the source material shall be carried forward to the new material when appropriate (2-102(c)); and

6. Any abbreviation or code permitted under section I. I. of this directive may be applied to derivatively classified documents.

D. *Classification guides.*—1. *Requirements.* Classification guides issued pursuant to section 2-2 of the order shall:

a. Identify the information to be protected, using categorization to the extent necessary to insure that the information involved can be identified readily and uniformly (2-201);

b. State which of the classification designations (i.e., top secret, secret, or confidential) applies to the information (2-201);

c. State the duration of classification in terms of a period of time or future event. When such duration is to exceed 6 years, the reason for such extension shall be provided in the guide. However, if the inclusion of classified reasons would result in a level of classification for a guide that would inhibit its desirable and required dissemination, those reasons need be recorded only on or with the record copy of the guide (2-201); and

d. Indicate how the designations, time limits, markings, and other requirements of the order and this directive are to be applied, or make specific reference to agency regulations that provide for such application (2-201).

2. *Review and record requirements.* Each classification guide shall be kept current and shall be reviewed at least once every 2 years. Each agency shall maintain a list of all its classification guides in current use (2-2).

III. Declassification and Downgrading

A. *Record requirements.* Agencies and officials granted original classification authority pursuant to section 1-2 of the order shall maintain a record of individuals or positions designated as declassification authorities pursuant to section 3-103 of the order (3-103).

B. *Declassification policy.* In making determinations under section 3-303 of the order, officials shall respect the intent of the order to protect foreign government information and confidential foreign sources (3-303).

C. *Systematic Review for Declassification.*—1. *Systematic review guidelines.*

a. *U.S. originated information.* Systematic review guidelines shall be kept current through review at least every 2 years, unless earlier review for revision is requested by the Archivist of the United States (3-402).

b. *Foreign government information.* Within 1 year after the effective date of the order, heads of affected agencies shall, in consultation with the Archivist and in accordance with the provisions of section 3-404 of the order, develop systematic review guidelines for 30-year-old foreign government information. These guidelines shall be kept current through review by agency heads at least once every 2 years, unless earlier review for revision is requested by the Archivist of the United States. A copy of these guidelines and any revisions thereto shall be furnished to the Information Security Oversight Office. Upon request, the Department of State shall provide advice and such assistance as is necessary to effect foreign government coordination of the guidelines (3-404).

2. *Systematic review procedures.*—a. *Scheduling for systematic review.* Classified nonpermanent records that are scheduled to be retained for more than 20 years need not be systematically reviewed but shall be reviewed for declassification upon request. Within 60 days of the effective date of the order, heads of agencies and officials designated by the President pursuant to section 1-2 of the order shall direct that all classified records 20 years old or older, whether held in storage areas by the agency or in Federal records centers, be surveyed to identify those that require scheduling for future disposition. Such scheduling shall be accomplished within 2 years of the effective date of the order (3-401).

b. *Extending classification after review.*—(1) *Foreign government information.* Agency heads listed in section 1-2 and officials designated by the President pursuant to section 1-201 of the order may extend the classification of foreign government information beyond 30 years, but only in accordance with sections 3-3 and 3-404. This authority may not be delegated. When classification is extended beyond 30 years, a date no more than 10 years later shall be set for declassification or for the next review. Subsequent reviews for declassification shall be set at no more than 10-year intervals (3-404).

(2) *Waivers of further review.* Heads of agencies listed in section 1-2 and officials designated by the President pursuant to section 1-201 of the order may request from the Director of the Oversight Office a waiver of the 10-year review requirement for both U.S.-originated and foreign government information. Such requests shall include a personal certification by the agency head that the classified information for which the waiver is sought has been systematically reviewed as required, and that a definitive date for declassification could not be determined. Waivers should not be requested unless the results of the review have established an identifiable need to continue classification for a period in excess of 20 additional years. Each request shall include a recommended date or event for subsequent review or automatic declassification (3-401).

c. *Assistance to the Archivist.*—(1) The head of each agency shall designate experienced personnel to assist the Archivist of the United States in the systematic review of 20-year-old U.S.-originated information and 30-year-old foreign government information accessioned into the National Archives of the United States. Such personnel shall:

(a) Provide guidance and assistance to National Archives employees in identifying and separating documents and specific categories of information within documents that are deemed to require continued classification; and

(b) Submit to the head of the agency recommendations for continued classification that identify documents or specific categories of information so separated.

(2) The head of the agency shall then make the determinations personally and in writing required under section 3-401 of the order as to which documents or categories of information require continued protection. The agency shall inform the Archivist of the United States of this determination (3-4).

d. *Special procedures.* Special procedures for systematic review and declassification of classified cryptologic information and classified information concerning the identities of clandestine human agents promulgated in accordance with the provisions of section 3-403 of the order shall be binding on all agencies (3-403).

e. *Foreign relations series.* In order to permit the editors of foreign relations of the United States to meet their mandated goal of publishing 20 years after the event, heads of departments and agencies are requested to assist the editors in the Department of State by facilitating access to appropriate classified materials in their custody and by expediting declassification review of items from their files selected for publication (3-4).

D. *Procedures for mandatory declassification review.*

1. *U.S.-originated information.*—a. *Action on an initial request.* Each Agency shall designate, in its implementing regulations published in the Federal Register, offices to which requests for mandatory review for declassification may be directed. Upon request for declassification pursuant to section 3-5 of the order, agencies shall apply the following procedures:

(1) The designated offices shall acknowledge receipt of the request.

(2) Whenever a request does not reasonably describe the information sought, the requestor shall be notified that unless additional information is provided or the scope of the request is narrowed, no further action will be undertaken (3-501).

b. *Information in the custody of and under the exclusive declassification authority of an agency.* The designated office shall determine whether, under the declassification provisions of section 3-3 of the order, the requested information may be declassified and, if so, shall make such information available to the requestor, unless withholding is otherwise warranted under applicable law. If the information may not be released in whole or in part, the requestor shall be given a brief statement as to the reasons for denial, a notice of the right to appeal the determination to a designated agency appellate authority (including name, title, and address of such authority), and a notice that such an appeal must be filed with the agency within 60 days in order to be considered (3-501).

c. *Information classified by agencies other than the custodial agency.* When an agency receives a request for information in its custody that was classified by another agency, is shall forward the request to the appropriate agency for review, together with a copy of the document containing the information requested where practicable, and with its recommendation to withhold any of the information where appropriate. Unless the agency that classified the information objects on grounds that its association with the information requires protection, the agency that received the request shall also notify the requestor of the referral. After the agency that classified the information completes its review (in coordination with other agencies that a direct interest in the subject matter), a response shall be sent to the requestor in accordance with the procedures described above. If requested, the agency shall also communicate its determination to the referring agency (3-501).

d. *Action on appeal.* The head of an agency or a designee shall establish procedures to act within 30 days upon all appeals of denials of requests for declassification. These procedures shall provide for meaningful appellate consideration, shall be forwarded to the Oversight Office for review, and shall be published in the Federal Register. In accordance with these procedures, agencies shall determine whether continued classification is required in whole or in part, notify the requestor of the determination, and make available any information that is declassified and otherwise releasable. If continued classification is required under the provisions of section 3-3 of the order, the requestor shall be notified of the reasons therefor. If requested, the agency shall also communicate the appeal determination to any referring agency (3-5 and 5-404(c)).

e. *Fees.* If the request requires the rendering of services for which fair and equitable fees may be charged pursuant ot title 5 of the Independent Offices Appropriation Act, 65 Stat. 290, 31 U.S.C. 483a (1976), such fees may be imposed at the discretion of the agency rendering the services. Schedules of such fees shall be published in the Federal Register (3-501).

2. *Foreign government information.* Except as provided hereinafter, requests for mandatory review for the declassification of classified documents that contain foreign government information shall be processed and acted upon in accordance with the provisions of section D.1 above. If the agency receiving the request is also the agency that initially received or classified the foreign government information, it shall determine whether the foreign government information in the document may be declassified and released in accordance with agency policy or guidelines, after consulting with other agencies that have subject matter interest as necessary. If the agency receiving the request is not the agency that received or classified the foreign government information, it shall refer the request to the appropriate agency, which shall take action as described above, including its recommendation to withhold any of the information where appropriate. In those cases where agency policy or guidelines do not apply, consultation with the foreign originator through appropriate channels may be advisable prior to final action on the request (3-5).

IV. Safeguarding

A. *General.* Information classified pursuant to Executive Order 12065 or prior orders shall be afforded a level of protection against unauthorized disclosure commensurate with its level of classification (4-1).

B. *General restrictions on access.*

1. *Determination of need-to-know.* Classified information shall be made available to a person only when the possessor of the classified information establishes in each instance, except as provided in section 4-3 of the order, that access is essential to the accomplishment of official Government duties or contractual obligations (4-101).

2. *Determination of trustworthiness.* A person is eligible for access to classified information only after a showing of trustworthiness as determined by agency heads based upon appropriate investigations in accordance with applicable standards and criteria (4-101).

C. *Access by historical researchers and former Presidential appointees.* Agencies shall obtain: (1) Written agreements from requestors to safeguard the information to which they are given access as permitted by the order and this directive; and (2) written consent to the agency's review of their notes and manuscripts for the purpose of determining that no classified information is contained therein. A determination of trustworthiness is a precondition to a requestor's access. If the access requested by historical researchers and former Presidential appointees requires the rendering of services for which fair and equitable fees may be charged pursuant to title 5 of the Independent Offices Appropriations Act, 65 Stat. 290, 31 U.S.C. 483a (1976), the requestor shall be so notified and the fees may be imposed (4-3).

D. *Dissemination.* Except as otherwise provided by section 102 of the National Security Act of 1947, 61 Stat. 495, 50 U.S.C. 403 (1970 and Supp. V 1975), classified information originating in one agency may not be disseminated outside any other agency to

V 4 3 / 1 9 4
0 C 5 7 8

which it has been made available without the consent of the originating agency (4-403).

E. *Accountability procedures.*—1. *Top secret.* Top secret control officers shall be designated to receive, transmit, and maintain current access and accountability records for top secret information. An inventory of top secret documents shall be made at least annually; however, heads of agencies may authorize the annual inventory of top secret documents in repositories, libraries, or activities that store large volumes of such information to be limited to documents to which access has been afforded within the past 12 months. The Director of the Oversight Office may grant a waiver with respect to the requirement of an annual inventory for storage systems involving large volumes of information if security measures with respect to such storage systems are adequate to prevent access by unauthorized persons (4-103).

2. *Secret and confidential.* Secret and confidential classified information shall be subject to such controls and current accountability records as the head of the agency may prescribe (4-103).

F. *Storage.* Classified information shall be stored only in facilities or under conditions adequate to prevent unauthorized persons from gaining access to it (4-103).

11. *Top secret.* Top secret information shall be stored in a GSA-approved, safe-type, steel file cabinet having a built-in, three-position, dial-type combination lock or within an approved vault, or vault-type room, or in other storage facility that meets the standards for top secret established under the pfovisions of subsection 3 below. In addition, heads of agencies shall prescribe such additional, supplementary controls as are deemed appropriate to restrict unauthorized access to areas where such information is stored (4-103).

2. *Secret and confidential.* Secret and confidential information shall be stored in a manner and under the conditions prescribed for top secret information, or in a container or vault that meets the standards for secret or confidential, established pursuant to the provisions of subsections 3 or 4 below (4-103).

3. *Standards for security equipment.* The General Services Administration shall, in coordination with agencies originating classified information, establish and publish uniform standards, specifications, and supply schedules for containers, vaults, alarm systems, and associated security devices suitable for the storage and protection of all categories of classified information. Any agency may establish more stringent standards for its own use. Whenever new security equipment is procured, it shall be in conformance with the standards and specifications referred to above and shall, to the maximum extent practicable, be of the type designated on the Federal Supply Schedule, General Services Administration (4-103).

4. *Exception to standards for security equipment.*—a. Secret and confidential information may also be stored in a steel filing cabinet having a built-in, three-position, dial-type, changeable combination lock, or a steel filing cabinet equipped with a steel lock bar, provided it is secured by a three-position, changeable, combination padlock approved by GSA for the purpose. The storage of secret information in the steel filing cabinets described above requires the use of such supplementary controls as the head of the agency deems necessary to achieve the degree of protection warranted by the sensitivity of the information involved (4-103).

b. For protection of bulky secret and confidential material (for example, weaponry containing classified components) in magazines, strong rooms, or closed areas, access oenings may be secured by changeable combination or key-operated, high-security padlocks approved by GSA. When key-operated padlocks are used, keys shall be controlled in accordance with subsection 6 below (4-103).

5. *Combinations.*—a. *Equipment in service.* Combinations to dial-type locks shall be changed only by persons having appropriate security clearance, and shall be changed whenever such equipment is placed in use, whenever a person knowing the combination no longer requires access to the combination, whenever a combination has been subjected to possible compromise, whenever the equipment is taken out of service, and at least once every year. Knowledge of combinations protecting classified information shall be limited to the minimum number of persons necessary for operating purposes. Records of combinations shall be classified no lower than the highest level of classified information to be stored in the security equipment concerned (4-103).

B. *Equipment out of service.* When security equipment having a built-in combination lock is taken out of service, the lock shall be reset to the standard combination 50-25-50. Combination padlocks shall be reset to the standard combination 10-20-30 (4-103).

6. *Keys.* Heads of agencies shall establish administrative procedures for the control and accountability of keys and locks whenever key-operated, high-security padlocks are utilized. The level of protection provided such keys shall be equivalent to that afforded the classified information being protected. Under no circumstances may keys be removed from the premises. They shall be stored in a secure container (4-103).

7. *Responsibilities of custodians.* Persons entrusted with classified information shall be responsible for providing protection and accountability for such information at all times and for locking classified information in approved security equipment whenever it is not in use or under direct supervision of authorized persons. Custodians shall follow procedures that insure unauthorized persons do not gain access to classified information (4-103).

8. *Inspections.* Individuals charged with the custody of classified information shall conduct the necessary inspections within their areas to insure adherence to procedural safeguards prescribed to protect classified information. Agency security officers shall insure that periodic inspections are made to determine whether procedural safeguards prescribed by agency regulations are in effect at all times (4-103).

G. *Transmittal.*—1. *Preparation and receipting.* Classified information shall be enclosed in opaque inner and outer covers before transmitting. The inner cover shall be a sealed wrapper or envelope plainly marked with the assigned classification and addresses of both sender and addressee. The outer cover shall be sealed and addressed with no identification of the classification of its contents. A receipt shall be attached to or enclosed in the inner cover, except that confidential information shall require a receipt only if the sender deems it necessary. The receipt shall identify the sender, addressee, and the document, but shall contain no classified information. It shall be immediately signed by the recipient and returned to the sender. Any of these wrapping and receipting requirements may be waived by agency heads under conditions that will provide adequate protection and prevent access by unauthorized persons (4-103).

2. *Transmittal of top secret.* The transmittal of top secret information shall be by specifically designated personnel, by State Department diplomatic pouch, by a messenger-courier system specially created for that purpose, or over authorized secure communications circuits (4-103).

3. *Transmittal of secret.* The transmittal of secret material shall be effected in the following manner:

a. *The 50 States, District of Columbia, and Puerto Rico.* Secret information may be transmitted within and between the 50 States, District of Columbia, and Puerto Rico by one of the means authorized for top secret information, by the U.S. Postal Service registered mail, or by protective services provided by U.S. air or surface commercial carriers under such conditions as may be prescribed by the head of the agency concerned (4-103).

b. *Canadian Government Installations.* Secret information may be transmitted to and between United States Government and Canadian Government installations in the 50 States, the District of Columbia, and Canada by United States and Canadian registered mail with registered mail receipt (4-103).

c. *Other areas.* Secret information may be transmitted from, to, or within areas other than those specified in subsections a or b above by one of the means established for top secret information, or by U.S. registered mail through Army, Navy, or Air Force Postal Service facilities provided that the information does not at any time pass out of U.S. citizen control and does not pass through a foreign postal system. Transmittal outside such areas may also be accomplished under escort of appropriately cleared personnel aboard U.S. Government and U.S. Government contract vehicles or aircraft, ships of the United States Navy, civil service manned U.S. Naval ships, and ships of U.S. Registry. Operators of vehicles, captains or masters of vessels, and pilots of aircraft who are U.S. citizens and who are appropriately cleared may be designated as escorts (4-103).

4. *Transmittal of confidential information.* Confidential information shall be transmitted within and between the 50 States, the District of Columbia, the Commonwealth of Puerto Rico, and U.S. territories or possessions by one of the means established for higher classifications, or by U.S. Postal Service certified, first class, or express mail service when prescribed by an agency head. Outside these areas, confidential information shall be transmitted only as is authorized for higher classifications (4-103).

H. *Loss or possible compromise.* Any person who has knowledge of the loss or possible compromise of classified information shall immediately report the circumstances to an official designated by the agency or organization. In turn, the orginating agency shall be notified about the loss or compromise in order that a damage assessment may be conducted and appropriate measures taken to negate or minimize any adverse effect of such a compromise. An immediate inquiry shall be initiated by the agency under whose cognizance the loss or compromise occurred, for the purpose of taking corrective measures and appropriate administrative, disciplinary, or legal action (4-103).

I. *Destruction.* Nonrecord classified information that has served its intended purpose shall be destroyed in accordance with procedures and methods approved by the head of the agency. The method of destruction selected must preclude recognition or reconstruction of the classified information or material (4-103).

V. Implementation and Review

Challenges to classification. Agency programs established to implement the order shall encourage holders of classified information to challenge classification in cases where there is reasonable cause to believe that information is classified unnecessarily, improperly, or for an inappropriate period of time. These programs shall provide for action on such challenges or appeals relating thereto within 30 days of receipt and for notification to the challenger of the results. When requested, anonymity of the challenger shall be preserved (5-404(d)).

VI. General Provisions

A. *Notification.* Notification of unscheduled changes in classification or changes in duration of classification may be by general rather than specific notice (4-102).

B. *Posted notice.* If prompt remarking of large quantities of information would be unduly burdensome, the custodian may attach a change of classification notice to the storage unit in lieu of the marking action otherwise required. Each notice shall indicate the change, the authority for the action, the date of the action, and the storage units to which it applies. Items permanently withdrawn from such storage units shall be marked promptly in accordance with the marking provisions herein. However, when information subject to a posted downgrading, upgrading, or declassification notice is withdrawn from one storage unit solely for transfer to another, or a storage unit containing such information is transferred from one place to another, the transfer may be made without marking if the notice is attached to or remains with each shipment (4-102).

C. *Downgrading, declassification, and upgrading markings.* Whenever a change is made in the original classification or in the dates of downgrading or declassification of any classified information, it shall be promptly and conspicuously marked to indicate the change, the authority for the action, the date of the action, and the identity of the person taking the action. Earlier classification markings shall be cancelled when practicable (4-102).

D. *Combat operations.* The provisions of the order and this Directive with regard to dissemination, transmittal, or safeguarding of classified information may be so modified in connection with combat or combat-related operations as the Secretary of Defense may by regulations prescribe (4-103).

E. *Publication and effective date.* This directive shall be published in the Federal Register. It shall become effective December 1, 1978 (6-204).

James B. Rhoads,
Acting Chairman, Interagency Classification Review Committee.

October 2, 1978.

HOW TO USE THE FEDERAL REGISTER

ALBANY, NEW YORK, AND DALLAS, FORT WORTH, AND AUSTIN, TEXAS, WORKSHOPS

See inside cover for details.

SUNSHINE ACT MEETINGS 46415

FLOODPLAINS MANAGEMENT
NRC issues document implementing Executive Order 11988.. 46498

FOREIGN ASSISTANCE
State/AID issues determination and waiver relating to Zambia.. 46401

EMPLOYEE EXPOSURE AND MEDICAL RECORDS
Labor/OSHA announces public hearings to be held 12-5, 12-12, and 12-15-78, on proposal 46322

PROCUREMENT
GSA sets forth final rule aimed at strengthening competitive negotiation procedures; effective 11-6-78 46302

OPHTHALMIC GOODS AND SERVICES
FTC clarifies rule on advertising; effective 9-15-78 46296

TREATMENT FOR RHEUMATOID ARTHRITIS
HEW/FDA announces availability of proposed guidelines intended to reflect acceptable standards for clinical evaluation of slow acting drugs; comments by 2-5-79 46375

MEDICAL PROGRAM REIMBURSEMENT
HEW/HCFA establishes updated schedule of guidelines for costs of respiratory and physical therapy services (2 documents) 46378

CANCER TESTING
HEW/NIH issues notices on the availability of reports on bioassay of various chemicals for possible carcinogenicity (3 documents) 46382,46383

MEDICAL DEVICES
HEW/FDA extends comment period to 12-5-78 on tentative final order for investigational device exemptions 46321

UMI

HOW TO USE THE FEDERAL REGISTER WORKSHOPS

FOR: Any person who must use the Federal Register and Code of Federal Regulations.

WHAT: Free public workshops (approximately 2½ hours) to present:

1. Brief history of the Federal Register system.
2. Difference between legislation and regulations.
3. Relationship of Federal Register and the Code of Federal Regulations.
4. Important elements of a typical Federal Register document.
5. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them, as part of the General Services Administration's efforts to encourage public participation in government actions. There will be no discussion of specific agency regulations.

ALBANY, NEW YORK

WHEN: October 27 and 28, 1978, at 1:00 p.m.
WHERE: Meeting Room No. 1, Cultural Education Center, Empire State Plaza, Albany, New York.
RESERVATIONS: Call Elizabeth Closson, 518–474–5943.

DALLAS, TEXAS

WHEN: October 30, 1978, at 9:30 a.m.
WHERE: Conference Room 7A23, Earle Cabell Federal Building, 1100 Commerce St., Dallas, Texas.
RESERVATIONS: Call Federal Information Center, 214–749–2131.

FORT WORTH, TEXAS

WHEN: October 31, 1978, at 9:30 a.m.
WHERE: Auditorium, 7th Floor, Lone Star Gas Co., 908 Monroe St., Fort Worth, Texas.
RESERVATIONS: Call Federal Information Center, 817–334–3624.

AUSTIN, TEXAS

WHEN: November 2, 1978, at 2 p.m.
WHERE: Room 1008, Regan Office Building, 15th & Congress Sts., Austin, Texas.
RESERVATIONS: Call Peggy Lockhart or Bob Walton, 512–475–6725.

federal register
Area Code 202 Phone 523–5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended, 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

INFORMATION AND ASSISTANCE

Questions and requests for specific information may be directed to the following numbers. General inquiries may be made by dialing **202–523–5240.**

FEDERAL REGISTER, Daily Issue:

Title 5—Administrative Personnel

CHAPTER I—CIVIL SERVICE COMMISSION

PART 213—EXCEPTED SERVICE

Temporary Boards and Commissions

AGENCY: Civil Service Commission.

ACTION: Final rule.

SUMMARY: This authority excepts from the competitive service under schedule A all staff positions of the President's Commission On World Hunger with the provision that no one may serve under this authority after June 30, 1980, or earlier as directed by the President. This exception is granted because it is impracticable to examine for these positions.

EFFECTIVE DATE: September 26, 1978.

FOR FURTHER INFORMATION CONTACT:

Michael Sherwin, 202-632-4533.

Accordingly, 5 CFR 213.3199 (1) is added as set out below:

§ 213.3199 Temporary Boards and Commissions.

* * * * * *

(l) *President's Commission On World Hunger.* (1) All positions on the staff of the President's Commission On World Hunger. No one may serve under this authority after June 30, 1980, or earlier as directed by the President.

(5 U.S.C. 3301, 3302; EO 10577, 3 CFR 1954–1958 Comp., p. 218.)

PART 213—EXCEPTED SERVICE

Department of Commerce

AGENCY: Civil Service Commission.

ACTION: Final rule.

SUMMARY: The title of the Schedule A Merchant Marine Academy position of Assistant Dean is changed to Associate Dean to conform with the title of similar positions at other service academies.

EFFECTIVE DATE: September 22, 1978.

FOR FURTHER INFORMATION CONTACT:

Michael D. Sherwin, 202-632-4533.

Accordingly, 5 CFR 213.3114(h)(11) is amended as follows:

§ 213.3114 Department of Commerce.

* * * * * *

(h) *Maritime Academy.* * * *

(11) U.S. Merchant Marine Academy positions of: Superintendent, Special Assistant to the Superintendent; Assistant Superintendent for Planning and Administration; Dean; Associate Dean; Registrar; Director of Admissions; Assistant Director of Admissions; Director, Office of External Affairs; Placement Officer; Administrative Librarian; Shipboard Training Assistant; and three Academy Training Representatives.

PART 213—EXCEPTED SERVICE

National Foundation on the Arts and the Humanities

AGENCY: Civil Service Commission.

ACTION: Final rule.

SUMMARY: One position of Assistant Director of Literature Programs is excepted under schedule A until September 30, 1980, in the National Endowment for the Arts because examination is impracticable for this position.

EFFECTIVE DATE: September 26, 1978.

FOR FURTHER INFORMATION CONTACT:

Michael Sherwin, 202-632-4533.

Accordingly, 5 CFR 213.3182(a)(8) is added as follows:

§ 213.3182 National Foundation on the Arts and the Humanities.

(a) *National Endowment for the Arts.* * * *

(8) Until September 30, 1980, one position of Assistant Director of Literature Programs.

[6325-01]

PART 539—CONVERSIONS BETWEEN PAY SYSTEMS

Transfer of Functions

AGENCY: Civil Service Commission.

ACTION: Final rule.

SUMMARY: The following amendments correct editorial oversights to (1) correct the title of Subpart B of Part 539, which covers conversions to the General Schedule, and (2) clarify that, for an employee who has been converted with his or her position to the General Schedule from another pay system, a subsequent movement to another agency as a result of a transfer of function does not terminate or defeat the employee's eligibility for saved pay. This protection in transfers of function is substantially the same as § 531.510 of Part 531, dealing with salary retention after reductions in grade. This clarification of the original protective intent of the conversion regulations is particularly necessary and appropriate at this time because a number of employees whose pay is currently based on Part 539 are now being transferred to another agency as

V 43 / 195
OCT 6 78

a result of Government reorganization.

EFFECTIVE DATE: October 1, 1978.

FOR FURTHER INFORMATION CONTACT:

Harry A. Wolf, 202-632-6553, Bureau of Policies and Standards, Technical Services Staff, Room 3351, 1900 E Street NW., Washington, D.C. 20415.

Accordingly, the headnote of 5 CFR Part 539, Subpart B, is amended and § 539.204 is added as set out below:

Subpart B—Conversions to General Schedule

* * * * *

§ 539.204 Transfer of functions.

The movement of an employee with his or her function in a transfer of function between agencies does not terminate or defeat the employee's eligibility for saved pay in determining whether he or she remained "in the same agency," as required by § 539.203(d).

(5 U.S.C. 5334, 5338)

UNITED STATES CIVIL SERVICE COMMISSION,
JAMES C. SPRY,
Executive Assistant to the Commissioners.

[6325-01]

PART 550—PAY ADMINISTRATION (GENERAL)

Adjustment of Work Schedules for Religious Observances

AGENCY: Civil Service Commission.

ACTION: Final rule.

SUMMARY: The following amendments are issued pursuant to title IV of Pub. L. 95-390, enacted September 29, 1978. Under the law and these regulations an employee of an executive agency may elect to work compensatory overtime for the purpose of taking compensatory time off because of religious obligations when an employee's personal religious beliefs require that the employee abstain from work during certain periods. A Federal agency may, under appropriate regulations, disapprove such modifications in work schedules if they interfere with the efficient accomplishment of an agency's mission. The Civil Service Commission is responsible for promulgating regulations for implementation of title IV of the act for executive agencies no later than 30 days after enactment. Because of this requirement, and in view of the President's wish that regulations be issued immediately due to the imminence of religious holidays, we could not delay the effective date to allow for proposed rulemaking and public procedures. Development of subsequent regulations will be made subject to public participation. The following regulations are interim regulations.

EFFECTIVE DATE: October 2, 1978.

FOR FURTHER INFORMATION CONTACT:

Dwight W. Brown, Room 3353, Office of Leave and Pay Administration Policy, Bureau of Policies and Standards, 1900 E Street NW., Washington, D.C. 20415, area code 202-632-5604.

Accordingly, 5 CFR part 550 is amended by adding subpart J as follows:

* * * * *

Subpart J—Adjustment of Work Schedules for Religious Observances

Sec.
550.1001 Coverage.
550.1002 Compensatory time off for religious observances.

AUTHORITY: 5 U.S.C. 5550a

Subpart J—Adjustment of Work Schedules for Religious Observances

§ 550.1001 Coverage.

This subpart applies to each employee in or under an executive agency as defined by section 105 of title 5, United States Code.

§ 550.1002 Compensatory time off for religious observances.

(a) These interim regulations are issued pursuant to title IV of Pub. L. 95-390, enacted September 29, 1978. Under the law and these regulations, an employee whose personal religious beliefs require the abstention from work during certain periods of time may elect to engage in overtime work for time lost for meeting those religious requirements.

(b) To the extent that such modifications in work schedules do not interfere with the efficient accomplishment of an agency's mission, the agency shall in each instance afford the employee the opportunity to work compensatory overtime and shall in each instance grant compensatory time off to an employee requesting such time off for religious observances when the employee's personal religious beliefs require that the employee abstain from work during certain periods of the workday or workweek.

(c) For the purpose stated in paragraph (b) of this section, the employee may work such compensatory overtime before or after the grant of compensatory time off. A grant of advanced compensatory time off should be repaid by the appropriate amount of compensatory overtime work within a reasonable amount of time. Compensatory overtime shall be credited to an employee on an hour for hour basis or authorized fractions thereof. Appropriate records will be kept of compensatory overtime earned and used.

(d) The premium pay provisions for overtime work in subpart A of part 550 of title 5, Code of Federal Regulations, and section 7 of the Fair Labor Standards Act of 1938, as amended, do not apply to compensatory overtime work performed by an employee for this purpose.

(e) These interim regulations shall remain in effect until superseded by further regulations on this subject by the Civil Service Commission.

UNITED STATES CIVIL SERVICE COMMISSION,
JAMES C. SPRY,
Executive Assistant to the Commissioners.

[FR Doc. 78-28218 Filed 10-5-78; 8:45 am]

[3410-02]

Title 7—Agriculture

CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

[Lemon Reg. 167]

PART 910—LEMONS GROWN IN CALIFORNIA AND ARIZONA

Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This regulation establishes the quantity of fresh California-Arizona lemons that may be shipped to market during the period October 8-14, 1978. Such action is needed to provide for orderly marketing of fresh lemons for this period due to the marketing situation confronting the lemon industry.

EFFECTIVE DATE: October 8, 1978.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, 202-447-6393.

SUPPLEMENTARY INFORMATION:

FINDINGS

Pursuant to the marketing agreement, as amended, and Order No. 910, as amended (7 CFR Part 910), regulating the handling of lemons grown in California and Arizona, effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), and upon the basis of the recommendations and information submitted by the Lemon Administrative Committee, and upon other information, it is found that the limitation of handling of lemons, as hereafter provided, will tend to effectuate the declared policy of the act.

The committee met on October 3, 1978, to consider supply and market conditions and other factors affecting the need for regulation and recommended a quantity of lemons deemed advisable to be handled during the specified week. The committee reports the demand for lemons is good for sizes 140's and larger but easier on sizes 200's and 235's.

It is further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking, and postpone the effective date until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553), because of insufficient time between the date when information became available upon which this regulation is based and the effective date necessary to effectuate the declared policy of the act. Interested persons were given an opportunity to submit information and views on the regulation at an open meeting. It is necessary to effectuate the declared purposes of the act to make these regulatory provisions effective as specified, and handlers have been apprised of such provisions and the effective time.

§ 910.467 Lemon Regulation 167.

ORDER

(a) The quantity of lemons grown in California and Arizona which may be handled during the period October 8, 1978, through October 14, 1978, is established at 215,000 cartons.

(b) As used in this section, "handled" and "carton(s)" mean the same as defined in the marketing order.

(Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674.)

Dated: October 5, 1978.

CHARLES R. BRADER,
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc. 78-28580 Filed 10-5-78; 11:43 am]

[3410-02]

PART 1201—TYPE 62 SHADE-GROWN CIGAR-LEAF TOBACCO GROWN IN DESIGNATED PRODUCTION AREA OF FLORIDA AND GEORGIA

Order Terminating Remaining Provisions

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Order terminating remaining provisions.

SUMMARY: This order terminates the remaining provisions of marketing agreement and order No. 195, as amended (7 CFR part 1201) regulating the handling of type 62 shade-grown cigar-leaf tobacco grown in the designated production area of Florida and Georgia. This order is being terminated at the request of the Control Committee because the order no longer is needed to effectuate the policy of the Act.

DATE: Effective October 6, 1978.

FOR FURTHER INFORMATION CONTACT:

Leonard J. Ford, Director, Tobacco Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250, 202-447-2097.

SUPPLEMENTARY INFORMATION: Prior documents in this proceeding: Proposed rule: Issued September 16, 1977, published September 22, 1977 (42 FR 47848); order terminating marketing agreement and order, as amended: Issued January 12, 1978, published January 18, 1978 (43 FR 2627).

Pursuant to the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.) hereinafter referred to as the "Act," and of the marketing agreement and order regulating the handling of type 62 shade-grown cigar-leaf tobacco grown in the designated production area of Georgia and Florida (7 CFR part 1201), it is hereby found and determined that:

(a) The following remaining provisions of the marketing agreement and order no longer tend to effectuate the declared policy of the Act: Section 1201.71 (Proceedings after termination).

On January 12, 1978, the Secretary terminated all the provisions of this marketing agreement and order except § 1201.71 relating to proceedings after termination of the order. In that termination order the Secretary ordered that the Control Committee continue as trustees for the purpose of liquidating the affairs of the Committee. Since that time, the Committee has wound up its affairs by distributing the assessment funds collected prior to June 3, 1973 (the date on which the program became inactive) pro rata, to growers qualified to receive such funds, after deducting audit and postage expenses. Accordingly, the function of liquidating the affairs of the Control Committee has been completed.

(b) Thirty days' notice of the effective date hereof is impractical, unnecessary, and contrary to the public interest in view of the fact that all affected parties have been fully notified of the termination proceeding and have had sufficient opportunity to make their views known to the Secretary.

It is therefore ordered, That the remaining provisions of order No. 195, § 1201.71, regulating the handling of type 62 shade-grown cigar-leaf tobacco grown in the designated production area of Georgia and Florida (7 CFR part 1201), are hereby terminated and part 1201 is vacated effective on or after October 31, 1978, subject, however, to the following condition: That such termination of the remaining provisions of that order shall not affect or waive any right, obligation, duty, or liability under the agreement or order which shall have arisen under these provisions or the regulations issued thereunder prior to February 1, 1978, or release or extinguish any violation of these provisions of the regulations issued thereunder, or affect or impair any right or remedies of the Secretary, or any other person, with respect to any such violation that has arisen or occurred or which may arise or occur prior to the time that the termination of such remaining provisions become effective.

Dated: October 3, 1978.

P. R. "BOBBY" SMITH,
Assistant Secreary for Marketing Services.

[FR Doc. 78-28301 Filed 10-5-78; 8:45 am]

[3410-07]

CHAPTER XVIII—FARMERS HOME ADMINISTRATION, DEPARTMENT OF AGRICULTURE

V 43 / 195
OCT 6 1978

SUBCHAPTER I—LOAN AND GRANT PROGRAMS (INDIVIDUAL)

[FmHA Instruction 1904-C]

PART 1904—LOAN AND GRANT PROGRAMS (INDIVIDUAL)

Subpart C—Farmer Program Loans

EMERGENCY LOANS

AGENCY: Farmers Home Administration, USDA.

ACTION: Final rule.

SUMMARY: The Farmers Home Administration is amending its emergency loan regulation to comply with recent legislation. This action sets forth the interest rate for actual loss loans made as a result of disasters occurring before October 1, 1978, and approved on or after October 1, 1978; and the interest rate for actual loss loans made as a result of disasters occurring on or after October 1, 1978. The amount of actual loss loan which may be made to any one applicant based on disasters occurring before October 1, 1978, and approved after that date has been limited to a maximum of $250,000.

EFFECTIVE DATE: October 6, 1978.

FOR FURTHER INFORMATION CONTACT:

James E. Lee, Director, Emergency Loan Division, phone 202-447-6257.

SUPPLEMENTARY INFORMATION: The Farmers Home Administration amends § 1904.170 (b)(2) and (e) (1) and (2) of Subpart C to Part 1904, Chapter XVIII, Title 7, in the Code of Federal Regulations. The interest rates published in this amendment are authorized by the Agricultural Credit Act of 1978, and are consistent to the extent possible with the interest rates which the Small Business Administration will charge farmers and ranchers for similar loans based on disasters occurring before October 1, 1978. It is the policy of this Department that rules relating to public property, loans, grants, benefits or contracts shall be published for comment notwithstanding the exemption in 5 U.S.C. 553 with respect to such rules. This amendment, however, is not published for proposed rulemaking since the change is being made to comply with recent legislation. Therefore, notice of proposed rulemaking and public procedure thereon are unnecessary. Accordingly, §§1904.170 (e)(1)(ii) (A) and (B) are deleted and §§ 1904.170 (b)(2) and (e) (1) and (2) are amended and read as follows:

§ 1904.170 Emergency loans.

* * * * *

(b) *Eligibility.* (1) * * *

(2) No ceiling has been established on the size of operations that may be financed with EM loans nor on the dollar limit of loans which may be made, except that actual loss loans based on disasters occurring on or after July 1, 1978, and before October 1, 1978, and approved on or after October 1, 1978, will be limited to the lesser of the applicant's actual dollar loss or $250,000 for any one authorized or declared disaster. Therefore, subject to the eligibility requirements and other provisions of this regulation, EM loans may be made to finance larger than family farm operations.

* * * * *

(e) *Rates and terms.*—(1) *Interest rates.* * * *

(i) For disasters occurring on or after July 1, 1976, and prior to October 1, 1978, all actual loss loans (physical and production) approved on or after October 1, 1978, will be at 3 percent interest with a maximum loss loan limitation of $250,000.

(ii) For disasters occurring on or after October 1, 1978, all actual loss loans (physical and production) will be at 5 percent interest and limited to the amount of the actual dollar loss.

* * * * *

(2) *Establishing repayment terms and delay of principal payments.* EM actual loss loans made at the 1, 3, and 5 percent interest rates and approved before October 1, 1978, will be scheduled for repayment so that principal and interest on that portion of the loan bearing the lowest interest rate will mature before principal payments are scheduled for portions of the loan bearing higher rates. However, interest must be collected on the portion of the principal deferred during the period principal payments are not scheduled. The portion of the loan bearing the lower interest rate should be repaid as soon as possible, consistent with the applicant's repayment ability. This deferral of principal does not apply to EM loans for other than actual losses.

* * * * *

(7 U.S.C. 1989; delegation of authority by the Secretary of Agriculture, 7 CFR 2.23, delegation of authority by the Assistant Secretary for Rural Development, 7 CFR 2.70.)

Dated: October 4, 1978.

GORDON CAVANAUGH,
Administrator,
Farmers Home Administration.

[FR Doc. 78-28379 Filed 10-5-78; 8:45 am]

[3410-07]

SUBCHAPTER N—OTHER LOAN PROGRAMS

[FmHA Instruction 1980-B]

PART 1980—GUARANTEED LOAN PROGRAMS

Subpart B—Farmer Program Loans

EMERGENCY LOANS

AGENCY: Farmers Home Administration, USDA.

ACTION: Final rule.

SUMMARY: The Farmers Home Administration is amending its guaranteed emergency loan regulation to comply with recent legislation. This action sets forth the interest rate for loss loans guaranteed as a result of disasters occurring before October 1, 1978, and approved on or after October 1, 1978; and the interest rate for loss loans guaranteed as a result of disasters occurring on or after October 1, 1978. The amount of actual loss loans which may be made to any one applicant based on disasters occurring before October 1, 1978, and approved after that date has been limited to a maximum of $250,000.

EFFECTIVE DATE: October 6, 1978.

FOR FURTHER INFORMATION CONTACT:

James E. Lee, Director, Emergency Loan Division, phone 202-447-6257.

SUPPLEMENTARY INFORMATION: The Farmers Home Administration amends § 1980.170 paragraphs (a), (d)(1)(i) and (e) (1) and (2) of Subpart B to Part 1980, Chapter XVIII, Title 7, in the Code of Federal Regulations. The interest rates published in this amendment are authorized by the Agricultural Credit Act of 1978, and are consistent to the extent possible with the interest rates which the Small Business Administration will charge farmers and ranchers for similar loans based on disasters occurring before October 1, 1978. It is the policy of this Department that rules relating to public property, loans, grants, benefits, or contracts shall be published for comment notwithstanding the exemption in 5 U.S.C. with respect to such rules. This amendment, however, is not published for proposed rulemaking since the change is being made to comply with recent legislation. Therefore, notice of proposed rulemaking and public procedure thereon are unnecessary. Accordingly, paragraphs

1980.170(e)(1)(i), (ii) (A) and (B) are deleted and §§ 1980.170 paragraphs (a), (d)(1)(i), and (ii), (e)(1) (i) and (e)(2) are amended to read as follows:

§ 1980.170 Emergency loans.

* * * * *

(a) *Objectives.* The basic objectives of EM loan guarantees are to provide financial assistance to eligible farmers, ranchers, and aquaculture operators to cover losses, make major adjustments, pay operating expenses, and provide for other essential needs so that they may maintain sound farming, livestock, or aquaculture operations. No ceiling has been established on the size of operations that may be financed with EM loans or on the dollar limit of loans which may be made, except that actual loss loans based on disasters occurring on or after July 1, 1976, and before October 1, 1978, and approved on or after October 1, 1978, will be limited to the lesser of the applicant's actual dollar loss or $250,000 for any one authorized or declared disaster.

* * * * *

(d) *Loan purposes.* * * *

(1) *Actual loss loans.* (i) Loans may be made to applicants for the amount of actual losses and expenses for disaster damaged or destroyed farm property, or production enterprises or both resulting from the disaster, except that actual loss loans based on disasters occurring on or after July 1, 1976, and before October 1, 1978, and approved on or after October 1, 1978, will be limited to the lesser of the applicant's actual dollar loss or $250,000 for any one authorized or declared disaster. Actual loss loan funds may be used for any authorized EM loan purpose. Applications for actual losses must be processed within 1 calendar year after they are filed.

* * * * *

(e) *Interest rates and terms.*—(1) *Interest rates.* * * *

(i) For disasters occurring on or after July 1, 1976, and prior to October 1, 1978, all actual loss loans (physical and production) approved on or after October 1, 1978, will be at 3-percent interest with a maximum loss loan limitation of $250,000.

(ii) For disasters occurring on or after October 1, 1978, all actual loss loans (physical and production) will be at 5-percent interest and limited to the amount of the actual dollar loss.

* * * * *

(2) *Establishing repayment terms and delay of principal payments.* EM actual loss loans made at the 1-, 3-, and 5-percent interest rates and approved before October 1, 1978, will be scheduled for repayment so that principal and interest on that portion of the loan bearing the lowest interest rate will mature before principal payments are scheduled for portions of the loan bearing higher rates. However, interest must be collected on the portion of the principal deferred during the period principal payments are not scheduled. The portion of the loan bearing the lower rate should be repaid as soon as possible, consistent with the applicant's repayment ability. This deferral of principal does not apply to EM loans for other than actual losses.

CHAPTER XXVIII—FOOD SAFETY AND QUALITY SERVICE, DEPARTMENT OF AGRICULTURE

PART 2852—PROCESSED FRUITS AND VEGETABLES, PROCESSED PRODUCTS THEREOF, AND CERTAIN OTHER PROCESSED FOOD PRODUCTS

Subpart—Regulations Governing Inspection and Certification

AGENCY: Food Safety and Quality Service, USDA.

ACTION: Final rule.

SUMMARY: This document adjusts the rates charged for inspection and grading service to reflect recently announced Federal employees' salary increase and deletes the overtime surcharge to plants operating under a full-time year-round, inspection contract.

EFFECTIVE DATE: October 8, 1978.

FOR FURTHER INFORMATION CONTACT:

Jacob J. Vollman, Chief, Processed Products Branch, Fruit and Vegetable Quality Division, Food Safety and Quality Service, U.S. Department of Agriculture, Washington, D.C. 20250, 202-447-4693.

SUPPLEMENTARY INFORMATION: The Agricultural Marketing Act of 1946 authorizes the official inspection, grading, and certification of processed fruits, vegetables, processed products thereof, and certain other processed food products. Such service is voluntary and is made available upon request of financially interested parties and upon payment of a fee. The Act requires the fees to be reasonable and, as nearly as possible, to cover the cost of rendering the service.

The rising cost of maintaining the inspection service has made it necessary to adjust inspection and grading fees. These adjustments will compensate for 1978 increases in Government employee salaries as authorized by Congress, as well as increased personnel benefits resulting therefrom.

Accordingly, sections 2852.42 and 2852.52—Schedule of Fees and Charges for Inspection on a Contract Basis—are being revised to recover the increased costs.

Pursuant to the authority contained in the Agricultural Marketing Act of 1946 (60 Stat. 1087 et seq., as amended; 7 U.S.C. 1621-1627), §§ 2852.42, 2852.52(c); and 2852.52(d) are hereby amended to read as follows:

§ 2852.42 Schedule of fees.

Unless otherwise provided in a written agreement between the applicant and the Administrator, the fee for any inspection service performed under the regulations in this part, including analyses specified in § 2852.47, shall be at the rate of $20.80 per hour plus an additional $5 per hour for all scheduled overtime hours.

* * * * *

§ 2852.52 Charges for inspection services on a contract basis.

* * * * *

(c) Charges for year-round inplant inspection services on a contract basis will be charged to the applicant at least monthly for all hours worked with a minimum of 40 hours per week, holiday pay and night differential for each inspector assigned to perform the inspection services in accordance with the following schedule:

(1) For personnel assigned on a year-round basis: Each inspector—$16 per hour.

(2) For personnel assigned on less than a year-round basis: Each inspector—$18.50 per hour. Each subordinate inspector on the same shift with an inspector—$13.50 per hour.

(3) *Travel expense.* No reporting charge will be made for regular full-time inspection personnel assigned on a year-round basis. Per diem and/or mileage will be charged when paid to

V 43 / 195

each inspector assigned on less than a year-round basis.

(4) *Holiday pay.* • • •

(5) *Night differential.* • • •

(6) *Overtime.* All overtime hours will be charged at the regular rates specified in (c) (1) and (2) of this section.

(d) Charges for less than year-round inplant inspection services on a contract basis will be billed to the applicant at least monthly for all hours with a minimum of 40 hours per week, holiday pay and night differential for each inspector assigned to perform the inspection services in accordance with the following schedule: (1) Each inspector—$23.

• • • • •

Notice of proposed rulemaking, public procedure thereon, and the postponement of the effective time of this action later than October 8, 1978 (5 U.S.C. 553), are impractical, unnecessary, and contrary to the public interest in that: (1) The Agricultural Marketing Act of 1946 provides that the fees charged be reasonable and, as nearly as possible, cover the cost of the service rendered, (2) The increase in fee rates set forth herein are necessary to more nearly cover such cost including, but not limited to, Federal employee salary adjustments, and (3) Additional time is not required by the users of the inspection service to comply with the amendment.

(Secs. 203, 205, 60 Stat. 1087, as amended. 1090, as amended (7 U.S.C. 1622, 1624).)

NOTE.—The Food Safety and Quality Service has determined that this document does not contain a major proposal requiring preparation of an inflation impact statement under Executive Order 11821 and OMB Circular A-107.

Dated to become effective at 12:01 a.m., October 8, 1978.

Done at Washington, D.C. on October 4, 1978.

SYDNEY J. BUTLER,
Acting Administrator, Food Safety and Quality Service.

Title 10—Energy

CHAPTER I—NUCLEAR REGULATORY COMMISSION

PART 2—RULES OF PRACTICE FOR DOMESTIC LICENSING PROCEEDINGS

PART 51—LICENSING AND REGULATORY POLICY AND PROCEDURES FOR ENVIRONMENTAL PROTECTION

Distribution of Applications and Environmental Statements to Local Officials

AGENCY: U.S. Nuclear Regulatory Commission.

ACTION: Final rule.

SUMMARY: The Nuclear Regulatory Commission (NRC) is amending its regulations to provide for notice to the chief executives of the appropriate alternative municipalities or counties which have been identified in the application or environmental report as alternative sites for nuclear facilities or activities. The notice will include a brief description of, and other pertinent information regarding, the site and facility proposed or alternatively listed. The notice will include a statement that if a request is received from the appropriate chief executive of the alternative site, a copy of the application or environmental report, and any changes to such documents which affect the alternative site location, will be transmitted to the executive who makes the request. This amendment will assure that local officials of communities which are preferred or alternative sites for nuclear facilities are notified at the same time the initial application or environmental report is submitted to the Commission.

EFFECTIVE DATE: November 6, 1978.

FOR FURTHER INFORMATION CONTACT:

Gerald L. Hutton, Division of Rules and Records, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, 301-492-7086.

SUPPLEMENTARY INFORMATION: By letter dated July 7, 1976, the township of Lower Alloways Creek, N.J., filed with the Nuclear Regulatory Commission a petition for rulemaking to amend 10 CFR 2.101 and 10 CFR 51.24 of the Commission's regulations.

In response to the petition for rulemaking PRM-51-2 the Commission published a notice of proposed rulemaking in the FEDERAL REGISTER on January 17, 1977 (42 FR 3178) to amend 10 CFR Parts 2 and 51.

The proposed amendment of § 2.101 set out in the January 17, 1977 notice would add a provision to paragraph (a)(3)(ii) that the applicant will also be requested to serve a copy of the tendered application and/or environmental report on the chief executives of the appropriate municipalities or counties which have been identified in the application or environmental report as alternative sites.

The proposed amendment of § 2.101 would add a provision to paragraph (b) which pertains to applications for licenses for receipt of waste radioactive material from other persons for the purpose of commercial disposal by the waste disposal licensee, that the applicant will also serve a copy of the application and environmental report, as appropriate, on the chief executives of the appropriate alternative municipalities or counties which have been identified in the application or environmental report as alternative sites.

The proposed amendment of § 51.24 would revise paragraph (c)(4) to provide that if the draft environmental impact statement is for a licensing action, copies of the draft statement and the applicant's environmental report will be provided to all parties to the licensing proceeding and the chief executives of all municipalities or counties which are identified in the draft statement as either preferred or alternative sites for the proposed facility or activity.

Six letters of comment were received on the petition for rulemaking and the notice of proposed rulemaking.

One commenter opposed the proposed rule, contending that jurisdictional officials and the public are aware of proposed projects even before the filing of an application; that the filing of applications with jurisdictional officials at alternative sites could have adverse impacts on local planning and land values; and that filing of the application would only serve to cause infighting between jurisdictions, possibly resulting in delays in the licensing process.

Although officials and the public may be aware of preferred sites before the filing of an application there is no assurance under present procedures that all officials with jurisdiction over alternative sites will know that a site in their area is under consideration or that the relative merits of such a site may have been the subject of dispute at hearings held in a different locale. The Commission is not convinced that furnishing such information to officials over alternative sites would have adverse impacts on local planning and land values, or cause jurisdictional conflicts resulting in licensing delays.

Three commenters opposed the proposed amendments on the grounds that they would require the service of voluminous and expensive documents upon individuals who have no real interest in receiving them, thereby placing an unjustified burden on applicants and municipal and county officials, without corresponding benefits to the public, the licensing process, or the municipalities or counties considered as alternative sites. These commenters suggested, however, that if some action is desired in this area, a more reasonable approach would be to notify the chief executives of municipalities or counties which have been designated as an alternative site in the application or environmental report of the availability of the documents. To the extent that such officials are interested, they could request copies of the documents.

It is the Commission's view that local officials of all of the communites or counties involved should be informed of the plans for a facility or a commercial waste disposal service or activity at the time the application or environmental report is submitted to the Commission. The Commission has concluded, however, that this objective can be accomplished in accordance with the alternative approach suggested by the three commenters noted in the preceding paragraph. Accordingly, the amendments set forth below have been revised to provide for notice to the chief executives of sites which have been identified in the application or environmental report as alternative sites. The notice will include a brief description of the proposed site and facility, the location of the site and facility proposed or alternatively listed, and will include a statement that if a request is received from the appropriate chief executive of the alternative site, a copy of the application or environmental report, and any changes to such documents which affect the alternative site location, will be transmitted to the executive who makes the request. A sentence has been added to §§ 2.101(a)(3)(ii) and 2.101(b) that an applicant in complying with those paragraphs should not make public distribution of those parts of the application subject to § 2.790(d); that is, information which identifies a licensee's or applicant's procedures for safeguarding licensed special nuclear material or detailed security measures for the physical protection of a licensed facility or plant in which licensed special nuclear material is possessed or used. A sentence has been added also that the applicant shall submit to the Director of Nuclear Reactor Regulation or Director of Nuclear Material Safety and Safeguards, as appropriate, an affidavit that service of the notice of availability of the application and environmental report has been completed along with a list of names and addresses of those executives upon whom the notice was served.

One firm commented favorably upon the proposed rule and suggested that local public document rooms be set up in the region of the alternative sites for displaying to the public the environmental report, draft environmental impact statement, and any other documents affecting the alternate sites. The Commission agrees that it may be desirable to establish a local public document room, or a mini-LPDR, in the region of the alternative sites in some cases. The Commission does not consider, however, that this should be done routinely. A determination will be made on a case-by-case basis after a survey of the public interest in the area of the alternative site.

One commenter encouraged the adoption of the proposed rule, but suggested that applications for amendments to existing licenses as well as new nuclear facilities and waste management facilities shoud be included, and notification and service of an application upon the appropriate governor or designated State government official should be included as well as municipal and county government. The suggestion regarding applications for amendments to existing licenses is outside the scope of this amendment inasmuch as the site would have been determined when the license was issued. The Commission's regulations already provide for distribution of applications and environmental reports to appropriate State officials.

The commenter also suggested that a provision for an early notice of intent to file and application be considered. It is the Commission's view that the present regulation, as amended below, provides for early notice to officials of alternative sites and notice of intent to file and application would not serve a useful purpose.

Pursuant to the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974, as amended, and sections 552 and 553 of title 5 of the United States Code, the following amendments to Title 10, Chapter I, Code of Federal Regulations, Parts 2 and 51 are published as a document subject to codification.

1. Section 2.101 of 10 CFR Part 2 is amended by revising § 2.101(a)(3)(ii) and § 2.101(b) to read as follows:

§ 2.101 Filing of application.

(a) • • •

(3) • • •

(ii) Serve a copy on the chief executive of the municipality in which the facility is to be located or, if the facility is not to be located within a municipality, on the chief executive of the county, and serve a notice of availability of the application or environmental report on the chief executives of the municipalities or counties which have been identified in the application or environmental report as the location of all or part of the alternative sites, containing the following information: Docket number of the application, a brief description of the proposed site and facility; the location of the site and facility as primarily proposed and alternatively listed; the name, address, and telephone number of the applicant's representative who may be contacted for further information; notification that a draft environmental impact statement will be issued by the Commission and will be made available upon request to the Commission; and notification that if a request is received from the appropriate chief executive, the applicant will transmit a copy of the application and environmental report, and any changes to such documents which affect the alternative site location, to the executive who makes the request. In complying with the requirements of this paragraph (a)(3)(ii) the applicant should not make public distribution of those parts of the application subject to § 2.790(d). The applicant shall submit to the Director of Nuclear Reactor Regulation an affidavit that service of the notice of availability of the application or environmental report has been completed along with a list of names and addresses of those executives upon whom the notice was served.

• • • • •

(b) After the application has been docketed, each applicant for a license for receipt of waste radioactive material from other persons for the purpose of commercial disposal by the waste disposal licensee shall serve a copy of the application and environmental report, as appropriate, on the chief executive of the municipality in which the activity is to be conducted or, if the activity is not to be conducted within a municipality on the chief executive of the county, and serve a notice of availability of the application or environmental report on the chief executives of the municipalities or counties which have been identified in the application or environmental report as the location of all or part of the alternative sites, containing the following information: Docket number of the application; a brief description of the proposed site and facility; the location of the site and facility as primarily proposed and alternatively listed; the name, address, and telephone number of the applicant's representative who may be contacted for further information; notification that a draft environmental impact statement will be issued by the Commission and will be made available upon request to the Commission; and notification that if a request is received from the appropriate chief executive, the applicant will transmit a copy of the application and environmental report, and any changes to such documents

OCT 6 1978

V 43 / 195 OCT 6 1978

which affect the alternative site location, to the executive who makes the request. In complying with the requirements of this paragraph (b) the applicant should not make public distribution of those parts of the application subject to § 2.790(d). The applicant shall submit to the Director of Nuclear Material Safety and Safeguards an affidavit that service of the notice of availability of the application or environmental report has been completed along with a list of names and addresses of those executives upon whom the notice was served.

2. Section 51.24 is amended by revising paragraph (c)(4) to read as follows:

§ 51.24 Distribution of draft environmental impact statement; news releases.

• • • • •

(c) • • •

(4) If the draft environmental impact statement is for a licensing action, (i) all parties to the licensing proceeding and the chief executive of the municipality or county identified in the draft environmental impact statement as the preferred site for the proposed facility or activity and (ii) the chief executives of municipalities or counties identified in the draft environmental impact statement as alternative sites who have requested a copy of the application.

(Secs. 53, 62, 81, 103, 104, 161i, Pub. L. 83-703, as amended; 68 Stat. 930, 932, 935, 936, 937, 948 (42 U.S.C. 2073, 2093, 2111, 2133, 2134, 2201(i)); Sec. 201, Pub. L. 93-438, as amended; 88 Stat. 1242, 89 Stat. 413 (42 U.S.C. 5841); Sec. 102, Pub. L. 91-190, 83 Stat. 853 (42 U.S.C. 4332).)

Dated at Washington, D.C. this 2d day of October, 1978.

For the Nuclear Regulatory Commission.

SAMUEL J. CHILK,
Secretary of the Commission.

Title 14—Aeronautics and Space

CHAPTER II—CIVIL AERONAUTICS BOARD

SUBCHAPTER A—ECONOMIC REGULATIONS

[Reg. ER-1076; Amdt. No. 33]

PART 241—UNIFORM SYSTEMS OF ACCOUNTS AND REPORTS FOR CERTIFICATED AIR CARRIERS

Accounting for Troubled Debt Restructurings, Prior Period Adjustments, and Forward Exchange Contracts

AGENCY: Civil Aeronautics Board.

ACTION: Final rule.

SUMMARY: This final rule would update the accounting and reporting provisions of the Uniform System of Accounts and Reports for Certificated Air Carriers (USAR) to reflect generally accepted accounting principles relating to troubled debt restructurings, prior period adjustments, and forward exchange contracts. This would be accomplished by: (1) Incorporating new sections in the USAR dealing with accounting and reporting for troubled debt restructurings and (2) revising the sections in the USAR relating to prior period adjustments and forward exchange contracts. This rule was developed at the initiative of the Board.

DATES: Adopted: September 29, 1978. Effective: November 6, 1978.

FOR FURTHER INFORMATION CONTACT:

Raymond Kurlander, Director, Bureau of Accounts and Statistics, Civil Aeronautics Board, 1825 Connecticut Avenue NW., Washington, D.C., 20428, 202-673-5270.

SUPPLEMENTARY INFORMATION:

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., October 2, 1978.

In EDR-357, dated June 1, 1978 (43 FR 25138, June 9, 1978) the Board gave notice of its intention to update the USAR to reflect three recent statements by the Financial Accounting Standards Board relating to troubled debt restructurings, prior period adjustments, and forward exchange contracts. It has been the Board's practice to revise the USAR periodically to include relevant pronouncements by authoritative bodies responsible for molding accounting principles and disclosure standards for American Business. This has been done to sustain the conformity of the Board's accounting regulations with generally accepted accounting principles. This conformity is important because it assists in maintaining the comparability of accounting practice throughout the air transportation industry and enables carriers to operate accounting systems which yield information acceptible for financial and governmental reporting purposes.

Comments were received in response to the rulemaking notice from American Airlines, Inc., and Hughes Airwest. Both were in support of the proposed rule. Hughes Airwest offered some suggestions of an editorial nature which have been considered and incorporated into the final rule where necessary to clarify the regulations. These changes involved adding cross-references in section 2-21 "Accounting for troubled debt restructurings."

Only one additional change was made to the specific language of the proposed rule, and it concerned the accounting instructions for forward exchange contracts. These contracts are agreements to exchange at a specified future date the currencies of different countries at a specified rate.

As discussed in EDR-357, this rulemaking proposed to amend the Board's accounting regulations to reflect the position of the Financial Accounting Standards Board (FASB) on accounting for forward exchange contracts in two ways: Setting the denomination of the forward contract and in corporation the FASB standard concerning the accounting for forward contracts when the amount of the contract exceeds the amount of the related commitment. The final rule adds a paragraph to section 2-3, specifying the FASB limitation that allows gains or losses to be deferred only on the amount in excess of the related commitment which is intended to be a hedge on an after-tax basis, as explained in EDR-357.(p. 5).

EFFECTIVE DATE

Although this amendment will be made effective after the normal 30-day period from publication in the FEDERAL REGISTER, this effective date should not be viewed as prohibiting earlier implementation of the following accounting requirements. Carriers are encouraged to apply these regulations to transactions occurring during calendar year 1978.

Accordingly, the Board amends part 241 of the Economic Regulations (14 CFR Part 241) as follows:

1. Amend the Table of Contents of the Uniform System of Accounts and Reports by adding a new section 2-21 identified as follows:

Sec.

• • • • •

2-20 Accounting for leases.
2-21 Accounting for troubled debt restructurings.

• • • • •

2. Revise paragraph (g)(2)(ii) of section 2-3 to read as follows:

Sec. 2-3 Transactions in foreign currencies.

• • • • •

(g) • • •

(2) • • •

(ii) The forward contract is denominated in the same currency as the foreign currency commitment,

• • • • •

3. Add a new paragraph (i) to section 2-3 to read as follows:

Sec. 2-3 Transactions in foreign currencies.

• • • • •

(i) The portion of a forward contract that shall be accounted for in accordance with paragraph (h) of this section is limited to the amount of the related commitment. If a forward contract that meets all of the conditions described in paragraphs (g)(2) (i) through (iii) of this section exceeds the amount of the related commitment, the gain or loss pertaining to a portion of the forward contract in excess of the commitment shall be deferred to the extent that the forward contract is intended to provide a hedge on an after tax-basis. A deferred gain or loss shall be offset against the related tax effects in the period the tax effects are recognized. A gain or loss pertaining to the portion of a forward contract in excess of the amount that provides a hedge on an after-tax basis shall not be deferred.

• • • • •

4. Revise paragraph (f) of section 2-7 to read as follows:

Sec. 2-7 Extraordinary items, discontinued operations, prior period adjustments, and accounting changes.

• • • • •

(f) Prior period adjustments are classified as those affecting previous fiscal years and those affecting previous interim periods of the current fiscal year.

(1) Corrections of errors in earlier financial statements and adjustments resulting from the tax benefits of preacquisition loss carryforwards of purchased subsidiaries may be treated as prior period adjustments of previous fiscal years. They are reflected as adjustments to the opening balance of retained earnings.

(2) Adjustments which are related to previous interim periods of the current fiscal year are adjustments or settlements of litigation or similar claims, of income taxes or of renegotiation proceedings. The total adjustment shall be included in the determination of net income for the current interim period. If the interim period is a period in which monthly reports are filed, a statement showing the effects of the adjustment on the current quarter and previous quarters should be attached to the submission. When the quarterly schedules are filed, these effects should again be stated on Schedule P-2, Notes to CAB Form 41 Report.

• • • • •

5. Add a new section 2-21 to read as follows:

Sec. 2-21 Accounting for troubled debt restructurings.

(a) *Accounting by debtors.* (1) A gain on the restructuring of debt shall be recognized in accordance with paragraph (a)(6) of this section when the debtor transfers assets to the creditor in full settlement of the debt. The gain shall equal the difference between the carrying amount of the payable and the fair value of the assets transferred. A gain or loss on the transfer of assets measured by the difference between the fair value and the book value of the assets transferred shall be recognized and recorded in account 88.6 Capital Gains and Losses—Other.

(2) A gain on the restructuring of debt shall be recognized in accordance with paragraph (a)(6) of this section when the debtor transfers an equity interest to the creditor in full settlement of the debt. The gain shall be equal to the amount that the carrying amount of the payable exceeds the fair value of the equity interest transferred.

(3) The modification of the terms of the debt in a troubled debt restructuring may take any or a combination of the following forms: (i) Reduction of the stated interest rate or accrued interest; (ii) reduction of the face amount or the maturity amount of the debt; or (iii) extension of the maturity date at a stated interest rate which is lower than the current market rate for new debt with similar risk. When the terms of the debt are modified so that the total future principal and interest payments are not less than the recorded amount of the payable, the effects of the restructuring shall be accounted for prospectively from the time of the restructuring by adjusting the effective interest rate so that it equates the present value of the future cash payments specified by the new terms with the carrying amount of the payable. If the total future principal and interest payments are less than the recorded amount of the payable, the amount of the payable shall be reduced so that it equals the total future principal and interest payments specified by the new terms and a gain shall be recognized in accordance with paragraph (a)(6) of this section which equals the amount of the reduction. In this case, all future principal and interest payments shall be treated as reductions of the payable and none shall be designated as interest. If the restructuring of the payable involves indeterminate future cash payments, no gain on the restructuring of the debt shall be recognized as long as the maximum total future cash payments may exceed the carrying amount of the payable.

(4) When there is a combination involving both the transfer of assets or equity interests and the modification of the terms of the debt, the carrying amount of the payable shall be reduced by the total fair value of those assets or equity interests. The difference between the fair value and the carrying amount of the assets transferred shall be recognized as a gain or loss on the transfer of assets and recorded in account 88.6 Capital Gains and Losses—Other. The remaining balance of the payable shall be accounted for as discussed in paragraph (a)(3) of this section.

(5) All legal fees and other direct costs incurred to effect a troubled debt restructuring shall be deducted when measuring the gain on restructuring, or, if no gain is recognized, they shall be included in expense for the period.

(6) Gains recognized on the restructuring of debt shall be aggregated and included in measuring net income for the period. If material, the aggregate amount, net of any tax effect, should be recorded in account 96 Extraordinary Items. If not, it should be recorded in account 88.9 Other Miscellaneous Nonoperating Credits.

(7) The following information shall be disclosed on Schedule P-2 Notes to CAB Form 41 Report for all troubled debt restructurings occurring during the current period:

(i) A description of the principal changes in terms and/or the major features of settlement for each restructuring;

(ii) The aggregate gain on restructuring of payables and the related income tax effect;

(iii) The aggregate net gain or loss on the transfer of assets;

(iv) The extent to which amounts contingently payable are included in the carrying amount of restructured payables; and

(v) The total amount contingently payable on restructured payables and the conditions under which the amounts would be payable or forgiven.

(b) *Accounting by creditors.* (1) A loss on the restructuring of debt shall be recognized in accordance with paragraph (b)(6) of this section when the debtor transfers assets to the creditor in full settlement of the debt to the

V 43 / 195

extent that his recorded investment in the receivable exceeds the fair value of the assets received. The assets shall be recorded in the books of account as if they had been acquired for cash.

(2) A loss on the restructuring of debt shall be recognized in accordance with paragraph (b)(6) of this section when the debtor transfers an equity interest to the creditor in full settlement of the debt to the extent that the recorded investment in the receivable exceeds the fair value of the equity interest. The equity interest shall be recorded in the books of account as if it had been acquired for cash.

(3) The modification of the terms of the debt in a troubled debt restructuring may take any or a combination of the following forms: (i) Reduction of the stated interest rate or accrued interest; (ii) reduction of the face amount or the maturity amount of the debt; or (iii) extension of the maturity date at a stated interest rate which is lower than the current market rate for new debt with similar risk. When the terms of the debt are modified so that the total future principal and interest receipts are not less than the recorded investment in the receivable, the effects of the restructuring shall be accounted for prospectively from the time of restructuring by adjusting the effective interest rate to equate the present value of the future cash receipts specified by the new terms with the recorded investment in the receivable. When the terms of the debt are modified such that the total future principal and interest receipts are less than the recorded investment in the receivable, the amount of the receivable shall be reduced so that it equals the total future principal and interest receipts specified by the new terms and a loss shall be recognized in accordance with paragraph (b)(6) of this section which is determined by the amount of the reduction. In this case, all future principal and interest receipts shall be treated as reductions of the receivable and none shall be designated as interest. A loss shall not be recognized on a restructuring involving indeterminate future cash receipts as long as the minimum future cash receipts specified by the new terms at least equal the recorded investment in the receivable.

(4) When the troubled debt restructuring involves both the transfer of assets or equity interests and the modification of the terms of the debt, the recorded investment in the receivable shall first be reduced by the fair value of the assets or equity interests received. The remaining portion of the receivable shall be accounted for as discussed in paragraph (b)(3) of this section.

(5) All legal fees and other direct costs incurred to effect a troubled debt restructuring shall be expensed when incurred.

(6) Losses recognized on the restructuring of debt shall be included in account 89.9 Other Miscellaneous Nonoperating Debits to the extent that they are not offset against valuation accounts, such as account 1290 Allowance for Uncollectible Accounts.

(7) The following information shall be disclosed on Schedule P-2 Notes to CAB Form 41 Report for each major category of receivables whose terms were modified in the current period such that the effective interest rate is less than the rate that the creditor would be willing to accept for a new receivable with comparable risk. The first three disclosure requirements listed below need not be followed if the effective interest rate for the modified receivable is greater than or equal to the rate that the creditor would be willing to accept for a new receivable with comparable risk:

(i) The aggregate recorded investment;

(ii) The gross interest income that would have been recorded in the period if the restructured receivables had been current according to their original terms;

(iii) The amount of interest income on the affected receivables included in the net income for the period; and

(iv) The amount of any commitments to lend additional funds to debtors owing receivables whose terms have been modified in a troubled debt restructuring.

6. Amend Section 14 by revising paragraphs 88.6, 88.9 and 89.9 to read as follows:

* * * * * *

§ 88.6 Capital Gains and Losses—Other.

Record here gains or losses not required to be reported in accounts 88.3, 88.4 and 88.5 such as gains or losses on retirement of nonoperating property and equipment, investments in other than marketable equity securities, and the transfer of assets in a troubled debt restructuring.

* * * * * *

88.9 Other Miscellaneous Nonoperating Credits.

Record here all credits of a nonoperating character not provided for otherwise, such as royalities from patents, gains from reacquisition and retirement or resale of debt securities issued by the air carrier, and gains resulting from troubled debt restructurings.

* * * * * *

§ 89.9 Other Miscellaneous Nonoperating Debits.

Record here all debits of a nonoperating character not provided for otherwise, such as fines or penalties imposed by governmental authorities, amortization expense attributable to capital leases recorded in balance sheet account 1795 Leased Property under Capital Leases; costs related to property held for future use; donations for charitable, social or community welfare purposes; losses on reacquired and retired or resold debt securities of the air carrier; losses resulting from troubled debt restructurings; losses on uncollectible nonoperating receivables; or accruals to allowance for uncollectible nonoperating receivables. This account shall be charged with the amortization of amounts carried in balance sheet account 1870 Property Acquisition Adjustment, unless otherwise approved or directed by the Civil Aeronautics Board.

(Secs. 204(a), 407, Federal Aviation Act of 1958, as amended, 72 Stat. 743, 766, as amended (49 U.S.C. 1324(a), 1377).)

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,
Secretary.

Title 16—Commercial Practices

CHAPTER I—FEDERAL TRADE COMMISSION

PART 456—ADVERTISING OF OPHTHALMIC GOODS AND SERVICES

Interpretation of Trade Regulation Rule and Reply to Request for Exemption from Trade Regulation Rule

AGENCY: Federal Trade Commission.

ACTION: Interpretation of Trade Regulation Rule; Reply to Request for Exemption from Trade Regulation Rule.

SUMMARY: The Federal Trade Commission has issued two interpretations of its trade regulation rule concerning the Advertising of Ophthalmic Goods and Services (16 CFR 456). One interpretation states that a refusal by a newspaper, or other advertising medium, to accept or publish an ophthalmic advertisement does not violate the provisions of the rule. The other interpretation states that a refractionist may deliver to his or her patients a written statement which says that the refractionist believes that the seller of the ophthalmic goods dispensed pursuant to the refractionist's prescription is responsible for the accuracy of those goods.

The Commission also answered a request by the Virginia State Board of Examiners in Optometry for an exemption from this trade regulation rule for certain disclosure requirements which were recently adopted by the Board. The Commission found that some of those requirements conflict with the trade regulation rule while others do not, and the Commission granted no exemption for those requirements that do conflict.

EFFECTIVE DATE: September 15, 1978.

FOR FURTHER INFORMATION CONTACT:

Gary D. Hailey or Scott P. Klurfeld, Room 279, Federal Trade Commission, 6th and Pennsylvania Avenue NW., Washington, D.C. 20580, 202-523-3427.

SUPPLEMENTARY INFORMATION: The Federal Trade Commission has issued two interpretations of its final trade regulation rule on the Advertising of Ophthalmic Goods and Services, 16 CFR Part 456. The first interpretation concerns the rule's proscription of conduct which prohibits, limits or burdens the dissemination of information. The Commission has determined that the refusal of a newspaper, or any other media, to accept or publish an ophthalmic advertisement does not constitute a prohibition, limitation or burden on the dissemination of information as those terms are used in 16 CFR Part 456.

The second interpretation concerns the meaning of § 456.7(d) of the rule which prohibits refractionists from "warning or disclaiming" responsibility for the accuracy of ophthalmic goods sold by another seller. The restriction does not cover statements by the refractionist as to whom the refractionist believes is liable or responsible. Thus, the Commission has interpreted its rule to permit refractionists to inform their patients as to whom they believe is responsible for the accuracy of goods dispensed, as long as the statement is not coupled with a waiver or disclaimer of the refractionist's liability. The complete interpretations are set out below:

Federal Trade Commission Interpretations of 16 CFR Part 456

In § 456.1 of the Commission's trade regulation rule on the Advertising of Ophthalmic Goods and Services, 16 CFR Part 456, the term "dissemination of information" is defined to include the use of any media to provide to the public information concerning ophthalmic goods, services, and eye examinations. In §§ 456.2, 456.3, 456.4, and 456.6 of the rule, prohibitions, limitations and burdens on the dissemination of information are proscribed.

The question has arisen as to whether the refusal of a newspaper or any other media to accept an ophthalmic advertisment consistitutes a prohibition, limitation or burden on the dissemination of information. The Commission has determined that the refusal of a newspaper, or any other media, to accept or publish an ophthalmic advertisement does not constitute a prohibition, limitation or burden on the dissemination of information as those terms are used in 16 CFR Part 456.

The Commission's intent in adopting the rule was to permit, not to require, persons to provide information to the public. The issue of whether the media should be compelled to accept advertisements was not considered in the course of the rulemaking proceeding in this matter nor was its inclusion as an issue in this proceeding ever contemplated by the Commission. Other situations exist in which the refusal by an individual to "permit" an advertisement would not be considered a "prohibition, limitation or burden." For example, the refusal of a property owner to permit a seller or refractionist to post a sign or billboard advertising ophthalmic goods or services on the land of the property owner would similarly not violate the rule.

A second interpretive question has arisen concerning the meaning of § 456.7(d) of the rule which prohibits refractionists from "waiving or disclaiming" responsibility for the accuracy of ophthalmic goods sold by another seller. By its terms, the rule proscribes only "waivers or disclaimers" of responsibility. This restriction does not encompass statements by the refractionist as to whom the refractionist believes is liable or responsible.

The Commission has interpreted its rule to permit affirmative statements concerning responsibility. For example, a statement "the person who dispenses your eyeglasses is responsible for their accuracy" would not violate § 456.7(d) even if delivered in writing.

Thus, any refractionist may, without violating § 456.7(d), include on the prescription or deliver to the patient a written statement stating the refractionist's belief that the seller of the ophthalmic goods dispensed pursuant to the refractionist's prescription is responsible for the accuracy of those goods. However, this cannot be coupled with a waiver or disclaimer of the refractionist's liability.

In adopting § 456.7(d), the Commission was concerned that negative statements disclaiming liability served to confuse consumers on the issue of responsibility. The Commission has been unable to find any legal precedent under which a refractionist has been held liable for the accuracy of ophthalmic goods dispensed by another seller (absent a contractual relationship between the refractionist and the seller).

The Commission expresses no opinion as to the desirability of making affirmative statements on the issue of liability. Nor does the Commission express any opinion as to where liability properly rests in any dispute between a refractionist and a person who dispenses ophthalmic goods pursuant to that refractionist's prescription. Rather, the Commission is simply permitting refractionists to inform their patients as to whom they believe is responsible for the accuracy of goods dispensed.

Virginia's Request for Exemption From 16 CFR Part 456

On August 2, 1978, the Commonwealth of Virginia, through its Board of Examiners in Optometry, requested an exemption from the Federal Trade Commission's trade regulation rule on the Advertising of Ophthalmic Goods and Services, 16 CFR Part 456, for certain disclosure requirements mandated by Virginia law. The Commission determined that some of the Virginia requirements do not conflict with the rule, and are therefore permissible. Other Virginia requirements were found to conflict with the Commission's rule and no exemption from the rule was granted.

The letter from the Virginia Board is set out below as Appendix A. The Federal Trade Commission's reply is set out below as Appendix B.

By direction of the Commission.

CAROL M. THOMAS,
Secretary.

Appendix A

The Federal Trade Commission
6th and Pennsylvania Avenue, N.W.
Washington, D.C. 20580

GENTLEMEN: I am herewith submitting application for exemption to the Federal Trade Commission's regulations governing the price advertising of ophthalmic goods and services. This exemption is being sought under § 456.5(c).

The rules and regulations of the Virginia State Board of Examiners in Optometry containing permissive advertising practices for which we seek exemptions are as follows:

"3. *Advertising disclosure requirements.* The following regulations are promulgated pursuant to section 54-396(9) of the Code of Virginia (1950) which permits the advertising of prices, or discounts from such prices of eyeglasses, spectacles, lenses, frames, mountings and prosthetic devices under the condition that such advertising include and specify the kind, type, and quality of the advertised item in accordance with these regulations. Under section 54-397 of the Code of Virginia (1950), a violation of these regulations is a criminal offense punishable by up to six (6) months in jail and a five hundred

OCT 6 1978

V 43 / 195

OCT 6 78

dollar ($500.00) fine. Each separate advertisement in violation of these regulations published in any media shall be considered a separate offense.

(a) *Kind, type, and quality of ophthalmic frames.* All advertisements of ophthalmic frames or temples shall specify (1) the name of the manufacturer, (2) the manufacturer's identifying name or number of the frame, (3) the country of manufacture and (4) material as plastic, metal, or combination plastic and metal unless the frame is illustrated. This information may not be abbreviated, except that the United States of America may be identified as "U.S.A.".

(b) *Kinds and types of ophthalmic lenses.* Where applicable advertisements for ophthalmic lenses must indicate that prices are variable depending on the individual's specific prescription. All lenses shall be described as clear, tinted, or photochromic and as glass or plastic, single vision, bifocal, trifocal, occupational and aphakic lenses shall be identified as such. Advertisements for bifocal lenses, except for executive/dualens types, shall state segment size. Advertisements for trifocal lenses, except for executive/dualens and variable focus types, shall state segment size. Occupational lenses shall be further described as double bifocal or quadrifocal. Aphakic lenses shall be further described as lenticular aspheric, lenticular non-aspheric, full field aspheric, or full field non-aspheric. All advertisements of ophthalmic lenses shall specify (1) the name of the manufacturer, (2) the manufacturer's identifying name or number of the lens, and (3) the country of manufacture.

(c) *Kinds and types of contact lenses.* All advertisements of contact lenses must specify: (1) name of manufacturer, (2) country of manufacturer, and (3) type as "hard" or "soft". Bifocal contact lenses must be identified as such.

(d) *Quality of ophthalmic and contact lenses.* The advertisements of any lens which is (1) not purchased from a munufacturer or wholesaler who warrants that the lens meet American National Standards Institute (ANSI) specifications, or (2) does not in fact meet ANSI specifications, shall contain the statement "Does Not Meet ANSI Standards".

(e) *Kinds and types of prosthetic devices.* Artificial eyes must be identified as stock, modified stock, or custom.

(f) All advertisements quoting prices or discounts from prices of eyeglasses, spectacles, lenses, frames, mounting or prosthetic devices shall contain the statement—"Does Not Include Eye Examination".

(g) All disclosure items must be in type no smaller than ten (10) point type.

(h) If discounts are advertised, they must include the regular price of items to be "discounted."

The Virginia Board of Examiners in Optometry seeks the exemption in whole or in part to the aforementioned regulations which were lawfully promulgated in this State in the public's interest.

Your immediate attention and early response to this application will be greatly appreciated.

Sincerely,

BERNARD STIER,
President.

APPENDIX B

Re Application for Exemption from Trade Regulation Rule on the Advertising of Ophthalmic Goods and Services (16 CFR Part 456).

BERNARD STIER, O.D.,
President, State Board of Examiners in Optometry, Commonwealth of Virginia, Seaboard Building, Room 457, 3600 West Broad Street, Richmond, Va. 23230.

DEAR DR. STIER: We are writing this letter in response to your request dated July 21, 1978 (which was received by the Commission on August 2, 1978), for an exemption from the Commission's trade regulation rule on the Advertising of Ophthalmic Goods and Services, 16 CFR Part 456, for certain disclosure requirements applicable to the advertising of ophthalmic goods and prosthetic devices adopted by the Virginia State Board of Examiners in Optometry pursuant to its statutory authority.

As you are aware, prior to the promulgation of this trade regulation rule by the Commission, many States specifically proscribed all ophthalmic advertising. During the course of the Commission's rulemaking proceedings on this matter, many persons testified that the imposition of disclosure requirements that were not necessary to curb unfairness or deception would serve to burden advertising unduly.

Our response to your exemption application will address, first, those disclosure requirements contained in your regulations which are specifically permitted under the Commission's rule.

1. Section 456.5(a)(1) of the Commission's rule specifically authorizes the States to require that ophthalmic advertisements state "whether an advertised price includes single vision and/or multifocal lenses." The Commission did not thereby limit the permissible wording of disclosure requirements in this area. Rather, the Commission set forth the subject matter on which disclosures could be imposed by the States. Thus, the Commission determined that Virginia's Rule 3(b), which requires that advertisements state whether "single vision, bifocal, trifocal, occupational and aphakic lenses" are included within an advertised price does not contravene 16 CFR 456.5.

2. Virginia's Rule 3(c), which requires that advertisements for contact lenses specify whether the price applies to hard or soft contact lenses, or bifocal contact lenses, is authorized by § 456.5(a) (1) and (2).

3. Virginia's Rule 3(e), concerning prosthetic devices, does not conflict with the Commission's rule. The Commission's rule applies only to advertisements of ophthalmic goods, services, and eye examinations. The rule does not extend to artificial eyes. Thus, Virginia's rule 3(e) is not affected by the Commission's rule.

4. Virginia's rule 3(g) is not inconsistent with the Commission's rule. The trade regulation rule adopted by the Commission places no limitation on the manner in which the States require information to be disclosed, so long as the subject matter of the disclosure does not conflict with the trade regulation rule. Accordingly, Virginia's requirement that all disclosures be in 10-point type is not inconsistent with the Commission's rule.

5. Rule 3(f) of the Virginia rule is, to a degree, inconsistent with the Commission's rule and the Commission has determined than an exemption would be inappropriate. The Commission's rule authorizes refractionists to advertise their eye examination services. Section 456.5(a)(3) authorizes the States to require that price advertisements state whether an eye examination is included in the stated price. Thus, Virginia remains totally free to require that advertisements state whether or not an eye examination is included. However, it would be inconsistent with the Commission's rule for Virginia to require that all sellers state that an eye examination is not included in an advertised price.

6. Section 456.5(b) of the Commission's rule permits the States to impose on advertising for ophthalmic goods and services any disclosure requirements that the State applies across-the-board to all advertising for consumer goods and services. However, Virginia's rules 3 (a), (b) (insofar as it requires the disclosure of the "name of the manufacturer • • • the manufacturer's identifying name or number of the lens • • • and, the country of manufacturer"), (c) (1) and (2), and (h) apply to ophthalmic advertising burdensome disclosure requirements which apparently are not required in all advertisements for consumer goods or services. While this information may be of interest to some consumers, it does not appear to be necessary to prevent deception. Moreover, the Commission can find no justification, and you have suggested none, for limiting such disclosures to ophthalmic advertising.

Accordingly, the Commission has determined that Virginia's rules 3 (a), (b) (in part, as set forth above), (c) (1) and (2), and (h) are inconsistent with the Commission's rule and that no exemption should be granted. As noted above, if the Commonwealth of Virginia should require such disclosures in advertising for all consumer products and services, rather than singling out ophthalmic advertising, the Commission's rule will permit their application to advertising for ophthalmic goods.

7. Virginia's rule 3(d) also conflicts with the Commission's rule, and the Commission has determined that an exemption should not be granted. The Commission fully supports the concept of maintaining high quality in the provision of vision care products and services, and Virginia remains free to, for example, require that all lenses meet ANSI specifications. However, Virginia apparently has no such rules. Nor, apparently, is a seller who chooses not to advertise prohibited from providing consumers with lenses not satisfying the ANSI Z80 standards without disclosing that fact. Some recent empirical research indicates that the lenses produced by manufacturers and wholesale laboratories which claim to meet the ANSI standard frequently do not.[1] The testimony offered at the public hearings on the TRR indicates that it is very unlikely that an optometrist would verify each lens sold against each and every parameter of the ANSI standard, when that lens is warranted to meet the standard by the supplier. Accordingly, most, if not all, sellers who advertise would be required to state that their products do not meet the ANSI standard. The Commission finds that this would constitute an unwarranted burden on advertising.

8. Finally, the disclosure requirements embodied in Virginia rule 3(b) (except those discussed above) conflict with the Commission's rule, and the Commission has determined that an exemption should not be granted. The Commission has concluded that detailed information on segment size in multifocal lenses, the types of occupational lenses and aphakic lenses, and whether glasses include tint or are composed of glass or plastic, are not necessary to prevent deception. The Commission has not determined that this information is not of interest to consumers, rather, it has simply determined that an advertisement, absent this information, is not deceptive.

Thus, to summarize the Commission's response, rule 3(b), insofar as it requires the disclosure of "(whether a lens is) single vision, bifocal, trifocal, occupational (or) aphakic", 3(c)(3), 3(e), and 3(g) are deemed not to conflict with the Commission's trade regulation rule.

All of the other disclosure requirements promulgated by the Virginia Board of Examiners in Optometry are deemed to be inconsistent with the Commission's rule. It is determined that no exemption should be granted for these requirements.

We would like to reiterate our position that any disclosure requirements imposed on all advertising for consumer goods and services by the Commonwealth of Virginia are automatically excluded from the coverage of the Commission's rule.

By direction of the Commission.

CAROL M. THOMAS,
Secretary.

Title 17—Commodity and Securities Exchanges

CHAPTER II—SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-15195; File No. S7-757]

PART 249—FORMS, SECURITIES EXCHANGE ACT OF 1934

Annual Assessment Form for SECO Brokers and Dealers

AGENCY: Securities and Exchange Commission.

ACTION: Adoption of form.

SUMMARY: The Securities Exchange Act of 1934 authorizes the Commission to collect such reasonable fees and charges as may be necessary to defray the costs of additional regulatory duties required to be performed with respect to broker-dealers who are not members of a registered national securities association ("nonmember" or "SECO" broker-dealers). This form sets forth the annual schedule under which SECO broker-dealers are to be assessed for fiscal year 1978.

EFFECTIVE DATE: October 1, 1978.

FOR FURTHER INFORMATION CONTACT:

Daniel Bateman, Division of Market Regulation, Room 501, Securities and Exchange Commission, 500 North Capitol Street NW., Washington, D.C. 20549, 202-755-1300.

SUPPLEMENTARY INFORMATION: The Securities and Exchange Commission announced today that it has adopted form SECO-4-78 which sets forth the annual assessment payable to the Commission for fiscal year 1978 by registered broker-dealers who are not members of a registered national securities association. Form SECO-4-78 was proposed and published for public comment on August 25, 1978 (43 FR 38028) (Securities Exchange Act Release No. 34-15074, August 18, 1978).

In adopting form SECO-4-78, for this year, the Commission has determined to modify the annual SECO assessment schedule by reducing the gross income assessment from 0.2 percent to 0.17 percent for municipal securities transactions and from 0.25 percent to 0.21 percent for other OTC securities transactions. These assessments are being reduced to adjust the anticipated revenues to more closely approximate the expected regulatory costs of the SECO program and to continue the Commission's policy over the years of maintaining general comparability with the fees and assessments charged by the National Association of Securities Dealers, Inc. (NASD). The annual base member assessment and the annual personnel assessment ($250 and $5 respectively) will remain unchanged.

NOTICE OF DUE DATE FOR FILING FORM SECO-4-78

SECO broker-dealers filing form SECO-4-78 should note that they are required to file the form and remit any assessments payable to the Commission by October 31, 1978.

STATUTORY BASIS

The modifications of 1978 assessments for SECO broker-dealers are adopted pursuant to the Securities Exchange Act of 1934 and particularly sections 15(b)(7), 15(b)(8), and 23(a) thereof. The Commission finds that any burden imposed upon competition by the amendments is necessary and appropriate in furtherance of the purposes of the Act, particularly to implement the Commission's continuing mandate under section 15(b)(8) to collect such reasonable fees and charges as may be necessary to defray the costs of the specified regulatory duties required to be performed with respect to nonmember broker-dealers. The Securities and Exchange Commission, pursuant to its authority under the Securities Exchange Act of 1934 (15 U.S.C. 78a et seq., as amended by Pub. L. 94-29 (June 4, 1975)) and particularly sections 15(b)(7), 15(b)(8), and 23(a) thereof, amends part 249 of title 17 of the Code of Federal Regulations by adopting § 249.504*l* as follows:

§ 249.504*l* Form SECO-4-78, 1978 assessment and information form for registered brokers and dealers not members of a registered national securities association.

This form shall be filed on or before October 31, 1978, pursuant to § 240.15b9-2 of this chapter, accompanied by the annual assessment fee required thereunder, for the fiscal year ended September 30, 1978, by every registered broker and dealer not a member of a registered national securities association. Those broker-dealers which are exempt from the payment of any assessment or fee pursuant to the provisions of § 240.15b9-2(e) must still file the form.

Copies of the form have been filed with the Office of the Federal Register, and additional copies are available on request from the Commission.

GEORGE A. FITZSIMMONS,
Secretary.

SEPTEMBER 28, 1978.

SUBCHAPTER E—ANIMAL DRUGS, FEEDS, AND RELATED PRODUCTS

PART 522—IMPLANTATION OR INJECTABLE DOSAGE FORM NEW ANIMAL DRUGS NOT SUBJECT TO CERTIFICATION

Lidocaine Hydrochloride Injection with Epinephrine

AGENCY: Food and Drug Administration.

ACTION: Final Rule.

SUMMARY: This document amends the animal drug regulations to reflect approval of a new animal drug application (NADA) filed by Carter-Glogau Laboratories Division, Chromalloy Pharmaceuticals, Inc., for an injectable local anesthetic for use in horses, cattle, dogs, and cats.

EFFECTIVE DATE: October 6, 1978.

FOR FURTHER INFORMATION CONTACT:

William D. Price, Bureau of Veterinary Medicine (HFV-123), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857, 301-443-3442.

SUPPLEMENTARY INFORMATION: Carter-Glogau Laboratories Division, Chromalloy Pharmaceuticals, Inc., 5160 West Bethany Home Road, Glendale, Ariz. 85301, filed NADA 45-578V providing for the safe and effective use of lidocaine hydrochloride injection with epinephrine as a local anesthetic for use in horses, cattle, dogs, and cats.

The drug was the subject of a National Academy of Sciences/National Research Council (NAS/NRC) review, published in the FEDERAL REGISTER of August 5, 1970 (35 FR 12493). The Academy concluded, and the Food and Drug Administration (FDA) concurred, that the product is probably effective for use as a local anesthetic in cattle, horses, dogs, and cats. The Academy stated:

1. The use of a central nervous system stimulant is contraindicated in the treatment of overdoses of local anesthetics. Use of oxygen and an arterial pressor agent such as norepinephrine are to be preferred over the use of an analeptic or central nervous system agent, i.e., pentamethylenetetrazole, in treatment of shock induced by lidocaine hydrochloride.

2. Under the caution portion of the package insert, the user should be warned of the possibility of central nervous system excitation or convulsive seizures when lidocaine hydrochloride is employed for local anesthetic purposes. The use of ultrashort or short-acting barbiturates and oxygen are recommended in antidoting convulsive seizures produced by overdoses of a local anesthetic

The NAS/NRC review was published to inform holders of NADA's of the findings of the Academy and FDA, and to inform all interested persons that such articles may be marketed provided they are the subject of approved NADA's and otherwise comply with the requirements of the Federal Food, Drug, and Cosmetic Act. NADA's submitted for lidocaine injection with epinephrine, which reflect those conditions of use set forth in the August 1970 notice, do not require efficacy data as specified by §§ 514.1(b)(8)(ii) or 514.111(a)(5)(vi) (21 CFR 514.1(b)(8)(ii) and 514.111(a)(5)(vi)). In lieu of such data, approval may require bioequivalency or similar data as suggested in the guideline for submitting NADA's for NAS/NRC reviewed generic drugs. Those conditions of use are identified in § 522.1258 by a footnote. The guideline is available from the Hearing Clerk (HFC-20), Food and Drug Administration, room 4-65, 5600 Fishers Lane, Rockville, Md. 20857.

In accordance with the freedom of information regulations and § 514.11(e)(2)(ii) (21 CFR 514.11(e)(2)(ii)) of the animal drug regulations, a summary of safety and effectiveness data and information submitted to support the approval of this application is publicly released. The summary is available for public examination at the office of the Hearing Clerk (HFC-20), at the above address from 9 a.m. to 4 p.m., Monday through Friday.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1), Part 522 is amended by adding new § 522.1258 to read as follows:

§ 522.1258 Lidocaine injection with epinephrine.

(a) *Specifications.* Each milliliter of the drug contains 20 milligrams (2 percent) of lidocaine hydrochloride, 0.01 milligram of epinephrine, with sodium chloride, and with methylparaben as a preservative, in water for injection.

(b) *Sponsor.* See No. 000381 in § 510.600(c) of this chapter.

(c) *Conditions of use.*[1]—(1) *Amount.* The drug is administered by injection as a 2-percent solution or diluted with bacteriostatic water for injection to a 0.5 percent solution for local anesthesia of large and small animals, as follows:

(i) Cats: Administer approximately 2 milliliters of 2 percent solution with epinephrine by caudal injection.

(ii) Cattle: Administer 5 milliliters of 2 percent solution with epinephrine by epidural injection (standing animal). Administer 10 to 20 milliliters of 2 percent solution with epinephrine by cornural nerve block injection. For teat operations and infiltration, inject 0.5 percent solution with epinephrine to effect.

(iii) Dogs: Administer 2 to 10 milliliters of 2 percent solution with epinephrine by caudal injection. Do not give intravascularly. For infiltration, administer 0.5 percent solution with epinephrine to effect.

(iv) Horses: Administer 5 to 10 milliliters of 2 percent solution with epinephrine by volar nerve block. Administer 10 to 15 milliliters of 2 percent solution with epinephrine by epidural injection. For standing animal, apply slowly and observe individual sensitivity. For infiltration, administer 0.5 percent solution with epinephrine to effect.

(2) *Limitations.*—(i) The drug is contraindicated in the presence of sepsis in the region of proposed injection, shock and heart block, neurologic disease, spinal deformities, septicema, and hypertension.

(ii) Do not give intravascularly.

(iii) Federal law restricts this drug to use by or on the order of a licensed veterinarian.

Effective date. This regulaton shall be effective October 6, 1978.

(Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i)).)

Dated: September 28, 1978.

LESTER M. CRAWFORD,
Director, Bureau of Veterinary Medicine.

[FR Doc. 78-28085 Filed 10-5-78; 8:45 am]

[4110-03]

PART 558—NEW ANIMAL DRUGS FOR USE IN ANIMAL FEEDS

Bambermycins

AGENCY: Food and Drug Administration.

[1] These conditions are National Academy of Science/National Research Council reviewed and deemed effective for this drug. Applications for these uses need not include effectiveness data as specified by § 514.111 of this chapter but may require bioequivalency and safety information.

ACTION: Final rule.

SUMMARY: This rule amends the regulations to reflect approval of a supplemental new animal drug application (NADA) filed by American Hoechst Corp., providing for safe and effective use of a lower concentration bambermycins premix for subsequent manufacture of swine feed. The resulting swine feed would increase the rate of weight gain.

EFFECTIVE DATE: October 6, 1978.

FOR FURTHER INFORMATION CONTACT:

Lonnie W. Luther, Bureau of Veterinary Medicine (HFV-147), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857, 301-443-4317.

SUPPLEMENTARY INFORMATION: American Hoechst Corp., Agricultural Division, Route 202-206, North, Somerville, NJ 08876, filed a supplemental NADA (44-759V) providing for use of a 0.4-gram-per-pound bambermycins premix in manufacturing a 2-gram-per-ton complete swine feed. The resultant feed would increase the rate of weight gain and improve feed efficiency. The feed would be used in accordance with approved conditions of use. Under the original application, the firm also holds approval for production of a 2-gram-per-ton complete swine feed from a 2-gram-per-pound bambermycin premix.

Approval of this supplement does not constitute a reevaluation of the original application nor does it reaffirm the safety and effectiveness of this drug.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1), Part 558 is amended in § 558.95 by revising paragraph (b) to read as follows:

§ 558.95 Bambermycins.

• • • • • •

(b) *Approvals.* (1) Premix level of 2 grams of bambermycins activity per pound of premix has been granted to No. 012799 in § 510.600(c) of this chapter for use as provided in paragraph (e) (1) and (2) of this section.

(2) Premix level of 0.4 gram of bambermycins activity per pound of premix has been granted to No. 012799 for use as provided in paragraph (e)(2) of this section.

• • • • • •

Effective date. This regulation shall be effective October 6, 1978.

(Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i)).)

Dated: September 28, 1978.

LESTER M. CRAWFORD,
Director, Bureau of Veterinary Medicine.

SUBCHAPTER L—REGULATIONS UNDER CERTAIN OTHER ACTS ADMINISTERED BY THE FOOD AND DRUG ADMINISTRATION

[Docket No. 75N-0115]

PART 1220—REGULATIONS UNDER THE TEA IMPORTATION ACT

Tea Standards

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: This document establishes tea standards for the year beginning May 1, 1978, and ending April 30, 1979. The tea standards are provided for under the Tea Importation Act.

DATES: Effective October 6, 1978; comments by November 6, 1978.

ADDRESS: Written comments to the Hearing Clerk (HFA-305), Food and Drug Administration, Room 4-65, 5600 Fishers Lane, Rockville, Md. 20857.

FOR FURTHER INFORMATION CONTACT:

Ralph A. Strand, Bureau of Foods (HFF-314), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C Street SW., Washington, D.C. 20204, 202-245-1567.

SUPPLEMENTARY INFORMATION: This amendment is based on the recommendation of the Board of Tea Experts, which comprises tea experts drawn from the Food and Drug Administration (FDA) and the tea trade, who are representative of the trade as a whole. By law (21 U.S.C. 42), the tea standards are to be revised annually, and FDA has set the effective date for the standards as May 1 by regulation (21 CFR 1220.41). The standards have been publicly available since the Board's report on April 4, 1978 and have been enforced in accordance with 21 U.S.C. 41 since then. Because the official publication date has passed and FDA has been enforcing the standards, the Commissioner concludes that the standards for the current year should be published without delay. For these reasons, the Commissioner finds also that it is unnecessary, impractical, and contrary to the public interest to initiate a notice and comment rulemaking proceeding at this time.

The Commissioner therefore is invoking the good cause exemption provisions of the Administrative Procedure Act (5 U.S.C. 553(b)(B) and (d)(3) and 21 CFR 10.40(c)(4) and (e)(1)) and is issuing this notice as a final rule effective immediately without notice of proposed rulemaking. However, interested persons may submit comments on this notice by November 6, 1978, as provided by 21 CFR 10.40(f)(10). If the comments necessitate agency action, the Commissioner will publish a notice in the FEDERAL REGISTER, discussing the comments and announcing the action determined to be necessary.

The Commissioner has considered the environmental effects of the issuance or amendment of food standards and has concluded in § 25.1(d)(4) (21 CFR 25.1(d)(4)) that food standards are not major agency actions significantly affecting the quality of the human environment. Therefore, an environmental impact statement is not required for this amendment.

Therefore, under authority vested in the Secretary of Health, Education, and Welfare by the Tea Importation Act (secs. 3, 10, 29 Stat. 605, 607, 41 Stat. 712, 54 Stat. 1237, 67 Stat. 631 (21 U.S.C. 43, 50)) and delegated to the Commissioner (21 CFR 5.1), Part 1220 is amended by revising § 1220.40(a) to read as follows:

§ 1220.40 Tea standards.

(a) Samples for standards of the following teas, prepared, identified, and submitted by the Board of Tea Experts on April 4, 1978, are hereby fixed and established as the standards of purity, quality, and fitness for consumption under the Tea Importation Act for the year beginning May 1, 1978, and ending April 30, 1979:

(1) Formosa Oolong.

(2) Black Tea other than China, Formosa, Japan Type (to be used for all black teas except those from China, Formosa, and Japan).

(3) Black Tea, China, Formosa, Japan Type (to be used for black teas from China, Formosa, and Japan).

(4) Green Tea (to be used for all green teas).

(5) Canton Oolong Type (to be used for all Canton type teas of Formosa or China origin).

(6) Scented Black Tea.

(7) Spiced Tea.

These standards apply to tea shipped from abroad on or after May 1, 1978. Tea shipped prior to May 1, 1978 will be governed by the standards that became effective on May 1, 1977.

• • • • • •

Effective date. This regulation shall become effective October 6, 1978.

(Secs. 3, 10, 29 Stat. 605, 607, 41 Stat. 712, 54 Stat. 1237, 67 Stat. 631 (21 U.S.C. 43, 50))

V 43 / 195
OCT 6 1978

Dated: September 27, 1978.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Regulatory Affairs.

Title 41—Public Contracts and Property Management

CHAPTER 1—FEDERAL PROCUREMENT REGULATIONS

[FPR Amdt. 194]

PART 1-3—PROCUREMENT BY NEGOTIATION

Proposal Evaluations and Contract Pricing

AGENCY: General Services Administration.

ACTION: Final rule.

SUMMARY: This amendment makes a number of changes in Part 1-3, Procurement by Negotiation, to strengthen competitive negotiation procedures. The need for the changes has been established by ongoing Office of Federal Procurement Policy (OFPP) and General Accounting Office (GAO) reviews and evaluations of competitive negotiation procedures. To the extent practicable, uniformity with the Defense Acquisition Regulation (DAR (ASPR)) is provided. The intended effect is to promote economy, efficiency, and effectiveness in Federal procurement.

EFFECTIVE DATE: November 6, 1978, but may be observed earlier.

FOR FURTHER INFORMATION CONTACT:

Philip G. Read, Director of Federal Procurement Regulations, 703-557-8947.

SUPPLEMENTARY INFORMATION: The amendment prescribes an additional level of review for noncompetitive procurements, based on a Comptroller General (CG) Report (B-160725, Sept. 15, 1977) entitled "Competition for Negotiated Government Procurement Can and Should Be Improved" and OFPP memorandum to the executive departments and establishments, January 25, 1978, subject: Competition for Negotiated Procurement. The amendment also prescribes circumstances in which preaward notices to offerors are required, based on a CG decision (B-190667, Feb. 22, 1978).

The amendment also removes references in the FPR that heretofore have recognized that some agencies have prescribed procedures which administratively imposed blanket fee limitations for cost-plus-fixed-fee (CPFF) contracts which are lower than the ceilings specified in section 304(b) of the Federal Property and Administrative Services Act of 1949 (41 U.S.C. 254(b)). The need for removing these references is based on OFPP reviews and evaluations of contract pricing and profit policies, including a public meeting on November 4, 1976. This action will not affect an agency determination to pay a fee that is lower than the statutory blanket ceilings, or preclude agency guidance to contracting officers in determining fair and reasonable fees applicable to certain classes of procurements.

The amendment prescribes changes in the provisions regarding pricing techniques. An earlier proposal would have added provisions essentially uniform with ASPR in regard to a contractor's claim for exemption from the submission of certified cost or pricing data. However, OFPP has determined that the action should be deferred pending an effort to develop a Standard form and uniform provisions which will be responsive to agencies' needs while minimizing the paperwork burden on Government contractors.

Based on GAO recommendations reflected in CG decisions (B-176223 (52 Comp. Gen. 161); B-185860, Sept. 14, 1976; and B-187587 (56 Comp. Gen. 725)); the amendment provides that requests for proposals shall state the relative importance of evaluation criteria the Government will use to select a contractor. Where an agency uses numerical weights in the evaluation process, the amendment also provides that they may be disclosed in the solicitation.

Subpart 1-3.1—Use of Negotiation

1. Section 1-3.101 is amended to revise paragraph (d), as follows:

§ 1-3.101 General requirements for negotiation.

* * * * *

(d) Negotiated procurement shall be on a competitive basis to the maximum practical extent. When a proposed procurement appears to be noncompetitive, the procuring activity is responsible not only for ensuring that competitive procurement is not feasible but also for acting whenever possible to avoid the need for subsequent noncompetitive procurements. This action shall include both examination of the reasons for the procurement being noncompetitive and steps to foster competitive conditions for subsequent procurements, particularly as to the availability of complete and accurate data, reasonableness of delivery requirements, and possible breakout of components for competitive procurements. Except for procurement of electric power or energy, gas (natural or manufactured), water, or other utility services, and procurement of educational services from nonprofit institutions, contracts of more than $10,000 shall not be negotiated on a noncompetitive basis without prior review at a level higher than the contracting officer to ensure compliance with this § 1-3.101(d).

2. Section 1-3.103 is amended to add a new paragraph (b) and to redesignate existing paragraphs (b) and (c) as (c) and (d) respectively, as follows:

§ 1-3.103 Dissemination of procurement information.

(a) * * *

(b) Preaward notices of proposal status shall be provided to offerors under the following specific conditions.

(1) In any procurement of more than $10,000 in which it appears that it will take longer than 30 days to make an award after (i) a proposal has been determined to be unacceptable or (ii) a competitive range determination has been made (see § 1-3.805), the contracting officer shall provide a prompt notice to the source submitting the proposal when a determination has been made that the proposal will not be considered further for award. Such a notice need not be given where the proposed contract is to be awarded within a few days after the determination and a notice pursuant to paragraph (c) of this § 1-3.103 would suffice.

(2) Notices pertaining to unacceptable proposals normally shall (i) indicate in general terms the basis for the determination, (ii) advise that, since further negotiation with the offeror concerning the procurement is not contemplated, a revision of the proposal will not be considered, and (iii) specify that no further information will be available until a later time.

(3) Notices pertaining to determinations of competitive range shall be provided to all offerors at the same time, whether or not their proposals are within the competitive range (see also § 1-3.802-2(g)). Notices to offerors that are not within the competitive range normally shall include information as described above for unacceptable offers. Where sources that are determined to be outside the competitive range number over 15, the basis for the determination may be omitted if the notified offerors are informed that the basis for the determination or nonselection for further discussion or negotiation will be furnished at a later time, upon inquiry. Notices to offerors that are within the competitive range need only state that fact.

(4) Notices pertaining to late proposals are addressed in §§ 1-3.802-1 and 1-3.802-2.

(c) Promptly after making awards in any procurement in excess of $10,000, the contracting officer normally shall give written notice to the unsuccessful offerors that their proposals were not accepted. Upon request, unsuccessful offerors whose offered prices were lower than those of the contractor which received the award shall be furnished the reasons why their proposals were not accepted; but in no event will an offeror's cost breakdown, profit, overhead rates, trade secrets, or other confidential business information be disclosed to any other offeror.

(d) Classified information shall be furnished only in accordance with agency regulations governing the handling of classified information.

Subpart 1-3.4—Types of Contracts

Section 1-3.405-5 is amended to revise the introductory material in paragraph (c)(2), as follows:

§ 1-3.405-5 Cost-plus-a-fixed-fee contract.

* * * * *

(c) * * *

(2) The fixed fees shall not exceed the limitations set forth in the first sentence of section 304(b) of the Act (41 U.S.C. 254(b)), which sentence reads in part as follows:

* * * * *

Subpart 1-3.8—Price Negotiation Policies and Techniques

1. Section 1-3.802 is amended to revise paragraph (c), as follows:

§ 1-3.802 Preparation for negotiation.

* * * * *

(c) *Requests for proposals.* (1) Requests for proposals shall contain the information necessary to enable a prospective offeror to properly prepare a quotation or proposal. The request for proposals shall be as complete as possible with respect to (i) item descriptions or statements of work, (ii) specifications, (iii) Government-furnished property, if any, (iv) required delivery schedule, (v) special provisions, (vi) cost or pricing data requirements (see § 1-3.807-3), and (vii) contract clauses.

(2) Each request for proposals shall state the relative importance of cost or price, technical considerations, and other factors for purposes of proposal evaluation and contract award. Numerical weights which may be employed in the evaluation of proposals may be disclosed in solicitations.

(3) Requests for proposals shall specify a date and time for the submission of proposals. Any extension of time granted to one prospective offeror shall be granted uniformly to all.

(4) The initial release of requests for proposals shall be made to all prospective offerors at the same time, and no offeror shall be given the advantage of advance knowledge that proposals are to be requested.

(5) Requests for proposals shall be in writing except in those cases in which the urgency of the procurement is such that there is not sufficient time to prepare a written request. In such cases oral requests are authorized.

2. Section 1-3.807-1 is amended to revise paragraph (b)(2), as follows:

§ 1-3.807-1 General.

* * * * *

(b) * * *

(2) *Established catalog or market prices of commercial items sold in substantial quantities to the general public.* (i) Application of this exception also requires judgment and analysis on a case-by-case basis. In making this judgment, the various elements of the term must be considered, and a price must meet all these conditions in order to be considered for exception. In other words, the price must be, or be based on, (A) an established catalog or market price, (B) of commercial items, (C) sold in substantial quantities, (D) to the general public.

(ii) The following criteria should be applied in determining whether an item falls within the scope of this exception:

(A) An "established catalog price" is a price included in a catalog, price list, schedule, or other form that (*1*) is regularly maintained by the manufacturer or vendor, (*2*) is published or otherwise available for inspection by customers, and (*3*) states prices at which sales are currently or were last made to a significant number of buyers constituting the general public. An "established market price" is a current price established in the usual and ordinary course of trade between buyers and sellers free to bargain which can be substantiated from sources independent of the manufacturer or vendor.

(B) A "commercial item" is an item, which term includes both supplies and services, of a class or kind which (*1*) is regularly used for other than Government purposes and (*2*) is sold or traded in the course of conducting normal business operations.

(C) Supplies are "sold in substantial quantities" when the facts or circumstances are sufficient to support a reasonable conclusion that the quantities regularly sold are sufficient to constitute a real commercial market for the item. Nominal quantities, such as models, specimens, samples, and prototype or experimental units, cannot be considered as meeting this requirement. Services are sold in substantial quantities if they are customarily provided by the contractor, with personnel regularly employed, and with equipment, if any is necessary, regularly maintained, solely or principally for the purpose of providing such services. There must be a sufficient number of commercial buyers so that their purchases establish an ascertainable going price for the service. Substantial quantity cannot be precisely defined.

(D) An item is sold "to the general public" if it is sold to other than affiliates of the seller for end use by other than the Government. Items sold to affiliates of the seller and sales for end use by the Government are not sales to the general public.

(iii) A price may be considered to be "based on" established catalog or market prices of commercial items sold in substantial quantities to the general public if the item being purchased is sufficiently similar to a commercial item to permit the difference between the prices of the items to be identified and justified without resort to cost analysis.

(iv) Even though an item qualifies for exemption from the requirements for submission of certified cost or pricing data, price analysis must be performed to determine the reasonableness of the price and the need for further negotiation. While the additional information required may be available from Government sources, it may be necessary to obtain it from the prospective supplier. The specific information will vary with the procurement involved but may include: (A) The supplier's marketing system; i.e., use of jobbers, brokers, sales agencies, distributors, etc.; (B) the services normally provided to commercial purchasers; e.g., engineering, financing, advertising, or promotion; (C) normal quantity per order; and (D) annual volume of sales to largest customers. Altered terms, minor configuration changes, or quantity differences are all good reasons for pricing items differently from the formal catalog or market prices. The ultimate objective is to achieve fair and reasonable prices for items bought. The Government and contractor personnel must recognize this fact by seeking innovative methods of satisfying the needs clearly but with a minimum of burdensome paperwork.

3. Section 1-3.807-2 is amended to revise paragraph (c)(4), as follows:

§ 1-3.807-2 Requirements for price or cost analysis

* * * * *

(c) * * *

(4) forecasting future trends in costs from historical cost experience is of primary importance, but care must be taken to insure that the effects of past

V 43 / 195

inefficient or uneconomical practices are not projected into the future. An adequate cost analysis must include an evaluation of trends and their effect on future costs. In cases involving production of recently developed complex equipment, even in periods of relative price stability, trend analysis of basic labor and materials costs should be undertaken.

4. Section 1-3.807-3 is amended to revise paragraphs (a)(1) and (c) and to add paragraphs (j) and (k), as follows:

§ 1-3.807-3 Cost or pricing data.

(a) • • •

(1) The award of any negotiated contract (other than a letter contract) expected to exceed $100,000 in amount; or

• • • • •

(c) The furnishing and certification or cost or pricing data shall be required prior to the award of any negotiated contract not expected to exceed $100,000 in amount, or prior to the pricing of any contract modification not expected to exceed $100,000 in amount to any formally advertised or negotiated contract, whether or not cost or pricing data were required in connection with the initial pricing of the contract: *Provided*, That it is considered that the circumstances warrant this action, such as in paragraphs (f) and (g) of this § 1-3.807-3.

• • • • •

(j) [Reserved].

(k) Negotiated final pricing actions, such as total final price agreements under fixed-price incentive and redeterminable contracts or termination settlement agreements under terminated contracts, are contract modifications for which certified cost or pricing data are required in accordance with paragraph (a)(2) of this § 1-3.807-3. A certificate in accordance with § 1-3.807-4 shall be submitted as soon as practicable after agreement is reached on the amount of the modification. A certificate is required when the amount of the total price agreement or of the final termination settlement agreement exceeds $100,000.

5. Section 1-3.807-10 is amended to revise paragraph (d), as follows:

§ 1-3.807-10 Subcontracting considerations in cost analysis.

• • • • •

(d) In considering cost-plus-fee subcontracts while negotiating prime contracts where cost analysis is performed, the contracting officer shall make every effort to ensure, and in consenting to cost-plus-fee subcontracts the contracting officer shall ensure, that fees under such subcontracts do not exceed the limits prescribed by § 1-3.405-5(c)(2). These limits should not be inserted in the prime contract because insertion of them might tend to inflate fees customarily negotiated at lower rates.

6. Section 1-3.808-1 is revised, as follows:

§ 1-3.808-1 General.

A fair and reasonable provision for profit or fee cannot be made by simply applying a certain predetermined percentage to the cost estimate or selling price of a product. Rather, the profit or fee should be first established as a dollar amount after considering the factors set forth in this § 1-3.808. Therefore, where a fee is involved and it is necessary to determine the percentage relationship between the fee and the estimated cost of the contract in order to comply with statutory limitations on fees for cost-reimbursement-type contracts (see § 1-3.405-5(c)(2)), the percentage shall be determined only after the dollar amount of the fee has been established for negotiation purposes.

(Sec. 205(c), 63 Stat. 390; (40 U.S.C. 486(c)).)

Dated: September 21, 1978.

PAUL E. GOULDING,
Acting Administrator
of General Services.

[CFR Part 1064]

[Docket No. AO-23-A52]

MILK IN THE GREATER KANSAS CITY MARKETING AREA

Hearing on Proposed Amendments to Tentative Marketing Agreement and Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Public hearing on proposed rulemaking.

SUMMARY: This hearing is being held to consider changes in the order that have been proposed by dairy farmer cooperatives and a milk distributor. The major proposals would change the shipping requirements for pool supply plants and would permit milk to be diverted from pool supply plants to other plants. Proponents contend that the requested order changes are needed to reflect changed marketing conditions and to insure orderly marketing in the area.

DATE: October 30, 1978.

ADDRESS: Holiday Inn, 1301 Wyandotte Street, Kansas City, Mo. 64105.

FOR FURTHER INFORMATION CONTACT:

Maurice M. Martin, Marketing Specialist, Dairy Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250, 202-447-7183.

SUPPLEMENTARY INFORMATION: Notice is hereby given of a public hearing to be held at the Holiday Inn, 1301 Wyandotte Street, Kansas City, Mo., beginning at 1:30 p.m., local time, on October 30, 1978, with respect to proposed amendments to the tentative marketing agreement and to the order, regulating the handling of milk in the Greater Kansas City marketing area.

The hearing is called pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900).

The purpose of the hearing is to receive evidence with respect to the economic and marketing conditions which relate to the proposed amendments, hereinafter set forth, and any appropriate modificaions thereof, to the tentative marketing agreement and to the order.

The proposed amendments, set forth below, have not received the approval of the Secretary of Agriculture.

PROPOSED BY MID-AMERICA DAIRYMEN, INC.

PROPOSAL NO. 1

Amend the pool plant provisions of § 1064.7(b) to provide that a supply plant must ship 50 percent of its receipts of Grade A milk from dairy farmers (including receipts from handlers described in § 1064.9(c), except receipts of milk diverted pursuant to § 1064.13) as fluid milk products (except filled milk) which is physically received at pool distributing plants (excluding fluid milk products transferred from any such distributing plant to the supply plant or to any other supply plant operated by the operator of the supply plant) during each of the months of September through January and 30 percent of such receipts during each of the months of February through August. The percentages specified in this paragraph may be increased or decreased up to 20 percentage points by the market administrator if he finds such revision is necessary to obtain needed shipments or to prevent uneconomical shipments. Before making such a finding the market administrator shall investigate the need for revision either on his own initiative or at the request of interested persons and, if his investigation shows that a revision might be appropriate, he shall issue a notice stating that revision is being considered and inviting data, views, and arguments with respect to the proposed revision.

PROPOSED BY FAIRMONT FOODS CO.

PROPOSAL NO. 2

Amend § 1064.7(b), *Pool plant*, as follows:

Eliminate the present minimum pooling requirements for supply plants and provide that the market administrator announce on the 5th day of the month the shipping requirement for the following month, such shipping requirement to be about 90 percent of the projected Class I utilization.

PROPOSED BY ASSOCIATED MILK PRODUCERS, INC.

PROPOSAL NO. 3

Amend § 1064.13, *Produced milk*, to permit allowable diversions from both pool distributing plants and pool supply plants.

PROPOSED BY MID-AMERICA DAIRYMEN, INC.

PROPOSAL NO. 4

Amend § 1064.45(d), *Market administrator's reports and announcements concerning classification*, to provide that the report of the amount and class utilization of milk received by each handler shall also include shipments of supply plant milk.

PROPOSED BY THE DAIRY DIVISION, AGRICULTURAL MARKETING SERVICE

PROPOSAL NO. 5

Make such changes as may be necessary to make the entire marketing agreement and the order conform with any amendments thereto that may result from this hearing.

Copies of this notice of hearing and the order may be procured from the Market Administrator, U. Grant Grayson, P.O. Box 4606, Overland Park, Kans. 66204; or from the Hearing Clerk, Room 1077 South Building, U.S. Department of Agriculture, Washington, D.C. 20250 or may be there inspected.

From the time that a hearing notice is issued and until the issuance of a final decision in a proceeding, Department employees involved in the decisional process are prohibited from dis-

OCT 6 1978

V 43 / 195

OCT 6 1978

cussing the merits of the hearing issues on an ex parte basis with any person having an interest in the proceeding. For the particular proceeding the prohibition applies to employees in the following organizational units:

Office of the Secretary of Agriculture.
Office of the Administrator, Agricultural Marketing Service.
Office of General Counsel.
Dairy Division, Agricultural Marketing Service (Washington office only).
Office of the Market Administrator, Greater Kansas City marketing area.

Procedural matters are not subject to the above prohibition and may be discussed at any time.

Signed at Washington, D.C., on September 29, 1978.

JAMES E. SPRINGFIELD,
Acting Deputy Administrator, Marketing Program Operations.

[3410-07]

Farmers Home Administration

[7 CFR Part 1924]

[FmHA Instruction 1924-F]

CONSTRUCTION AND REPAIR

Compensation for Construction Defects

AGENCY: Farmers Home Administration, USDA.

ACTION: Proposed rule.

SUMMARY: The Farmers Home Administration (FmHA) proposes to add a new regulation to implement a public law. The action will authorize FmHA to compensate borrowers for defects resulting from construction financed under the section 502 Rural Housing Program. There have been instances where serious construction defects occurred and were not corrected by the contractor because of bankruptcy or other problems. The borrower had no other recourse except to repair these defects themselves. It is difficult, if not impossible, for the low-to-moderate income borrowers to correct these defects with their own resources. The intended effect of the action is to compensate borrowers for construction defects not due to their fault or neglect.

DATES: Comments must be received on or before November 6, 1978.

ADDRESSES: Submit written comments to the Office of the Chief, Directives Management Branch, Farmers Home Administration, U.S. Department of Agriculture, Room 6316, Washington, D.C. 20250. All written comments made pursuant to this notice will be available for public inspection at the address given above.

FOR FURTHER INFORMATION CONTACT:

Mr. Elvon H. Spencer, 202-447-4295.

SUPPLEMENTARY INFORMATION: The FmHA proposes to add Subpart F, "Compensation for Construction Defects" to Part 1924, Subchapter J, Chapter XVII, Title 7 in the Code of Federal Regulations. This proposal contributes to the implementation of Pub. L. 95-128 by providing for compensation to borrowers in the form of cash payments, conveyance by the borrower back to the Government in satisfaction of the indebtedness, or repair at the Government's expense. The regulation will apply only to section 502 Rural Housing loans. The compensation aspects of this regualtion are contingent on funds being made available in appropriation acts (42 U.S.C. 1487(j)(6)); as of this date, no funds are available. Due to the need to implement these regulations as soon as possible we are publishing this subpart with a 30-day comment period.

As proposed Subpart F reads as follows:

PART 1924—CONSTRUCTION AND REPAIR

* * * * * *

Subpart F—Compensation for Construction Defects

Sec.
1924.251 General.
1924.252 Definitions.
1924.253 Eligibility.
1924.254 Purpose for which claims may be approved.

1924.258 Final inspection.
1924.259 Action against contractor.
1924.260 [Reserved]
1924.261 Conveyance of mortgaged property.
1924.262 Notification of borrowers.
1924.263—1924.300 [Reserved]
Exhibit A.

AUTHORITY. 42 U.S.C. 1480; delegation of authority by the Secretary of Agriculture, 7 CFR 2.23; delegation of authority by the Assistant Secretary for Rural Development, 7 CFR 2.70.

Subpart F—Compensation for Construction Defects

§ 1924.251 General.

This Subpart contains policies and procedures for compensating borrowers for structural defects under section 509(c) of the Housing Act of 1949. Provisions of this subpart apply only to owner's of newly constructed dwellings financed with an insured section 502 Rural Housing (RH) loan. It does not apply to dwellings financed through the guaranteed section 502 program.

§ 1924.252 Definitions.

(a) *Newly constructed dwelling.* A Newly Constructed Dwelling is one which is not more than 1 year old, not previously occupied as a residence, and was built under an FmHA conditional commitment or section 502 construction loan.

(b) *Structual Defect:* A Structural Defect is a defect in the dwelling including the siting and grading directly affecting the dwelling, or a related facility, which directly and significantly reduces the useful life, the habitability, or the integrity of the dwelling. The defect may be due to faulty material, poor workmanship, or latent causes that existed when dwelling was constructed. The term includes but is not limited to:

(1) Structural failures which directly and significantly affect the basic integrity of the dwelling such as in the foundation, footings, slabs, floors, framing walls, or roof.

(2) Major deficiencies in the structural components of the building such as faulty wiring, or failure of sewage disposal or water supply systems located on the property securing the loan.

(3) Serious defects in installation of heating systems, central air conditioners, water heaters, or water pumps.

§ 1924.253 Eligibility.

To be eligible for assistance under this subpart, all of the following must exist:

(a) The claim must be one for repairs to, or compensation for, damages arising from major structural defects to a newly constructed dwelling financed with a section 502 RH loan or one to have the Government acquire the property because of such defects.

(b) The dwelling must be both newly constructed and financed with a section 502 RH loan closed on or after April 12, 1976.

(c) The claim must be filed with the local Farmers Home Administration (FmHA) County Office within 18 months after the loan is closed except for claims involving loans closed on or between April 12, 1976, and October 12, 1977, which may be filed through April 12, 1979.

(d) The claim must be submitted by the FmHA borrower who is also the current owner of the newly constructed dwelling. The claimant need not be the original owner of the newly constructed dwelling. However, the date of closing of the initial loan establishes the eligibility date for filing a claim under this section.

(e) The obligation of the contractor or builder to correct the defect(s) (under a builders warrant) must have expired or the contractor or builder is

liable to make corrections under the builder's warranty, but is unable or unwilling to do the work. The claimant, when applicable, must provide evidence that the contractor has been contacted and the reasons, if known, why the contractor will not correct the defect(s).

(f) The construction must have been completed under a FmHA approved contract or a conditional commitment, except that a dwelling built by borrower or self-help method of construction is also eligible if the defect is the result of poor workmanship performed or materials supplied and installed by a subcontractor; or the defect is the result of soil movement caused by other than improper compaction or other negligence on the part of the claimant; or the defect occurs in the home equipment described in § 1924.252.

§ 1924.254 Purposes for which claims may be approved.

(a) *Eligible purposes.* A claim may be approved to:

(1) Compensate for costs to repair major structural defects, including costs approved by FmHA for professional reports by engineers, architects or others needed to determine causes of or means of repairing the defect.

(2) Compensate the owner for funds expended for emergency repairs, or repairs made in accordance with plans and specifications after approval by FmHA. Emergency repairs are those repairs necessary to preserve the intergrity of the structure, to prevent damage or further damage to personal property or fixtures in the dwelling and related facilities, or to prevent or eliminate immediate health-hazards. Receipts or other evidence of owner's expenditures must be provided.

(3) Acquire title to the property and, when appropriate, compensate claimant for any loss of borrower contribution at the time the loan was closed. A borrower contribution may be such thing as:

(i) A borrower's land or cash contribution,

(ii) Development work done by the borrower, the cost of which was not included in the loan funds.

(iii) Attorney fees, abstract costs or title insurance costs actually paid by the claimant in connection with closing the loan.

Compensation allowed for the land or development work will be the value established by the appraisal on which the loan was based or present market value, whichever is less.

(4) Compensate the claimant for damages, which are a direct result of the defect to permanent additions, remodeling, upgrading, etc., of the dwelling or related facilities. Reimbursement under this paragraph will be based on actual cost of the development, or the replacement cost of the improvement, whichever is less. If the actual cost method is used, the borrower must provide evidence to reasonably establish the development cost.

(5) Compensate the claimant for temporary living expenses, miscellaneous expenses, storage of household goods and moving expenses incurred as a result of the defect.

(i) Payment under this paragraph may be made under either of the following circumstances:

(A) The property is acquired by the Government because FmHA determines that the dwelling is not habitable and the severity of the defects prevents the property from being repaired and made suitable as a permanent residence for the borrower. Payment of expenses covered by this paragraph is not authorized in cases where the Government accepts conveyance of the property as a convenience to the borrower and the dwelling is or can feasibly be made suitable as a permanent residence.

(B) The property is not acquired by the Government but FmHA determines that the dwelling is not habitable or must be vacated to repair the defects.

(ii) Claims for compensation are limited as follows:

(A) Compensation may be granted for temporary living expenses for not more than 45 calendar days per claim. Compensation will be paid for actual cost to the claimant not to exceed $40 per day. Reimbursement may be claimed for expenses such as food, lodging, cleaning, etc., which would not have been incurred had the claimant remained in the house.

(B) Compensation may be granted for actual miscellaneous expenses not to exceed $200 to cover such items as utility connect and disconnect fees.

(C) Compensation may be granted for moving and storage expenses not to exceed $2,500 unless authorized by the State Director and not to exceed the actual cost of moving the claimant household with personal belongings, a distance of not more than 50 miles from the original residence. Compensation for storage expenses may not exceed that amount paid to store household furnishings for 45 days.

(6) Compensate the claimant for reasonable interest paid on loans obtained for the sole purpose of correcting structural defects or other approved purposes under this Subpart.

(b) *Ineligible purposes.* Compensation will not be granted for:

(1) Damages resulting from alterations in construction not approved by FmHA, or additions or remodeling of dwellings and related facilities not financed by FmHA.

(2) The loss of past, present, or future wages or salary directly or indirectly resulting from the defect.

(3) Treatment for physical or psychological damages including medical and dental claims.

(4) Death benefits or funeral expenses.

(5) Damages encountered as a result of war, flood, tornado, lightening, earthquake or other acts of nature which the structure was not designed to withstand.

(6) Damages resulting from the homeowner's negligence or failure to properly maintain the property.

(7) Correction of defects such as a damp basement or malfunctioning septic system unless the defect is so serious that the Board of Health condemns the property, or the affected part of the dwelling cannot continue to be used for its intended purpose.

(8) Damage to personal property.

§ 1924.255 [Reserved]

§ 1924.256 Processing applications.

(a) An application for financial assistance under Section 509(c) of the Housing Act of 1949 as amended shall be submitted by the claimant to the County Supervisor on Form FmHA 424-4 "Request for Compensation for Construction Defects." The application form shall be completed in its entirety. All structural defects and claims for which compensation is sought will be listed. If necessary, the County Supervisor may assist the claimant in preparing and submitting the application.

(b) The County Supervisor will review applications for financial assistance to determine if the applicant and claim appear to meet the eligibility requirements as detailed in § 1924.253.

(c) If the claim is not eligible for compensation, the County Supervisor will notify the claimant in writing of the specific reasons for lack of eligibility and of appeal rights in accordance with Subpart B of Part 1900 of this chapter.

(d) The County Supervisor will process claims that appear to be eligible for compensation as follows:

(1) If the builder's warranty appears to cover the defect and the contractor has not been notified in writing about the defect, the County Supervisor will advise the borrower of the provisions of the builder's warranty and, if needed and if requested by the borrower, assist in completing appropriate notice to the contractor with the request that the defect be corrected within 30 days.

(2) If the builder's warranty covers the defect and the contractor has received written notice and is unable or unwilling to make repairs in accordance with the provisions of the build-

V 4 3 / 1 9 5

er's warranty, the County Supervisor will notify the contractor in writing that the Government is considering compensating the borrower and the contractor may be liable for costs paid by the Government. Further actions against the contractor will be in accordance with Subpart E, Part 1924, of this chapter.

(e) If the defect is not covered by a builder's warranty or the contractor does not appear to be liable, or the contractor has failed to perform after proper notification under the warranty or the County Supervisor has evidence that the contractor is unable or unwilling to make the repairs, the following action will be taken:

(1) A copy of the claim will be sent to the District Director.

(2) The County Supervisor will be responsible for having an onsite inspection made by a qualified FmHA employee within 30 days of receipt of the claim. The inspector should not indicate to the claimant whether or how much financial assistance might be given. If eligibility of the defect or the proper method of making repairs is not clear, the State architect should be consulted. A narrative inspection report will be prepared and include at least the following information:

(i) A description of the defect and a statement as to whether the defect is a structural defect as defined in § 1942.252(b).

(ii) The cause or probable cause of the defect.

(iii) A list of any other damages to the structure and related facilities.

(iv) A description of the work necessary to correct the defect and an estimate of the repair cost, or a recommendation as to whether it is feasible to repair the property.

(f) After the inspection and report have been completed, the County Supervisor will send the claim file to the District Director who will inform the claimant by letter that:

(1) An inspection has been completed and a copy of the report is attached. Furthermore, a determination has been made as to which defects:

(i) Are the responsibility of the contractor, or equipment manufacturer.

(ii) Are not eligible for assistance under this subpart.

(iii) May be eligible for assistance under this regulation.

(2) The claimant must indicate in writing whether there is a desire to repair the eligible defects or convey the property to the Government in satisfaction of the indebtedness on the rural housing loan(s) to the Agency with the Government paying for borrower investment in the property as authorized in § 1924.254. The option to convey to the Government is available to the claimant only if the estimated cost of correcting the defect, as determined by FmHA, exceeds $2,000 or if FmHA determines that after the proposed corrections are made the dwelling would not be suitable for the borrower considering the borrower's needs and circumstances. Should the decision be to repair, the claimant must provide plans, specifications, and cost estimates for planned repairs.

(3) The claim, if approved, will be subject to the availability of funds.

§ 1924.257 Approval—Disapproval.

(a) The District Director may approve or disapprove claims up to $2,000. All other claims will be approved or disapproved by the State Director. The approval official must in writing, inform the claimant of the decision within 30 days after the claim is received by that official. In no case will the County Supervisor or the District Director hold a claim docket for more than 30 days unless they inform the claimant of the reason(s) why it is being delayed. If the claim or any part of the claim is denied at any level, the claimant will be informed in writing of the reason(s) for the denial and advised of appeal rights in accordance with Subpart B of Part 1900 of this chapter.

(b) The assembled claim docket to be submitted to the District Director in accordance with § 1924.256 (f) will contain all of the following completed forms and documents as well as other information bearing upon the validity of the claim.

(1) Form FmHA 424-4 completed and signed by claimant.

(2) Report of inspection completed and signed by the FmHA employee who made the inspection.

(3) Plans, specifications, and cost estimates.

(4) The County Supervisor's comments and recommendations.

(c) Claims will be approved subject to availability of funds. The approving official will enter the amount for which the claim is approved and sign the original Form FmHA 424-4. Two copies will be mailed to the State Office, one copy to the borrower, and the original will remain in the borrower's case file. When the State Office allocates funds for the claim, two copies of Form FmHA 424-4 will be stamped "funded" and returned to the County Supervisor. The County Supervisor, when ordering the check, will send one copy with the "funded" stamp to the Finance Office. The Finance Office will send the check to the county office on the basis of this form. It will not be necessary to use Standard Form 1034. The check will be made payable to the claimant and may be, as appropriate, released to the claimant to reimburse claimant for approved costs incurred by applicant, endorsed by the claimant to be applied on an account, or deposited in a supervised bank account.

§ 1924.258 Final inspection.

All repair work will be performed in accordance with FmHA Instruction 424.1. In all cases, a final inspection of the repair work performed will be made before final payment is made for the work. If practical, the inspection will be made by the same employee who made the initial inspection to determine eligibility. Interim inspections may be made to insure that minimum property standards are met. The inspection report for the final inspection will be signed by both borrower and inspector.

§ 1924.259 Action against contractor.

Compensation by the Government will not be approved until after reasonable efforts to obtain corrective actions by the contractor have failed. However, if it becomes necessary for FmHA to pay for correction of construction defects in a dwelling which are the responsibility of the contractor, debarment proceedings will be initiated against the contractor in accordance with subpart C of part 1918 of this chapter. An assignment of the borrower's claim against the contractor or other party may be obtained if is appears to the approval officials, with any necessary advice from OGC, that recovery is reasonably possible.

§ 1924.260 [Reserved]

§ 1924.261 Conveyance of mortgaged property.

If a borrower, eligible under this subpart, requests, because of a structural defect, that the FmHA debt be canceled, the borrower will be requested to convey the mortgaged security to the Government if FmHA approves the borrower's request. The conveyance will be handled in accordance with applicable provisions of part 1955, subpart A.

§ 1924.262 Notification of borrowers.

Each borrower potentially eligible for compensation will be notified in writing by the County Supervisor within 30 days of the receipt of this subpart of the borrower's rights under this subpart. The County Supervisor will also give the notification to loan applicants at or before loan closing, and to borrowers at any time construction defects are apparent and favorable results cannot be obtained from the contractor. Exhibit A of this subpart may be used as a guide in preparing the notification letter to be sent to potentially eligible borrowers.

§ 1924.263–1924.300 [Reserved]

(42 U.S.C. 1480; delegation of authority by the Secretary of Agriculture, 7 CFR 2.23; delegation of authority by the Assistant Secretary for Rural Development, 7 CFR 2.70.)

Dated: October 2, 1978.

GORDON CAVANAUGH,
Administrator,
Farmers Home Administration.

EXHIBIT A

DEAR ————,

Recent legislation has enabled Farmers Home Administration (FmHA) to provide financial assistance to correct major structural deficiencies in new dwellings financed on or after April 12, 1976.

The assistance may be granted to correct deficiencies in the major structural components of single family houses not corrected under thae builder's warranty.

A major structural defect is considered to be a defect(s) which significantly reduces the useful life or habitability of the dwelling or unit or threatens its integrity. The defect may be due to faulty material, poor workmanship, or latent unpredictable causes.

If you have such a defect in your house, you should contact our office at ——. You will be provided with additional information as well as the necessary forms for filing a claim. Any claim submitted for loans closed on or between April 12, 1976 and October 11, 1977, must be received in the County Office by April 12, 1979. For loans closed after October 12, 1977, the claim must be received no later than 18 months after the date of loan closing.

Sincerely,

————,
County Supervisor.

[7590-01]

NUCLEAR REGULATORY COMMISSION

[10 CFR Part 72]

STORAGE OF SPENT FUEL IN AN INDEPENDENT SPENT FUEL STORAGE INSTALLATION (ISFSI)

Proposed Licensing Requirements

AGENCY: U.S. Nuclear Regulatory Commission.

ACTION: Proposed rule.

SUMMARY: The proposed new regulation specifies procedures and requirements for issuance of licenses to store spent fuel in an independent spent fuel storage installation (ISFSI). In addition to general provisions, the proposed regulation contains requirements for the siting, general design criteria and certain operational aspects of such an activity.

DATE: Comment period expires January 4, 1979.

ADDRESSES: Written comments should be submitted to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch. Copies of comments on the proposed new regulation may be examined in the Commission's Public Document Room at 1717 H Street NW., Washington, D.C.

The Commission is particularly interested in comments on Subpart E, "Siting Criteria" and Subpart F, "General Design Criteria."

FOR FURTHER INFORMATION CONTACT:

Russell E. L. Stanford, Office of Standards Development, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, phone 301-443-5910.

SUPPLEMENTARY INFORMATION: The present policy of the United States is to store commercial reactor spent fuel without reprocessing pending a decision to reprocess it or to dispose of it directly as high level waste. As a result of this policy, spent fuel is accumulating in storage basins throughout the U.S. The Nuclear Regulatory Commission has evaluated the environmental impacts of the accumulation of spent fuel and recently published a draft Generic Environmental Impact Statement (GEIS) on this subject.[1] The GEIS concludes that there is a need for independent spent fuel storage installations (ISFSI), or as these are sometimes called, away-from-reactor (AFR) storage installations, to accommodate some of the accumulating spent fuel. The GEIS also recognizes the need for a more definitive regulatory basis for future licensing of facilities of this type. The GEIS identifies the development of 10 CFR Part 72, as coming to meet the need.

The Nuclear Regulatory Commission has under consideration this new regulation covering the requirements for extended spent fuel storage at installations built specifically for this purpose that are not coupled to either a nuclear power plant or a fuel reprocessing plant.

The present regulations covering the possession of source, byproduct and special nuclear materials are largely designed for relatively short-term possession in conjunction with operations involving such materials. The Nuclear Regulatory Commission recognizes that there is a need for a new regulation covering the requirements for extended spent fuel storage under static storage conditions involving no operations on such materials. The proposed new regulation specifies procedures and requirements for the issuance of licenses to store spent fuel in an independent spent fuel storage installation. To ensure adequate protection of the public health and safety, the proposed regulation establishes siting, design, operation and records requirements for away-from-reactor spent fuel storage. Specific features of licensing under Part 72 are:

1. Single license—Part 72 provides for issuance of a single license as early as practical in the licensing process—before the start of construction of any physical facilities involved. This license would contain a provision that it be reevaluated by NRC and its "license conditions" be updated prior to the receipt of spent fuel at an ISFSI.

2. Safety analysis report—A single safety analysis report will be submitted with the license application. This will be updated as the project progresses and changes submitted to the NRC, with any final changes submitted at least 90 days prior to the receipt of spent fuel at an ISFSI.

3. Licenses covering the storage of spent fuel in an ISFSI will not be issued by Agreement States because of the significant quantities of special nuclear materials involved. Agreement States are prohibited by section 274b(3) of the act from licensing special nuclear material in quantities sufficient to form a critical mass.

4. Such licenses are limited to the temporary storage only of spent fuel; no license under this part will be granted for the later permanent storage or disposal of spent fuel.

An opportunity for public hearings will be provided before issuing a license for an ISFSI. Appropriate amendments to the regulations to include ISFSIs in the public hearing procedures will be issued for public review and comment.

Underwater storage of spent fuel has been standard practice in the nuclear industry for more than 30 years. The basic technology involved is well established and readily lends itself to the contemplated extended storage of spent fuels under water for periods of more than 10 years.

However, the storage of spent fuels in an ISFSI is not limited to underwater storage. Although many of its specific requirements apply to water pool installations, the storage of aged spent fuel under dry storage conditions is also covered by this regulation. The storage of spent fuels under water is only necessary for those fuels which have not undergone sufficient aging since their discharge from a reactor to make cooling by some other means feasible.

The proposed rule is applicable only to "aged" fuel, with more than one year's decay since reactor shutdown. Aged spent fuel, having lost the short-lived radionuclides by decay, need not have a high degree of protection from

[1] NUREG-0404 Draft Generic Environmental Impact Statement on Handling and Storage of Spent Light Water Reactor Fuel—March 1978. Copies may be obtained from the Director, Division of Technical Information and Document Control, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555.

OCT 6 1978

V 4 3 / 1 9 5

weather extremes, tornadoes, or tornado generated missiles.

The large inventory of radionuclides in an ISFSI represents a potential hazard to public health and safety. Storage conditions must provide an environment which will insure the long-term integrity on the fuel cladding as the primary containment for the radioactive materials contained in spent fuel. For underwater storage, the pool water is also an effective medium for the containment of the small amounts of radioactive materials, primarily cesium, that may escape from defective fuel.

To assure the long-term integrity of the stored spent fuel, the storage racks and other important components of an ISFSI, there must be provisions for periodic inspection and surveillance of critical components.

The rationale underlying the siting requirements is that although the potential risk is small due to the relatively inert nature of aged spent fuel, sound sites should be selected for such installations. An ISFSI could be located on the site of another license facility or a separate site. The population distributions at licensed reactor sites would be acceptable for the location of ISFSI.

The Commission is considering whether a new seismic siting approach for an ISFSI should be adopted which recognizes that the simple static nature of an ISFSI makes seismic risk less serious than it is for a reactor. The Commission also recognizes from experience that substantial resources can be expended in investigation work to establish site-specific seismic design values and further resources on debate of the exact values and review of different viewpoints to meet these site-specific values. By including requirements in the proposed regulations which limit the location of an ISFSI to sites with an earthquake ground motion potential of no more than 0.25g (with a recurrence interval of 500 years) [2] and which specify that all ISFSI's shall be designed to withstand a 0.25g acceleration, the integrity of the ISFSI can be assured without the need for costly seismic site investigations, analyses and review unless some unusual geologic characteristic is identified. The limiting earthquake ground motion potential of 0.25 g with a recurrence interval up to 500 years is not considered unduly restrictive. It rules out sites of high seismic potential as being generally unsuitable. However, if special circumstances and special design treatment are shown, exemption from this site restriction is possible. The imposition of this site restriction does raise the possibility that a small amount of additional transportation of spent fuel might be necessary to reach an acceptable ISFSI site from a few reactors in the U.S. Based on previous evaluations of the impact of transporting spent fuel,[3,4] the savings achieved by the site restriction are justified.

For underwater storage, the pool structure and the spent fuel storage racks within the pool must be designed and constructed to resist potential seismic forces to insure sub-critical geometry at all times.

Spent fuel in storage under water requires a cooling system for the removal of decay heat. However, the heat capacity of the large volume of water in a spent fuel storage pool allows adequate time to take corrective action if the cooling system fails, provided there is an assured source of makeup water and some means of getting it to the storage pool, if needed. Therefore, the cooling system need not be designed to withstand the extremes of natural phenonmena. Likewise, the emergency water supply system need not be permanently installed, provided it is available within the time span needed.

The activity level of the pool water must be kept within control and equipment such as the pool water cleanup system and the waste treatment system must be designed to meet ALARA objectives for operating personnel.

Experience has shown that the level of radioactive materials in the ambient air in the spent fuel storage area of an ISFSI is normally about 5 percent of 10 CFR 20 limits for occupied areas. However, there is a potential for the release of radioactive materials in the venting of shipping casks before these are unloaded, hence cask unloading must be handled under controlled conditions.

The proposed Part 72 includes an operational dose limit to any member of the general public of 25 mrem per year from the uranium fuel cycle in accordance with the regulations of the Environmental Protection Agency (40 CFR Part 190). The EPA regulations were prepared with a reprocessing fuel cycle in mind, but the Commission considers it reasonable to apply them to the ISFSI since the storage of fresh spent fuel at reactors and reprocessing plants was already envisioned and the storage of aged spent fuel at an ISFSI entails much lower potential releases.

Part 72 also sets a limit of 5 Rem in 2 hours for the calculated dose to individuals off the ISFSI site from design basis accidents. With such a limit, an ISFSI, if located on a reactor site, will not add substantially to the risk to the public off site. Accident analyses for an ISFSI presented in the GEIS and in previous licensing cases show that this limit is reasonably achievable.

With spent fuel committed to storage for an idefinite period of time, and its ultimate disposition unknown, there is a need for the maintenance of adequate records of the identify and history of the spent fuel in storage.

It is the Commission's judgment that an NRC review of the licensee's training program and a certification by the licensee that his operators are adequately trained are adequate. The provisions of Section 107 of the Atomic Energy Act, as amended, which provide for licensing of operators, do not apply to ISFSI personnel.

Although the proposed regulation does not contain specific requirements relating to financial protection and responsibility for public liability, the Commission is considering the question of whether it should exercise its discretionary authority under the Price-Anderson Act to prescribe such requirements and would be interested in any comments or views which might be offfered on this issue. The question is also undergoing review in the context of a broad study by the NRC staff of whether, and if so in what manner, the Commission should exercise its discretionary authority to impose financial protection requirements on its materials licensees.

Pursuant to the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974, as amended, and section 553 of title 5 of the United States Code, notice is hereby given that adoption of the following new regulation 10 CFR Part 72 is contemplated.

A new Part 72 is added which reads as follows:

PART 72 "LICENSING REQUIREMENTS FOR THE STORAGE OF SPENT FUEL IN AN INDEPENDENT SPENT FUEL STORAGE INSTALLATION" (ISFSI)

Subpart A—General Provisions

Sec.
72.1 Purpose.
72.2 Scope.
72.3 Definitions.
72.4 Communications.
72.5 Interpretations.
72.6 License Required.
72.7 General License to Own Spent Fuel.
72.8 Specific Exemptions.
72.9 Denial of Licensing by Agreement States.

Subpart B—License Application, Form, Contents

72.11 Filing of Applications for Licenses; Oath or Affirmation.
72.12 Elimination of Repetition.
72.13 Public Inspection of Applications.
72.14 Contents of Application: General and Financial Information.
72.15 Contents of Application: Technical Information.
72.16 Contents of Application: License Conditions.
72.17 Contents of Application: Technical Qualifications.
72.18 Decommissioning Plan, Including its Financing.
72.19 Emergency Plan.
72.20 Environmental Report.

Subpart C—Issuance and Conditions of Licenses

72.31 Issuance of Licenses.
72.32 Duration of Licenses; Renewal.
72.33 License Conditions.
72.34 Changes, Tests, and Experiments.

TRANSFERS OF LICENSES—CREDITORS' RIGHTS—SURRENDER OF LICENSES

72.36 Transfer of Licenses.
72.37 Creditor Regulations.
72.38 Applications for Termination of Licenses.

AMENDMENT TO LICENSE AT REQUEST OF HOLDER AND REVOCATION, SUSPENSION, AND MODIFICATION OF LICENSES

72.39 Application for Amendment of License.
72.40 Issuance of Amendment.
72.41 Revocation, Suspension and Modification of Licenses.
72.42 Backfitting.

Subpart D—Records, Reports, Inspections, and Enforcement

72.51 Material Balance, Inventory and Records Requirements for Stored Materials.
72.52 Reports of Accidental Criticality or Loss of Special Nuclear Material.
72.53 Material Status Reports.
72.54 Nuclear Material Transfer Reports.
72.55 Inspections and Tests.
72.56 Maintenance of Other Records and Reports.
72.57 Violation.

Subpart E—Siting Criteria

72.61 General Criteria.
72.62 Criteria for Design Basis External Natural Events.
72.63 Criteria for Design Basis External Man-Induced Events.
72.64 Criteria for Defining Potential Effects of the ISFSI on the Region.
72.65 Criteria for Regional Distribution of Population.
72.66 Criteria for Defining Acceptable Seismic Design.
72.67 Criteria for Defining Potential Radiological Consequences.

Subpart F—General Design Criteria

72.71 General Design Criteria.

OVERALL REQUIREMENTS

NUCLEAR CRITICALITY SAFETY

RADIOLOGICAL PROTECTION

SPENT FUEL AND RADIOACTIVE WASTE STORAGE AND HANDLING

DECOMMISSIONING

Subpart G—Quality Assurance

72.75 Quality Assurance Program; Records.

Subpart H—Plant Protection

72.81 Physical Security Plan.

Subpart I—Training and Certification of ISFSI Personnel

Sec.
72.91 Scope of Training Program.
72.92 Responsibility for Training Program.
72.93 Physical Requirements.
72.94 Submission for Approval.

AUTHORITY: Atomic Energy Act of 1954, as amended, secs. 51, 53, as amended, 62, 63, 65, 81, 161 b, h, i, o, 182a as amended, 183 as amended, 184 as amended, 186, 187, Pub. L. 83-703, 68 Stat. 929, 930 as amended by 71 Stat. 576, 72 Stat. 632 and 79 Stat. 602, 932, 933, 935, 948, 953 as amended by 70 Stat. 1069, 954 as amended by 78 Stat. 602, 955, (42 U.S.C. 2071, 2073, 2092, 2093, 2095, 2111, 2201 (b), (h), (i), (o), 2232, 2233, 2234, 2236, 2237); sec. 234, Pub. L. 91-161, 83 Stat. 444, 42 U.S.C. 2282; sec. 274c, Pub. L. 86-273, 73 Stat. 688, (42 U.S.C. 2021(c)); under sec. 102(2)(C) of the National Environmental Policy Act of 1969, Pub. L. 91-190, 83 Stat. 853, (42 U.S.C. 4332), and under the Energy Reorganization Act of 1974, as amended, sec. 201, as amended, 202, and 206, Pub. L. 93-438, 88 Stat. 1242, as amended by 89 Stat. 413, 1243, 1246 (42 U.S.C. 5841, 5842, 5846).

Subpart A—General Provisions

§ 72.1

§ 72.1 Purpose.

The regulations in this part establish requirements, procedures and criteria for the issuance of licenses to receive title to, own, acquire, receive, or possess special nuclear material, byproduct material, and source material in spent fuel for the purpose of storage in the United States in an independent spent fuel storage installation (ISFSI) as defined in § 72.3 and establish and provide for the terms and conditions under which the Commission will issue such licenses. Such licenses are limited to the temporary storage only of spent fuel; no license under this part will be granted for the later permanent storage or disposal of spent fuel.

§ 72.2 Scope.

The regulations in this part apply to all persons in the United States, including persons in Agreement States. The regulations in this part are limited to spent fuel. This includes the byproduct, special nuclear and source materials in the spend fuel to be stored or in storage in an independent spent fuel storage installation as defined by § 72.3. With respect to licenses covering the storage of spent fuel in an ISFSI issued prior to the effective date of this regulation, such licenses will not be renewed unless the operating requirements of this Part 72 are met.

§ 72.3 Definitions.

As used in this part:

(a) "Act" means the Atomic Energy Act of 1954 (68 Stat. 919) including any amendments thereto.

(b) "As low as is reasonably achievable" means as low as is reasonably achievable taking into account the state of technology, and the economics of improvements in relation to benefits to the public health and safety.

(c) "Byproduct material" means any radioactive material (except special nuclear material) yielded in or made radioactive by exposure to the radiation incident to the process of producing or utilizing special nuclear material.

(d) "Commission" means the Nuclear Regulatory Commission or its duly authorized representatives.

(e) "Commencement of construction" means any clearing of land, excavation or other substantial action that would adversely affect the natural environment of a site, but does not mean:

(1) Changes desirable for the temporary use of the land for public recreational uses, necessary borings or excavations to determine subsurface materials and foundation conditions or other preconstruction monitoring to establish background information related to the suitability of the site or to the protection of environmental values;

(2) Construction of environmental monitoring facilities;

(3) Procurement or manufacture of components of the installation.

(f) "Confinement system" means those systems, including ventilation, between areas containing radioactive substances and the environment.

(g) "Controlled area" means that area immediately surrounding the ISFSI complex, the use of which is controlled by the licensee.

(h) "Design basis" means the parameter values associated with that level of severity of an external event or combination of events selected for design of all or part of an ISFSI to insure that the structures, systems, and components important to safety (in relation to that event or combination of events) will maintain their integrity and will not suffer loss of function during or after the event or before completing its design function. These values may be (1) restraints derived from generally accepted "state-of-the-art" practices for achieving functional goals, or (2) requirements derived from analysis (based on calculation and/or experiments) of the effects of a postulated event under which a structure, system, or component must meet its functional goals.

(i) "Historical data" means a compilation of the available information concerning a particular type of event derived from human history.

(j) "Independent spent fuel storage installation (ISFSI)" means a self-contained installation designed for the storage of spent fuel and capable of independent operation with all necessary supporting services.

[2] As demonstrated by authorities such as Algermissen and Perkins, USGS, Open File Report 76-416, 1976, "A Probabilistic Estimate of Maximum Acceleration in Rock in the Contiguous United States."

[3] WASH-1238, "Environmental Survey of Transportation of Radioactive Materials to and From Nuclear Power Plants."

[4] NUREG-0170, "Final Environmental Statement on the Transportation of Radioactive Material by Air and Other Modes."

OCT 6 1978

V 43 / 195 OCT 6 78

(k) "Neighboring area" means that area immediately surrounding the controlled area in which population distribution and density and land and water uses are considered with respect to the possibility of implementing contingency measures.

(l) "NEPA" means the National Environmental Policy Act of 1969 including any amendments thereto.

(m) "Person" means (1) any individual, corporation, partnership, firm, association, trust, estate, public or private institution, group, Government agency other than the Department of Energy (DOE), except that the DOE shall be considered a person within the meaning of the regulations of this part to the extent that its facilities and activities are subject to the licensing and related regulatory authority of the Commission pursuant to section 202 of the Energy Reorganization Act of 1974 (88 Stat. 1244), any State or any political subdivision of, or any political entity within a State, any foreign government or nation or any political subdivision of any such government or nation, or other entity; and (2) any legal successor, representative, agent, or agency of the foregoing.

(n) "Region" means a geographical area surrounding and including the site sufficiently large to contain all the features related to a phenomenon or to the effect from a particular event.

(o) "Site" means the real property on which the ISFSI is located. The site includes the controlled area.

(p) "Source material" means (1) uranium or thorium, or any combination thereof, in any physical or chemical form or (2) ores which contain by weight one-twentieth of 1 percent (0.05%) or more of (i) uranium, (ii) thorium, or (iii) any combination thereof. Source material does not include special nuclear material.

(q) "Special nuclear material" means (1) plutonium, uranium 233, uranium enriched in the isotope 233 or in the isotope 235, and any other material which the Commission, pursuant to the provisions of section 51 of the Act, determines to be special nuclear material, but does not include source material; or (2) any material artifically enriched by any of the foregoing but does not include source material.

(r) "Spent fuel" suitable for storage in an ISFSI means irradiated light water reactor nuclear power plant fuel which has undergone at least one year's decay since reactor shutdown.

(s) "Structures, systems and components important to safety" means those items whose function is to (1) maintain the required spent fuel storage conditions, (2) prevent damage to the spent fuel during transfer and storage, (3) protect plant personnel from exposure to radiation in excess of design objectives.

§ 72.4 Communications.

Except where otherwise specified, all communications and reports concerning the regulations in this part and applications filed under them should be addressed to:

The Nuclear Regulatory Commission, Division of Fuel Cycle and Material Safety, Washington, D.C. 20555

Communications, reports, and applications may be delivered in person at the Commission's Offices at:

7915 Eastern Avenue, Silver Spring, Md., or 1717 H Street NW., Washington, D.C.

§ 72.5 Interpretations.

Except as specifically authorized by the Commission in writing, no interpretation of the meaning of the regulations in this part by any officer or employee of the Commission other than a written interpretation by the General Counsel will be recognized to be binding upon the Commission.

§ 72.6 License required.

(a) No person may receive title to, own, acquire, receive, or possess special nuclear material, byproduct material, or source material in spent fuel for the purpose of storage in an independent spent fuel storage installation except as authorized by the general license in § 72.7, or as authorized in a specific license issued by the Commission in accordance with the regulations in this part.

(b) Licenses for special nuclear material are of two types: General and specific. Any general license provided in this part is effective without the filing of applications with the Commission or the issuance of licensing documents to particular persons. Specific licenses are issued to named persons upon applications filed pursuant to the regulations in this part.

§ 72.7 General license to own spent fuel.

A general license is hereby issued to receive title to and own source material, special nuclear material and byproduct material contained in spent fuel without regard to quantity. Regardless of any other provision of this chapter, a general licensee under this section is not authorized to acquire, deliver, receive, or possess source material, special nuclear material and byproduct material contained in spent fuel, except as authorized in a specific license.

§ 72.8 Specific exemptions.

The Commission may, upon application by any interested person or upon its own initiative, grant such exemptions from the requirements of the regulations in this part as it determines are authorized by law and will not endanger life or property or the common defense and security and are otherwise in the public interest.

§ 72.9 Denial of licensing by agreement states.

Licenses covering the storage of spent fuel in an ISFSI will not be issued by Agreement States.

Subpart B—License Application, Form, Contents

§ 72.11 Filing of applications for licenses; oath or affirmation.

(a) *Place of filing.* Each application for a license under this part, or amendment thereof, should be filed with:

The Director, Division of Fuel Cycle and Material Safety, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555.

Applications, communications, reports, and correspondence may be delivered in person at the Commission's offices at 7915 Eastern Avenue, Silver Spring, Md., or 1717 H Street NW., Washington, D.C.

(b) *Oath or affirmation.* Each application for a license or license amendment, including amendments to such applications, should be executed in three signed originals by the applicant or duly authorized officer thereof under oath or affirmation.

(c) *Number of copies of applications.* Each filing of an application for a license or license amendment under this part (including amendments to such applications) shall include in addition to three signed originals the required documents listed in Table I in the number of copies specified.

(d) *Fees.* The application, amendment and inspection fees applicable to a license covering the storage of spent fuels in an ISFSI are those shown in § 170.31 of this chapter.

§ 72.12 Elimination of repetition.

In any application, under this part, the applicant may incorporate by reference information contained in previous applications, statements or reports filed with the Commission: *Provided,* That such references are clear and specific.

§ 72.13 Public inspection of applications.

Applications and documents submitted to the Commission in connection with applications may be made available for public inspection in accordance with provisions of the regulations contained in Part 2 and Part 9 of this chapter.

CONTENTS OF APPLICATION

§ 72.14 Contents of application: General and financial information.

Each application shall state;

(a) Full name of applicant;

(b) Address of applicant;

(c) Description of business or occupation of applicant;

(d) (1) If applicant is an individual, state citizenship and age.

TABLE I.—*Required licensing documents*

Section	Document	No. of copies
72.11	License application	[1] 25
72.15	Safety analysis report	70
72.19	Emergency plan	25
72 20	Environmental report	150
72.34	Report of installation and procedures changes	[2] 12
72.36	Application for transfer of license	[2] 25
72.38	Application for termination of license	[2] 25
72.39	Amendment to license	[2] 25
72.75	Quality assurance program	25
72.81(a)	Physical security plan [3]	10
72.81(c)	Safeguards contingency plan	10
72.94	Personnel training program	10

[1] Plus 3 signed originals.
[2] Plus 1 signed original.
[3] Physical protection plans should be held exempt from public disclosure pursuant to 10 CFR 2.790(d).

(2) If applicant is a partnership, state name, citizenship and address of each partner and the principal location where the partnership does business.

(3) If applicant is a corporation or an unincorporated association, state:

(i) The State, where it is incorporated or organized and the principal location where it does business;

(ii) The names, addresses and citizenship of its directors and principal officers.

(4) If the applicant is acting as an agent or representative of another person in filing the application, identify the principal and furnish information required under this paragraph with respect to such principal.

(e) Information sufficient to demonstrate to the Commission the financial qualifications of the applicant to carry out, in accordance with the regulations in this chapter, the activities for which the license is sought. This information shall state the place at which the activity is to be performed, the general plan for carrying out the activity and the period of time for which the license is requested. The information shall show that the applicant either possesses the necessary funds or that the applicant has reasonable assurance of obtaining the necessary funds, or that by a combination of the two, the applicant will have the necessary funds available to cover the following:

(1) Estimated construction costs.

(2) Estimated operating costs over the planned life of the installation.

(3) Estimated shutdown and decommissioning costs and the necessary financial arrangements prior to licensing that will insure shutdown, decontamination and decommissioning will be carried out.

§ 72.15 Contents of application: Technical information.

Each application for a license under this part shall include: (a) Safety Analysis Report describing the proposed installation (ISFSI) for the storage of spent fuel, including how the ISFSI will be operated. The minimum information to be included in this report shall consist of the following:

(1) A description and safety assessment of the site on which the ISFSI is to be located, with appropriate attention to features affecting installation design. Such assessment shall contain an analysis and evaluation of the major structures, systems and components of the ISFSI which bear on the suitability of the site assuming that the installation will be operated at the ultimate capacity [1] which is contemplated by the applicant.

(2) A description and discussion of the ISFSI structures with special attention to design and operating characteristics, unusual or novel design features, and principal safety considerations.

(3) The preliminary design of the installation including:

(i) The principal design criteria for the installation pursuant to subpart F of this part, with any additions to or departures from the general design criteria identified and justified.

(ii) The design bases and the relation of the design bases to the principal design criteria;

(iii) Information relative to materials of construction, general arrangement, and approximate dimensions, sufficient to provide reasonable assurance that the final design will conform to the design bases with an adequate margin for safety; and

(iv) Applicable codes and standards.

(4) A preliminary analysis and evaluation of the design and performance of structures, systems, and components of the ISFSI with the objective of assessing the risk to public health and safety resulting from operation of the installation and including determination of

(i) The margins of safety during normal operations and expected operational occurrences during the life of the installation and

(ii) The adequacy of structures, systems, and components provided for the prevention of accidents and the mitigation of the consequences of accidents, including natural and man-made phenomena and events.

(5) The means for controlling and limiting occupational radiation exposures to meet the objective of as low as is reasonably achievable and the limits shown in Part 20 of this chapter.

(6) The features of ISFSI design and operating modes to minimize waste volumes generated by the facility.

(7) An identification and justification for the selection of those variables, conditions, or other items which are determined as the result of the safety analysis and evaluation to be probable subjects of license conditions, with special attention given to those items which may significantly influence the final design of the installation.

(8) A preliminary plan for the applicant's organization, training of personnel pursuant to § 72.91, and conduct of operations, including the planned managerial and administrative controls system.

(9) An identification of those structures, systems or components of the installation, if any, which require research and development to confirm the adequacy of their design; an identification and description of the research and development program which will be conducted to resolve any safety questions associated with such structures, systems or components; and a schedule of the research and development program showing that such safety questions will be resolved prior to the initial receipt of materials to be stored at the ISFSI.

(10) The technical qualifications of the applicant to engage in the proposed activities as required by § 72.17.

(11) A description of the applicant's plans for coping with emergencies as required by § 72.19.

(12) A description of the equipment to be installed to maintain control over radioactive materials in gaseous and liquid effluents produced during normal operations and expected operational occurrences. The description shall identify the design objectives, and the means to be employed, for keeping levels of radioactive material in effluents to unrestricted areas as low as reasonably achievable and within the limits shown in Part 20 of this chaper. The description shall include:

(i) An estimate of;

(A) The quantity of each of the principal radionuclides expected to be released annually to unrestricted areas in liquid effluents produced during normal ISFSI operations; and

(B) The quantity of each of the principal radionuclides expected to be released annually to unrestricted areas in gaseous effluents produced during normal ISFSI operations.

(ii) A general description of the provisions for packaging, storage, and disposal of solid wastes containing radioactive materials resulting from treat-

[1] "Capacity" in this context refers to the quantity in metric tons of spent fuel, its contained radioactivity (curies) and heat generation rate (Btu/hr).

V 4 3 / 1 9 5

ment of gaseous and liquid effleunts and from other sources.

(iii) A description of the equipment and procedures for the maintenance and use of equipment installed in radioactive waste systems.

(iv) Prior to the first receipt of material to be stored, a revised estimate of the infomation required in paragraph (a)(12)(i)(B) of this section if the expected releases and exposures differ significantly from the estimates submitted in the application.

(v) A description of the measures taken to control the quantities of radioactive wastes for offsite disposal to as low as reasonably achievable levels.

(13) A conservative analysis of the potential dose to an individual off site from accidents and natural phenomena which result in (i) criticality, (ii) release of radioactive materials to the site and surrounding areas, and (iii) the loss of water for water pool type installations. The calculations of dose from any pathway may be limited to direct exposure, inhalation or ingestion occurring within 24 hours of the postulated event.

(b) Periodically during design and normally prior to construction, with final completion at least 90 days prior to the planned receipt of materials to be stored, and annually thereafter, the safety analysis report (SAR) will be updated and submitted to the Commission for approval and shall include the following:

(1) All current information relating to applicable site evaluation factors, including the results of environmental monitoring programs.

(2) A description and analysis of changes in the structures, systems, and components of the installation, with emphasis upon performance requirements, the bases, with technical justification therefor, upon which such requirements have been established, and the evaluations required to show that safety functions will be accomplished.

(i) Such items as the instrumentation and control systems, ventilation and filter systems, electrical systems, auxiliary and emergency systems, and radioactive waste handling systems shall be discussed insofar as they are pertinent.

(3) A final analysis and evaluation of the design and performance of structures, systems, and components taking into account any pertinent information developed since the submittal of the license application.

(c) A description of the quality assurance program to be applied to the design, fabrication, construction, testing and operation of the safety-related structures, systems, and components of the ISFSI as required by § 72.75. The description of the quality assurance program shall identify safety-related structures, systems and components and shall show how the criteria in Appendix B of Part 50 of this chapter will be applied to such identified safety-related components, systems, and structures in a manner consistent with their importance to safety.

(d) A description of the detailed security measures for physical protection, including design features and a plan as required by § 72.81.

(e) A description of the planned program covering preoperational testing and initial operations.

(f) The decommissioning plan required under § 72.18 of this part.

§ 72.16 Contents of application: license conditions.

Each application under this part shall include proposed license conditions in accordance with the requirements of § 72.33 together with a summary statement of the bases or reasons for such conditions.

§ 72.17 Contents of application: technical qualifications.

An application under this part shall include:

(a) The technical qualifications, including training and experience of the applicant and members of the applicant's staff to engage in the proposed activities in accordance with the regulations in this chapter.

(b) A description of the personnel training program required under Subpart I of this part.

(c) A commitment by the applicant to have an adequate complement of trained and certified plant personnel prior to the receipt of spent fuel for storage.

§ 72.18 Decommissioning Plan, Including its Financing.

(a) Each application under this part shall include a decommissioning plan which shall contain information on proposed procedures for the disposal of radioactive material, decontamination of the site and other procedures, sufficient to provide reasonable assurance that the dismantling and disposal of the ISFSI at the end of its useful life will not be inimical to the common defense and security or to the health and safety of the public. This plan shall include an evaluation of the ISFSI design features which have been selected to facilitate to the maximum degree reasonable its decontamination and decommissioning at the end of its useful life. This plan shall include provisions for minimizing the amount of solid, airborne and liquid wastes generated during decommissioning.

(b) The decommissioning plan will include the financial arrangements for its execution.

§ 72.19 Emergency plan.

An application to store spent fuel in an ISFSI, will include plans for coping with emergencies. These plans shall contain the elements that are listed in Section IV, "Content of Emergency Plans," of Appendix E to Part 50 of this chapter.

§ 72.20 Environmental report.

Each application for a license under this part shall be accompanied by an Environmental Report which meets the requirements of Part 51 of this chapter; 150 copies are required.

Subpart C—Issuance and Conditions of licenses

§ 72.31 Issuance of Licenses.

(a) The Commission will issue a license under this part and updated prior to the receipt of spent fuel in such form and containing such conditions and limitations as it deems appropropriate or necessary upon a determination that an application for a license meets the standards and requirements of the act and regulations, that the applicant's proposed site, installation and equipment for the storage of spent fuel are adequate to protect health and minimize danger to life or property; and that:

(1) The proposed site complies with the requirements of § 72.66.

(2) The applicant is qualified by reason of training and experience to conduct the operation covered by the regulations in this part.

(3) The applicant's personnel training program complies with Subpart I of this part.

(4) The applicant's proposed operating procedures to protect health and to minimize danger to life or property are adequate.

(5) The applicant is financially qualified to engage in the proposed activities in accordance with the regulations in this part.

(6) The applicant's physical security plan complies with § 72.81.

(7) The applicant's quality assurance plan complies with § 72.75.

(8) The applicant's emergency plan complies with § 72.19.

(9) The applicant's decommissioning plan and its financing pursuant to § 72.18 are adequate.

(10) Before commencement of construction of the installation, the Director of the Office of Nuclear Materials Safety and Safeguards or his designee, has concluded, or after a public hearing, the Atomic Safety and Licensing Board has made the finding that on the basis of information filed and evaluations made pursuant to Part 51 of this chapter, and after weighing the environmental, economic, technical and other benefits against environmental costs and considering available alternatives, that the action called for

is the issuance of the proposed license, with any appropriate conditions to protect environmental values. Commencement of construction prior to such conclusion or finding may be grounds for denial of a license to store spent fuel in an ISFSI.

(11) No license will be issued by the Commission to any person within the United States if the Commission finds that the issuance of such a license would be inimical to the common defense and security or would constitute an unreasonable risk to the health and safety of the public.

§ 72.32 Duration of license; renewal.

Each license will be issued for a fixed period of time to be specified in the license but not to exceed 20 years. Licenses may be renewed by the Commission upon expiration of that period, upon application of the licensee.

§ 72.33 License conditions.

(a) Each license issued under this part will include license conditions. The license conditions will be derived from the analyses and evaluations included in the safety analysis report, and amendments thereto, submitted pursuant to § 72.15, and from the proposed license conditions submitted by the applicant pursuant to § 72.16. The Commission may also include such additional license conditions as the Commission finds appropriate.

(b) License conditions will include items in the following categories:

(1) *Functional and operating limits and monitoring instruments and limiting control settings.* (i) Functional and operating limits for an ISFSI are limits upon fuel handling and storage conditions which are found to be necessary to protect the integrity of the stored fuel and guard against excessive occupational exposures and the uncontrolled release of radioactive materials. (ii) Monitoring instruments and limiting control settings for an ISFSI are settings for alarms or mechanical devices related to those fuel handling and storage conditions having significant safety functions.

(2) *Limiting conditions.* Limiting conditions are the lowest functional capability or performance levels of equipment required for safe operation.

(3) *Surveillance requirements.* Surveiliance requirements are requirements relating to tests, calibrations, and inspections to assure that the necessary integrity of required systems, components and the fuel in storage is maintained, that operation of the installation will be within the required safety limits, and that the limiting conditions required for safe storage will be met.

(4) *Design features.* Design features to be included are those features of the installation such as materials of construction and geometric arrangements, which, if altered or modified, would have a significant effect on safety and are not covered in categories described in subparagraphs (1), (2), and (3) of this paragraph (c).

(5) *Administrative controls.* Administrative controls are the provisions relating to organization and management procedures, recordkeeping, review and audit, and reporting necessary to assure that the operations involved in the storage of spent fuel in an ISFSI are performed in a safe manner.

(c) In addition to the conditions described in paragraph (a) of this section, every license issued under this part shall be subject to the following conditions, whether stated therein or not:

(1) Neither the license, nor any right thereunder, shall be transferred, assigned, or disposed of in any manner, either voluntarily or involuntarily, directly or indirectly, through transfer of control of the license to any person, unless the Commission shall, after securing full information, find that the transfer is in accordance with the provisions of the Atomic Energy Act and give its consent in writing.

(2) The license shall be subject to revocation, suspension, modification, or amendment as provided in the Atomic Energy Act and Commission regulations, in accordance with the procedures provided by the Atomic Energy Act and Commission regulations.

(3) The licensee shall at any time before expiration of the license, upon request of the Commission, submit written statements, signed under oath or affirmation, to enable the Commission to determine whether or not the license should be modified, suspended, or revoked.

(4) Prior to the receipt of spent fuel for storage at an ISFSI, the licensee shall have in effect an NRC approved program covering the training and certification of ISFSI personnel which shall meet the requirements of subpart I of this part.

(5) the licensee shall not permit the manipulation of the safety-related equipment and controls of the installation by any one whom the licensee has not certified as being adequately trained to perform such manipulations.

(d) *Effluent controls.* Effluent controls are operating controls, including monitoring and testing controls and systems, and procedures required to keep releases of radioactive materials to unrestricted areas during normal operations and expected operational occurences within the limits stated in EPA regulation, 40 CFR Part 190, "Environmental Radiation Protection Standards for Nuclear Power Operations," as an upper limit. Each license authorizing the storage of spent fuels under this part will include license conditions that, in addition to requiring compliance with the limits and the as low as reasonably achievable provisions of part 20 of this chapter and the design objective included (or referenced) in paragraph (2) below, require:

(1) That operating by procedures for control of effluents by established and followed and equipment installed in the radioactive waste system be maintained and used as to meet the requirements of 40 CFR Part 190 as established in the license conditions.

(2) The submission of a report to the Commission within 60 days after June 30 and December 31 of each year specifying the quantity of each of the principal radionuclides released to unrestricted areas in liquid and in gaseous effluents during the previous 6 months of operation, and such other information as may be required by the Commission to estimate maximum potential annual radiation doses to the public resultifig from effluent releases. If quantities of radioactive materials released during the reporting period are significantly above design objectives, the report shall cover this specifically. On the basis of such reports and any additional information the Commission may obtain from the licensee or others, the Commission may from time to time require the licensee to take such action as the Commission deems appropriate.

(e) Maintenance of safeguards contingency plan procedures pursuant to § 72.81(d).

§ 72.34 Changes, tests and experiments.

(a)(1) The holder of a license issued under this part may (i) make changes in the installation as described in the safety analysis report, (ii) make changes in the procedures as described in the safety analysis report, and (iii) conduct tests or experiments not described in the safety analysis report, without prior Commission approval, unless the proposed change, test or experiment involves a change in the license conditions incorporated in the license or an unreviewed safety question.

(2) A proposed change, test, or experiment shall be deemed to involve an unreviewed safety question (i) if the probability of occurrence or the consequences of an accident or malfunction of equipment important to safety previously evaluated in the safety analysis report may be increased; or (ii) if a possibility for an accident or malfunction of a different type than any evaluated previously in the safety analysis report may be created; or (iii) if the margin of safety as

OCT 6 1978

V 43 / 195
OCT 6 1978

defined in the basis for any license condition is reduced.

(b) The licensee shall maintain records of changes in the installation and of changes in procedures made pursuant to this section, to the extent that such changes constitute changes in the installation as described in the safety analysis report or constitute changes in procedures as described in the safety analysis report. The licensee shall also maintain records of tests and experiments carried out pursuant to paragraph (a) of this section. These records shall include a written safety evaluation which provides the bases for the determination that the change, test or experiment does not involve an unreviewed safety question. The licensee shall furnish to the Commission, or the appropriate regional office, annually or at such shorter intervals as may be specified in the license, a report containing a brief description of such changes, tests and experiments, including a summary of the safety evaluation of each. Any report submitted by a licensee pursuant to this paragraph will be made a part of the public record of the licensing proceeding. In addition to a signed original, 12 copies of each report of changes shall be filed. The records of changes in the installation and of changes in procedures and records of tests shall be maintained for the lifetime of the installation.

(c) The holder of a license issued under this part who desires (1) a change in license conditions or (2) to make a change in the installation or the procedures described in the safety analysis report or to conduct tests or experiments not described in the safety analysis report, which involve an unreviewed safety question or a change in license conditions, shall submit an application for amendment of his license pursuant to § 72.39.

(d) The licensee shall make no change which would decrease the effectiveness of the physical security plan prepared pursuant to § 72.81 without the prior approval of the Commission. A licensee desiring to make such a change shall submit an application for an amendment to his license purusant to § 72.39. The licensee shall maintain records of changes to the plan made without prior Commission approval, for a period of 2 years from the date of the change, and shall furnish the Commission a report containing a description of each change within 2 months after the change is made.

TRANSFERS OF LICENSES—CREDITORS' RIGHTS—SURRENDER OF LICENSES

§ 72.36 Transfer of licenses.

(a) No license issued under this part or any right thereunder, shall be transferred, assigned, or in any manner disposed of, either voluntarily or involuntarily, directly or indirectly, through transfer of control of the license to any person, unless the Commission shall give its consent in writing.

(b)(1) An application for transfer of a license shall include as much of the information described in §§ 72.14, 72.15 and 72.16 with respect to the identity and technical and financial qualifications of the proposed transferee as would be required by those sections if the applications were for an initial license. One signed original of the application executed under oath or affirmation plus 25 copies shall be submitted.

(2) The Commission may require additional information such as data respecting proposed protection from radioactive materials and the applicant's qualifications in this technology. The application shall include also a statement of the purposes for which the transfer of the license is requested and the nature of the transaction necessitating or making desirable the transfer of the license.

(3) The Commission may require any person who submits an application for license pursuant to the provisions of this section to file a written consent from the existing licensee or a certified copy of an order or judgment of a court of competent jurisdiction attesting to the person's right subject to the licensing requirements of the Act and these regulations to possession of the spent fuel and the storage installation involved.

(c) After appropriate notice to interested persons, including the existing licensee, and observance of such procedures as may be required by the act or regulations or orders of the Commission, the Commission will approve an application for the transfer of a license, if the Commission determines:

(1) That the proposed transferee is qualified to be the holder of the license; and

(2) That transfer of the license is otherwise consistent with applicable provisions of law, regulations, and orders issued by the Commission pursuant thereto.

§ 72.37 Creditor regulations.

(a) Pursuant to section 184 of the act, the Commission consents, without individual application, to the creation of any mortgage, pledge, or other lien upon special nuclear material contained in spent fuel not owned by the United States which is the subject of a license or upon any interest in such special nuclear material in spent fuel: *Provided:*

(1) That the rights of any creditor so secured may be exercised only in compliance with and subject to the same requirements and restrictions as would apply to the licensee pursuant to the provisions of the license, the Atomic Energy Act of 1954, as amended, and regulations issued by the Commission pursuant to said act; and

(2) That no creditor so secured may take possession of the spent fuel pursuant to the provisions of this section prior to either the issuance of a license from the Commission authorizing such possession or the transfer of the license.

(b) Any creditor so secured may apply for transfer of the license covering such spent fuel by filing an application for transfer of the license pursuant to § 72.36(b). The Commission will act upon such application pursuant to § 72.36(c).

(c) Nothing contained in this regulation shall be deemed to affect the means of acquiring, or the priority of, any tax lien or other lien provided by law.

(d) As used in this section, "Creditor" includes, without implied limitation, the trustee under any mortgage, pledge or lien on spent fuel in storage made to secure any creditor, any trustee or receiver of such spent fuel appointed by a court of competent jurisdiction in any action brought for the benefit of any creditor secured by such mortgage, pledge or lien, any purchaser of such spent fuel at the sale thereof upon foreclosure of such mortgage, pledge, or lien or upon exercise of any power of sale contained therein, or any assignee of any such purchaser.

§ 72.38 Applications for termination of licenses.

(a) Any licensee may apply to the Commission for authority to surrender a license voluntarily and to dismantle the installation and dispose of the materials stored therein. The Commission may require information, including information as to proposed procedures for the disposal of radioactive material, decontamination of the site, to provide reasonable assurance that the decommissioning and disposal will be performed in accordance with the regulations in this chapter and will not be inimical to the common defense and security or to the health and safety of the public. The application for termination of a license issued under this part shall be submitted as one signed original plus 25 copies.

(b) If the application demonstrates that the decommissioning of the installation and disposal of the materials stored therein will be performed in accordance with the regulations in this chapter and will not be inimical to the common defense and security or to the health and safety of the public, and after notice to interested persons, the Commission may issue an order authorizing such decommissioning and disposal, and providing for the termination of the license upon completion of such procedures in accordance with any conditions specified in the order.

AMENDMENT TO LICENSE AT REQUEST OF HOLDER AND REVOCATION, SUSPENSION AND MODIFICATION OF LICENSES

§ 72.39 Application for amendment to license.

Whenever a holder of a license desires to amend the license, an application for an amendment shall be filed with the Commission, fully describing the changes desired, and the reasons for such changes, and following as far as applicable the form prescribed for original applications.

§ 72.40 Issuance of amendment.

In determining whether an amendment to a license will be issued to the applicant, the Commission will be guided by the considerations which govern the issuance of initial licenses to the extent applicable and appropriate.

§ 72.41 Revocation, suspension and modification of licenses

(a) The terms and conditions of all licenses are subject to amendment, revision, or modification by reason of amendments to the Atomic Energy Act of 1954, or by reason of rules, regulations or orders issued in accordance with the Act or any amendments thereto.

(b) Any license may be revoked, suspended or modified in whole or in part for any material false statement in the application or any statement of fact required under Section 182 of the Act, or because of conditions revealed by such application or statement of fact or any report, record, or inspection or other means which would warrant the Commission to refuse to grant a license on an original application, or for failure to operate an installation in accordance with the terms of the license, or for violation of, or failure to observe any of the terms and conditions of the Act, or any regulation, license or order of the Commission.

(c) Upon revocation, suspension or modification of a license, the Commission may immediately cause the retaking of possession of all special nuclear material contained in spent fuel held by the licensee. In cases found by the Commission to be of extreme importance to the national defense and security, or to the health and safety of the public, the Commission may take possession of any spent fuel held by the licensee prior to any of the procedures provided under sections 551-558 of title 5 of the United States Code.

§ 72.42 Backfitting.

(a) The Commission may require the backfitting of an ISFSI if it finds that such action will provide substantial, additional protection which is required for either occupational or public health and safety. As used in this section, "backfitting" means a change in storage conditions which may require the addition, elimination or modification of structures, systems or components of an ISFSI, after the license has been issued.

(b) Nothing in this section shall be deemed to relieve a holder of a license from compliance with the rules, regulations, or orders of the Commission.

(c) The Commission may at any time require a holder of a license to submit such information concerning the backfitting or the proposed backfitting of the installation as it deems appropriate.

Subpart D—Records, Reports, Inspections and Enforcement

§ 72.51 Material balance, inventory, and records requirements for stored materials.

(a) Each licensee shall keep records showing the receipt, inventory (including location), disposal, acquisition, and transfer of all spent fuel in storage regardless of its origin or method of acquisition.

(b) Each licensee shall conduct a physical inventory of all spent fuel in storage at intervals not to exceed 12 months or as otherwise directed by the Commission.

(c) Each licensee shall establish, maintain and follow written material control and accounting procedures which are sufficient to enable the licensee to account for the spent fuel in storage under license.

(d) Records of spent fuel in storage shall be kept in duplicate for as long as the spent fuel is in storage at an ISFSI. The duplicate set of records shall be kept at a separate location far enough removed from the original records so that a single event would not destroy both sets of records. Records of spent fuel transferred out of an ISFSI shall be preserved for a period of 5 years after the date of transfer.

§ 72.52 Reports of accidental criticality or loss of special nuclear material.

Each licensee shall report immediately to the Director of the appropriate Nuclear Regulatory Commission Inspection and Enforcement Regional Office by telephone, and telegram, or teletype, any case of accidental criticality and any loss of special nuclear material contained in spent fuel.

§ 72.53 Material Status Reports.

Each licensee shall complete and submit to the Commission Material Status Reports on Form NRC-742, in accordance with printed instructions for completing the form, concerning special nuclear material contained in spent fuel possessed, received, transferred, disposed of or lost by the licensee. All such reports shall be made as of March 31 and September 30 of each year and shall be filed with the U.S. Department of Energy, P.O. Box E, Oak Ridge, Tennessee, 37830, within thirty (30) days after the end of the period covered by the report. The Commission may permit a licensee to submit Material Status Reports at other times when good cause is shown.

§ 72.54 Nuclear Material Transfer Reports.

Each licensee who transfers and each licensee who receives spent fuel shall complete and distribute a Nuclear Material Transaction Report on Form NRC-741, in accordance with printed instructions for completing the form, whenever he transfers or receives spent fuel. Each licensee who transfers spent fuel shall submit a copy of Form NRC-741 to the U.S. Department of Energy, P.O. Box E, Oak Ridge, Tennessee 37830, and three copies to the receiver of the material promptly after the transfer takes place. Each licensee who receives spent fuel shall submit a copy of Form NRC-741 to the Department of Energy and to the shipper of the material within 10 days after the spent fuel is received.

§ 72.55 Inspections and tests.

(a) Each licensee shall afford to the Commission at all reasonable times opportunity to inspect spent fuel in storage and the premises and installation wherein such spent fuel is stored.

(b) Each licensee shall make available to the Commission for inspection, upon reasonable notice, records kept by the licensee pertaining to his receipt, possession, or transfer of spent fuel.

(c) Each licensee shall perform, or permit the Commission to perform, such tests as the Commission deems appropriate or necessary for the administration of the regulations in this part, including tests of (1) spent fuel during handling and storage, (2) spent fuel handling and storage facilities, (3) radiation detection and monitoring equipment, and (4) other equipment used in connection with spent fuel storage.

§ 72.56 Maintenance of other records and reports.

(a) Each licensee shall maintain such records and make such reports in connection with the licensed activities as may be required by the conditions of the license or by the rules, regula-

V 43 / 195

0 C 6 7 8

tions, and orders of the Commission in effectuating the purposes of the Act.

(b) Each licensee shall, upon each issuance of its annual financial report, including the certified financial statements, file a copy thereof with the Commission.

(c) Records which are required by the regulations in this part or by the license conditions shall be maintained for a period specified by the appropriate regulation or license condition. If a retention period is not otherwise specified, such records shall be maintained until the Commission authorizes their disposition.

(d) Records which must be maintained pursuant to this part may be the original or a reproduced copy or microform if such reproduced copy or microform is duly authenticated by authorized personnel and the microform is capable of producing a clear and legible copy after storage for the period specified by Commission regulations.

(e) If there is a conflict between the Commission's regulations in this part, license condition, or other written Commission approval or authorization pertaining to the retention period for the same type of record, the retention period specified in the regulations in this part for such records shall apply unless the Commission, pursuant to § 72.8, has granted a specific exemption from the record retention requirements specified in the regulations in this part.

§ 72.57 Violation.

An injunction or other court order may be obtained prohibiting any violation of any provision of the Atomic Energy Act of 1954, as amended, or Title II of the Energy Reorganization Act of 1974, as amended, or any regulation or order issued thereunder. A court order may be obtained for the payment of a civil penalty imposed pursuant to section 234 of the Atomic Energy Act for violation of section 53, 57, 62, 63, 81 or 82 of the Atomic Energy Act, or section 206 of the Energy Reorganization Act of 1974, or any rule, regulation, or order issued thereunder, or any term, condition, or limitation of any license issued thereunder, or for any violation for which a license may be revoked under section 186 of the Atomic Energy Act. Any person who willfully violates any provision of the Atomic Energy Act, or any regulation or order issued thereunder, may be guilty of a crime and, upon conviction, may be punished by fine or imprisonment or both, as provided by law.

Subpart E—Siting criteria

§ 72.61 General Criteria.

(a) Site characteristics which may directly affect the safety of the ISFSI shall be investigated and assessed.

(b) Proposed sites for the ISFSI shall be examined with respect to the frequency and the severity of external natural and man-induced events that could affect the safe operation of the installation.

(c) Design basis external events shall be determined for each combination of proposed site and proposed installation design.

(d) Proposed sites with design basis external events for which adequate protection cannot be provided through installation design shall be deemed unsuitable for the location of the ISFSI.

(e) For each proposed site, the potential for radiological consequences in the region shall be evaluated with due consideration of the characteristics of the population, including its distribution.

(f) For each proposed site, pursuant to Part 51 of this chapter, the potential for environmental impact to the region shall be evaluated with due consideration of the characteristics of the regional environs, including its historical and aesthetic value.

§ 72.62 Criteria for design basis external natural events.

(a) Natural phenomena which may exist or can occur in the region of a proposed site shall be identified and assessed according to their potential effects on the safe operation of the installation. The important natural phenomena for which design basis should be derived shall be identified.

(b) Historical records of the occurrence and severity of those important natural phenomena shall be collected for the region and evaluated for reliability, accuracy and completeness.

(c) Appropriate methods shall be adopted for establishing the design basis natural events for important natural phenomena. The methods should be justified as being compatible with the characteristics of the region and the current state of knowledge.

§ 72.63 Criteria for design basis external man-induced events.

(a) The region shall be examined for man-made facilities and activities that might endanger the proposed ISFSI. The important man-induced phenomena for which design basis external man-induced events should be derived shall be identified.

(b) Information concerning the occurrences and severity of those important man-induced phenomena shall be collected and analyzed for reliability, accuracy and completeness.

(c) Appropriate methods shall be adopted for establishing the design basis external man-induced events for those phenomena. The methods should be justified as being campatible with the characteristics of the region and the current state of knowledge.

§ 72.64 Criteria for defining potential effects of the ISFSI on the region.

(a) The proposed site shall be examined with respect to the effects on people in the region resulting from the release of radioactive materials under normal and accident conditions; in this evaluation unusual regional and site characteristics shall be taken into account.

(b) Each site shall be examined with respect to the effects on the regional environment resulting from construction, operation and decommissioning of the ISFSI; in this evaluation unusual regional and site characteristics shall be taken into account.

(c) Effects which would otherwise be unacceptable shall be compensated for by the ISFSI design or the site shall be deemed unsuitable.

§ 72.65 Criteria for regional distribution of population.

(a) The proposed site shall be evaluated with respect to the present and future character and distribution of the human population of the region. Such evaluation, which should include consideration of present and projected future uses of land and water within the region, shall also take into account any special characteristics which may influence the potential consequences of a release of radioactive material during the operational lifetime of the ISFSI.

(b) A controlled area and a neighboring area shall be established for each site.

(c) The licensee shall have authority within the controlled area to determine all activities including exclusion or removal of personnel and property from the area.

(d) The neighboring area of a proposed site shall be evaluated from the perspective of the potential for adverse consequences to the human population or environment and of the capability of implementing protective measures as may be necessary to mitigate the immediate effects of a release of radioactive material.

(e) The distribution of the human population in the region surrounding the site shall be evaluated with respect to both the potential for adverse consequences to regional populations from normal and potential accidental releases of radioactive material during operations and decommissioning of the ISFSI.

(f) Effects which would otherwise be unacceptable shall be compensated for by the ISFSI design or the site shall be deemed unsuitable.

§ 72.66 Criteria for defining acceptable seismic characteristics.

(a) A peak horizontal ground acceleration of not greater than 0.25 g with a recurrence interval of at least 500 years (equivalent to a 90 percent probability of not being exceeded in 50 years) shall be deemed suitable for an ISFSI site and require only the foundation engineering and geologic hazards investigations covered in the following paragraph (b). However, as an alternative approach the applicant has the optionof establishing a site specific "g value" by the procedures of Part 100 of this chapter.

(b) An ISFSI founded on bedrock and (and meeting criterion "a") is acceptable, and no detailed site-specific earthquake analysis is required unless some unusual geologic characteristic is identified (e.g., active faulting, mass wasting, cavernous or karst terrain, subsidence collapse or uplift potential, etc.). If not founded on bedrock and where a potential exists for soil liquefaction or other soil instability due to vibratory ground motion or other anomaly, it must be shown by site-specific investigations and laboratory analysis that soil failure could not occur in the foundation materials during the operating life of the installation.

(c) For ISFSI designs other than the water basin type proposed sites will be evaluated on the basis of a site-specific investigation and analysis.

§ 72.67 Criteria for defining potential radiological consequences.

(a) During normal operations and anticipated occurrences, the annual dose equivalent shall not exceed 25 mrem to the whole body, 75 mrem to the thyroid and 25 mrem to any other organ of an actual individual located outside the controlled area as a result of planned discharges of radioactive materials in the general environment.[2] In this evaluation unusual regional and site characteristics shall be taken into account.

(b) Under accident conditions, the calculated exposure from the controlling design basis accident shall not exceed 5 Rem in 2 hours at the outside boundary of the controlled area.

Subpart F—General Design Criteria

§72.71 General design criteria.

Pursuant to the provisions of § 72.15, an application to store spent fuel in an ISFSI must include the principal design criteria for the proposed storage installation. The principal design criteria establish the design, fabrication, construction, testing, and performance requirements for structures, systems, and components important to safety, as defined in § 72.3. The general design criteria identified in this section establish minimum requirements for the principal safety-related design criteria for an ISFSI. Any omissions in these general design criteria do not relieve the applicant from the requirement of providing the necessary safety features in the design of this installation.

OVERALL REQUIREMENTS

(1) *Quality standards.* Structures, systems, and components important to safety shall be designed, fabricated, erected, and tested to quality standards commensurate with the importance of the function to be performed.

(2) Protection against Environmental Conditions and Natural Phenomena.

(i) Structures, systems, and components important to safety shall be designed to accommodate the effects of and to be compatible with site characteristics and environmental conditions associated with normal operation, maintenance and testing of the ISFSI, and with postulated accidents.

(ii) Structures, systems, and components important to safety shall be designed to withstand the effects of natural phenomena such as earthquakes (with a horizontal ground motion acceleration of at least 0.25g), tornadoes (excluding tornado missiles), lightning, hurricanes, floods, tsunami, and seiches without impairing their capability to perform safety functions. The design bases for these structures, systems, and components shall reflect: (A) Appropriate consideration of the most severe of the natural phenomena reported for the site and surrounding area, with appropriate margins to take into account the limitations in the quantity of the historical data and the period of time in which the data have been accumulated; and (B) appropriate combinations of the effects of normal and accident conditions and the effects of natural phenomena.

(iii) Capability for determining the intensity of natural phenomena which may occur for comparison with design bases of structures, systems, and components important to safety shall be provided.

(iv) If an ISFSI is located over an aquifer, measures must be taken to preclude the transport of radioactive materials to man and the environs through this potential pathway.

(3) *Protection against fires and explosions.* Structures, systems, and components important to safety shall be designed and located so as to continue to perform their safety functions effectively under fire and explosion exposure conditions. Noncombustible and heat-resistant materials shall be used wherever practical throughout the installation, particularly in locations vital to the control of radioactive materials, and to the maintenance of safety control functions. Explosion and fire detection, alarm, and suppression systems shall be designed and provided with sufficient capacity and capability to minimize the adverse effects of fires and explosions on structures, systems, and components important to safety. The design of the facility shall include provisions to protect against adverse effects which might result from either the operation or the failure of the fire suppression system.

(4) *Sharing of structures, systems, and components.* Structures, systems, and components important to safety shall not be shared between an ISFSI and other plants unless it is shown that such sharing will not impair the capability of the ISFSI to perform its safety functions, including the capability for return to a safe condition in the event of an accident or incident.

(5) *Proximity of sites.* An ISFSI located near other nuclear facilities shall be designed and operated to ensure that the cumulative effects of their combined operations will not result in a significant additional risk to the health and safety of the public.

(6) *Testing and maintenance of systems and components.* Systems and components that have safety-related functions shall be designed to permit inspection, maintenance, and testing to ensure their continued functioning to meet their design objectives.

(7) *Emergency capability.* Structure, systems, and components important to safety shall be designed to assure capability of continuity of operations and handling of the emergency. The design shall ensure capability for use, as necessary, of onsite facilities and available offsite facilities and services such as hospitals, fire and police departments, ambulance service, and other emergency agencies.

(8) *Confinement barriers and systems.* (i) The fuel cladding shall be protected against degradation and gross ruptures.

(ii) For underwater storage of spent fuel in which the pool water serves as a shield and a confinement medium for radioactive materials, systems designed for maintaining water purity and the pool water level shall be designed so that any maloperation or failure in those systems from any cause will not cause the water level to fall below safe limits. Drains, permanently connected systems and other features that by maloperation or failure could cause a significant loss of water shall not be installed or included in the design. Pool water level monitoring equipment shall be provided to alarm both locally and in a continuously manned location if the water level in the fuel storage pools falls below a predetermined level.

(iii) Ventilation systems shall be provided where necessary, e.g., for the cask venting station, to assure the confinement of airborne radioactive particulate materials during normal or off-normal conditions.

(9) *Instrumentation and control systems.* Instrumentation and control systems shall be provided to monitor safety-related systems over anticipated ranges for normal operation and off-normal operation. Those instruments and control systems which must remain operational under accident conditions must be identified and designed to remain operable.

(10) *Control room or control areas.* A control room or control areas shall be designed to permit occupancy and actions to be taken to operate and monitor the ISFSI safely under normal conditions and to maintain the ISFSI in a safe condition under off-normal or accident conditions.

(11) *Utility services.* (i) The design of each utility service system required for emergency conditions shall provide for the meeting of safety demands under normal and off-normal conditions. The design of safety-related utility services and distribution shall include redundant systems to the extent

[2] 40 CFR 190.11.

V 4 3 / 1 9 5

necessary to maintain, with adequate capacity, the ability to perform safety functions assuming a single failure.

(ii) Emergency utility services shall be designed to permit testing of the functional operability and capacity, including the full operational sequence, of each system for transfer between normal and emergency supply sources, and the operation of associated safety systems.

(iii) Provisions shall be made so that, in the event of a loss of the primary electric power source or circuit, reliable and timely emergency power will be provided to instruments, utility service systems, and operating systems including the security central alarm station, in amounts sufficient to allow safe storage conditions to be maintained with all safety devices essential to safe storage functioning.

NUCLEAR CRITICALITY SAFETY

(12) *Design for criticality safety.* All handling, transfer and storage systems shall be designed to be maintained subcritical and to insure that no nuclear criticality accident can occur unless at least two unlikely (i.e., very low probability), independent, and concurrent or sequential changes have occurred in the conditions essential to nuclear criticality safety. The design of handling, transfer and storage systems shall include margins of safety for the nuclear criticality parameters that are commensurate with the uncertainties in the handling, transfer, and storage conditions, in the data and methods used in calculations, and in the nature of the immediate environment under accident conditions.

(13) *Acceptable methods of control.* (i) Favorable geometry (spacing) is the standard method of nuclear criticality control. Subcriticality is assured by limiting the reactivity through the control of spacing of the individual storage unit (one or more fuel assemblies), and for underwater storage, by the neutron absorption by the water between storage units. Storage racks must be structurally compatible with seismic design criteria.

(ii) The use of permanently fixed neutron-absorbing materials (poisons) is an alternative method of criticality control. Where solid neutron-absorbing materials are used for the prevention of nuclear criticality, the design shall provide for positive means to verify their continued efficacy.

RADIOLOGICAL PROTECTION

(14) *Exposure control.* Appropriate radiation protection systems and programs shall be provided for all areas and operations where plant personnel may be exposed to levels of radiation or airborne radioactive materials significantly above background levels to insure that exposures are within the limits of Part 20 and are as low as is reasonably achievable. Structures, systems, and components for which operation, maintenance, and required inspections may involve such exposure shall be designed, fabricated, located, shielded, controlled and tested so as to control external and internal radiation exposures to personnel. This shall include means to:

(i) Prevent the accumulation of or provide for decreasing the content of radioactive material in those systems to which access by personnel is required;

(ii) Provide for control of access to areas of potential contamination or high radiation within the ISFSI;

(iii) Assure that contamination can be monitored and controlled;

(iv) Minimize the time required to perform work in the vicinity of radioactive components, such as by providing sufficient space for ease of operation and designing equipment for ease of repair and replacement; and

(v) Provide shielding to assure that exposures to personnel in accessible areas are within the limits of Part 20 and are as low as is reasonably achievable.

(15) *Radiation alarm systems.* Radiation alarm systems shall be provided to warn operating personnel of significant increases in radiation levels in accessible work areas and of excessive concentrations of radioactive material in effluents. Such systems shall be designed with capability to permit testing of their operability.

(16) *Effluent monitoring.* Effluent systems shall be designed to include means for measuring the amount of radionuclides in any effluent. In order that the data thus measured and recorded can be used, a means of measuring the flow of environmental diluting media, either air or water, shall be provided.

(17) *Effluent control.* The design of the ISFSI shall include means to minimize the release in effluents of radioactive materials in any form, during normal operations and under accident conditions. Systems provided to guard against the release of radioactive materials shall be designed to be monitored and tested, and shall be provided with alarms. Capability shall be provided for prompt cessation of the flow of contaminated effluents or for retention of such effluents as is necessary to ensure that the concentrations and total quantities of radioactive materials in effluents are maintained within the limits of Part 20 and are as low as is reasonably achievable.

SPENT FUEL AND RADIOACTIVE WASTE STORAGE AND HANDLING

(18) *Spent fuel and radioactive waste storage and handling systems.* Spent fuel storage, radioactive waste storage, and other systems that might contain or handle radioactive materials shall be designed to assure adequate safety under normal and accident conditions. These systems shall be designed (i) with a capability to test and monitor components important to safety, (ii) with suitable shielding for radiation protection under normal and accident conditions, (iii) with confinement systems, (iv) with a heat removal capability having testability and reliability consistent with the importance to safety, and (v) to minimize the quantity of radioactive wastes generated.

(19) *Waste treatment.* Radioactive waste treatment facilities shall be provided. These facilities shall be designed to concentrate all site generated wastes and convert them into a form suitable for interim storage and ultimate final disposal.

DECOMMISSIONING

(20) *Decommissioning.* An ISFSI shall be designed to facilitate decontamination of structures and equipment and to minimize the quantity and facilitate the removal of radioactive wastes and contaminated equipment at the time the installation is permanently decommissioned.

Subpart G—Quality Assurance

§ 72.75 Quality assurance program; records.

(a) A quality assurance program based on the criteria in Appendix B of Part 50 of this chapter shall be established and implemented to provide assurance that the safety-related structures, systems and components of an ISFSI will perform their safety functions. The application of the quality assurance program should be commensurate with the importance of individual structures, systems and components to safety. The quality assurance program should cover the activities of designing, purchasing, fabricating, handling, shipping, storing, cleaning, erecting, installing, inspecting, testing, operating, maintaining, repairing, and modifying.

(b) As used in this section, "quality assurance" means all those planned and systematic actions necessary to provide confidence that a structure, system, or component will perform satisfactorily in service. Quality assurance includes quality control, which comprises those quality assurance actions related to the physical characteristics of a material, structure, component, or system which provide a means to control the quality of the material, structure, component, or system to predetermined requirements.

(c) Appropriate records of the design, fabrication, erection, and testing of structures, systems, and components important to safety shall be maintained by or under the control of the licensee throughout the life of the installation.

Subpart H—Plant Protection

§ 72.81 Physical security plan.

(a) The plan for detailed security measures for physical protection shall consist of two parts. Part I shall demonstrate how the applicant plans to comply with the applicable requirements of Part 73 of this chapter at the proposed installation. Part II shall list tests, inspections, audits, and other means to be used to demonstrate compliance with such requirements. Ten copies are required.

(b) A description of the design for physical protection shall show the site layout and ISFSI design features which will make the installation less vulnerable to sabotage, and shall include:

(1) The principal design criteria for the physical protection of the proposed installation.

(2) The design bases and the relation of the design bases to the principal design criteria submitted pursuant to paragraph (a) of this section; and

(3) Information relative to materials of construction, equipment, general arrangement, and proposed quality assurance program sufficient to provide reasonable assurance that the final installation will conform to the design bases for the principal design criteria submitted pursuant to paragraph (a) of this section.

(c) The licensee safeguards contingency plan for dealing with threats and industrial sabotage are defined in Part 73 relating to nuclear facilities licensed under Part 50 of this chapter. This plan shall include the first four categories of information contained in the applicant's safeguards contingency plan. (The first four categories of information, as set forth in Appendix C to Part 73 of this chapter are Background, Generic Planning Base, Licensee Planning Base, and Responsibility Matrix. The fifth category of information, Procedures, does not have to be submitted for approval.)

(d) The licensee shall prepare and maintain safeguards contingency plan Procedures in accordance with Appendix C of 10 CFR Part 73 for effecting the actions and decisions contained in the Responsibility Matrix of his safeguards contingency plan. The licensee shall make no change that would decrease the safeguards effectiveness of the first four categories of information (Background, Generic Planning Base, Licensee Planning Base, and Responsibility Matrix) contained in any licensee safeguards contingency plan prepared pursuant to §§ 72.81(c) and 70.22(g), 70.22(j), 73.30(g), or 73.40 of this chapter without the prior approval of the Commission. A licensee desiring to make such a change shall submit an application for an amendment to his license pursuant to § 72.39 of this chapter. The licensee may make changes to the licensee safeguards contingency plan without prior Commission approval if the changes do not decrease the safeguards effectiveness of the plan. The licensee shall maintain records of changes to any such plan made without prior approval for a period of 2 years from the date of the change and shall furnish to the Director of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, with a copy to the appropriate NRC Regional Office specified in Appendix A of Part 73 of this chapter, a report containing a description of each change within 2 months after the change is made.

Subpart I—Training and Certification of ISFSI Personnel

§ 72.91 Scope of training program.

Manipulation of equipment and controls which have been identified as safety-related in the safety analysis report shall be limited to trained personnel, or in an emergency situation, under the direct supervision of an individual with adequate training in such operation. Supervisory personnel who direct the manipulation of safety-related equipment and controls must have a level of training in such operations comparable to that of trained operating personnel.

§ 72.92 Responsibility for training program.

The training and proficiency certification of operating personnel is the responsibility of the licensee under this part.

§ 72.93 Physical requirements.

(a) The physical condition and the general health of personnel certified for the manipulation of safety-related equipment and controls must not be such as might cause operational error endangering other in-plant personnel or the public health and safety. Any physical or mental condition which might cause impaired judgment or motor coordination must be considered in the selection of personnel for safety-related activities. Such conditions need not categorically disqualify a person provided appropriate provisions are made to accommodate such defect.

§ 72.94 Submission for approval.

The applicant for a license under this part must submit his program for training, proficiency testing and certification of ISFSI personnel to the Commission for approval at least 6 months prior to the scheduled receipt of the first materials for storage.

Dated at Washington, D.C., this 29th day of September 1978.

For the Nuclear Regulatory Commission.

SAMUEL J. CHILK,
Secretary of the Commission.

[Docket No. 76N-0324]

TENTATIVE FINAL REGULATION RELATING TO INVESTIGATIONAL DEVICE EXEMPTIONS

Extension of Comment Period

AGENCY: Food and Drug Administration.

ACTION: Tentative final regulation; extension of comment period.

SUMMARY: This document extends the time for submission of comments of the tentative final order for investigational device exemptions (IDE's) and all matters discussed at the Food and Drug Administration's (FDA) hearing August 7, 1978 on the tentative final order. The agency is taking this action in response to several requests for an extension.

DATE: The deadline for written comments is extended until December 5, 1978.

ADDRESS: Written comments to the Hearing Clerk (HFA-305), Food and Drug Administration, Room 4-65, 5600 Fishers Lane, Rockville, Md. 20857.

FOR FURTHER INFORMATION CONTACT:

Frank Morlock, Bureau of Medical Devices (HFK-70), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Avenue, Silver Spring, Md. 20910, telephone 301-427-7114.

SUPPLEMENTARY INFORMATION: On August 7, 1978, a hearing before the Commissioner of Food and Drugs was held at FDA headquarters in Rockville, Md., to receive comments and views from interested persons on the tentative final order on procedures for IDE's. The tentative final order was published in the FEDERAL REGISTER on May 12, 1978 (43 FR 20726) and the notice of hearing in the FEDERAL REGISTER on June 9, 1978 (43 FR 25142). The notice of hearing provided that the administrative record of the hearing would remain open until the end of the comment period on September 11, 1978, so that additional written comments and views concerning matters discussed during the hearing could be submitted.

The Commissioner has received two written and five oral requests for an extension of the comment period as a result of subsequent issuance of the following four related documents concerning clinical investigations and protection of human subjects: (1) Proposed rules of research involving children published by the Department of Health, Education, and Welfare in the FEDERAL REGISTER of July 21, 1978 (43 FR 31786); (2) proposed standards for institutional review boards for clinical investigators (43 FR 35186), and (3) proposed obligations of clinical investigators of regulated articles (43 FR 35210), both published by FDA in the FEDERAL REGISTER of August 8, 1978; and (4) Report and Recommendations on Institutional Review Boards, authored by the National Commission for the Protection of Human Subjects of Biomedical and Behavioral Research (the Commission) on September 1, 1978.

The element common to these seven requests is that it is in the public interest to extend the comment period to allow all interested parties suffi-

OCT 6 1978

V 43 / 195
OCT 6 78

cient time to analyze all related documents.

One request asked that the comment period for IDE's and obligations of clinical investigators be extended to the close of the comment period for the proposed rules on institutional review boards, which is December 6, 1978, or, alternatively, that the IDE comment period be extended for 30 days. Another request asked that the comment period be extended to November 1, 1978.

The Commissioner agrees that an extension of the comment period is in order.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 301, 501, 502, 520, 701(a), 702, 704, 801(d), 52 Stat. 1042-1053 as amended, 1049-1051 as amended, 1055-1057 as amended, 90 Stat. 565-574, 587 (21 U.S.C. 331, 351, 352, 360j, 371(a), 372, 374, 381)) and under authority delegated to him (21 CFR 5.1), the Commissioner hereby grants an extension of the comment period until December 5, 1978 to allow all interested parties an opportunity to review and analyze the transcript of the proceedings and all outstanding proposals relating to IDE's. This extension will also enable interested parties to comment on matters discussed at the hearing and on the effect of all the FDA proposals and Commission recommendations. A copy of the transcript of the hearing is available at the office of the Hearing Clerk.

Interested persons may, on or before December 5, 1978, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, room 4-65, 5600 Fishers Lane, Rockville, Md. 20857, written comments regarding the tentative final regulation and the matters relating to it discussed above. Four copies of all comments, identified by Docket No. 76N-0324, shall be submitted, except that individuals may submit single copies of comments. Received comments may be seen in the Hearing Clerk's office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: September 29, 1978.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Regulatory Affairs.

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

[29 CFR Part 1910]

[Docket No. H-112]

ACCESS TO EMPLOYEE EXPOSURE AND MEDICAL RECORDS

Public Hearings

AGENCY: Occupational Safety and Health Administration, Department of Labor.

ACTION: Notice of public hearings.

SUMMARY: On July 21, 1978, OSHA published a proposed rule on access to employee exposure and medical records and gave interested persons until September 22, 1978, to submit written comments. Based on the widespread interest expressed on the proposal, OSHA has decided to hold informal public hearings on the proposed rule, to be held on December 5, 12, and 15, 1978, in Washington, D.C., Chicago, and San Francisco, as set forth below.

DATES: Notices of intention to appear must be submitted by November 13, 1978, and copies of testimony and accompanying documents must be submitted by November 22, 1978.

ADDRESS: Documents pertaining to the hearing should be submitted to the OSHA Division of Consumer Affairs, Docket No. H-112, Room N-3635, U.S. Department of Labor, Third Street and Constitution Avenue NW., Washington, D.C. 20210, 202-523-8024.

FOR FURTHER INFORMATION CONTACT:

Mr. Kevin Conlon, OSHA Division of Consumer Affairs, Room N-3635, U.S. Department of Labor, 3d Third Street and Constitution Avenue NW., Washington, D.C. 20210, 202-523-8024.

SUPPLEMENTARY INFORMATION: On July 21, 1978, OSHA published in the FEDERAL REGISTER a proposed rule on access to employee exposure and medical records (43 FR 31371). The proposed rule includes requirements for the retention of all employee exposure and medical records which are maintained by employers, and for the availability of these records to employees, former employees, their designated representatives, and to OSHA and the National Institute of Occupational Safety and Health (NIOSH). The text of the proposed rule and a discussion of its background, purpose, and significant issues appeared in the July 21 FEDERAL REGISTER document.

In accordance with 5 U.S.C. 553, OSHA gave interested persons until September 22, 1978, to present written comments, views or arguments on any

issue raised by the proposal. As a result, OSHA has recieved a total of 212 comments to date. Several of these comments either requested extensions of time in which to file comments or asked that OSHA hold public hearings on this matter.

Based on the comments, it is evident that there is widespread interest in the proposed rule. In addition, OSHA is mindful of Executive Order 12044's ("Improving Government Regulations," 43 FR 12661) encouragement of the fullest possible public participation in agency rulemakings. Consequently, OSHA has decided that in this instance it is appropriate to go beyond the minimal requirements of the APA by providing public hearings on this proposal.

Accordingly, pursuant to section 8 of the OSH Act and 4 of the APA, an opportunity to submit oral testimony concerning all the issues raised by the proposed rule of July 21, including any environmental and economic impacts, will be provided at informal public hearings scheduled to begin at 9:30 a.m. as follows:

1. December 5, 1978, New Department of Labor Auditorium, New Department of Labor Building, Third Street and Constitution Avenue NW., Washington, D.C. 20210.

2. December 12, 1978, John C. Kluczynski, Federal Building, Conference Room 3619, 230 South Dearborn, Chicago, Ill. 60604.

3. December 15, 1978, Quality Inn, 2775 Van Ness, San Francisco, Calif. 94109.

OSHA witnesses will appear only at the Washington hearing. However, all testimony submitted prior to the hearing will be available at the Technical Data Center, Docket Office.

NOTICES OF INTENTION TO APPEAR

All persons desiring to participate at any of the hearings must file in quadruplicate a notice of intention to appear, postmarked on or before November 13, 1978, addressed to Mr. Kevin Conlon, OSHA Division of Consumer Affairs, Third Street and Constitution Avenue NW., Washington, D.C. 20210; telephone: 202-523-8024.

The notices of intention to appear, which will be available for inspection and copying at the OHSA Technical Data Center Docket Office, Room S-6212, telephone 202-523-7895, must contain the following information:

(1) The name, address, and telephone number of each person to appear;

(2) The capacity in which the person will appear;

(3) The city where the person intends to appear;

(4) The approximate amount of time requested for the presentation;

(5) The specific issues that will be addressed;

(6) A detailed statement of the position that will be taken with respect to each issue addressed; and

(7) Whether the person intends to submit documentary evidence, and if so, a brief summary of that evidence.

Persons who have not filed such notice will be permitted to present brief oral statements to the extent that time permits. Priority, however, will be given those who have previously filed a notice of intention to appear.

FILING OF TESTIMONY AND EVIDENCE BEFORE HEARING

Any person requesting more than 15 minutes for a presentation at the hearing, or who will submit documentary evidence, must provide in quadruplicate the complete text of his testimony, including any documentary evidence to be presented at the hearing, to the OSHA Division of Consumer Affairs. This material must be received by November 22, 1978, and will be available for inspection and copying at the Technical Data Center, Docket Office. Each such submission will be reviewed in light of the amount of time requested in the notice of intention to appear. In those instances where the information contained in the submission does not justify the amount of time requested, a more appropriate amount of time will be allocated and the participant will be notified of that fact.

Any person who has not substantially complied with this requirement may be limited to a 15-minute presentation and may be requested to return for questioning at a later time.

CONDUCT OF HEARINGS

The hearings will commence at 9:30 a.m. on December 5, 12, and 15, 1978 with a resolution of any procedural matters relating to the proceeding. The hearing will be conducted in accordance with 29 CFR Part 1911. The hearing will be conducted in as expedited a manner as possible consistent with a full development of the record and the rights of the parties.

The hearing will be presided over by an administrative law judge who will have all the powers necessary and appropriate to conduct a full and fair informal hearing as provided in 29 CFR Part 1911. Following the close of the hearing or of any post-hearing comment period, the presiding administrative law judge will certify the record to the Assistant Secretary of Labor for Occupational Safety and Health. The proposal will be reviewed in light of all oral and written submissions received as part of the record, and a rule will be issued based on the entire record in this proceeding.

AUTHORITY

This document was prepared under the direction of Eula Bingham, Assistant Secretary of Labor for Occupational Safety and Health, U.S. Department of Labor, Third Street and Constitution Avenue NW., Washington, D.C. 20210.

Accordingly, pursuant to section 8 of Occupational Safety and Health Act of 1970 (84 Stat. 1598, 29 U.S.C. 657), the Secretary of Labor's Order No. 8-76 (41 FR 25059), and 29 part 1911, notice of public hearings on the proposed rule on access to employee exposure and medical records is hereby given.

(Sec. 8, 84 Stat. 1598 (29 U.S.C. 657); Secretary of Labor's Order No. 8-76 (41 FR 25059); (5 U.S.C. 553)).

Signed at Washington, D.C., this 3d day of October 1978.

EULA BINGHAM,
Assistant Secretary of Labor.

[3410-11]

DEPARTMENT OF AGRICULTURE

Forest Service

[36 CFR Part 223]

SALE AND DISPOSAL OF TIMBER

AGENCY: Forest Service, USDA.

ACTION: Proposed rule.

SUMMARY: This notice proposes certain changes to the regulations in this part on the sale and disposal of timber. Several editorial changes are made to correct minor problems. Substantive changes would allow for shortening the advertising period for emergency or administrative use sales, and would eliminate the dollar limit on log sales not covered by export so that sales of logs under $2,000 would no longer be exempt from the substitution restrictions. The shortened advertising period is allowed under the National Forest Management Act of 1976 (NFMA). The exemption of sales under $2,000 from substitution restrictions is designed to relieve forest officers of the burden of surveillance of these categories of logs to determine their eligibility for exportation. Change is also made which would remove the authority to refuse awards to high bidders because of the infrequent use of that authority.

DATE: Comments must be received before December 5, 1978.

ADDRESS: Submit comments to: John R. McGuire, Chief, Forest Service, Department of Agriculture, P.O. Box 2417, Washington, D.C. 20013.

All written submissions made pursuant to this notice will be available for

V 43 / 195 OCT 6 1978

public inspection in the Timber Management Staff, South Agriculture Building, Room 3207, Washington, D.C. during regular business hours.

FOR FURTHER INFORMATION CONTACT:

George Leonard or Peter Wagner, Timber Management Staff, Forest Service, Department of Agriculture, Washington, D.C. 20013, 202-447-4051.

SUPPLEMENTARY INFORMATION: This is a proposal to revise 36 CFR 223, to make editorial changes or correct minor problems which developed from the rewrite of this part in 1977.

The first substantive change would allow the Chief or Regional Forester authority to shorten the advertising period for administrative use sales and emergency situations. This authority existed for administrative use sales prior to the passage of the National Forest Management Act of 1976 (NFMA). The NFMA expanded the authority to shorten the advertising period, but when the applicable regulations were promulgated, this authority was inadvertently deleted. The proposed change would replace and expand the old authority.

The second substantive change would remove the exemption of sales under $2,000 from substitution restrictions. When the restrictions were first promulgated, these small sales were exempted because of the very minor volume and the unlikelihood that these logs would be suitable for export. This is still true; however, the existence of exempt logs has caused a significant surveillance problem. Forest officers are required to determine the individual sale from which each log originated in order to determine whether or not the logs were eligible for export. Under the proposed change, the determination could be limited to finding out if the logs originated from a National Forest.

The third substantive change would remove existing authority which allows the Chief to refuse award to a high bidder if he determines such award would be detrimental to local labor. This authority has been used only once since it was first granted (sometime prior to 1962). The need is therefore doubtful especially since oral bidding now allows local manufacturers to protect their timber supply. Further, the authority has been misinterpreted and is causing confusion among bidders.

All other changes either correct processing mistakes, update references, or remove conflicts. None are intended to change the basic intent.

The following changes are therefore proposed.

1. Section 223.1(e)(3) be revised to read:

§ 223.1 Authorization for sale and disposal of timber.

* * * * *

(e) * * *

(3) Supervisors may designate portions or all of a National Forest as free-use areas where such action is compatible with land management plans and shall give public notice of their action. Within such free-use areas, any dead timber or any green timber previously marked or designated by forest officers may be cut and removed for personal use for domestic purposes. Cutting and removal of timber in free-use areas shall be in accordance with such rules as may be prescribed by the district ranger to prevent fires, minimize damage to uncut trees and other resources, and to avoid confusion among users. Similar material may be cut outside of a free-use area without permit in cases of emergency, but the person taking such material shall promptly notify the district ranger. Small quantities of material needed by transients while in the forest may also be taken without permit; subject to such rules as may be prescribed pursuant to § 261.70. In all other cases permits will be required for green material.

* * * * *

2. Section 223.5(b) be revised to read:

§ 223.5 Advertisement and bids.

* * * * *

(b) In emergency situations where prompt removal of timber included in a sale is essential to avoid deterioration or to minimize the likelihood of the spread of insects, the approving officer may authorize shortening the formal advertising period to not less than 7 days. In other emergency situations, or for timber sold under 36 CFR 223.1(b) the Regional Forester or Chief may authorize shortening the formal advertising period to not less than 7 days.

* * * * *

3. Section 223.7 be revised to read:

§ 223.7 Awards.

(a) Advertised timber will be awarded to the highest bidder upon satisfactory showing by him of ability to meet financial requirements and any other conditions of the sale offer unless:

(1) Determination is made to reject all bids.

(2) Two or more bidders, all of whom meet the requirements, submit equal bids which are the highest bids, in which case award may be by the drawing of lots. Equal bids from parties having direct or indirect common control or association in logging, processing or marketing may be consolidated to the extent deemed necessary by the awarding officer in order to give to any others who have bid the same amount an equitable opportunity in the drawing of lots.

(3) The highest bidder is notoriously or habitually careless with fire, or has failed to comply with the requirements of previous contracts for National Forest timber.

(4) Monopoly, injurious to the public welfare, would result from the control of large amounts of public or of public and private timber.

(5) The high bidder has elected Forest Service road construction in response to an advertisement extending such an option, the Forest Service cannot perform the construction and in response to solicitation has not received a satisfactory bid for such construction within the period stated in the advertisement and the high timber sale bidder is unwilling to perform the construction.

(b) Any bidder or applicant for a sale may be required to furnish a statement of his relation to other bidders or operators, including, if desired by the supervisor or Regional Forester, a certified statement of stockholders or members of the firm, and the holders of bonds, notes or other evidences of indebtedness, so far as known, so that the statement will show the extent of the interest of each in the bidder or applicant.

(c) If the highest bid is not accepted and the sale is still deemed desirable, all bids may be rejected and the timber readvertised; or, if the highest bidder cannot meet the requirements under which the timber was advertised or the withholding of award to him is based on one or more of paragraphs (a) (3), (4), and (5) of this section, award at the highest price bid may be offered to the next highest qualified bidder or to the other qualified bidders in order of their bids until the award is accepted by one or refused by all of the qualified bidders.

(d) If timber is advertised as set aside for competitive bidding by small business concerns, award will be made to the highest bidder who qualifies as a small business concern and who has not been determined by the Small Business Administration to be ineligible for preferential award of set-aside sales. If there are no qualified small business bidders any readvertisement shall be without restriction on the size of bidders.

(e) When necessary in the judgment of the approving officer, any applicant or bidder may be required to submit, before expense is incurred in acting on the application or before award is made in response to a bid, a satisfactory showing of financial ability and

bidder may be required to show that he has or can obtain equipment and supplies suitable for logging the timber and for meeting the resource protection provisions of the contract.

4. Section 223.10 be revised to read:

§ 223.10 Timber export and substitution restrictions.

(a) Unless restricted as provided in this section or unless it is determined by the Secretary of Agriculture that the supply of timber for local use is endangered, timber lawfully cut on any National Forest may be exported from the State where grown to any other State for processing. As used in this paragraph, "supply of timber for local use" means the supply of timber necessary for consumption by local users.

(44 Stat. 242, 16 U.S.C. 616)

(b) Unprocessed timber as defined in paragraph (c) of this section, purchased after March 8, 1974, from National Forest System lands located west of the 100th Meridian in the contiguous 48 States, may not be exported from the United States nor used as a substitute for timber from private lands exported by the purchaser. The above limitations on export and substitution do not apply to species of timber previously found to be surplus to domestic needs; or to additional species, grades, or quantities of timber found by the Secretary of Agriculture after public hearing to be surplus to domestic needs. As used in this section and as further defined in paragraph (d) of this section, "export" means either direct or indirect export and "purchaser" means the purchaser or his affiliates. "Private lands" means lands held or owned by a private person (individual, partnership, corporation, association, or other legal entity). Nonprivate lands include but are not limited to, lands held or owned by the United States, a State or political subdivision thereof, or other public agency, or lands held in trust by the United States for Indians.

(c) As used in this section, the term "unprocessed timber" shall mean any logs of species, quantities, or grades which have not been found surplus to domestic needs and having a net scale content not less than 33⅓ percent of the gross volume in material meeting the peeler or sawmill requirements published in the January 1, 1978, official Log Scaling And Grading Rules used by West Coast Log Scaling and Grading Bureaus; cants to be subsequently remanufactured exceeding 8¾ inches in thickness; cants of any thickness reassembled into logs; and split or round bolts, or other roundwood not processed to standards and specifications suitable for end-product use. Unprocessed timber shall not mean pulp (utility) grade logs and Douglas-fir special cull logs or timber processed into the following:

(1) Lumber and construction timbers, regardless of size, sawn on four sides;

(2) Chips, pulp, and pulp products;

(3) Green veneer and plywood;

(4) Poles and piling cut or treated for use as such;

(5) Cants cut for remanufacture, 8¾ inches in thickness or less.

(d) As used in this section, unprocessed timber, either from National Forest System lands or from private lands, is exported directly when exported by the National Forest timber purchaser, his subsidiary, subcontractor, parent company, or any other affiliate. Business entities are considered to be affiliates when one controls or has the power to control the other or when both are controlled directly or indirectly by a third entity. Timber is exported indirectly when export occurs as a result of a sale to another person or as a consequence of any subsequent transaction.

(e) As used in this section, substitution is the purchase of timber from National Forest System lands to be used as replacement for timber exported from private lands. Such replacement occurs when with respect to historic levels (1) the purchaser continues to export and increases his purchase of National Forest timber, or (2) the purchase of National Forest timber continues while the purchaser increases his export of unprocessed timber from private lands tributary to the plant for which National Forest timber covered by a specific contract is expected to be delivered. Historic level is defined as the purchase or export during 1974 or any subsequent calendar year of not to exceed 110 percent of the average annual volume purchased or exported in calendar years 1971, 1972, and 1973.

(f) To be eligible to bid on a sale of timber from National Forest System lands west of the 100th Meridian in the 48 contiguous States, a bidder must:

(1) Certify that purchase of the timber will not constitute substitution as defined in paragraph (e) of this section.

(2) Agree to furnish to the Forest Service, prior to beginning operations under the contract: the names and addreses of processing plants or other locations to which the timber is expected to be delivered; the names and advertised volumes of timber sales purchased by the purchaser for delivery to each such location in calendar years 1971, 1972, and 1973; the volumes of timber from private lands tributary to each location listed, exported by the purchaser in calendar years 1971, 1972, and 1973.

(3) Agree to furnish the information required by paragraph (f)(2) of this section to the Forest Service prior to log hauling to any location not included in the list required by paragraph (f) of this section.

(4) Agree to make available to the Forest Service, upon request, all of his records dealing with origin and destination of exported timber. For false certification the Forest Service may cancel the contract, debar the purchaser from bidding on Federal timber, and impose such other penalties as may be provided by law or regulation.

(g) Contracts for sales of unprocessed timber from National Forest System lands as described in paragraph (b) of this section, entered into after March 8, 1974, shall, with respect to the timber covered by said contracts, prohibit the purchaser from exporting said timber or selling it for export and from substituting said timber for timber which the purchaser has exported or sold for export from private lands, except that these limitations will not apply to species of timber previously found surplus to domestic needs and additional species, grades, or quantities of timber found by the Secretary of Agriculture, after public hearing to be surplus to domestic needs. Where appropriate, contracts shall include:

(1) Restrictions on the export of unprocessed timber or the use of said timber in substitution of timber exported from private land, including a provision that before the purchaser sells, exchanges, or otherwise disposes of the included timber restricted from export, the purchaser shall require his buyer, exchanger, or other recipient to enter into an agreement not to export unprocessed timber as defined in this section.

(2) Requirements for showing compliance with the timber export restrictions and exemptions and the restrictions against the purchaser using said timber in substitution for timber exported from private land.

(3) The quantities and species of unprocessed timber, if any, which may be exported.

(h) No additional species not previously determined to be surplus, specified quantities or grades of unprocessed timber may be sold for export as surplus to domestic needs unless: a public hearing is authorized by the Secretary of Agriculture and is held to seek advice and counsel as to the quantities, grades, and species of unprocessed timber, if any, surplus to the needs of domestic users and processors, and a determination is made by the Secretary of Agriculture that the specific quantities, grades, and species of unprocessed timber are surplus to the needs of domestic users and pro-

V 43 / 195
OCT 6 78

cessors. The Secretary of Agriculture shall give notice in the FEDERAL REGISTER of the quantities, grades, and species of unprocessed timber which are determined to be surplus. Hearings will be conducted in accordance with the following procedures:

(1) Notice will be published in a newspaper of general circulation within the area of the specific quantities, grades, and species under consideration at least 15 days prior to the hearings, and known parties or organizations with special interest in the quantities, grades, and species should be notified directly.

(2) The time, place, and conduct of the hearing will be coordinated with the Department of the Interior and held at a convenient, contralized location within the area of the specific quantities, grades, and species under consideration.

(3) The hearing record shall remain open for at least 5 calendar days following the hearing for receipt of additional written statements.

(i) Subject to the other provisions of this section, timber cut from the National Forests in the State of Alaska may not be exported from Alaska in the form of logs, cordwood, bolts, or other similar products necessitating primary manufacture elsewhere without prior consent of the Regional Forester. This requirement is determined to be necessary in order to assure the development and continued existence of adequate wood processing capacity in that State essential to the sustained utilization of timber from the National Forests located therein which is geographically isolated from other processing capacity. In determining whether consent will be given to the export of such timber, consideration will be given, among other things, to whether such export will (1) permit a more complete utilization of material on areas being logged primarily for products for local manufacture, (2) prevent loss or serious deterioration of logs unsalable locally because of an unforeseen loss of market, (3) permit the salvage of timber damaged by wind, insects, or fire, (4) bring into use a minor species of little importance to local industrial development, or (5) provide material required to meet urgent and unusual needs of the Nation.

(Sec. 301, 90 Stat. 1063, Pub. L. 94-373)

DAVID G. UNGER,
Deputy Assistant Secretary for Conservation, Research, and Education.

OCTOBER 3, 1978.

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Parts 0, 2, and 18]

[Docket No. 20718; FCC 78-656]

INDUSTRIAL, SCIENTIFIC AND MEDICAL EQUIPMENT

AGENCY: Federal Communications Commission.

ACTION: Proposed rulemaking.

SUMMARY: The Federal Communications Commission is proposing to revise its regulations relating to industrial, scientific, and medical equipment to control the interference potential of microwave ovens, industrial heaters, and similar equipment. The revision is necessary because present regulations are not sufficient to protect radio communications. The proposed rules would reduce the interference potential of these devices and make enforcement easier.

DATES: Comments are requested by January 15, 1979, and reply comments are requested by February 15, 1979.

ADDRESS: Federal Communications Commission, 1919 M Street NW., Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Art Wall or Herman Garlan, Office of Chief Engineer, FCC, 202-632-7095.

Adopted: September 19, 1978.

Released: September 29, 1978.

By the Commission: Commissioner Quello absent.

1. The Commission proposes herewith to revise part 18 of its rules governing the interference potential of microwave ovens, industrial heaters, and similar equipment coming under the heading of Industrial, Scientific, and Medical (hereinafter ISM) equipment. The first step in this proceeding was a notice of inquiry (NOI) [1] soliciting answers to a number of questions and inviting the public to participate in the formulation of new rules for ISM equipment. A list of the parties filing comments in response to the NOI is given in appendix A.[2] A summary of the comments received and our reasons for revising part 18 begins with paragraphs 15 and 35, respectively. The proposed rules are attached as appendix C. Examples of the radiofrequency (RF) emissions from various sources is presented in graph form in appendix B. Comments are hereby invited on all aspects of this proposal.

BACKGROUND

2. ISM equipment is a general term referring to equipments that generate and use RF energy to perform some work, such as heating, other than for communications. Included in this category of equipments are microwave ovens, high frequency heating equipments including RF plastic welders, RF stabilized arc welders, ultrasonic cleaners, and medical diathermy.

3. Microwave ovens are by far the most prolific of the ISM equipments, where "* * * industry sources estimated that there were about 1.5 million microwave ovens sold in the United States in 1976. * * * Some industry sources have projected that by 1980, four million microwave ovens will be produced in the United States and about one million imported." Also, "the market value of microwaves will then exceed the total market value of all other microwave equipment." [3] Most home ovens operate in the ISM band at 2450 MHz with an output of less than 700 watts. A relatively small number of ovens operate in the ISM band at 915 MHz, but to our knowledge they are no longer in production. Other frequencies (5800, 10525, and 24125 MHz) are being considered by oven manufacturers with one manufacturer petitioning the Commission to make the band 10525 MHz available as an ISM band for microwave ovens.[4]

4. High frequency (HF) heating equipment is a general term which includes induction heating, dielectric heating, and microwave heating equipment. Members of the HF Heating Committee of the IEEE conservatively estimate * * * "that at least 75,000 kilowatts of high frequency dielectric heating power is being applied in industrial applications by at least 5,500 different equipments in the U.S.A. only." The Committee further states that "of the three basic HF industries, induction heating has probably 10 times the power of dielectric heating and 5 times the number of units of dielectric heaters installed so that the total kilowatts of power used in industrial high frequency heating exceeds the total kilowatts used for all communication purposes".[5] Some of the larger industrial heating equipment, such as those used in the lumber industry range from 2.5 kW to 100 kW output.[6]

5. One type of dielectric heater, which is widely used by many industries throughout the U.S. is the RF Plastic Welder. Operating on frequencies between 10 MHz and 2450 MHz, such equipment is used to heat mold, cut, and form plastics and vinyl.[7] According to one manufacturer * * * "there are in use in the United States roughly six to eight thousand equipments of various sizes ranging from 100 watts of output to above 100 kilowatts producing a very wide variety of low-cost plastic products that otherwise would not be made available to the public." [8]

6. RF stabilized welders are machines that generate and use RF energy to initiate and stabilize the arc for welding nonferrous metals. In a RF welder the common source of RF energy is a spark gap oscillator because of its ruggedness and simplicity in design and construction. Furthermore, its broadband characteristics-emissions extending over a broad band of frequencies, commonly from 1 to 30 MHz—is insurance that a random change in circuit constants or welding conditions will have little effect on the RF energy available for excitation. Unfortunately, this same ideal source of RF energy for welders is also a prolific source of radiation and a potential source of interference. Such welders ranging in size from 3'x3'x3' to 20'x20'x100' are extensively used in the aerospace industry.[9]

7. Ultrasonic cleaners use sound energy to vibrate loose dirt and other imbedded particles from dirty tools and equipment. The mechanical vibrations (sound) are produced by feeding RF energy to a transducer—a device that converts electrical energy to mechanical energy or vice versa. (A common example of a transducer is the speaker.) Present day cleaners operate in above audible range of 20 kHz to several megahertz and have a power output ranging from a few watts to several thousand watts depending on the application. These ISM equipments are used in both industrial and medical applications. Other ultrasonic devices use sound energy for diagnostic and therapeutic purposes.

8. Medical Diathermy are therapeutic machines used by the medical profession to apply heat to a selected area of the body. The rapidly varying alternating fields increased the number of molecular collisions which in turn results in a heating affect. Most present day diathermy equipment operate on one of three frequencies 13.56 MHz, 27.12 MHz and 2450 MHz. This is the same process that occurs in a microwave oven. Electrosurgical units (ESU), a special class of diathermy equipment, use RF energy to cut and cauterize blood vessels and tissue during surgical procedures. Many of these use a spark gap type oscillator producing a broadband emission in the range of 1 to 10 MHz.

9. Inasmuch as we are concerned about all ISM equipment—present and new—the Commission will also consider comments about any new equipment being developed. For example, we are aware of the development of at least two new consumer ISM products—induction heating range and RF excited light bulb. As we understand it, the range, unlike the conventional cooking range, heats only the metal pot, not the cooking surface. RF energy is used to induce eddy currents to flow in a metal pan placed over the cooking surface, which in turn heats the pan and its contents—not the surface. The RF excited light bulb which uses RF energy to excite a gas in the bulb to produce illumination, is intended according to our understanding to be screwed or fitted into the present standard incandescent light bulb socket. The primary advantage of this bulb is its efficiency, which is several times better than the present incandescent bulb. Whether these devices are ultimately successful and widely accepted remains to be seen, but in any case, we believe new equipments like these should be considered in this rewrite of part 18.

10. In each of these equipments RF energy is generated by an oscillator in much the same way RF energy is produced in a transmitter. The only difference between the two is what is done with the RF energy after it is produced. In a transmitter intelligence is added and the signal is radiated into space through an antenna. In ISM equipment, the RF energy is used to do work, ionize a gas or heat food, for example. With the exception of microwave ISM equipments, RF stablized arc welders and electrosurgical units (ESU), emissions from ISM equipments are essentially continuous wave (CW) in nature. For most ISM equipment there is very little attempt to suppress the harmonic (multiples of the fundamental operating frequency) frequencies as can be seen from the first seven graphs in appendix D. Ideally ISM equipments are not supposed to radiate RF energy (radiated energy actually represents a loss of power in the system) but unless proper precautions (shielding, filtering, etc.) are taken sufficient radiowaves are radiated into space and therefore have the inherent possibility of causing interference to radio communications.

11. Before 1948, ISM equipments were a major source of interference to radio-communications. Although the present ISM rules have gone a long way in reducing that interference, they are no longer considered adequate to protect communication systems for the reasons discussed below.

PRESENT RULES FOR ISM EQUIPMENTS

12. The Federal Communications Commission, under the Communications Act of 1934, as amended, is charged with the responsibility of managing the non-U.S. Government use of radio. Soon after the act was passed into law, it became apparent that other devices, beside transmitters, such as industrial heaters radiate and thereby can and do interfere with legitimate radio communications. Hence, our primary concern with ISM equipment is its effect on radio communications. Other aspects of ISM equipment, e.g., potential health hazards from nonionizing radiation, come under the jurisdiction of other Government agencies and, in some instances, are subject to additional regulations. For instance, domestic microwave ovens must comply with FCC specifications to protect against radiofrequency interference (hereinafter RFI) in addition to regulations promulgated by the Department of Health, Education, and Welfare to protect against possible health hazards of microwave radiation. We might add at this point that in instances where there are different Government regulations for the same equipment, FCC approval will be subject to the equipment complying with all applicable specifications imposed by other U.S. Government agencies.

13. The present part 18 rules, which were adopted in 1948 and essentially have remained unchanged, permit operation of ISM equipment without an individual license,[10] provided the equipment complies with both the technical and administrative requirements in part 18, and provided further that it does not cause harmful interference to radio communications. This regulatory approach will not change with the proposed rules.

14. Part 18 permits unlimited radiation for any emission from ISM equipment that lies within the seven bands allocated for that purpose.[11] The ISM bands, as they are called, are both national and international allocations. ISM emissions that lie outside these bands are required to be limited. Although the level in the present part 18 varies depending on how the equipment is classified, the two most commonly used limits for out of band emissions are:

10 microvolts per meter measured at 1 mile for industrial heaters.

25 microvolts per meter measured at 1,000 feet for medical diathermy and miscellaneous ISM equipment.[12]

---

[12] The present technical requirements for ISM equipment are contained in the proposed rules in subpart C of part 18 in appendix C.

V 43 / 195 OCT 6 1978 LMI

Equipment approvals are mandatory for most ISM equipment. With the exception of ultrasonic equipment there is no limit on the level of radio frequency voltage feed back into the power lines to which the equipment is connected.

COMMENTS IN RESPONSE TO THE NOI

15. As stated, the notice of inquiry in this proceeding invited the public to assist the Commission in formulating new rules to control the interference potential of ISM equipment. This was done by soliciting answers to a number of questions addressing technical specifications, test methods, equipment authorization and administrative procedures, screened enclosures, interference control and the FAA study.[13] With a few notable exceptions, the comments received mainly expressed the interests of ISM manufacturers who unfortunately did not take full advantage of the opportunity to assist the Commission in formulating new ISM rules. Moreover, individuals who were expected to comment, did not. For example, communication users, who have in the past voiced the strongest complaints about the overly liberal present limits for ISM equipment were strangely silent.

16. With the exception of HEW, the parties filing comments were either users or manufacturers of ISM equipments, who naturally would oppose changes to the present ISM rules. Many of the commentors either explicitly stated or implied that they saw no reason why the Commission should change the present ISM rules, except for some minor administrative changes. Internationally many administrations have incorporated recommendations made by CISPR to control the interference potential of ISM equipment.[14] The Canadian Standards Association is also circulating draft proposals modelled after the CISPR recommendations. In the NOI, we asked for comments (questions 6 and 7) regarding the feasibility of adoption of the international standard. The comments were inconclusive. Basically, manufacturers exporting equipment favored such adoption; whereas, those whose market is only in the U.S.A. opposed this. A summary of the comments follows.

17. AHAM, an association of home appliance manufacturers, and manufacturers Litton, Amana, Panasonic and Toshiba restricted their comments to matters relating to microwave ovens. AHAM took the approach that the microwave oven industry is new and "when the new rules are written they should be framed so as to encourage development of the microwave oven industry".[15] AHAM concludes that the basic requirement should be that microwave ovens operate so as to stay in the ISM band and that any spurious outside band should not cause harmful interference. AHAM opposes FCC adoption of the CISPR recommendations for ovens on the grounds that the CISPR instrumentation is not available in this country and that peak or quasi-peak measurements are not a good measure of the interference potential of ovens to communications systems.[16] Both Litton and Amana supported the comments submitted by AHAM. Panasonic and Toshiba on the other hand support adoption of a single standard with Panasonic stating that the single standard should coincide with the CISPR recommendations for microwave equipment. With respect to equipment authorizations, AHAM recommends that the present type approval requirement, where the FCC tests production samples for compliance, be replaced with certification.[17]

18. As previously stated, most present day domestic microwave ovens operate in the ISM band at 2450 MHz. Both AHAM and Litton indicate that oven manufacturers are now investigating other frequencies for microwave cooking. In particular, Litton stated they are looking at the frequency 10,525 MHz as well as the ISM bands at 915 MHz, 5800 MHz and 24,125 MHz. Litton has since filed a petition for rulemaking (RM-2788) requesting the Commission to make 10,675 MHz band available for the use of microwave ovens. The firm also requested the USA to recommend that the bands 915 MHz and 10,525 MHz be allocated for ISM equipment on a worldwide basis.

19. Raytheon, a major supplier of microwave processing equipment for industrial applications in the food processing, foundry and rubber industries, manufacture microwave ISM equipment that operates in the ISM Bands At 915 MHz and 2450 MHz with the output powers ranging from 10 to 75 kW per system. For such equipment operating with a power output of less than 500 watts, Raytheon recommends a single maximum radiated limit of 2500 microvolts per meter measured at a distance of 10 feet. For ISM equipment with output powers above 500 watts, the maximum radiated field may increase by the square root of the ratio of the generated power to 500 watts up to a maximum of 5300 microvolts per meter at 10 feet.[18] The firm said the specification is based on economics, the present noninterference provisions section 18.120-18.121 and the environment in which such equipment is normally operated, which Raytheon asserts and industrial areas located away from residential areas.

20. The firm opposes adoption of the CISPR recommendations for ISM equipment on the grounds that the CISPR limit, which specifies an instrument having a quasi-peak detector is not representative of the interference potential of ISM equipment to modern communication systems, which Raytheon asserts is more fundamentally predictable on the basis of an average or rms detector. Specifications requiring CISPR instrumentation would require a substantial investment in new equipment to test ISM equipment, which Raytheon claims poses an unnecessary burden on ISM manufacturers and users in the United States. Specifications for line conducted emissions are also unnecessary for ISM equipment according to Raytheon because of the environment in which ISM equipment is normally operated and because there are no documented cases of interference.

21. Manufacturers Solidyne, Mann-Russell, Lepel and SPI and the HF Heating Committee representing manufacturers and users submitted comments on the matters relating to industrial heaters. With the exception of Solidyne, each participant essentially requested little or no change in the present technical specifications and filed statements opposing adoption of the CISPR recommendations for ISM equipments on the grounds that the quasi-peak detector in the test instrument recommended by CISPR had less relevance than the average or peak detectors. Both Mann-Russell and SPI question the need for tighter specifications and line conducted limits for industrial heating equipment. All three manufacturers and both SPI and the HF Heating Committee recommend some changes in the present test procedures for industrial equipment. SPI requests simplifi-

[13] See paragraph 26 of NOI, in this proceeding.

[14] CISPR is the acronym for Comite International Special des Perturbations Radioelectrique (International Special Committee on Radio Interference). The CISPR recommendation for limits and measurement procedures is contained in CISPR Publication 11 (1975): Limits and Methods of Measurement of Radiofrequency Interference Characteristics of Industrial, Scientific and Medical (ISM) Equipment. This publication is available from American National Standards Institute Inc., 1430 Broadway, New York, N.Y., 10018 at a cost of $27.25.

[15] AHAM p. 10.

[16] It is unclear why AHAM and Litton are objecting to the use of the CISPR instrumentation since the CISPR field strength meter is not recommended for measuring microwave ISM equipment operating above 1 GHz. A spectrum analyzer is the recommended test equipment for tests above 1 GHz.

[17] See par. 40, below for a discussion of the FCC equipment authorization program.

[18] The recommendation is the same as the present limit for medical diathermy equipment when an inverse distant relationship is used to extrapolate the field from 1,000 feet to 10 feet.

cation of the present equipment authorization procedures in line with the procedures now in force for prototype certification of ISM equipment.

22. The HF Heating Committee also makes the point that " * * * " additional, or more restrictive rules will not guarantee the prevention of interference. It is an unfortunate fact that there exists in these United States a certain element whose selfish interests causes it to attempt to avoid compliance with regulations of proper governmental bodies. This element of our society will not heed further restrictive rules any more than they heed present ones. Enforcement seems to be the only tool available to society for this problem. Meanwhile the public right to the products made available or less costly by high frequency heating should not be removed by restrictions which will stifle use of presently installed equipment or the development of new machines and processes which will benefit mankind. We are confident the Commission agrees with the principle."[19]

23. Solidyne, a corporation with domestic and International Divisions, claims to have manufactured 60 to 75 percent of the heat sealing now in operation in the United States. In their comments on such equipment Solidyne takes a position that is the reverse of that taken by other industrial heater manufacturers. Solidyne supports adoption of the CISPR recommendations for ISM equipment on the grounds that they are technically and economically feasible. The firm remarks:

> Heat sealing is being done within CISPR radiation limits on a large scale in European countries. We have studied the engineering problems involved and we feel the redesign of presently made American equipment will not be prohibitively expensive and the production costs will be only moderately higher than at present. Most of the new equipment will be operated on the assigned frequency bands, thereby drastically reducing noise pollution due to radiation from the fundamental operating frequency. Because harmonics are much better controlled, there will be a much lower level of pollution from that source. Because most equipments will operate on the assigned bands, anything not on these bands immediately becomes suspect, so that inspection and policing is easier.
>
> Some equipments cannot operate on the assigned bands, by reason of the size of the electrodes or the heatability of the material being processed. In that case, self-shielding of equipment or operation in a screen room is required. For both of these methods, it is possible to meet CISPR radiation limits; the cost will be moderately above costs incurred for present FCC limits, but certainly not economically prohibitive. In some cases it is thought that uniform voltages are not attainable on assigned bands and that lower frequencies must be used. However, there are techiques available to equalize voltages for uniform heating on assigned bands. Again, the cost is somewhat higher, but not unreasonable.[20]

24. Solidyne, Litton, Mann-Russell and AHAM requested widening the present ISM bands, particularly at 13 MHz and 40 MHz; or adding additional ISM bands for a number of reasons, but largely because the present bands are not considered adequate. Requests for additional frequency allocations are outside the scope of this proceeding and cannot be considered here. Individuals wishing to change the present national frequency allocations are advised to file a separate petition for rule making with the Commission in accordance with the procedures in part 1 of FCC rules. Individuals wishing to change worldwide frequency allocations should be participating in the proceeding in FCC docket No. 20271 which is developing U.S. proposals to be presented at the next World Administrative Radio Conference (WARC) in 1979.[21]

25. Branson, a manufacturer of ultrasonic equipment and the Ultrasonic Industries Association (UIA) submitted actual proposals for ultrasonic equipment. Both parties recommended a conducted limit of 0.1 volts rms, instead of the present limit of 1,000 microvolts at frequencies up to 490 kHz, with a minimum measurement frequency of 150 kHz, instead of the present 10 kHz. The proposed change, says Branson, will ease the economic impact, manifest under the present specification and would encourage industry compliance with FCC regulation. In support of this, Branson stated:

> The cost of providing a filter network to reduce conducted radio frequency voltage to a value within the presently prescribed limits of 1,000 microvolts at frequencies up to 490 kilohertz and 200 microvolts at frequencies above 490 kiloherts is substantial. So much so that many, if not most, of the manufacturers of small ultrasonic cleaning systems, for example, introduce ISM equipment into commerce which does not meet the present FCC regulations concerning conducted noise. The proposed less restrictive specification will undoubtedly result in the allowance of the use of less expensive filters, thereby lessening the economic impact of the regulations upon industry while concurrently encouraging greater industrywide compliance.[22]

26. Alternatively, if the first proposal is not acceptable, Branson offered the following proposal:

> The FCC should adopt new standards for conducted interference as recommended by the CISPR, which standards are being adopted in Europe and Canada.[23] By conforming United States standards to an international uniform standard, the flow of goods from the United States to these countries will be greatly increased. Moreover, manufacturers will no longer be required to maintain two inventories, one for United States consumption and the other for European consumption.[24]

Furthermore, the firm recommends measurements to be made at a standard test site with a standard line impedance stabilization network (LISN) for the CISPR standard to assure repeatability of results. Such a standard would provide insurance that U.S. goods are shipped in international commerce without contravening radiation specifications of other countries, says Branson.

27. With respect to responsibility for compliance, Branson states: "When the equipment is an assemblage of components, the generator manufacturer should be held responsible for obtaining an equipment authorization for the generator for use under specified operating conditions. The person assembling the components should then be held responsible for complying with the generator manufacturer's installation and operating instructions." [25] For ultrasonic equipment operating on a frequency below 100 kHz, both Branson and UIA, recommended that only conducted interference data be sent to the Commission to show proof of compliance, since experience has shown that such equipment which complies with the conducted limit can also be expected to comply with radiation limit. Consequently, they argue that radiation test data is only necessary for equipment operating on a frequency above 100 kHz.

28. IBM, primarily a user of ISM equipment but also a fabricator of special purpose ISM machines that cannot be purchased, endorsed the need * * * "for reasonable technical standards for the operation of ISM equipment in order to minimize the possibility of such edquipment causing harmful interference to authorized radio communication service, polluting the radio spectrum and having adverse effects on other electronic equipment." [26] However, IBM urged that the limits and methods of measurements be founded on a sound technical basis similar to those studies included in the FAA reports,[27] the CBEMA proposal for data processing equipment [28] and

[28] In response to the notice of proposed rulemaking in FCC docket 20780, the Computer and Business Equipment Manufacturers Association filed a report, CBEMA/ESC5/77/29, titled: "Limits and Methods of Mea-

Footnotes continued on next page

V 43 / 195

to a limited extent the CISPR recommendations. With respect to CISPR, IBM stated that they applaud • • • "the detailed technical treatment of many of the considerations for controlling ISM electromagnetic interference and support adoption by the FCC of certain of these recommendations; however, IBM cannot endorse the entire program recommended in CISPR Publication 11." The principal reasons given by IBM for this position are:[29]

(1) CISPR limits are designed to protect frequency assignment in region 1 of the World (Europe, Africa and the USSR);

(2) CISPR instrumentations based on their investigations would place an overly stringent requirement on ISM equipment having broadband emission characteristics; and

(3) The LISN recommended by CISPR Publication No. 11 for measuring RF line conducted voltage from ISM equipment with current output less than 25 amps is not representative of U.S. power line impedance and therefore would produce results of questionable validity.

29. With respect to test procedures, the computer firm supports revising the present procedures in part 18 to eliminate what they allege are unnecessarily complicated and time consuming testing practices and replacing it with a single unified procedure for all ISM equipment. Moreover, they state that clause 5 of CISPR Publication 11, "Method of Measurement", can be used as the structure and scope of such a standard. However, the following modifications are recommended:

Define the limits at 30 meters, but permit tests at shorter distances (e.g., 3 or 10 meters) using acceptable propagation models.

(2) A 50 ohm/50 microhenry LISN network for measuring conducting RF voltage from all ISM equipment having power requirements of 100 amperes or less.[30]

30. IBM agrees with the Commission that the manufacturer of discrete items should be required to obtain an equipment authorization for his products; however, in the case where the equipment is an assembly of components the individual marketing the components should be responsible for obtaining FCC approval.

31. AFTRCC, a council representing the aerospace manufacturing industry, one of the principal users of ISM equipment, including radio frequency stablized arc welders filed comments that not only opposed the CISPR recommendations for ISM equipment, but questioned the need for tightening the specifications for ISM equipment. Second, in view of the portable nature of RF Welding, AFTRCC, "strongly urged the Commission to adopt a 'Yard' or 'Premises' approach—a concept which appears to be within the contemplation of the CISPR regulation and which was put forward for consideration by AFTRCC some 10 years ago."[31] [32]

32. RCA, a user of ISM equipment, filed comments supporting . . . "a single standard for industrially-used equipment based on the current radiation limit for industrial heating equipment." [33] Different limits for different industrial equipment is difficult to justify from a technical point of view, says the firm. For equipment used by the general population, RCA states that a conducted interference limit of the RF voltage fed back into the power lines is most appropriate. But it should not apply to equipment in a large industrial location, since power line distribution transformers used at such locations provided a natural form of isolation. For ISM equipment consisting of a number of components that must be assembled at the installation site, RCA recommended the following:

(1) Any technical standards adopted should apply to the RF generator alone. (2) For the purposes of equipment approval, the manufacturer should be required to adequately specify the configurations, uses, or attachments for or with which an RF generator will continue to meet the equipment authorization. For example, under the rules for prototype certification, the manufacturer should specify the maximum limits of coil size, lead length, other appropriate operating restrictions and operating conditions. (3) The manufacturer should specify the radiation actually measured at the proper certification distance. Thus providing the user with information about the limits of proper operating conditions.[34]

33. In a letter stating that they were the largest American manufacturer of short wave diathermy and possibility in the world, Mettler expressed deep concern with any Part 18 revision, especially if patterned after CISPR recommendations. Mettler claims that the international standards has virtually eliminated their units from the European market. No details or information of the equipment are furnished to support this claim.

34. While Mettler is concerned about tighter limits for medical equipment, FDA, on the other hand is concerned about the problem of conducted and radiated interference in the hospital. Sensitive medical equipment either malfunctions or doesn't function at all due to the high level of radio noise in many hospitals. Because of this problem, FDA is proposing a susceptibility standard which would require equipment used in a hospital to be able to accept a certain amount of RF noise and continue to operate normally. Since ISM equipment, particularly medical diathermy and electrosurgical units produce the highest levels of RF noise in the hospital, FDA said that the proposed susceptibility levels could be reduced if the ISM limits are reduced. The proposed susceptibility standard is based on the present hospital ambient levels according to the agency. Reducing the ISM limits could result in lower ambient levels which could reduce the technical burden and associated costs of sensitive hospital instrumentation.

Reasons for Revising Part 18

35. The following is a list of the more important reasons for revising part 18. An elaboration of each is presented in subsequent paragraphs.

(a) ISM equipment is considered to be the largest source of manmade radio noise.

(b) Present limits are inadequate to protect future communication needs. ISM limits are out of line with limits for other equipment.

(c) Requests for tighter limits have been made.

(d) Present ISM specifications are much more liberal than those imposed by other administrations.

(e) Present equipment approval procedure requires clarification.

(f) Responsibility for compliance requires clarification.

(g) Present test procedures are inadequate.

(h) Present equipment classifications are difficult to apply.

36. As previously discussed, some ISM equipment generated and use tens of thousands of RF watts,[35] which means that unless such energy is contained, it is radiated into space and conducted/radiated from power lines. Consequently, ISM equipment is and always has been a major contributor to the manmade radio noise problem. Our emphasis in controlling RFI has been not to eliminate radiated emissions from equipment—a desirable but economically unacceptable (and probably an unnecessary) solution—but to keep the number of instances of harmful interference down to an enforceable level. We feel this approach is justified because it takes into account the environment in which the equipment is operated.

37. In general most of the commentors, agreed with the above approach. Most quickly point to the fact that the record for ISM equipment has been relatively good, since the number of documented cases where ISM equipment was identified as the source is now relatively small. However, this evidence is misleading, at best, for the following reasons:

(1) Most ISM equipment manufacturers have learned from experience to produce equipment to operate on those frequencies where the potential of receiving a compliant is least probable.

(2) For every documented interference complaint where ISM equipment is identified as the source of interference, there are many more instances where the source is never identified. The reasons for this are numerous. Among other things, emissions from ISM equipment are difficult to identify and locate, so much so that unless a communication service is deemed completely unusable, the source is left unidentified and never located.

(3) In the past, most ISM equipment were operated in large industrial environments where the probability for interference was small. This separation of the ISM equipment and communication user is changing for a number of reasons. First, some ISM equipment, e.g., domestic microwave ovens, are consumer products that are or will be used throughout the country.[36] Second, more and more people, most of whom expect reliable communications are living closer to industrial complexes. Lastly, all manmade radio noise adds to the ambient backgrounds of radio noise which in a complex manner decreases the use and reuse of the radio spectrum for communication.[37]

38. The graphs in appendix B show the radiated emissions in microvolts per meter at some distance from a number of ISM equipments installed and tested by the respective manufacturer. The data for these graphs was taken from the report of measurements filed by each manufacturer to support their application for prototype certification. No attempt was made to convert the filed data to field strength at a standard distance for purposes of making comparisons, since there is some disagreement about how the value should be extrapolated. We did not want to get into this argument. The graphs are included to show the number of emissions and relative level of each emission from ISM equipment. Emissions above the tenth harmonic (10 times the fundamental operating frequency) is not shown, because tests above the tenth harmonic are not required. Note, also, that a harmonic of two equipments was higher than or equal to the level at the fundamental operating frequency. Each emission has the potential for interfering with radio communications and does interfere if the conditions (e.g., location, frequency, relative level of emission compared to desired signal) are right.

39. Two Government agencies, FDA and FAA, have indicated a desire to have tighter technical specifications for ISM equipment. The Electromagnetic Compatability Analysis Center in their contract report to FAA [38] requested tighter technical specifications for emissions that lie within the aeronautical navigation and communication frequency bands of 108-136 MHz. FDA comments that more restrictive technical specifications for ISM equipment—the greatest offender of RFI in the hospital—would reduce the burden of severe susceptibility standards for electronic equipment used in a hospital.[39] In addition, several NATO (North Atlantic Treaty Organization) countries have informally requested tighter technical specifications for ISM equipment. Moreover, many countries have already adopted the tighter technical specifications recommended by CISPR in publication No. 11, as noted above by Solidyne and Branson.[40]

40. At present, there are four types of FCC equipment approvals. Type approval, type acceptance, and certification apply to RF devices including ISM equipment. The fourth procedure, registration of telephone terminal equipment applies only to equipment interconnected to the telephone network and is of no concern in the present rulemaking. Type approval is an equipment authorization granted by the Commission based on measurments made on a sample device by the FCC Laboratory. Certification and type acceptance are based on representations and test data submitted by the applicant and are considered representative of similarly produced units. The only difference between certification and type acceptance is the type of equipment they apply to—the latter applies to licensed transmitters, whereas certification is required for devices that operate without an individual license under parts 15 and 18 of the rules.[41]

41. In part 18, the terms prototype and onsite certification are also used. Prototype certification is the same as certification described above. Onsite certification, as the name infers, means that the equipment is tested and found to comply at that one location. Onsite certification does not carry the implication, as does certification, or prototype certification, that similarly manufactured equipment installed at a different location can be expected to comply.

42. Contrary to intention of the marketing rules of placing some responsibility for compliance on the manufacturer, the present ISM rules permits a manufacturer in some instances, to choose between the three equipment authorizations: Type approval, prototype certification or onsite certification. For example, manufacturers of ultrasonic equipment now have the option of choosing between type approval or prototype certification, or, he may elect to sell the equipment and let the purchaser worry about certifying the equipment. Under these conditions it is not possible to determine who has the responsibility for assuring compliance—the manufacturer or the purchaser. As a result, there are some individuals (either informed or uninformed), who are not adhering to any minimum technical specifications, as so clearly stated by UIA and Branson and several other commentors. The proposed rules are intended to clarify this responsibility in line with the present equipment authorization rules for other equipment in subpart J of part 2 of FCC rules.

43. A major area of concern and one which has long needed clarification is the procedure for assuring compliance of ISM equipment. Under section 302 of the Communications Act, and the subsequent marketing, equipment authorization and import rules in Subparts I, J, and K of part 2 of FCC rules,[42] the Commission imposes an equipment authorization requirement on the manufacturer as a precondition for marketing in order to provide some assurance that equipment placed into operation can be expected to comply with the applicable technical specifications. The rules are based on the consideration that it is much easier to control a device with an interference potential at the manufacturing level than it is to tell a purchaser that his device is causing interference and that he must stop using it until the interference is corrected. Moreover, it is far less expensive to incorporate interference controls into a device at the design stage than to try and fix an interference problem once it is discovered and identified, which in itself presents costly manhours in searching for unidentified emissions. Up to now, ex-

ceptions have been made in the marketing rules for ISM equipment until such time as the problem could be considered in total. Several of the commentors stated that they would like to see the exemptions continue but they failed to adequately justify why ISM equipment should be exempt from the marketing rules while other equipment with far less RFI potential is subject to those rules.

44. To assure compliance with our technical specifications, equipment must be measured in a prescribed manner. The present test procedures in part 18, are not considered adequate, as stated in some of the comments to the NOI, for measuring RFI from ISM equipment. Too much room is left to interpretations, which means the maximum level of emissions is sometimes left undetected. As a result, the data may not be meaningful or reproducible. And from a regulatory point of view test results must be reproducible.

45. An example of a problem with the present test procedures in part 18 is the requirement in § 18.107 to make field strength measurements along a specified number of radials from the source. The procedure for making measurements is satisfactory for industrial heaters operating below, say 490 kHz. However, it is much less applicable for high frequency (HF) (3 to 30 MHz) devices now used for plastic preform heating and far less satisfactory for microwave heaters and ovens. Leakage radiation patterns from HF and microwave devices are by nature directional; much more so than from devices operating at lower frequencies. The present test methods in part 18 were written in 1947 for devices operating at lower frequencies. At higher frequencies care needs to be taken to assure that measurements on a given frequency are made in the direction in which leakage radiation is greatest.

46. Another problem with the present test methods in part 18 concerns the effect of the load on the radiation patterns from the equipment. The load is the dielectric or other material being heated or changed with the application of RF energy. In many ISM equipments, the load is designed to be in the plate circuit of the RF oscillator. When the material is heated its dielectric constant is changed resulting in a frequency shift, unless there is a frequency compensating network in the equipment. This in turn changes the radiation characteristic of the equipment. This affect is not considered in the present test methods in part 18. To overcome this difficulty we are proposing the equipment be measured with the kind of applicators or work fixtures to be used with the equipment containing both the largest and smallest expected loads. In cases where this is not practical, we will consider the use of dummy loads when such a load can be expected to develop interference conditions reasonably similar to those expected in actual operation. The measurement problem has been a source of concern that we are addressing in the proposal by prescribing measurement procedures for a number of different classes of equipment.

FCC Proposal

47. The proposed rules are set in appendix C. The following is a list of some of the more important points of the proposed rules followed by a brief discussion of each item in subsequent paragraphs.

(a) Technical specifications and test procedures are modeled after CISPR recommendations for ISM equipment.

(b) Test procedures set out in detail in OCE bulletins.

(c) CISPR instrumentation is recommended but not required.

(d) Administrative provisions are clarified and consolidated.

(e) Certification and ISM-registration will replace all existing FCC approvals for ISM equipment.

(f) ISM-registration (similar to on-site certification) will be permitted only for equipment that cannot be tested on an approved test site.

(g) Responsibility for obtaining ISM-registration is placed on the RF generator supplier.

(h) Effective date of new rules is 18 months after adoption of final rules in this proceeding.

48. For the same reasons given by IBM, Solidyne and Branson, we are proposing to model the new ISM rules after the recommendations in CISPR publication No. 11.[43] As already mentioned, CISPR recommendations are internationally agreed upon standards having a sound technical basis, even though there is some disagreement whether they should be used in the U.S.A.

49. CISPR's recommendations are designed to reduce the interference potential of all types of electrical equipment, including ISM equipment. Besides the fact that they have international agreement, many foreign administrations have or are in the process of adopting the CISPR recommendations for ISM equipment as their national regulation. As a result U.S. manufacturers are finding that they are at disadvantage when they try to market their products abroad. Because of this a manufacturer wishing to market ISM equipment in another country is faced with making extensive modifications to his equipment in order that it can comply with foreign specifications which in most cases follow CISPR recommendations. The cost of incorporating RFI suppression into the design of equipment is far less expensive than adding suppression after the equipment has been built. Because of this, some manufacturers have gone to the expense of developing two equipments—one for the U.S. market and a second for the international market.[44]

50. In view of objections raised by IBM and others the following changes to the CISPR recommendations are proposed:

(a) The CISPR field strength meter is recommended, but not mandatory for testing ISM equipment.

(b) The CISPR recommendation for measurements at 100 meter distance is not included in the FCC proposal.

(c) The proposed radiation limit and test procedure for ISM equipment operating on a frequency above 1,000 MHz differs from the CISPR recommendation.

(d) Test procedures are set out in OCE Bulletins.

(e) In lieu of the 150 ohm line impedance stablization network, a 50 ohm network is proposed.

(f) An electrosurgical unit will be subject to a line conducted limit, but not the radiation limit, if certain conditions are met.

51. The major objection to adoption of the international standard is the measuring instrument recommended by CISPR. The primary difference the CISPR instrument and other field strength meters is the quasi-peak detector, as opposed to peak, average or rms detectors. In the past few years more and more instrument manufacturers have been adding the quasi-peak detector function to their instrumentation. So the argument that it is no longer available in the U.S.A. may no longer be valid. Secondly, since RFI emissions from most ISM equipment is basically CW (continuous wave or sinusoidal) in nature and since there is little difference in the results when using a field strength meter with an average or quasi-peak detector to measure CW emissions, the Commission is recommending the use of the CISPR instrument, but will permit the use of a meter with an average detector. Instruments having an average detector and meeting certain minimal specifications such as those specified by the American National Standard Institute (ANSI) for such instruments will be permitted for testing ISM equipment.

52. ISM equipment operating on frequencies in the microwave region above 1,000 MHz presents a special problem. For ISM equipment operating on a frequency between 1 and 18 GHz, CISPR Publication 11 recommends that the radiated energy not exceed 57 dB above a picowatt when referred to half-wave dipole using a spectrum analyzer as the measuring instrument. Our preliminary investigation of this recommendation agreed

[43] See footnote 13, above.

[44] See par. 23, above.

with the comments from Litton that manufacturers will not be able to meet the CISPR microwave limit using the specified spectrum analyzer. Furthermore, only one country to our knowledge is enforcing the CISPR recommendation for microwave ISM equipment.

53. The problem is further aggravated by the fact that the present field strength instrumentation used for measuring RFI from microwave ovens, may not be readily available. Ideally, the spectrum analyzer is the most desirable instrument for making RFI measurements, since it is readily available and it can be used for other purposes. Unfortunately, however, additional investigations are needed to adapt the spectrum analyzer into an acceptable procedure for making measurements of RFI from microwave ovens. In the meantime, we are proposing the CISPR limit, converted to field strength (1,500 microvolts per meter at 3 meters) and permitting the use of a field strength meter with an average detector. In addition, we are inviting manufacturers to submit alternative proposals for measuring microwave ISM equipment.

54. Draft test procedures, which are under consideration and will be released as soon as practical, follow CISPR recommendations, but do include some differences. For example, in lieu of CISPR 150 ohm line impedance stabilization network used to measure RF terminal voltage, a 50 ohm, 50 μH network is proposed. Testing of microwave ovens will continue to be made pursuant to present procedure in Bulletin OCE 20. The Bulletin will be revised slightly to take care of the revision in the new rules when adopted but the test procedure will not change. Comments on the proposed test procedures are also invited, when they are released. A public notice will be issued announcing their release. When available, copies may be obtained by writing: Federal Communications Commission, OCE, Room 7306, 2025 M Street NW., Washington, D.C. 20554.

55. At present, RF stabilized arc welders and electrosurgical units (ESU) are not included in the recommended limits and method of measurements for ISM equipment in CISPR publication 11. This is in part, due to the wideband emissions radiated by these equipments and the difficulty in measuring these emissions. However, because of their high interference potential, we do not believe they can be ignored indefinitely. For all practical purposes the present part 18 provisions do not control the interference potential of either of these ISM equipments. Earlier attempts to regulate them have not been successful.[45] [46]

[45] In 1955, the Commission initiated the proceeding in FCC docket No. 11467 proposing alternative rules for RF stabilized arc welders. Three proposals were issued in this proceeding with little agreement reached. FCC docket 11467 will be terminated in a separate order and the issued involved in docket 11467 are reconsidered in this proceeding.

[46] The present rules in part 18 exempt low power electrosurgical units from complying with any technical requirements. The proceeding in FCC docket 18731 tried to define the term low power ESU. FCC docket 18731 will also be terminated in a separate proceeding with the issue of how to control the interference potential of ESU considered herein.

56. For the present proposal, RF arc welders will be subject to the same technical restrictions that will be applied to other industrial ISM equipment. ESU's, however, present a special problem. As previously stated, ESU's produce extremely high level broadband emissions, particularly in the frequency range of 1 to 10 MHz. Because of this ESU's are the primary source of interference to electronic equipment in the hospital. During use, the emissions emanating from an ESU may render hospital instrumentation useless. But because it is a very useful instrument during surgery and since actual use is brief, doctors have learned and are willing to accept brief interruptions to other hospitals instrumentation caused by ESU's. In the operating room where almost all ESU's are used this willingness to accept interference may be acceptable since the doctor can control its use, but outside the operating room it presents obvious hazards. To overcome this problem, we encourage hospital designers to provide shielding for hospital operating rooms to reduce such emanations outside the room. Because the proposed limits would probably preclude most present day ESU's, we are proposing, at least for the time being, to exempt ESU's operating pursuant to conditions in section 18.114 from the out-of-band limits in section 18.108. This is a temporary proposal and we are encouraging alternative proposals for this equipment.

57. In lieu of the present equipment authorization for ISM equipment, prototype certification, onsite certification and type approval, we are proposing to require certification for those equipments that can be tested at an approved measurement facility and ISM-registration for ISM equipment that cannot be tested at such a facility. Responsibility for obtaining ISM-registration will be on the supplier of the RF generator.

58. Certification is a procedure where the manufacturer or his representative makes measurements on the equipment and submits an application with the report of measurements to the Commission. If acceptable, a grant is issued.[47] Certification applies to all similarly produced equipment. The same procedure is followed for ISM-registration however, the grant only applies to the equipment measured at that one location. We are deleting the type approval requirement for ISM equipment, since adequate test facilities are now available to manufacturers for the required test. Moreover, our experience over the last several years shows that most equipments submitted for type approval meet our requirements without adjustment or changes. We reserve to the right, of course, to test the equipment at any time. In this connection, we plan to increase enforcement efforts as recommended by many of the comments by randomly testing approved devices and applying administrative sanctions against manufacturers of noncomplying equipment.

59. In recognization of the fact that some of the ISM manufacturers may have to make some design changes in their equipment to comply with these more stringent technical requirements, we are proposing an 18 month lead period before the rules take effect. That is, ISM equipment manufactured 18 months after the adoption of these rules will be required to comply with the new rules for ISM equipment. Existing ISM equipment and equipment in operation before the effective date of the new rules will continue to operate under the present rules for a period of 10 years after adoption of the new rules.

Conclusion

60. The Commission believes that the present text of part 18 of FCC rules is not satisfactory for governing the interference potential of ISM equipment to protect current and future radio communication needs. We find, therefore, that proposed ISM rules in appendix C which are modeled after CISPR recommendation in Publication No. 11, would serve the public interst. It is recognized, however, that in rule changes as voluminous, technically involved and far-reaching as those proposed herein, there are bound to be provisions that could be further clarified or consolidated. Interested persons, including spectrum users, as well as ISM manufacturers and ISM users, are urged to recommend other possible modifications that can be incorporated within the scope of this rulemaking action. At the same time, it would be helpful if any observed omissions and errors were brought to our attention so that they can be corrected. Further, there may be a number of concurrent Commission proceedings that affect or change specific rules being proposed herein. Such changes will be included at the time final action is taken in this docket.

61. In accordance with the foregoing, notice of proposed rulemaking is

[47] See footnote 13, above.

V 43 / 195
OCT 6 78

hereby given to revise all aspects of part 18 of FCC rules. The specific changes proposed are set forth in appendix C. Authority for these proposed amendments are contained in sections 4(i), 301, 302 and 303(r) of the Communications Act, as amended.

62. Pursuant to applicable procedures in section 1.415 of FCC rules, interested persons may file comments on or before January 15, 1979, and reply comments on or before February 15, 1979. In accordance with the provisions of §1.419(b) of FCC rules an original and five copies of all statements, briefs and comments or reply comments shall be furnished to the Commission. Members of the public who wish to express their interest by participating informally in this rule-making proceeding may do so by submitting one copy of their comment, without regard to form, provided the submission is identified as a comment in docket No. 20718. All relevant and timely comments and reply comments will be considered by the Commission before final action is taken. Comments and reply comments, when received will be available for public inspection during regular business hours in the Commission's Docket Reference Room 239 at 1919 M Street NW., Washington, D.C.

FEDERAL COMMUNICATIONS COMMISSION,
WILLIAM J. TRICARICO,
Secretary.

22. Mettler Electronics, Corp	Mettler.

APPENDIX B

EXAMPLE OF EMISSIONS FROM ISM EQUIPMENT

The seven graphs in this appendix give a pictorial display of RFI emissions from seven different ISM equipments. The level of each emission is field strength in microvolts per meter at a specified distance. The data for these graphs was taken from the report of measurement submitted by the manufacturer in support of his application for prototype certification. Emissions above the 10th harmonic (10 times the operating frequency) are not required to be measured, nor reported. In almost all cases, the measurements on this equipment were made either at the manufacturer's plant or at the user's facility. Because of this, it is questionable whether the data reported is representative of the same equipment at a different location. Additional discussion is provided in paragraph 38 of the text of the NPRM.

APPENDIX C

The following items are proposed amendments to parts 0, 2, and 18 of chapter I of title 47 of the Code of Federal Regulations.

PART 0—COMMISSION ORGANIZATION

§ 0.455 [Amended]

1. Section 0.455(e)(2) is deleted in its entirety.

PART 2—FREQUENCY ALLOCATIONS AND RADIO TREATY MATTERS; GENERAL RULES AND REGULATIONS

2. The present text of § 2.809 is deleted and the following new text is inserted. As revised § 2.809 reads as follows:

§ 2.809 Exemption for equipment subject to ISM-registration.

Section 2.803 shall not apply to ISM equipment requiring ISM-registration under part 18 of this chapter, provided all the following conditions are met:

(a) The supplier of such ISM equipment or, in the case of ISM equipment which is a composite of subassemblies supplied by a number of different manufacturers, the supplier of the radio frequency generator section of the equipment, has submitted an application for ISM-registration (FCC form 731) pursuant to the procedures in subpart J of this part before the complete equipment is placed into operation.

(b) A grant of ISM-registration is issued by the Commission for the complete ISM equipment 90 days after it is placed into operation.

(c) The completed equipment complies with all other applicable requirements in part 18 of this chapter.

(d) ISM equipment which has not received a grant of ISM-registration within 90 days after it is placed into operation shall cease being operated and shall not be operated again until said ISM-registration is granted by the Commission. The 90-day grace period may be extended by the Chief Engineer to permit operation of the equipment for an additional 30 days when there are sufficient reasons given to justify the extension.

3. The title of subpart J of part 2 is revised to read as follows:

Subpart J—Equipment Authorization Procedures—Type Approval; Type Acceptance; Certification; ISM-Registration

4. Section 2.901 is amended to read as follows:

§ 2.901 Basis and purpose.

(a) In order to carry out its responsibilities under the Communications Act and the various treaties and international regulations, and in order to promote efficient use of the radio spectrum the Commission has developed technical standards for radio frequency equipment and parts or components thereof. The technical standards applicable to individual types of equipment are found in that part of the rules governing the service wherein the equipment is to be operated. In addition to the technical standards provided, the rules governing the service may require that such equipment receive equipment authorization from the Commission by one of the following procedures: Type approval, type acceptance, certification, or ISM-registration.

(b) The following sections describe the procedures to be followed in obtaining type approval, type acceptance, certification, or ISM-registration from the Commission and the conditions attendant to such a grant.

5. A new § 2.906 is added to read as follows:

§ 2.906 ISM-registration.

(a) ISM-registration of equipment operating under the provisions of part 18 of this chapter is an equipment authorization issued by the Commission based on representations and test data submitted by the applicant.

(b) Unlike the other equipment authorizations, a grant of ISM-registration applies only to the equipment measured at the user's premise. The grant of ISM-registration does not apply to subsequently produced units.

6. Section 2.915 is amended by revising paragraphs (a), (c), and (d) to read as follows:

§ 2.915 Grant of application.

(a) The Commission will grant an application for type approval, type acceptance, certification, or ISM-registration if it finds from an examination of the application and supporting data, or other matter which it may officially notice, that:

(1) The equipment is capable of complying with pertinent technical standards of the rule part(s) under which it is to be operated; and,

(2) A grant of the application would serve the public interest, convenience, and necessity.

• • • • •

(c) The mere fact that an application for an equipment authorization has been filed with the Commission does not constitute an approval by the Commission.

(d) Grant of an equipment authorization shall not be deemed effective until on or after the date inscribed on the written grant of equipment authorization.

7. Paragraph (b) of § 2.929 is amended as follows:

§ 2.929 Nonassignability of an equipment authorization.

• • • • •

(b) The grantee of an equipment authorization other than ISM-registration may license or otherwise authorize a second party to manufacture or market the equipment covered by the grant of the equipment authorization provided:

(1) The equipment manufactured by such second party bears the identical name and number as is set out in the grant of the equipment authorization.

NOTE.—Any change in the name or number desired as a result of such production or marketing agreement will require the filing of a new application for an equipment authorization as specified in § 2.933.

(2) The grantee of the equipment authorization shall continue to be responsible to the Commission for the equipment produced pursuant to such an agreement.

(3) Notice that such a licensing agreement has been entered into shall be provided to the Commission within 30 days after the execution of the agreement. The notice shall indicate with specificity the equipment involved, the date of application and date of grant of the equipment authorization, and shall indicate the provisions that the grantee has made to insure that equipment manufactured by such licensee will continue to comply with the Commission's regulations. The Commission may require the submission of additional information (new measurement data, etc.) depending on the circumstances in the particular case.

8. The text of § 2.931 is amended as follows:

§ 2.931 Responsibility of the grantee.

In accepting a grant of equipment authorization, other than a grant of ISM-registration, the grantee warrants that each unit of equipment marketed under such grant and bearing the name and type or model number specified in the grant will conform to the unit that was measured and that the data (design and rated operational characteristics) filed with the application for type acceptance or certification, or measured by the Commission in the case of type approved equipment, continues to be representative of the equipment being produced under such grant within the variation than can be expected due to quantity production and testing on a statistical basis.

9. Section 2.932 is amended by revising paragraph (a) and adding a new paragraph (e) to read as follows:

§ 2.932 Modification of equipment.

(a) A new application for an equipment authorizaion shall be filed whenever there is a change in the design, circuitry, construction, or location in the case of ISM-registration under part 18 of this chapter, of an equipment or device for which an equipment authorization has been issued, except as provided in paragraphs (b), (c), (d), and (e) of this section.

• • • • •

(e) For changes in equipment for which an ISM-registration was issued, the procedure and permissive changes in § 2.1055 shall apply.

10. The headnote and text of § 2.1037 are revised to read as follows:

§ 2.1037 Application for certification of ISM equipment.

(a) An application for certification of ISM equipment shall be sumbitted for equipment that can be tested on a test site.

(b) The application shall be filed on FCC form 731 with all items answered. Items that do not apply shall be so noted.

(c) The application shall be accompanied by the required fees, technical report, photographs, expository statement, instruction manual, and other attachments specified in part 18 for the particular equipment.

(d) The application shall be accompanied by photographs sufficient in number to show the general appearance, construction, RF generator, operating controls, attachments, and accessories (if any) and placement of electronic parts. At least one photograph must show the identification label in sufficient detail so that the information required by § 2.1045 is legible. The photographs should be 8 x 10 inches in size. Smaller photographs may be submitted provided they are sharp and clear, show the necessary detail, and are mounted on a sheet of letter size paper. In lieu of a photograph of the label, a sample label or engineering drawing of the label may be submitted together with a sketch showing where this label will be placed on the equipment. The label and sketch should be mounted on a sheet of letter size paper to facilitate handling and filing.

(e) The expository statement shall include the following information:

(1) A description of the equipment explaining how it operates supported by graphs, charts, and diagrams, as needed. The description shall include a circuit diagram complete with a written description and a block diagram of the circuitry noting each frequency generated in the equipment.

(2) A description of all accessories and attachments, if any, used with the equipment along with a description of how they are used.

§ 2.1039 [Reserved]

11. The present text and title of § 2.1039 are deleted in its entirety and replaced with "Reserved."

12. A new § 2.1040 is added to read as follows:

§ 2.1040 Technical report for ISM equipment.

The application for certification of ISM equipment shall include a technical report containing the following information:

(a) The full name, mailing address, street address (if different), and telephone number of the manufacturer of the equipment.

(b) The model number, trade name (if any), or FCC identifier of the equipment pursuant to § 2.1045.

(c) A copy of the installation and operating instructions furnished to the user. A draft copy of such instructions may be submitted with the application provided a copy of the final document furnished to the user is submitted to the Commission as soon as it is available, but no longer than 60 days after the grant of the application.

(d) A report of measurements clearly showing that the equipment is capable of complying with the applicable technical specifications in part 18 of this chapter. The procedure for making the measurements is specified in part 18. Measurement report shall include test data showing that the equipment complies when any attachments specified in 2.1037(e)(2) are used with the equipment.

(e) A statement of the technical parameters that includes:

Electrical power requirements of equipment.
Maximum RF energy generated.
Nominal operating frequency.
Measured frequency variations due to changes in temperature and load.
Any other pertinent operating characteristics.

(f) A statement of the operating conditions that must be observed to insure that radiation during routine operation does not exceed the technical specifications that were measured and reported herewith.

(g) The name and location of the test facility where the equipment was measured.

NOTE.—If the rules proposed in FCC docket 21371 are adopted, the individual making measurements on the equipment will be required to file a description of his test facility with the Commission.

13. Section 2.1045 is amended by adding two new paragraphs, (f) and (g), to read as follows:

§ 2.1045 Identification label for certificated equipment.

• • • • •

(f) For ISM equipment requiring certification under part 18 of this chapter the words "Model No." followed by the number assigned to the equipment by the grantee. If the identification label contains other numbers in addition to that required by this paragraph, such as "Service No.," "Catalog No.," or other similar terms, the words "Model No." should be preceded by the term "FCC Data" to avoid confusion and to facilitate recognition of the identifying number used for FCC.

NOTE.—This requirement may change if the rules in FCC docket 20790 are adopted as proposed.

(g) The identification label for ISM equipment requiring certification under part 18 of this chapter shall also legibly bear the following statement: "This equipment, as of date of manufacture, complies with 47 CFR Part 18. If harmful interference to radio communications is caused by its operation, the operator shall take the necessary steps to remedy the interference."

14. A new undesignated subheading and §§ 2.1050 to 2.1055 are added to read as follows:

ISM-REGISTRATION

§ 2.1050 General.

(a) Part 18 of this chapter provides for ISM-registration of an ISM equipment when the size, power requirement, or need for other auxiliary capability for such equipment makes it impractical to test for compliance on a standard test site.

(b) Such equipment shall be tested for compliance with the technical specifications in part 18 after it has been installed and is ready for use.

(c) The equipment shall not be placed into operation until it has been tested and found to comply with the technical specifications in part 18 and an application for ISM-registration of the equipment has been filed with the Commission pursuant to the procedures in this subpart.

(d) Pending grant of ISM-registration by the Commission such equipment may be operated on a temporary basis for a period not to exceed 90 days from the date the application was filed with the Commission. (See 2.901 et seq.) A 30-day extension may be granted by the Chief Engineer in unusual circumstances.

§ 2.1051 Cross reference.

The general provisions of this subpart, § 2.901 et seq., shall apply to applications for grants of ISM-registration of ISM equipment.

V 43 / 195
OCT 6 78

§ 2.1052 Application for ISM-registration.

(a) An application for ISM-registration shall be filed on FCC Form 731 with all questions answered. Items that do not apply shall be so noted.

(b) The applications shall be accompanied by the required technical report, photographs, expository statement, instruction manual, and such other documents that are specified in part 18 for the particular equipment.

(c) The application shall be accompanied by a sufficient number of photographs showing the general appearance, construction, RF generator, operating control attachments (accessories), if any, and placement of electronic parts. At least one photograph must show the identification label in sufficient detail so that the information required by § 2.1054 is legible. The photographs should be 8 x 10 inches in size. Smaller photographs may be submitted provided they are sharp and clear, show the necessary detail, and are mounted on a sheet of letter size paper. In lieu of a photograph of the label, a sample label or engineering drawing of the label may be submitted together with a sketch showing where this label will be placed on the equipment. The label or drawing should be mounted on a sheet of letter size paper.

(d) The expository statement shall include the following information:

(1) A description of the equipment explaining how it operates supported by graphs, charts, and diagrams, as needed. A circuit diagram shall be included, complete with a written description and where appropriate, block diagrams of the circuitry noting each frequency generated in the equipment.

(2) A description of all attachments (accessories), if any, used with the equipment with an explanation of how they are used.

(e) A statement signed and dated by the engineer who performed the tests that he had tested the assembled equipment and found it complies with the specifications in part 18 of this chapter and that in his opinion the operation of the equipment is not expected to cause harmful interference to radio communications.

§ 2.1053 Technical report.

An application for ISM-registration shall include a technical report containing the following information:

(a) The full name, mailing address, and telephone number of the manufacturer of the equipment. For composite ISM equipment, the name, address, and telephone number of the manufacturer of the RF generator part of the equipment is also required.

(b) The model number, trade name (if any), or FCC identifier of the equipment pursuant to § 2.1054.

(c) A copy of the installation and operating instructions furnished to the user. The operating manual supplied to the user shall include a list of items the user can check to insure continued compliance of the equipment with the provisions of this chapter. A draft copy of such instructions may be submitted with the application provided copies of the final documents that will be furnished to the user are submitted to the Commission as soon as they are available, but no longer than 120 days after the application is filed.

(d) The name, address, and telephone number of the firm operating the equipment accompanied by a drawing showing its physical location in the plant.

(e) A report of measurements clearly showing that the equipment with all attachments specified in § 2.1052(d)(2) is capable of complying with the applicable technical specifications in part 18 of this chapter. The procedure for making the measurements is specified in part 18.

(f) A technical description of the equipment that includes the nominal operating frequency, measured range of frequency variations due to changes in temperature and load, power requirements, RF power generated, and any other pertinent technical characteristics.

(g) A statement of the operating conditions that must be observed to insure that radiation during routine operation does not exceed, the technical specifications that were measured and reported herewith.

(h) A list of the measuring equipment used, including the manufacturer and model of equipment and the date when last calibrated.

(i) A sample calculation showing how the readings from the measurement instrument are equated to the limits in part 18.

§ 2.1054 Identification of ISM-registered equipment.

In the case of an ISM equipment registered under part 18 of this chapter, the identification label shall contain the following information:

(a) name of the grantee of the ISM-registration.

(b) The words "Model No." followed by a unique number assigned to the equipment.

NOTE.—This requirement will be conformed with any new identification rules that are adopted in FCC docket 20790.

(c) The following statement:

This equipment as of date of installation (date) complies with 47 CFR Part 18 of FCC rules. In the event that this equipment is identified as the source of harmful interference to radio communications, operation of this equipment must cease and may not be resumed until the interference problem has been corrected.

§ 2.1055 Changes in ISM-registered equipment.

(a) Any modification, or change in location, of registered ISM equipment that affects the data reported to and accepted by the Commission must comply with the provisions of this section.

(b) Two classes of permissive changes are permitted for ISM-registered equipment without requiring a new application for and grant of ISM-registration.

(1) A class I permissive change includes those modifications, or changes in location of the equipment which do not degrade the characteristics reported by the applicant and accepted by the Commission when registration is granted. No filing with the Commission is required for a class I permissive change.

(2) A class II permissive change includes those modifications or changes in location which degrade the performance characteristics as reported to the Commission at the time of initial ISM-registration. Such degraded peformance must still meet the minimum requirements of the applicable rules. The user of the equipment must supply the Commission with complete information and results of tests of the characteristics affected by such change. The Commission may require additional tests and information to verify continued compliance of the equipment and, if necessary, may require a complete new ISM-registration of the equipment.

(3) When a class II permissive change is made by other than the grantee of ISM-registration, the information and data specified in paragraph (b)(2) of this section shall be supplied by the person making the change. The modified equipment shall not be operated prior to acknowledgement by the Commission that the change is acceptable.

(c) The following changes are not considered permissive changes as defined in paragraph (b) of this section and require a new grant of ISM-registration:

(1) The addition of new or modified equipment requiring ISM-registration to the user's premise, regardless of the fact that ISM-registration has been granted to existing equipment. Test data need only be submitted for the new equipment, unless specifically requested otherwise by the Commission.

(2) Reconstruction or modification of a screen room that houses ISM-registered equipment.

(3) Relocation of ISM-registered equipment to a building where the construction and consequently the attenuation provided by the building is different.

(4) Any other change not covered by the permissive changes in paragraph (b) of this section.

(d) A user desiring to make a change other than a permissive change described in paragraph (a) of this section shall file a new application pursuant to the procedure in § 2.1052. The applicant shall attach a description of the changes to be made along with a new report of measurements.

15. Part 18 is revised as follows:

PART 18—INDUSTRIAL, SCIENTIFIC, AND MEDICAL EQUIPMENT

Subpart A—General

Sec.

18.1 Scope of the part.
18.2 Cross reference.
18.3 Definitions.
18.5 General conditions of operation.
18.7 Interference to a safety or radionavigation service.
18.30 Certification of ISM equipment.
18.31 Marketing requirement.
18.32 ISM-registration of equipment.
18.34 Interim operation permitted pending ISM-registration.
18.36 Inspection of ISM equipment by operator.
18.38 Description of measurement facilities.

Subpart B—Technical Specifications

18.100 ISM frequencies.
18.102 Reduced frequency tolerance for certain ISM equipment.
18.104 General technical requirement.
18.106 In-band emission limits.
18.108 Out-of-band emission limits.
18.110 Prohibited frequency bands.
18.112 Conducted RF voltage limits.
18.114 Exemption for electrosurgical units.
18.116 Exemption for ultrasonic equipment.
18.118 Measurement site.
18.120 Measurement procedure: At a test site.
18.122 Measurement procedure: At the user's premises.
18.124 Measurement procedure: Domestic microwave oven.
18.128 Measurement procedure: Ultrasonic equipment.
18.130 Measurement procedure: Medical diathermy equipment.

Subpart C—Interim Requirments for Existing ISM Equipment

18.200 ISM equipment manufactured before (date to be specified).
18.202 Technical specifications for ultrasonic ISM equipment manufactured before (date to be specified).
18.204 Technical requirements for industrial heating equipment manufactured before (date to be specified).
18.206 Technical requirements for medical diathermy and miscellaneous ISM equipment manufactured before (date to be specified).

AUTHORITY: Secs. 4(i), 301, 302, and 303(r) of the Communications Act as amended.

Subpart A—General

§ 18.1 Scope of this part.

(a) This part sets out the requirements and conditions under which the operation of ISM equipment is not considered to be a source of harmful interference and is therefore not required to be licensed under 47 U.S.C. 301.

(b) This part sets out the procedures governing the application for and grant of an equipment authorization to implement the requirements of 47 U.S.C. 302.

§ 18.2 Cross reference.

The requirements in subparts I, J, and K of part 2 of this chapter shall apply to an ISM equipment.

§ 18.3 Definitions.

For purposes of this part the following definitions shall apply:

(a) *"Radiofrequency energy" (RF energy).* Electromagnetic energy on any frequency or over a band of frequencies that lie between 10 kHz and 3000 GHz.

(b) *"ISM equipment."* Any apparatus or system which generates and uses "RF energy" for industrial, scientific, medical or any other purpose including the transfer of RF energy by conduction, induction or radiation and which is neither used, nor intended to be used for radiocommunications. The following devices are subject to other parts of this chapter and are not considered ISM equipment:

(1) Industrial controllers, including those that use sonic, ultrasonic, or RF energy to control other devices or equipment (see part 15 of this chapter).

(2) RF switching power supplies (see part 15).

(3) Test equipment.

(4) Any device that transfers energy or signals to an electronic apparatus, e.g., implanted pacemakers.

(5) Data processing equipment, computers, and office machines (see part 15).

(6) Carrier current or radiofrequency distribution system (see part 15).

(c) *"ISM frequency."* The frequencies, including variations due to frequency tolerance, specified in § 18.100 of this part.

(d) *"Harmful interference."* Any emission, radiation, or induction which endangers the functioning of a radionavigation service or of other safety services or seriously degrades, obstructs or repeately interrupts a radiocommunication service operating in accordance with this chapter.

(e) *"Ultrasonic equipment."* An apparatus which generates radiofrequency energy and utilizes that energy to excite or drive an electromechanical transducer for the production of sound, sonic or ultrasonic mechanical energy for industrial, scientific, medical, or other noncommunicative purposes. Equipment that generates and uses RF energy to produce ultrasonic or sonic waves for communication or control purposes is subject to rules in other parts of this chapter.

(f) *"Consumer ISM product."* Any ISM equipment used or intended to be used and operated by the general public, e.g., microwave ovens.

(g) *"Equipment authorization."* A collective term referring to type approval, type acceptance, certification, and ISM-registration of radio frequency devices. The specific equipment authorization required is specified in the rules governing that equipment (see § 2.901 et seq.). Registration of telephone equipment subject to the specification of part 68 of this chapter is not included in this definition.

(h) *"User premises."* The building in which the ISM equipment is or will be operated.

(i) *"Medical diathermy equipment."* Any apparatus, including electrosurgical units, which generate and utilize radiofrequency energy for therapeutic purposes.

(j) *"Miscellaneous ISM equipment."* Includes equipment other than industrial heating equipment and medical diathermy equipment that generate and apply RF energy to materials to produce physical, biological, or chemical effects such as heating, ionization of gases, mechanical vibrations, hair removal, and acceleration of charged particles, which do not involve communications or the use of receiving equipment.

(k) *"Low-voltage ISM equipment."* ISM equipment with input operating voltages of up to 600 volts d.c. or RMS a.c.

§ 18.5 General conditions of operation.

(a) Persons operating ISM equipment shall not be deemed to have any vested or recognizable right to the continued use of any given frequency, by virtue of prior ISM-registration or certification of equipment.

(b) Operation of ISM equipment is subject to the condition that no harmful interference is caused to radiocommunications.

(c) Notwithstanding whether the equipment complies with the rules herein, the operator of ISM equipment that causes harmful interference to any authorized radio service (with exception of interference to authorized devices operating on ISM frequencies on a secondary basis) shall promptly take steps as may be necessary to remedy the interference.

NOTE.—The Commission may also require the person receiving the interference to take corrective measures, depending on the

V 43 / 195
OCT 6 78

circumstances of the particular interference.

(d) The premises upon which ISM equipment is located and any documents required under these rules shall be available for inspection by representatives of the Commission at all reasonable hours. Upon receipt of a reasonable request by Commission representative, the owner or operator of ISM equipment shall furnish to the representative such information as may be requested pertaining to the operation, maintenance, and use of his equipment.

§ 18.7 Interference to a safety or radionavigation service.

(a) Upon notification by a Commission representative that an ISM equipment is endangering the functioning of a radio navigational or safety radio service, the operator shall cease operating the interfering equipment immediately.

(b) Corrective measures must be taken before operation of the interfering equipment may be resumed.

(c) Before operation is resumed, a report must be filed and accepted by the engineer in charge of the local Commission district office which explains in detail what corrective measures have been taken to insure that the harmful interference has been eliminated. A copy of this report shall also be concurrently filed with the Office of Chief Engineer, Federal Communications Commission, Washington, D.C. 20554. A new report of measurements showing compliance with all the requirements of this part may also be required.

(d) Upon receipt of the report, the local engineer in charge will notify the operator of the equipment within 10 days that the report is acceptable or, if not, state in writing what additional information is required to insure compliance.

(e) With the permission of the local engineer in charge, operation may be resumed on a temporary basis pending acceptance of the report required in paragraph (c) of this section. Requests for permission to operate on a temporary basis may be made and granted by telephone, provided that the request and grant are promptly confirmed in writing.

§ 18.30 Certification of ISM equipment.

(a) ISM equipment capable of being measured on a test site shall be certificated pursuant to the procedures in subpart J of part 2 of this chapter to show compliance with the technical specifications in this part.

(b) Certification is mandatory for the following ISM equipment:

(1) Domestic microwave oven;

(2) Consumer ISM products;

(3) Ultrasonic equipment having less than 500 watts output;

(4) Medical ISM products.

§ 18.31 Marketing requirement.

Importation and marketing of ISM equipment are proscribed under subpart I of part 2 of this chapter until certification if required, has been granted by this Commission. Equipment requiring ISM-registration shall comply with requirements in § 2.809 of this chapter.

§ 18.32 ISM-registration of equipment.

(a) ISM equipment that does not lend itself to measurement on a test site because of size, power requirements, or some other special consideration, shall be ISM-registered at the user's premises pursuant to the procedures in subpart J of part 2 of this chapter to show compliance with the technical specifications of this part.

(b) The supplier of the equipment requiring ISM-registration shall have the primary responsibility in submitting the application for and obtaining the grant of ISM-registration of such equipment for the user, except under the following circumstances:

(1) When the equipment is a composite of a number of subassemblies each supplied by a different manufacturer, the supplier of the RF generator shall have primary responsibility for applying for and obtaining ISM-registration of the complete ISM equipment for the user.

(2) When a previously ISM-registered equipment has been modified or changed so as to require a new grant of ISM-registration, the equipment user shall apply for and receive a new grant of ISM registration. User shall notify grantee of such application.

(3) When an ISM equipment is fabricated by the user, he shall bear the responsibility for applying for and obtaining the grant of ISM-registration of such equipment.

(c) The user shall be listed as the grantee with the supplier listed as the manufacturer on the application for ISM registration. After ISM-registration is granted the user is responsible for insuring continued compliance of the equipment.

(d) The application for ISM-registration of ISM equipment must be filed within 10 days after the equipment is placed into operation.

§ 18.34 Interim operation permitted pending ISM-registration.

After the application for ISM-registration has been filed with the Commission pursuant to § 18.32 of this part, the equipment may be operated for a maximum of 90 days pending receipt of the grant of ISM-registration. This interim operating period may be extended by the chief engineer for an additional 30 days when there is justification for the extension.

§ 18.36 Inspection of ISM equipment by operator.

(a) ISM-registered equipment shall be routinely inspected by the user's representative to insure continued compliance of the equipment. Inspections shall be made semiannually in accordance with the list of inspection items in the operating manual and pursuant to the instructions in Bulletin OCE-8. (See note under § 18.124)

(b) A log shall be maintained of the inspections. The inspector shall enter a note of his findings and shall date and sign each entry.

(c) The log shall be maintained at the same location as a copy of the report of measurements and grant of ISM-registration.

(d) A Commission representative may require the operator of the equipment to file a new application for ISM-registration if he determines, as a result of an inspection, that such action is necessary in order to assure compliance with this part.

§ 18.38 Description of measurement facilities.

Each person making measurements to be filed with an application for certification shall file a description of his measurement facility pursuant to section 2.951.

NOTE.—This requirement is being proposed in a separate rulemaking proceeding in FCC docket 21371.

Subpart B—Technical Specifications

§ 18.100 ISM frequencies.

(a) The following frequencies and tolerances are allocated for use by ISM equipment:

Frequency	Tolerance	Notes
13.56 MHz	±6.78 kHz	(1)
27.12 MHz	±160 kHz	(1)
40.66 MHz	±20 kHz	(1) (2)
915 MHz	±13 MHz	(3)
2,450 MHz	±50 MHz	(1)
5,800 MHz	±75 MHz	(1)
24,125 MHz	±125 MHz	(1)

[1] Frequencies allocated worldwide for ISM equipment.

[2] Frequencies allocated for ISM equipment worldwide, except in the United Kingdom and Italy.

[3] Frequencies allocated for ISM equipment in North and South America only (ITU Region 2).

(b) Other radiofrequency devices, including licensed transmitters, operating on frequencies in any of the bands in paragraph (a) of this section shall be operated on a secondary basis and must accept any interference received from ISM equipment.

§ 18.102 Reduced frequency tolerance for certain ISM equipment.

Medical diathermy and consumer ISM equipment designed to operate in an ISM band, shall not have frequency variations that exceed 70 percent of the tolerance listed in section 18.100(a) after a 5-minute warmup period. Emissions outside this reduced band shall be below the levels specified in section 18.108 for out-of-band emissions.

§ 18.104 General technical requirement.

ISM equipment shall be designed and constructed in accordance with good engineering practice with sufficient shielding and filtering to provide adequate suppression of emissions on frequencies outside the ISM frequency bands.

§ 18.106 In-band emission limits.

ISM equipment operating on a frequency specified in section 18.100 is permitted unlimited conducted and radiated energy in the band specified for that frequency or the band reduced by

$$\text{Field Strength} = 30\sqrt{\frac{\text{RF Power in Watts}}{1000}}$$

(Frequency of Emission in the range 30 to 470 MHz)

$$\text{Field Strength} = 100\sqrt{\frac{\text{RF Power in Watts}}{1000}}$$

(Frequency of Emission in the range 470 to 1000 MHz)

This relaxation of the out-of-band emissions does not apply to emissions that fall on frequencies within the TV channel in use at the user's site.

NOTE 3: ISM equipment within 80 km (50 mil) distance of a nondirectional beacon transmitter employed in the aeronautical radio navigation service shall not operate on a frequency that is within 20 kHz of the frequency assigned to such nondirectional beacon.

§ 18.110 Prohibited frequency bands.

The following frequency bands are allocated for safety, search and rescue operations: 490-510 kHz, 2170-2194 kHz, 8354-8374 kHz, 121.5 MHz, 156.8 MHz, 243 MHz. Operation of ISM equipment on these frequencies is prohibited.

§ 18.112 Conducted RF voltage limits.

ISM equipment designed to be connected to low or middle voltage (100 to 600 volts) public utility powerlines that also feed power to residential dwellings shall be capable of limiting the RF voltage conducted back into the powerlines in accordance with the levels specified below when measured in accordance with the procedure in Bulletin OCE 47—"FCC Test Procedure for Measuring Conducted RF Voltage" (see note under § 18.124).

Conducted RF Voltage Limits in Millivolts (Average Value)

Frequency range in kHz	Consumer ISM equipment (mV)	All other ISM equipment (mV)
10 to 100	[1]10 to 1	10
100 to 150	1	10
150 to 200	1	3
200 to 500	1	2
500 to 30,000	0.1	1

[1] Linear interpolation.

§ 18.114 Exemption for electrosurgical units.

Until further notice, an electrosurgical unit is exempt from complying with out-of-band radiation limits of Section 18.108 only when used pursuant to one of the following conditions:

(a) When used by a licensed medical doctor, dentist, or veterinarian in the performance of surgical procedures, provided the RF energy generated by the unit can only be activated when needed during surgical procedures.

(b) For testing and servicing by a qualified technician in a shielded room.

§ 18.116 Exemption for ultrasonic equipment.

An ultrasonic equipment that complies with the conducted RF voltage limits in § 18.112 when measured using the procedure in FCC Bulletin OCE-47 (see note under § 18.124) is considered to have sufficient RF interference suppression to meet the out-of-band emission limits of section 18.108. Tests to show compliance with section 18.108 are not required, unless such data is specifically requested by the Commission.

§ 18.118 Measurement site.

(a) ISM equipment shall be measured for compliance on an FCC approved test site pursuant to § 2.951, unless there is some compelling reason why the equipment cannot be tested on such a site. Measurements on such a site are mandatory for the following equipment:

(1) Domestic microwave ovens;

(2) Consumer ISM products;

(3) Ultrasonic equipment having less than 500 watts output;

(4) Medical ISM products.

(b) ISM equipment which, because of its size, power requirements, or other special considerations, cannot be measured on an FCC approved test site may be measured for compliance at the user's premise.

NOTE.—The user's premises are defined for the purposes of this Part as the building where the equipment is being operated.

§ 18.120 Measurement procedure: At a test site.

Unless otherwise specified, ISM equipment required to be measured for compliance with the specifications of this part on an FCC approved test site shall be measured pursuant to the procedures in FCC Bulletin OCE-48—"FCC Test Procedures for ISM Equipment Measured on an Approved Site" (see note under § 18.124).

§ 18.122 Measurement procedure: At the user's premises.

Unless otherwise specified, ISM equipment measured for compliance with the specifications of this part at the user's premise shall be measured pursuant to the procedure in FCC Bulletin OCE-49—"FCC Test Procedure for ISM Equipment Tested at the User's Premises."

NOTE 1: For certification, measurements are made on a test site and the distance is measured from the ISM equipment under test. For ISM-registration, measurements are made at the user's premises where the equipment is installed and the distance is measured from the perimeter of the building in which the equipment is installed.

NOTE 2: For ISM-registered equipment having RF power outputs in excess of 1000 watts, the permitted level of out-of-band emissions in the above-noted frequency bands may be increased in accordance with the following relations, but in no case shall the level exceed 500 uM/m at 30 meters.

Out-of-Band Emission Limits

Frequency (MHz)	Field Strength (uv/m)	Distance (note 1) (meters)
0.01 to 0.285	200 (note 3)	30
0.285 to 0.49	900 (note 3)	30
0.49 to 1.605	200	30
1.605 to 3.95	900	30
3.95 to 30	200	30
30 to 108	30 (500 note 2)	30
108 to 135	30	30
135 to 470	30 (500 note 2)	30
470 to 1,000	100 (500 note 2)	30
1,000 to 18,000	1,500	3

V 43/195
OCT 6 78

§ 18.124 Measurement procedure: Domestic microwave oven.

A domestic microwave oven shall be tested for compliance with the out-of-band emission limits using the procedure in FCC Bulletin OCE-20, "FCC Test Procedure for Microwave Ovens."

NOTE.—Draft measurement procedures are still under consideration for this equipment and will be released as soon as practical. A public notice will be issued announcing their release. When available, copies may be obtained by writing to: Federal Communications Commission, OCE, Room 7306, 2025 M Street NW., Washington, D.C. 20554.

§ 18.128 Measurement procedure: Ultrasonic equipment.

An ultrasonic equipment shall be tested for compliance with the conducted RF voltage limits by using the procedure in FCC Bulletin OCE-47, "FCC Procedure for Measuring RF Line Conducted Voltage" (see note under § 18.124).

§ 18.130 Measurement procedure: Medical diathermy equipment.

A medical diathermy equipment, excluding an electrosurgical unit shall be tested for compliance with the out-of-band emission limits using the procedure in Bulletin OCE-39, "FCC Test Procedure for Medical Diathermy Equipment."

Subpart C—Interim Requirements for Existing ISM Equipment

§ 18.200 ISM equipment manufactured before (date to be specified).

In lieu of meeting the requirements in subparts A and B of this part, ISM equipment manufactured before (date to be specified) shall comply with all the conditions in paragraphs (a) through (d) of this section. An individual license is not required for ISM equipment that complies with these requirements. These interim provisions shall terminate on (date to be specified). All ISM equipment operated after (10 years after effective date of new rules) shall comply with the requirements in subpart A and B of this part.

(a) The equipment complies with the appropriate technical specifications in §§ 18.202-18.206 for the particular class of equipment.

(b) The equipment has been type approved or certificated and the certification is attached to the equipment or is prominently posted in the room in which it is being operated.

(c) If the equipment was certificated or type approved before (date to be specified) renewal of such certificate or type approval is not required, provided no change is made to the equipment. In the event that the equipment is changed or modified so that the data previously reported to the Commission is no longer valid, or if the Commission has reason to believe that operation of the equipment may be inconsistent with the terms of the certificate or type approval, the Commission may require a new certification pursuant to the procedures in subpart B of this part. Operation of such equipment must terminate (10 years after effective date of rules) or thereafter must comply with requirements in subpart A and B of this part.

(d) Ultrasonic equipment operating on frequencies below 90 kHz and generating less than 500 watts of radiofrequency power may be operated without a license, type approval or certification, provided it complies with all other applicable requirements in § 18.202.

§ 18.202 Technical specifications for ultrasonic ISM equipment manufactured before (date to be specified).

(a) Under varying conditions of operation, emissions from ultrasonic equipment shall not exceed the following limits:

Frequency	Distance in meters	Field strength in μV/m
Below 490 kHz	300	2400 F(kHz).
490 to 1600 kHz	30	24000 F(kHz).
Above 1600 kHz	30	15.

(b) The operation of ultrasonic equipment on frequencies below 490 kHz using radiofrequency power in excess of 500 watts shall be in compliance with the requirements of this section except that the maximum radiated field permitted may be increased as the square root of the ratio of the generated radiofrequency power to 500 watts: *Provided*, That the field shall in no case exceed the field of 10 microvolts per meter at 1,600 meters (1 mile), and provided further, that equipment used in predominantly residential areas shall not be permitted the increase in field with power as indicated in this paragraph.

(c) On any frequency above 490 kHz, the radiofrequency voltage appearing on each power line shall not exceed 1,000 microvolts. Measurement shall not exceed 200 microvolts. On any frequency below 490 kHz, the radiofrequency voltage appearing on each power line shall be made from each power line to ground with the equipment itself both grounded and ungrounded.

§ 18.204 Technical requirements for industrial heating equipment manufactured before (date to be specified).

(a) Industrial heating equipment operating on an ISM frequency may be operated with unlimited radiation on that frequency. Equipment operated on other frequencies must suppress radiation on the fundamental carrier frequency as well as other frequencies as required by this section. Industrial heating equipment shall include any apparatus which generates and uses RF energy for or in connection with industrial heating operations utilized in manufacturing or production process.

(b) Industrial heating equipment designed for operation on an ISM frequency shall be adjusted to operate as close to that ISM frequency as practicable.

(c) Radiation of radiofrequency energy from any industrial heating equipment on any frequency below 5725 MHz, except ISM frequencies, shall be suppressed so that the radiated field strengtrh does not exceed 10 microvolts per meter at a distance of one mile or more from the equipment.

(d) Radiation of radiofrequency energy from any industrial heating equipment on any frequency above 5725 MHz, except ISM frequencies, shall be reduced to the greatest extent practicable.

(e) Filtering between the industrial heating equipment and powerlines must be provided to the extent necessary to prevent the radiation of energy from power lines on frequencies other than ISM frequencies with a field strength in excess of 10 microvolts per meter at a distance of 1 mile (1,600 meters) or more from the industrial heating equipment and at a distance of 50 feet from the powerline.

§ 18.206 Technical requirements for medical diathermy and miscellaneous ISM equipment manufactured before (date to be specified).

(a) Medical diathermy and miscellaneous ISM equipment manufactured before (date to be specified) and operating on an assigned ISM frequency may be operated with unlimited rediation on that frequency. Spurious and harmonic emissions on frequencies other than on the assigned ISM frequencies from each equipment shall be suppressed so that they do not exceed 25 microvolts per meter at a distance of 300 meters or more from the equipment.

(b) Medical diathermy and miscellaneous ISM equipment operating on a frequency outside the ISM bands shall limit all emissions to 15 microvolts per meter at a distance of 300 meters or more from the equipment.

(c) The maximum radiated field from miscellaneous equipment generating in excess of 500 watts may be increased as the square root of the ratio of the generated power to 500 watts, provided that the radiated field does not exceed 10 microvolts per meter at 1600 meters.

National Oceanic and Atmospheric Administration

[50 CFR Parts 611 and 672]

GROUNDFISH OF THE GULF OF ALASKA

Fishery Management Plan Amendment; Proposed Implementary Regulations

AGENCY: National Oceanic and Atmospheric Administration/Commerce.

ACTION: Notice of approval of fishery management plan amendment; proposed regulations.

SUMMARY: An amendment to the fishery management plan (FMP) for the Gulf of Alaska Groundfish Fishery submitted by the North Pacific Fishery Management Council is approved. This amendment increases the portion of each species' optimum yield (OY) set aside as a reserve. Amendments to the regulations which were proposed to implement to FMP are proposed. These amendments set forth the procedures and criteria to be used by the Regional Director of the National Marine Fisheries Service in making allocations from the reserve to Total Allowable Level of Foreign Fishing (TALFF) for harvesting by vessels of foregin nations.

DATE: Comments are invited until November 17, 1978.

ADDRESS: Comments should be addressed to the Assistant Administrator for Fisheries, National Oceanic Atmospheric Administration, Washington, D.C. 20235. Please mark "Alaska Groundfish" on outside of the envelope.

FOR FURTHER INFORMATION CONTACT:

Harry L. Rietze, Director, Alaska Region, National Marine Fisheries Service, P.O. Box 1668, Juneau, Alaska 99802, telephone number 907-586-7221.

SUPPLEMENTARY INFORMATION: On April 21, 1978, a FMP for the Gulf of Alaska Groundfish Fishery prepared by the North Pacific Fishery Management Council (the Council) was approved (43 FR 17242). That FMP established conservation and management measures for both the foreign and domestic groundfish fisheries in the Gulf of Alaska under the Fishery Conservation and Management Act of 1976, 16 U.S.C. 1801 et seq., as amended. Proposed regulations to implement the FMP were also published on April 21, 1978 (43 FR 17013 for foreign vessels; 43 FR 17242 for vessels of the United States).

On August 7, 1978, an amendment of the FMP submitted by the Council was published in the FEDERAL REGISTER (43 FR 34825). That amendment extended the established optimum yields (OY's), statement of U.S. capacity, and total allowable level of foreign fishing (TALFF) from December 31, 1978 to October 31, 1979.

On August 28, 1978, the Council submitted another amendment to the FMP for approval. This amendment raises the pollock reserve to 133,800 metric tons, with appropriate increases in the reserves of species that will be taken incidental to a directed fishery for pollock, in order to assure that an adequate supply of fish is available for harvest through October 31, 1979 by U.S. fishermen in potential joint venture operations involving sale of U.S. caught fish to foreign processing vessels at sea.

The proposed implementary regulations for this amendment set forth the procedure for making allocations from this reserve to the TALFF during the plan year. In order to assure that any portion of the reserve that will not be utilized by U.S. fishermen is made available to foreign fisheries in an expeditions manner, the proposed regulations provide that 25 percent of the initial reserve will be allocated to the TALFF every 2 months (bimonthly, beginning January 2, 1979, unless it is determined by the Regional Director that United States fishing vessels will harvest all of the remaining reserve during the remainder of the plan year. If such a determination is made, the Regional Director will withhold from allocation to the TALFF all or part of the scheduled bimonthly allocation of the reserve.

A determination that the remaining reserves will be harvested by United States fishing vessels would be based on consideration of: (1) Reported U.S. catches by species and area; (2) projected U.S. catch and effort by species and area; and (3) projected and utilized processing capacity of United States fish processors. Interested persons are afforded a period of 15 days in which to submit comments supported by data or other factual material prior to the time of making each determination. If, on the basis of such a determination, the Regional Director withholds all or a portion the normal bimonthly allocation to the TALFF, and the subsequent performance of United States fishing vessels fails to achieve the anticipated harvest levels upon which the determination was made, then any amount of fish in the reserves previously withheld from allocation are to be added to the next bemonthly allocation to TALFF.

The Assistant Administrator for Fisheries, under a delegation of authority from the Secretary, has determined that this amendment to the FMP is (1) necessary and appropriate to the conservation and management of Gulf of Alaska groundfish resources; (2) is consistent with the national standards and other provisions of the Act and other applicable laws; and (3) does not constitute a major Federal action requiring the preparation of an environmental impact statement.

NOTE.—It has been determined that this amendment does not require a Regulatory Impact Analysis under Executive Order 12044.

Signed at Washington, D.C., this 29th day of September, 1978.

WINFRED H. MEIBOHM,
Acting Executive Director,
National Marine Fisheries Service.

The FMP (43 FR 17244, Apr. 21, 1978) is revised as follows:

FEDERAL REGISTER, page 17245—No. 2

Recommend the initial foreign allocation of surplus stocks be computed by the following formula: Initial Foreign Allocation=(0.8 OY)—DAH—Special JV Reserve. The 20 percent of OY and the Special Joint Venture Reserves are to be reevaluated beginning January 2, 1979 and reallocated to the domestic or foreign fisheries following reassessment of U.S. development—both in terms of Joint Venture activities and delivery to U.S. shorebased processors.

Page 17245—No. 3: Sentence 1, add after "• • • to U.S. processors" • • •:

• • • and later reallocate from special joint reserves the amounts needed to handle the delivery of raw fish to foreign processors by U.S. fishermen.

(Delete all of sentence 2.)

Page 17312—Section 5.2.1 Domestic annual capacity (DAC).

Add an additional paragraph directly after paragraph No. 1 to read as follows:

In addition to the U.S. shore-based harvesting and processing capacity surveyed, at least two joint U.S./foreign ventures intend to opeate in the management areas. Both operations will buy pollock and other groundfish from American fishermen delivered directly to foreign processing ships in the FCZ. The catching and processing capacity identified in this plan for those ventures has been furnished by the two joint U.S./foreign firms active in developing these enterprises.

Page 17312—Section 5.2.1.2 Processing capacity.

And a paragraph directly after paragraph No. 4 to read as follows:

In addition to the purely domestic processing capacity as indicated in the preceding, two U.S./foreign ventures intend to fish in the Gulf of Alaska with foreign processing ships receiving raw fish, primarily pollock, from U.S. fishing vessels. One venture

V 43 / 195 OCT 6 1978

has a stated capacity of 300 metric tons of raw product per day while the other has capacity up to 600 tons per day based on up to three processing ships receiving 200 tons apiece. Based on these figures, a total of 900 tons per day for an estimated 200 days, their capacity is 180,000 metric tons.

Page 17312—Section 5.2.1.3 Freezing capacity.

Add a second paragraph to read as follows:

The intended U.S./foreign joint ventures will be working solely on groundfish and their capacity is figured for a 200-day fishing year. The two ventures, involving up to four processing ships, are capable of processing and freezing 900 tons of raw product a day, or 180,000 metric tons for the year.

Page 17312—Section 5.2.1.4 Holding capacity.

Add a second paragraph to read as follows:

Holding capacity for the foreign processing ships that might be involved in joint U.S./foreign ventures in the Gulf of Alaska is not considered a factor since the product will be moved on a regular basis.

Page 17313—Section 5.2.2 Expected domestic annual harvest (DAH).

Delete paragraph 2 and insert the following;

In order to ascertain just how much of the total domestic capacity would be utilized in 1978, the industry representatives were asked to furnish their projections for moving into the groundfish fisheries. Considerable planning has been done to establish joint ventures or contracts for foreign processing ships to purchase raw fish directly from U.S. fishing vessels. This form of domestic utilization will be allowed during the last four months of 1978 and for the fishing year 1979. The expected domestic annual harvest (DAH) for 1978 however, has been considered only from the standpoint of deliveries to domestic processing plants. A special J/V reserve allocation has been created to handle the potential joint venture catches and is described fully in Section 7.0.

Page 17313—Section 5.2.2.2 Delivered to foreign factory ships.

Revise to read as follows:

Delivery of U.S.-caught groundfish to foreign processing vessels has been permitted during the last four months of 1978. It is expected that such delivery will again be permitted for the period from November 1st, 1978, through October 31st, 1979. The two operations that have been currently issued permits estimate a take of 155,000 metric tons of pollock and associated by-catch during that period. If, in fact, this quantity is necessary, it will be reallocated from the reserve to DAH as their ability to catch and process these quanitities becomes apparent.

Page 17314—Section 4.0 Foreign allowable catch (FAC).

Completely revise to read as follows:

United States fishermen will have reserved for their use during the 1979 fishing year any amount of any species up to the optimum yield based on credible projections of catch. The optimum yield (OY) of any species or species group shall not be exceeded by the all nation fishery. Optimum yields for each groundfish species or species group in the Gulf of Alaska are shown in Table 58. Expected domestic annual harvest (DAH) projections are shown in Table 61. The foreign allowable catch (FAC) will be determined and applied as described below.

Because: (1) Growth of the domestic groundfish fishery cannot be accurately forecast; (2) constraints against growth of the domestic fishery up to the level of optimum yield are contrary to the intent of Pub. L. 94-265; (3) optimum yield should neither be exceeded nor should it go unrealized; and (4) recognizing that domestic fishermen are often restricted in their activity during a season, it is, therefore, not unreasonable to make in-season amendments to measures applying to foreign fishermen. FAC will be set in a manner so as to allow in-season adjustments between foreign and domestic fisheries. Such adjustments will be dictated by domestic fishery performance and will be accomplished as follows:

The initial FAC for each species for the 1979 fishing year will equal DAH subtracted from 80 percent of OY less specific amounts for each species held in reserve until January 2, 1979 at which time progress of the proposed joint ventures using foreign processing ships can be evaluated.

Initial FAC will be computed as follows: FAC=(0.8 OY)—DAH—special J/V reserve. The amount of special J/V reserve for each species is shown in the following table.

	Metric tons
Pollock	100,000
Other rockfish	2,000
POP	3,000
Sablefish	1,500
Pacific cod	3,000
Flounders	3,000
Squid	500
Atka mackerel	500
Other species	1,500

The reserve (20 percent of OY + amounts in the preceding table) will be apportioned to foreign or domestic fisheries as the season progresses on the basis of continuing reappraisals of DAH. The gulfwide schedule of OY/reserve/DAH/FAC is given in table 62. FAC and reserve have also been apportioned to individual statistical areas (table 64).

Page 17317—Section 8.3.1.1(D)(2). Revise to read as follows:

(2) December 1 to May 31: When the total incidental trawl catch of halibut in any statistical area exceeds that amount listed below, that statistical area shall be closed to domestic trawling for the remainder of this period.

Shumagin—29 mt.
Chirikof—18 mt.
Kodiak—34 mt.
Yukutat—17 mt.
Southeast—14 mt.

Page 17315—Change table 62 to read as follows:

TABLE 62.—*Derivation of Foreign Allowable Catch (FAC)[1] for Gulf of Alaska Groundfish in 1978–79*

[In thousand metric tons]

Species	OY	Reserve	Additional reserve for possible J/V ventures	DAH	FAC[1]
Pollock	166.6	33.8	100.0	14.2	20.8
Cod	34.8	7.0	3.0	15.5	[2]9.3
Flounders	33.5	6.7	3.0	7.2	16.6
Pacific Ocean perch	25.0	4.9	3.0	1.1	16.0
Other rockfish	7.6	1.5	2.0	2.0	2.1
Sablefish	13.0	2.6	1.5	4.0	4.9

V 43/195 OCT 78

(2) Revise 50 CFR 672.3(d) to read as follows:

§ 672.3 Domestic annual harvest, optimum yield, and reserve.

* * * * *

(d) The reserves set out in table I of this section represent 20 percent of OY, plus an additional amount set aside as a special reserve for possible joint venture operations.

(1) The reserves for all species will be allocated to the total allowable level of foreign fishing (TALFF) every 2 months (bimonthly) as soon as practicable after each of the following dates, in the amount indicated:

January 2—25 percent.
March 2—25 percent.
May 2—25 percent.
July 2—25 percent.

(2) The Regional Director may withhold from allocation all or part of each of the bimonthly allocations in paragraph (d)(1) of this section if he/she determines that the remaining reserves will be harvested by fishing vessels of the United States. Such a determination shall be based upon consideration of the following factors:

(i) Reported U.S. catches by species and area;

(ii) Projected U.S. catch and effort by species and areas;

(iii) Projected processing capacity by U.S. processors; and

(iv) Utilized processing capability by U.S. processors.

(3) Interested persons may file comments with the Regional Director concerning whether or not, and the extent to which vessels of the United States will harvest all of the remaining reserve during the plan year.

(4) Comments may be submitted no later than 15 days prior to the dates specified in paragraph (d)(1) of this section.

(5) The Regional Director shall consider any timely comments filed in accordance with this section, in making the determination specified in paragraph (d)(2) of this section.

(6) The Regional Director shall compile, in aggregate form, the most recent available reports on level of catch and effort by vessels of the United States in the groundfish fishery. This data shall be open for public inspection during business hours at the National Marine Fisheries Service, Alaska Regional Office, Federal Building, Room 453, 709 West Ninth Street, Juneau, Alaska 99802, during each 15 day period.

(7) If domestic fishermen fail to utilize any portion of a 25 pervent dimontly allocation withheld from allocation by the Regional Director pursuant to paragraph (d)(2) of this section, the unutilized portion shall be added to the amount allocated to the TALFF's in the next bimonthly allocation.

43 FR 17014: (1) Revise 611.92(b)(1), table I to read as follows:

TABLE 1.—*Gulf of Alaska Groundfish Fishery: Initial Foreign Fishing Allocations by Nation and Area for 1978/79 (Metric Tons) Reserves*

(A) Shumagin Area

Nation	Pollock	Pacific ocean perch	Other rockfishes	Flounders	Sablefish	Atka mackerel	Pacific cod [1]	Squid	Other species
Japan									
Korea									
Mexico									
Poland									
USSR									
Initial TALFF	7,000	1,700	100	5,200	800	3,400	2,570	200	3,000

Reserves									
Total initial TALFF	20,800	16,000	2,100	16,600	4,900	19,300	[2]9,300	1,100	11,000
Reserves	133,800	7,900	3,500	9,700	4,100	5,500	10,000	900	4,700

(2) Revise 611.92(b)(1) as follows:

(b) * * *

(1)(i) The initial TALFF's set out in table 1 of this section represent the amount of fish remaining after the expected domestic annual harvest (DAH) and additional reserves (in the amounts indicated in table 1) were subtracted from the optimum yields (OY's) for each species.

(A) * * *

(B) The reserves for all species will be allocated to the TALFF's every 2 months (bimonthly) as soon as practicable after the following dates, in the amount indicated:

January 2—25 percent.
March 2—25 percent.
May 2—25 percent.
July 2—25 percent.

(C) The Regional Director may withhold from allocation all or part of each of the bimonthly allocations in paragraph (b)(1)(i)(B) of this section, if he/she determines that the remaining reserves will be harvested by fishing vessels of the United States. Such a determination shall be based upon consideration of the following factors:

(1) Reported U.S. catches by species and area;

(2) Projected U.S. catch and effort by species and areas;

(3) Projected processing capacity by U.S. processors; and

(4) Utilized processing capability by U.S. processors.

(D) Interested persons may file comments with the Regional Director concerning whether or not, and the extent to which, vessels of the United States will harvest all of the remaining reserve during the remainder of the plan year.

(1) Comments may be submitted no later than 15 days prior to the dates specified in paragraph (b)(1)(i)(B) of this section.

(2) The Regional Director shall consider any timely comments filed in accordance with this section, in making the determination specified in paragraph (b)(1)(i)(C) of this section.

(3) The Regional Director shall compile, in aggregate form, the most recent available reports on level of catch and effort by vessels of the United States in the groundfish fishery. This data shall be open for public inspection during business hours at the National Marine Fisheries Service, Alaska Regional Office, Federal Building, Room 453, 709 West Ninth Street, Juneau Alaska 99802, during each 15 day period.

(D) If domestic fishermen fail to utilize any portion of a 25 percent bimonthly allocation withheld from allocation by the Regional Director pursuant to paragraph (b)(1)(i)(C) of this section, the unutilized portion shall be added to the amount allocated to the TALFF's in the next bimonthly allocation.

* * * * *

50 CFR 611.20(c), Table I is revised as follows:

50 CFR 611.20(c), table 1 is revised as follows:

Species code	Species	Ocean area	Initial TALFF (metric tons)	U.S. capacity review dates
*	*	*	*

Rural Electrification Administration

ASSOCIATED ELECTRIC COOPERATIVE, INC.

Intent To Prepare Environmental Impact Statement

Notice is hereby given that the Rural Electrification Administration intends to prepare an environmental impact statement in accordance with section 102(2)(C) of the National Environmental Policy Act of 1969, in connection with possible financing for Associated Electric Cooperative, Inc., P.O. Box 754, Springfield, Mo. 65801.

This financing is related to proposed construction of approximately 55 miles of 500 kV transmission line in the counties of New Madrid, Pemiscott, and Dunklin, Mo., and Mississippi County, Ark.

Interested persons are invited to submit comments which may be helpful in preparing the draft EIS.

Comments should be forwarded to the Assistant Administrator—Electric, Rural Electrification Administration, U.S. Department of Agriculture, Washington, D.C. 20240, with a copy to Associated, whose address was given above. Additional information may be obtained at the borrower's office during regular business hours.

Any financing which may be made pursuant to this possible application will be subject to, and the release of funds thereunder will be contingent upon, REA's reaching satisfactory conclusions with respect to environmental effects and final action will be taken only after compliance with Environmental Statement procedures required by the National Environmental Policy Act of 1969.

Dated at Washington, D.C., this 29th day of September 1978.

DAVID A. HAMIL,
Administrator, Rural
Electrification Administration.

[FR Doc. 78-28261 Filed 10-5-78; 8:45 am]

[3410-15]

ASSOCIATED ELECTRIC COOPERATIVE, INC., AND WESTERN FARMERS ELECTRIC COOPERATIVE

Final Environmental Impact Statement

Notice is hereby given that the Rural Electrification Administration has issued a final environmental impact statement in accordance with section 102(2)(C) of the National Environmental Policy Act of 1969, in connection with possible financing assistance for Associated Electric Cooperative, Inc., P.O. Box 754, Springfield, Mo. 65801, and for Western Farmers Electric Cooperative, P.O. Box 429, Anadarko, Okla. 73005.

The anticipated financing assistance would provide Associated and Western Farmers with the financing required to participate with the Public Service Co. of Oklahoma in the joint construction of the Black Fox Station, a 2,300 MW (net) nuclear generating plant, to be located in Rogers County, Okla. Also, related to the project would be 278 circuit miles of new transmission lines in northeastern Oklahoma, northwestern Arkansas, and southwestern Missouri to interconnect with existing transmission systems.

Additional information may be secured on request, from Mr. Richard F. Richter, Assistant Administrator—Electric, Rural Electrification Administration, U.S. Department of Agriculture, Washington, D.C. 20250. The final environmental impact statement may be examined during regular business hours at the offices of REA in the South Agriculture Building, 12th and Independence Avenue SW., Washington, D.C., Room 4314, or at the headquarters of Associated Electric Cooperative, Inc., or Western Farmers Electric Cooperative whose addresses are given above.

Final action may be taken with respect to this matter after November 6, 1978.

Any loan guarantee which may be made pursuant to this application will be subject to, and release of funds thereunder will be contingent upon, REA's reaching satisfactory conclusions with respect to environmental effects and final REA action will be taken only after compliance with environmental statement procedures required by the National Environmental Policy Act of 1969.

Dated at Washington, D.C., this 29th day of September 1978.

DAVID A. HAMIL,
Administrator, Rural
Electrification Administration.

[FR Doc. 78-28262 Filed 10-5-78; 8:45 am]

[3410-15]

MINNKOTA POWER COOPERATIVE

Negative Determination; Environmental Impact Statement

Notice is hereby given that the Rual Electrification Administration (REA) has made a negative determination on the need for an environmental impact statement by REA in connection with the construction of a 35 MW combustion turbine by Minnkota Power Cooperative (Minnkota). The combustion turbine will be located on a Minnkota-owned site located 1.5 miles northeast of Larimore in Grand Forks County, N. Dak. Funding for the turbine is proposed to be obtained from non-REA sources.

REA has prepared an environmental assessment on the proposed action. Minnkota has prepared an environmental analysis of the proposed action in which REA had extensive input. The environmental analysis is in compliance with REA's environmental guidelines and numerous commitments have been made by Minnkota to satisfy Federal, State, and local requirements.

Responsible officials have been contacted in their areas of expertise, and no objections to the project were expressed. Rare and endangered species, prime and unique farmlands, archaeological and historic sites, and other potential impacts of the project are adequately considered, and we do not anticipate any significant effects as a result of the project. Findings related to the compliance with applicable statutes, Executive orders, or memorandums have been made and attached to the environmental assessment.

Our independent evaluation of the proposed project leads us to conclude that installation of this turbine is not a major Federal action that would significantly affect the quality of the human environment.

Based on REA's independent evaluation, our environmental assessment, our review of the environmental analysis and REA experience with installations of this type and the subsequent environmental effects, a negative determination was made under section 5K of REA Bulletin 20-21.

Copies of the environmental assessment with the attached list of non-NEPA findings and environmental analysis may be secured on request, submitted to Mr. Richard F. Richter, Assistant Administrator—Electric, Rural Electrification Administration, U.S. Department of Agriculture, Washington, D.C. 20250.

Final REA action with respect to this matter may be taken after October 23, 1978, but only after REA has reached satisfactory conclusions with respect to its environmental effects and under procedural requirements set forth in he National Environmental Policy Act of 1969 have been met.

Dated at Washington, D.C., this 29th day of September 1978.

DAVID A. HAMIL,
Administrator, Rural
Electrification Administration.

[FR Doc. 78-28260 Filed 10-5-78; 8:45 am]

[3410-15]

WESTERN FARMERS ELECTRIC COOPERATIVE

Final Environmental Impact Statement

Notice is hereby given that the Rural Electrification Administration has prepared a final environmental impact statement in accordance with section 102(2)(C) of the National Environmental Policy Act of 1969, in connection with a request for financing assistance from Western Farmers Electric Cooperative, P.O. Box 429, Anadarko, Okla. 73005.

This request includes financing for a 376 MW (net) coal-fired electric generating station and 29 miles of transmission lines and related facilities to be located near Hugo, Okla.

Additional information may be secured on request, submitted to Mr. Richard F. Richter, Assistant Administrator—Electric, Rural Electrification Administration, U.S. Department of Agriculture, Washington, D.C. 20250. The final environmental impact statement may be examined during regular business hours at the offices of REA in the South Agriculture Building, 12th Street and Independence Avenue SW., Washington, D.C., Room 4043, or at the office of Western Farmers Electric Cooperative, whose address was given above.

Final REA action may be taken with respect to this matter after November 6, 1978.

Any financial assistance which may be made pursuant to this application will be subject to, and release of funds thereunder will be contingent upon, REA's reaching satisfactory conclusions with respect to environmental effects and final REA action will be taken only after compliance with environmental statement procedures required by the National Environmental Policy Act of 1969.

Dated at Washington, D.C., this 29th day of September 1978.

DAVID A. HAMIL,
Administrator, Rural
Electrification Administration.

Office of the Secretary

ADVISORY COMMITTEE ON EXPORT SALES REPORTING

Meeting

In accordance with the Federal Advisory Committee Act (Pub. L. 92-463), notice is hereby given of the following Committee meeting:

Name: Advisory Committee on Export Sales Reporting.
Date: October 23, 1978.
Time: 1 to 4 p.m.
Place: Room 218-A, Administration Building, U.S. Department of Agriculture, 1400 Independence Avenue, Washington, D.C. 20250.
Type of meeting: Open.
Contact person: Dr. Kelly Harrison, General Sales Manager, USDA, Washington, D.C. 20250, telephone 202-447-5651.
Summary minutes: May be obtained from the Office of the General Sales Manager, USDA, Washington, D.C. 20250.
Purpose: On August 1, 1978, the Secretary of Agriculture created the Advisory Committee on Export Sales Reporting to review the present reporting requirements and make recommendations to strengthen and improve the effectiveness of the monitoring capability.

Agenda: 1 to 4 p.m.—A discussion of the organization, functioning, and planning for future activities of the Advisory Committee.

Dated: October 2, 1978.

KELLY HARRISON,
General Sales Manager and Executive Secretary, Advisory Committee for Export Sales Reporting.

[6320-01]

CIVIL AERONAUTICS BOARD

[Docket No. 33091; Order 78-9-122]

ALLEGHENY AIRLINES, INC., ET AL.

Order Regarding Florida Service Case

Issued under delegated authority, September 28, 1978.

By order 78-7-128, July 25, 1978, the Board instituted the *Florida Service Case*, docket 33091, to consider whether the public convenience and necessity require new or improved authority between and among Fort Lauderdale, Gainesville, Jacksonville, Melbourne, Miami, Orlando, Panama City, Pensacola, Tallahassee, Tampa-St. Petersburg-Clearwater, West Palm Beach, Atlanta, Mobile, and New Orleans.

In addition, the Board delegated to the administrative law judge the authority to consolidate any applications which conform to the scope of the proceeding. The following listed applications conform to the scope of the issues in the *Florida Service Case*:

Allegheny Airlines, Inc., docket 33255.
Air Florida, Inc., docket 33272.
Braniff Airways, Inc., docket 33246.
Continental Air Lines, Inc., docket 33263.
Delta Air Lines, Inc., docket 33222 (with the exception of the request to serve Daytona Beach).
Frontier Airlines, Inc., docket 33273.
National Airlines, Inc., docket 33271.
North Central Air Lines, Inc., docket 33259.
Northwest Airlines, Inc., docket 33198.
Piedmont Aviation, Inc., docket 33245.
Ozark Air Lines, Inc., docket 33282.
Southeast Air Lines, Inc., docket 33207.
Southern Airways, Inc., docket 31680 (amendment No. 1).
Texas International Airlines, Inc., docket 33194.
Trans World Airlines, Inc., docket 33261.
Western Air Lines, Inc., docket 33251.

In addition, American's application in docket 33256, as amended, is within the scope of the issues insofar as it seeks authority between New Orleans, Tampa/St. Peterburg/Clearwater, Orlando, West Palm Beach, Fort Lauderdale, and Miami.

The above listed applications conform to the scope of the issues in the *Florida Service Case*, and it is found that consolidation of those applications will be conducive to the proper dispatch of the Board's business and

V 43 / 195 OCT 6 1978

to the ends of justice and will not unduly delay the proceeding.

By motion filed on September 20, 1978, Coastal Airlines, Inc., D. 31917, has requested leave to withdraw as a party. No objections have been filed. Accordingly, it is found that it is in the public interest to permit Coastal to withdraw as a party to the *Florida Service Case.*

Petitions for leave to intervene in the above-entitled proceeding have been filed by Dade County, Fla., and the Greater Miami Traffic Association; the city of Mobile, Ala., and the Mobile Area Chamber of Commerce; the Panama City-Bay County Airport and Industrial District and the Bay County Chamber of Commerce; and the county of Volusia, Fla.

Pursuant to authority duly delegated by the Board in its regulations, 14 CFR 385.11, it is found that the petitioners have sufficient economic interest in this proceeding to justify their participation as parties.

Accordingly, *it is ordered:*

1. That the following applications be and they hereby are consolidated for hearing and decision with the *Florida Service Case,* docket 33091: American Airlines, Inc., docket 33256, as amended (consolidated to the extent it seeks authority between New Orleans, Tampa/St. Petersburg/Clearwater, Orlando, West Palm Beach, Fort Lauderdale, and Miami); Allegheny Airlines, Inc., docket 33255; Air Florida, Inc., docket 33272; Braniff Airways, Inc., docket 33246; Continental Air Lines, Inc., docket 33263; Delta Air Lines, Inc., docket 33222 (with the exception of the request to serve Daytona Beach); Frontier Airlines, Inc., docket 33273; National Airlines, Inc., docket 33271; North Central Air Lines, Inc., docket 33259; Northwest Airlines, Inc., docket 33198; Ozark Air Lines, Inc., docket 33282; Piedmont Aviation, Inc., docket 33245; Southeast Air Lines, Inc., docket 33207; Southern Airways, Inc., docket 31680 (amendment No. 1); Texas International Airlines, Inc., docket 33194; Trans World Airlines, Inc., docket 33261; and Western Air Lines, Inc., docket 33251;

2. That the petitions for leave to intervene filed by Dade County, Fla., and the Greater Miami Traffic Association; the city of Mobile, Ala., and the Mobile Area Chamber of Commerce; the Panama City-Bay County Airport and Industrial District and the Bay County Chamber of Commerce; and the county of Volusia, Fla., be and they hereby are granted;

3. That the motion of Coastal Airlines, Inc., to withdraw as a party be and it hereby is granted;

4. Persons entitled to petition the Board for review of this order pursuant to the Board's regulations, 14 CFR 385.50, may file such petitions within 10 days after the date of service of this order; and

5. This order shall be effective and become the action of the Civil Aeronautics Board upon expiration of the above period unless before that date a petition for review thereof is filed or the Board gives notice that it will review this order on its own motion.

This order shall be published in the FEDERAL REGISTER.

PHYLLIS T. KAYLOR,
Secretary.

[6320-01]

[Docket Nos. 32327, etc.; Order 78-9-153]

DHL AIRWAYS, INC., ET AL.

Order Regarding Policy Regarding Public Need for Charter Services

Former large irregular air carrier investigation, dockets 32327, 33361, 33362, 33363; *Alaska International Air Certification Case,* docket 29237; *AIA Control Case,* docket 29237; DHL Airways, Inc., docket 31540; Harold S. Low and Lawrence Rosenthal, dockets 33233, 33232; Maverick International, Inc., dockets 33337, 33338; Air Fleets International, Inc., dockets 33285, 33286, 33287; David Travels, Inc., dockets 33310, 33311; Development International, dockets 33291, 33292; Arthurs Travel Center, Inc., docket 32630.

Adopted by the Civil Aeronautics Board at its office in Wahington, D.C., on the 29th day of September 1978.

In our decision adopted on July 21, 1978, order 78-7-106, we announced our basic policy concerning admission of new entrants into the supplemental air carrier industry, defined the scope of the issues and established the procedural ground rules for this investigation, and requested comments from interested persons. We made some modest procedural adjustments in order 78-9-26, September 7, 1978.

Comments basically supporting our proposed policy regarding the public need for charter services have been filed by Jet Fleet Corp., Inc. and Central American Air Taxi, Inc. Transocean Airlines, Inc. filed comments urging us to provide for a gradual implementation of new supplemental operating authority by way of a transition period similar to the one established in the recently enacted all-cargo legislation. Specifically, Transocean recommends that new authority issued to currently authorized carriers and former large irregular and supplemental carriers become effective as soon as possible and that all other authority become effective 1 year later. Global American Transport Co. opposes Transocean's request, arguing that conditions today are completely different from those of 20 years ago, so the former large irregular operators are not entitled to a preferred position.

Central American and Alaska International Air, Inc. (AIA) filed petitions for reconsideration, urging a change in the scope of the case and a waiver of our environmental regulations.[1] Central American asks us to include the issue of charter transportation (1) among U.S. territories and possessions, (2) between U.S. territories and possessions and nearby foreign points, and (3) between Puerto Rico and the Virgin Islands, on the one hand, and points in the United States, Canada, Mexico, Central and South America, the Caribbean, and the Pacific and Atlantic, on the other. AIA urges us to delete the issue of interstate supplemental cargo transportation since such authority is covered by recently enacted section 418 of the Act. TIA suggests including intra-Alaska authority. In addition, five companies—Air Fleets International, Development International Corp., Harold S. Low and Lawrence Rosenthal (joint applicants), Maverick International, Inc., and David Travels, Inc.—seek permission to late file applications and one applicant—Arthurs Travel Center—wants its application dismissed. Finally, AIA and Air Fleets International ask us to resolve certain section 408/409 matters, which we discuss below.

1. LICENSING ISSUES

We shall modify the scope of the proceeding as requested by Central American and AIA. The issues in this case do not currently comprehend service between and among U.S. territories and possessions, and between those territories and possessions, on the one hand, and domestic and foreign points, on the other. There is no reason to exclude these. Inclusion will not expand the case substantially and the possibility of granting such authority will provide greater decisional flexibility for the Board and increased operational flexibility for successful applicants. We shall exclude from the case the issue of interstate supplemental cargo authority: That is already held by carriers who have received section 418 certificates and new applicants can obtain such certificates starting November 9, 1978, under procedures likely to be completed in advance of this case. We agree with AIA, therefore, that it is neither necessary nor desirable to include the issue in this proceeding. We see no reason to reconsider our earlier decision to exclude the intra-Alaska markets from this case, as TIA suggests. See order 78-7-106, p. 21. The carrier is, of

[1] AIA's petition is accompanied by a motion for leave to late file, which we will grant.

course, free to request institution of a separate proceeding in accordance with the requirements of part 302 of our procedural regulations.

We will grant the motions for leave to late-file applications to the extent consistent with the scope of the case. Their inclusion will neither delay nor disrupt it.

We will not waive the requirements of part 312 as requested by Central American. While we recognize that the nature of charter demand makes a prediction about future operations at particular cities difficult, we are not prepared to conclude that the environmental implications of a decision in this case should not be fully considered. See *Palisades Citizens Association* v. *CAB,* 420 F. 2d 188 (D.C. Cir. 1969). We would be unable to make a reasonable environmental evaluation in the absence of information required by section 312 of our regulations.

We will not at this stage provide for a transition as requested by Transocean. Global American correctly observes that the former large irregular operators are not entitled to a priority solely because of their earlier operations; we believe that the question of transition is one which should be resolved during the course of the hearing, rather than in advance.

2. CONTROL ISSUES

Issues arising under sections 408 and 409 of the Act will be examined in this case as in all cases involving the possible certification of new entrants. We shall, therefore, resolve those issues insofar as Air Fleets International is concerned. Alaska International's application raises some unique problems, however.

AIA is an Alaskan commercial airline which provides various air services, including scheduled, charter, and contract cargo services within Alaska, air services within the United States, between points outside the United States, and some transatlantic charter cargo services.[3] According to the applicants' submissions, the 408/409 issues involving AIA arise as follows: First, in 1972, Mr. Neil Bergt acquired a controlling interest in Interior Airways, Inc. (the predecessor of AIA) from National Equipment Rental Ltd.[3] During that year the corporated name was changed to Alaska International, Inc. Second, in 1973, AIA acquired all the stock of Weaver Brothers, Inc. (Weaver), a motor common carrier of freight.[4] Third, in 1974, AIA reorganized into a holding company structure, in which AIA and Weaver became the wholly owned subsidiaries of AII. Since 1974, AII has acquired several nonaeronautical concerns,[5] and also formed a subsidiary, Alaska International Sales Corp. (AISC), which is engaged in the export sale of aircraft and aircraft parts.

AIA originally filed its section 408/409 applications in connection with its application for certificate authority in the *Alaska International Air Certification Proceeding,* docket 29237. There applications were transferred to the *Transatlantic Cargo* case, docket 30789, and the *D.O.D. Contract-Eligible Certification* case, docket 30221, leaving the 408/409 applications as the sole issues in docket 29237. See order 76-12-97, December 15, 1976. Those issues have been deferred since May 1977. See order 77-5-143, May 26, 1977.

On March 23, 1977, AIA filed a motion to terminate docket 29237 and, on June 24, 1977, the carrier filed a supplemental motion requesting disposition of its section 408/409 requests through a disclaimer of jurisdiction or, alternatively, grant of an exemption or entry of an order of approval. AIA argues that the Board has received enough information to decide the control and interlocking questions without a hearing, that AIA and Weaver transact little business with each other, and that AIA's operations subject to Board's jurisdiction have little to do with Weaver's trucking operations. Seaboard World Airlines, Inc., Trans International, Inc., and Evergreen International Airlines filed answers contending that the issues raised are of sufficient complexity to warrant a hearing.

On August 22, 1978, AIA filed its petition for reconsideration in the *Former Large Irregular* case, renewing its request for nonhearing disposition of its section 408/409 applications in docket 29237. AIA alleges that its opponents have used the control issues to frustrate its entry and that this is likely to occur again in a large case like the *Former Large Irregular* proceeding. AIA indicates that it will soon file an application for a section 418 certificate to provide domestic all-cargo transportation, and that the section 408/409 applications should be disposed of in connection with that application. Trans International Airlines opposes AIA's request. It denies that it seeks to delay or frustrate consideration of AIA's application, restating its view that what it describes as "the various complex and unique § 408 and § 409 issues raised by AIA's corporate structure * * *" should be examined in a hearing. AIA offers an alternative plan in the event the Board agrees that the *Former Large Irregular* case is the wrong vehicle for considering AIA's intercorporate relationships; it recommends that the Board reestablish the AIA certification case, expand it to include all geographical authority now sought by AIA in the *Former Large Irregular* case as well as intra-Alaska charter authority, and consolidate additional applications.

We have decided to dispose of AIA's section 408/409 applications promptly in docket 29237. AIA indicates that it will soon file an application for an all-cargo certificate and the Board may be required to examine at least some section 408/409 issues in connection with that application. See EDR-359, setting out the conditions under which the Board proposes to exempt holders of all-cargo certificates from the requirements of sections 408(a) and 409. AIA is also an applicant in the *Transatlantic Cargo Service* case, docket 30789, and will presumably pursue its request for charter authority in the *Former Large Irregular* case as well. It is unclear which of these cases will be decided first (the section 418 proceeding seems to be the most likely candidate) but we have an obligation to decide the section 408/409 issues in connection with AIA's application for its first certificate. Clearly, the applicants and the opponents should not be required to litigate these issues in three or more cases. Given the length of time the control issues have already been before the Board, we think the best plan is to set all of them for prompt disposition. We will use docket 29237 as the vehicle.

We cannot at this time determine what procedures will be necessary to dispose of AIA's applications. The series of intercorporate transactions is intricate and occurred over a period of 4 years, being completed in 1975. The record which the applicants claim is now adequate to decide the issues is dispersed over several dockets and may contain inaccurate or outdated information. The potential anticompetitive elements which we must consider in connection with the section 408/409 requests may be somewhat different insofar as AIA seeks international as opposed to domestic authority. We, therefore, urge AIA to submit, within

[2] AIA holds no certificate of public convenience and necessity. For its current operations, it relies on various ad hoc exemptions from title IV provisions, and a general temporary exemption to conduct outsized cargo charter flights between the United States and points in the Middle East and Africa until 90 days after the Board's final decision in the *Transatlantic Cargo Service Case,* docket 30789.

[3] See Flying Tiger Corp. et al., order 72-7-26, July 10, 1972.

[4] Weaver is a motor common carrier transporting commodities within Alaska and between Alaska and the Pacific Northwest. No authorization for the acquisition of Weaver was requested or granted by the Board (see order 76-5-30).

[5] In 1974, AII acquired Valdez Alaska Terminals, Inc., which is engaged in real estate leasing, and its subsidiary, Valdez Stevendoring Co., Inc., which is engaged in leasing of dock facilities. During 1975, AII formed as subsidiaries, Aleasco, Inc. and Alaska International Construction, Inc., both of which are engaged in construction activities.

V 43/195
OCT 6 1978

21 days, such updated information as is necessary, and to identify what information in docket 29237 remains accurate. In addition, the exact nature of AIA's operations and the authority for each type of operation should be set forth clearly. For convenience it would be useful to us if all such information is contained in a single document or set of documents. Parties to the case will then have 21 days to file rebuttal comments and documents. Opponents may at the same time request oral evidentiary hearings if there are material factual issues to be decided which can be resolved only through cross-examination. AIA will have 7 days to reply. We will then decide whether or not to hold an oral hearing. We expect parties to specify the exhibits or information which require cross-examination and state precisely the matters they find necessary to explore at an oral hearing. We plan to act expeditiously whether or not we find oral hearings necessary.

Accordingly, *we order*, that:

1. The primary issues in docket 32327 shall be:

(a) Whether the public convenience and necessity may require the grant of additional certificated supplemental authority for the transportation of persons, property, and military traffic in interstate, overseas, or foreign supplemental air transportation between (i) any point in any State of the United States, the District of Columbia, or any U.S. territory or possession, on the one hand, and any other point in any State of the United States, or any U.S. territory or possession, on the other hand, and (ii) any point in any State of the United States, the District of Columbia, or any U.S. territory or possession, and the following areas: Canada, Mexico, the Caribbean, Central and South America, the transpacific, and transatlantic;

(b) Whether the applicants for such authority are fit, willing, and able to perform the supplemental air transportation found by the Board to be required by the public convenience and necessity; [6]

2. The following authority will not be considered:

(a) Property between points in the United States and points in the transatlantic area;

(b) Air transportation between points in the United States, on the one hand, and points in the polar regions or in outer space, on the other hand;

(c) Air transportation between points within the State of Alaska;

(d) All-cargo air service as defined in section 102(11) of the Act.

3. The motions for leave to late-file are granted, and the following applications are consolidated to the extent consistent with the issues in the case.

Docket 33363:
Air Fleets International, Inc.
Development International Corp.
Harold S. Low and Lawrence Rosenthal
David Travels, Inc.

Docket 33362:
Maverick International, Inc.

4. AIA's motion in docket 32327 for leave to late-file is granted;

5. Docket 29237, renamed the *AIA Control Case*, is reopened for expeditious disposition in accordance with the procedures established in this order;

6. The motion of AIA in docket 29237 for leave to file a reply to the answers of Evergreen, Seaboard, and TIA be granted;

7. Except to the extent granted by this order, the motion of AIA, AII, and Neil G. Bergt in docket 29237 for final disposition without further proceedings is denied; and

8. The applications of Arthurs Travel Center in docket 32630, and DHL Airways in docket 31540, are dismissed. [7]

This order shall be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR, [8]
Secretary.

[6320-01]

[Docket No. 32752; Order 78-9-135]

PAN AMERICAN WORLD AIRWAYS, INC.

Order to Show Cause and Granting Temporary Suspension at Fairbanks, Alaska on Route 150

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 29th day of September 1978.

On May 26, 1978, Pan American World Airways filed an application under part 205 of the Board's regulations and section 401(j) of the Act for authority to suspend service to Fairbanks, Alaska, on Route 150 for an indefinite period. It asks that the authority be effective September 30, 1978.

In support of its request, the applicant states that the route has historically been financially marginal and the end of the oil pipeline boom has brought a return of loss operations; that it continued to operate at a loss in anticipation of the construction of the Alcan pipeline, but with its construction deferred, Pan American can no longer afford to hang on hoping a boom will materialize; that it should be allowed to end this strain on its resources and to improve the quality and efficiency of service on its remaining routes; that Alaska Airlines provides multiple daily Fairbanks-Seattle one-stop flights via Anchorage; that connecting service is available between Fairbanks and Portland; and that several carriers are currently seeking to provide nonstop service in the *West Coast-Alaska Investigation*.

No answers have been received.

We have decided (1) to issue an order to show cause which proposes to make Pan American's authority to serve the Fairbanks-New York/Seattle-Portland markets over Route 150 permissive, and (2) to authorize Pan American to suspend its Fairbanks-Seattle-Portland services over segment 1 of Route 150.

TENTATIVE FINDINGS AND CONCLUSIONS

We have tentatively concluded, on the basis of the tentative findings below, that the public convenience and necessity require the amendment of Pan American's certificate for Route 150 to make its Fairbanks-New York/Seattle/Portland authority over the route permissive. [1]

Pan American will be able to discontinue service at will, but, by our making its authority permissive instead of suspending or deleting it under section 401(g), it will also be able to resume service should its assessment of the markets change, without the costly delay otherwise required to obtain our approval. Thus, should the Alcan pipeline be constructed or some other major traffic increase occur the carrier could help meet the immediate demand for additional service. As noted in several cases, we view the possible preemptive effect of such dormant authority as small, and counterbalanced by its used as a competitive spur. [5]

The Seattle-Fairbanks segment is a vestige of an earlier era, when Pan Amercian served Fairbanks and points in southeastern Alaska with propeller aircraft from Seattle. The segment has historically been financially marginal, and for many years Pan American (as well as Alaska Airlines) suffered substantial losses providing Seattle-Fairbanks nonstop service. [3] With the end of the oil pipeline boom, it is again faced with unacceptable operating losses. In 1977, Pan American estimates it experienced a seat load factor of 31.4 percent and suffered an operating loss of $3,414,000 on its Fairbanks-Seattle/Portland services (segment 1 of Route 150). [4] This estimate appears reasonable, and there is no prospect for improved results for Pan American in the near term.

Similarly, Pan American's operations over segment 2 of Route 150 have proved unprofitable. By the terms of its certificate the carrier has to serve a point west of Fairbanks on its Pacific Route 130 on all flights over segment 2. Until 1975, it provided service over a New York-Fairbanks-Tokyo routing; however, service over the Fairbanks-Tokyo portion of the flights was uneconomic. By order 75-8-144, August 28, 1975, the Board granted Pan American exemption authority to provide turnaround service between New York and Fairbanks as an alternative to suspension at Fairbanks on segment 2 and allowed it to suspend its Fairbanks-Tokyo services. Unfortunately, the results of the New York-Fairbanks turnaround operations were not encouraging. For the first year of operations, Pan American carried only 6,522 coupon O. & D. passengers, which produced an operating loss of $628,000 or $96 per passenger. As a result, the Board allowed Pan American to suspend service between Fairbanks and New York for a 2-year period, stating that direct service was not required by the public interest and noting the existence of ample connecting service available via Seattle (order 77-5-22, May 5, 1977). There is little reason to believe that Pan American's chances for economic operations over segment 2 will improve in the near term.

Pan American wishes to concentrate on large markets requiring larger aircraft and it should be allowed to do so. Under these circumstances, we believe its authority over the Fairbanks-Seattle/Portland and Fairbanks-New York portion of the route should be made permissive.

TEMPORARY SUSPENSION

For the above reasons, we will also authorize Pan American to suspend its Fairbanks-Seattle/Portland services on segment 1. We recognize that Pan American's Fairbanks-Seattle operations provide the only nonstop services in the market, continuation of which is vital to the commerce of Alaska. It is imperative that there be little, if any, interruption in nonstop service. To meet these needs, we will grant nonstop exemption authority in the Seattle-Fairbanks market along with the suspension authority (order 78-9-149). [5] Thus, discontinuation of Pan American's service will not result in substantial inconvenience to the public. Under these circumstances, we find that grant of the suspension is in the public interest.

PROCEDURES

Interested persons will be given until 30 days following the date of adoption of this order to show cause why the above tentative findings and conclusions should not be made final. We expect that objections will be supported by detailed economic or legal arguments. If an oral evidentiary hearing complete with the opportunity for cross-examination is requested, the objector should state, in detail, why such hearing is necessary and what material facts the objector would expect to establish through such a hearing that cannot be established in written pleadings. General, vague, or unsupported objections will not be entertained.

Accordingly: 1. We direct all interested persons to show cause why the Board should not issue an order making final these tentative findings and conclusions and amending Pan American's certificate for Route 150 to make its Fairbanks-Seattle/Portland (segment 1) and Fairbanks-New York (segment 2) authority over that route permissive;

2. Any interested person having objection to the issuance of an order making final the proposed findings, conclusions, and certificate amendment shall, no later than October 30, 1978, file with the Board and serve upon all persons listed in paragraph 9 a statement of objection together with a summary of testimony, statistical data, and evidence expected to be relied upon to support its objections. Answers to objections shall be filed 10 days later;

3. If timely and properly supported objections are filed, full consideration will be accorded the matters and issues raised before further action is taken by the Board; [6]

4. In the event no objections are filed to any part of this order, all further procedural steps relating to such part or parts will be deemed to have been waived, and the case will be submitted to the Board for further action;

5. We suspend, under section 401(j), the authority of Pan American World Airways to serve the Fairbanks-Seattle/Portland markets on segment 1 of Route 150 until 90 days after final decision on the proposed certificate amendment;

6. The authority granted in paragraph 5 shall become effective on October 1, 1978;

7. We dismiss Pan American's request for a waiver of the filing requirements of part 312;

8. The authority granted in paragraph 5 may be amended or revoked at any time in the discretion of the Board without hearing; and

9. A copy of this order shall be served on all persons named in the service lists of dockets 30170, 30435, 32749, 32752, 32787, 32799, 32878, and 32897 and any persons who filed answers to those applications.

This order shall be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR, [7]
Secretary.

[6320-01]

[Docket No. 33341]

TIGERAIR, INC., ET AL.

Proposed Approval of Application

Application of TigerAir, Inc., the Flying Tiger Line, Inc., and Tiger International, Inc., for approval under section 408 of the Federal Aviation Act of 1958, as amended, of the acquisition of control of Aircraft Tank Services, Inc., and WEF Manufacturing, Inc., docket 33341.

I hereby give notice pursuant to the statutory requirements of section 408(b) of the Federal Aviation Act of 1958, as amended, that I intend to issue the attached order under dele-

[1] We also tentatively find that Pan American is fit, willing, and able within the meaning of sec. 401 of the Act. Since the proposed suspension and certificate amendment will induce, at most, only a minor decrease in operations, our actions will not result in a major Federal action significantly affecting the quality of the environment within the meaning of the National Environmental Policy Act of 1969 or a major regulatory action under the Energy Policy and Conservation Act of 1975. Pan American originally requested a waiver of the filing requirements of pt. 312. Later it filed an environmental evaluation. We will dismiss its waiver request.

[2] This will include all issues arising under other sections of the Act including secs. 408 and 409, except insofar as AIA is concerned.

[3] See *Pacific Northwest-Alaskan Service Case*, 42 CAB 489, 509-11 (1965).

[4] Pan American's authority to serve Portland on segment 1 is temporary and expires February 7, 1979. The carrier is also suspended at Ketchikan and Juneau on segment 1 until Feb. 7, 1979. Service between the latter points and Seattle is in issue in the *Southeast Alaska Service Investigation*, docket 31570. Consequently, we are not proposing to give Pan American permissive authority at those points, but will await developments in that case.

[5] Six carriers have applied for temporary certificate or exemption authority to provide Seattle-Fairbanks nonstop service pending the outcome of the *West Coast-Alaska Investigation:* Alaska Airlines (docket 32749), Western (docket 32787), Wien Air Alaska (docket 32799), Northwest (docket 32878), Pacific Alaska Airlines (docket 32897), and Aeroamerica (docket 33114). Issues in the above case include (1) whether the 13-year-old suspension of Alaska Airlines' Fairbanks-Seattle nonstop authority should be removed, and (2) whether a new carrier other than Alaska should be certificated in the Fairbanks-Seattle market.

[6] All motions and/or petitions for reconsideration shall be filed within the period allowed for filing objections and no further motions, requests or petitions for reconsideration of this order will be entertained.

[7] All Members concurred.

[8] All members concurred.

gated authority. Interested persons have until October 13, 1978, to file comments or request a hearing with respect to the action proposed in the order.

Dated at Washington, D.C., October 3, 1978.

BARBARA A. CLARK,
Deputy Director-Designate.

UNITED STATES OF AMERICA, CIVIL AERONAUTICS BOARD, WASHINGTON, D.C.

ORDER OF APPROVAL

Issued under delegated authority.

Application of TigerAir, Inc., the Flying Tiger Line, and Tiger International, Inc., for approval of acquisition of control, Docket 33341.

TigerAir, the Flying Tiger Line (FTL), and Tiger International (TI) have requested that the Board approve, under section 408 of the Act and ordering paragraph 6 of order 70-6-119 [1] the acquisition of control resulting from the purchase by TigerAir of 100 percent of the equity of Aircraft Tank Services, Inc. (ATS), and WEF Manufacturing, Inc. They also filed a motion requesting expedited handling, noting that ATS and WEF can withdraw from the agreement if final Board approval is not obtained before October 31, 1978.

TigerAir is a wholly owned subsidiary of National Equipment Rental, which is a wholly owned subsidiary of Tiger Leasing Group, which is itself a wholly owned subsidiary of TI. TI also owns all the outstanding stock of FTL, a certificated all cargo carrier.

TigerAir is engaged in the sale and leasing of aircraft and it has three subsidiaries in aeronautical fields. One of them, TigerAir Service Center (TSC), is a fixed base operator engaged primarily in aircraft repair and maintenance.[2]

ATS and WEF are both owned by Merril E. and Wilman June Fuller. Operating adjacent to the Hollywood-Burbank Airport, where TSC is located, ATS is engaged in the manufacture, sale, and installation of aircraft fuel expansion systems. WEF operates a sheet metal shop whose production is used almost exclusively by ATS. The applicants argue that because of this fact and because of common management and ownership, ATS and WEF should be viewed as a single entity.

TSC is currently engaged in the design and installation of fuel expansion systems but it specializes in systems for conversion of commercial aircraft into long-range corporate aircraft, and it does not have production facilities. The applicants assert that TSC will benefit from gaining ATS's production capabilities and its broader product line, and that ATS will benefit from TSC's Hollywood-Burbank Airport facilities, and its broader aviation industry sales base.[3]

The applicants assert that the acquisition will not threaten any other carriers for a number of reasons: ATS and TSC currently have almost no dealings with commercial carriers; commercial carriers generally deal with aircraft manufacturers for this type of work and have the potential for doing it themselves; [4] and that numerous independent firms provide similar services in the United States.

We have received no comments on this application or requests for a hearing.

We have concluded that TI is a person controlling an air carrier; that ATS and WEF are persons engaged in a phase of aeronautics; [5] and that the purchase of ATS and WEF results in acquisitions of control that are subject to section 408(a)(6) and ordering paragraph 6 of order 70-6-119. However, we have also concluded that the transaction does not affect the control of an air carrier directly engaged in the operation of aircraft in air transportation; does not result in creating a monopoly or otherwise lessen comnpetition; [6] and that the transaction will be consistent with the public interest.

The Board's focus in a conglomerate-type acquisition is on its potential effects in the air transportation industry,[7] and we have decided that the acquisition will not have any adverse results in that industry.[8] FTL is currently affiliated with a concern engaged in the design and installation of fuel expansion systems and the extension of these activities are unlikely to pose a competitive threat to certificated air carriers. ATS and TSC do not currently have significant dealings with certificated air carriers, and there are a variety of alternatives available to them for obtaining fuel expansion systems. We will, however, retain jurisdiction to amend or revoke the approval granted here as the public interest requires.

We therefore find, under authority delegated by the Board in its regulations, 14 CFR 385.6 and 385.13, that approval of the acquisition of control of ATS and WEF by TigerAir and through it by TI, under section 408(a)(6) of the Act and ordering paragraph 6 of order 70-6-119 is in the public interest and that the public interest does not require a hearing on this matter; [9] that our action is not a major Federal action within the meaning of the National Environmental Policy Act of 1969; [10] that our action is governed by prior Board precedent and policy,[11] that immediate action is required to enable the transaction to take place; that the filing of petitions therefore will not preclude this order from becoming effective immediately; and that all other requests in the docket should be dismissed.[12]

Accordingly, 1. We approve the acquisition of control of ATS and WEF by TigerAir and through it, by TI;

2. We grant the motion of the parties for expedited treatment;

3. We dismiss all other requests in this docket; and

4. We retain jurisdiction for the purpose of amending or revoking the approval granted here, with or without hearing, as the public interest requires.

Persons entitled to petition the Board for review of this order under the Board's regulations, 14 CFR 385.50 may file petitions within 10 days after the date of service of this order.

This order shall be effective immediately and the filing of such petitions shall not stay its effectiveness.

MICHAEL E. LEVINE,
Director, Bureau of Pricing and Domestic Aviation.

Secretary.

[FR Doc. 78-28280 Filed 10-5-78; 8:45 am]

[1] The applicants assert that their request for approval under the order is without prejudice to TI's right to challenge it.

[2] See *TigerAir, Inc., the Flying Tiger Line, Inc., and Tiger International, Inc.*, order 78-8-52, Aug. 10, 1978, for a fuller description of TigerAir and its subsidiaries.

[3] Thirty percent of ATS's current business comes from a single customer.

[4] The applicants state that Hughes Airwest has its own installation facilities.

[5] Sheet metal fabrication is not, of course, per se an aeronautical activity, but in view of WEF's almost exclusive dealing with ATS and the historic unity of ownership and management, we will treat WEF as a person engaged in a phase of aeronautics.

[6] Our findings are limited to the field of air transportation.

[7] *International Air Service Company Acquisition of Control of Aloha Airlines, Inc.*, order 78-6-208, June 29, 1978.

[8] In any event, our approval here goes only to the acquisition itself and not any subsequent actions of the affiliated companies.

[9] We have published in the FEDERAL REGISTER a notice of intent to dispose of this application without a hearing and have furnished a copy of the notice to the Attorney General not later than the day following the date of its publication, both in accordance with the requirements of section 408(b) of the Act.

[10] From examination of the application, it appears that approval will not cause any of the results set forth in § 312.9 of the Board's procedural regulations.

[11] See e.g., order 78-8-52, supra.

[12] The applicants had requested a disclaimer of jurisdiction over interlocking relationships which might arise from the acquisition of control. We find that to the extent that they do, they fall within the exemption and approval afforded by part 287 of the Board's economic regulations.

Bureau of the Census

SPECIAL CENSUSES

The Bureau of the Census conducts a program whereby a local or State government can contract with the Bureau to conduct a special census of population. The content of a special census is ordinarily limited to questions on household relationship, age, race, and sex, although additional items may be included at the request and expense of the sponsor. The enumeration in a special census is conducted under the same concepts which govern the decennial census.

Summary results of special censuses are published semiannually in the Current Population Reports—Series P-28, prepared by the Bureau of the Census. For each area which has a special census population of 50,000 or more, a separate publication showing data for that area by age, race, and sex is prepared. If the area has census tracts, these data are shown by the tracts.

The data shown in the following table are the results of special censuses conducted since December 31, 1977, for which tabulations were completed between September 1, 1978, and September 30, 1978.

Dated: October 2, 1978.

MANUEL D. PLOTKIN,
Director, Bureau of the Census.

Economic Development Administration

INFANTA KNITTING MILLS, INC., KIRSTEIN LEATHER CO., AND LAWRENCE MAID FOOTWEAR, INC.

Petitions for Determinations of Eligibility To Apply for Trade Adjustment Assistence

Petitions have been accepted for filing from three firms: (1) Infanta Knitting Mills, Inc., 27 Jarrett Avenue, Rockledge, Pa. 19111, a producer of sweaters and other sportswear for children (accepted September 28, 1978); (2) Kirstein Leather Co., 72 Main Street, Saco, Maine 04072, a processor of leather (resubmitted petition accepted Sept. 29, 1978); and (3) Lawrence Maid Footwear, Inc., 50 Island Street, Lawrence, Mass. 01840, a producer of women's footwear (accepted Sept. 29, 1978). The petitions were accepted pursuant to section 251 of the Trade Act of 1974 (Pub. L. 93-618) and § 315.23 of the adjustment assistance regulations for firms and communities (13 CFR Part 315).

Consequently, the U.S. Department of Commerce has initiated separate investigations to determine whether increased imports into the United States of articles like or directly competitive with those produced by each firm contributed importantly to total or partial separation of the firm's workers, or threat thereof, and to a decrease in sales or production of each petitioning firm.

Any party having a substantial interest in the proceedings may request a public hearing on the matter. A request for a hearing must be received by the Chief, Trade Act Certification Division, Economic Development Administration, U.S. Department of Commerce, Washington, D.C. 20230, no later than the close of business of the 10 calendar day following the publication of this notice.

CHARLES L. SMITH,
Acting Chief, Trade Act Certification Division, Office of Planning and Program Support.

ROUNDS I AND II OF THE LOCAL PUBLIC WORKS CAPITAL DEVELOPMENT AND INVESTMENT (LPW) PROGRAM

Closing Date for Requests for Project Modification

Correction

In FR Doc. 78-27291, appearing at page 44560 in the issue of Thursday, September 28, 1978, on page 44560, the second sentence should read:

"All requests for changes in a project's scope or modifications which involve a project's cost must be received and accepted in the appropriate EDA Regional Office by C.O.B. December 29, 1978."

[3510-13]

National Bureau of Standards

SIMPLIFIED PRACTICE RECOMMENDATION

Action on Withdrawal

In accordance with section 10.12 of the Department's "Procedures for the Development of Voluntary Product Standards" (15 CFR Part 10), notice is hereby given of the withdrawal of simplified practice recommendation R163-48, "Coarse Aggregates (Crushed Stone, Gravel, and Slag)."

It has been determined that this standard is technically inadequate, no longer used to any extent, and not in the public interest to maintain. In view of the existence of the American Society for Testing and Materials (ASTM) D448, "Standard Sizes of Coarse Aggregate for Highway Construction," and various other industry standards, revision of this simplified practice recommendation would serve no useful purpose.

This action is taken in furtherance of the Department's announced intentions as set forth in the public notice appearing in the FEDERAL REGISTER of July 13, 1978 (43 FR 30090) to withdraw this standard. The effective date for the withdrawal of this standard will be 60 days after the publication of this notice. This withdrawal action terminates the authority to refer to this standard as a voluntary standard developed under the Department of Commerce procedures.

Dated: October 2, 1978.

THOMAS A. DILLON,
Acting Director.

National Fire Prevention and Control Administration

BOARD OF VISITORS FOR THE NATIONAL ACADEMY FOR FIRE PREVENTION AND CONTROL

Open Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), announcement is made of the following committee meeting:

Name: Board of Visitors for the National Academy for Fire Prevention and Control (Board).
Date of meeting: October 26, 1978.
Place: Board Room, Olympic Hotel, Fourth and Seneca, Seattle, Wash.
Time: 8:30 a.m. to 5 p.m.
Proposed agenda: Semiannual update on activities of National Academy for Fire Prevention and Control. Preparation for Annual Report submission. Review of staffing, course offerings and delivery schedule for fiscal year 1979.

The meeting will be open to the public with approximately 20 seats available on a first-come, first-served basis. Members of the general public who plan to attend the meeting should contact Ms. Jane Sornberger, National Fire Academy, National Fire Prevention and Control Administration, P.O. Box 19518, Washington, D.C. 20036.

Minutes of the meeting will be prepared by the Board and will be available for public viewing in room 214, National Fire Prevention and Control Administration, 2400 M Street NW., Washington, D.C.

Copies of the minutes will be available upon request 30 days after the meeting.

Dated: October 2, 1978.

JOSEPH A. MORELAND,
Acting Administrator, National Fire Prevention and Control Administration.

Federal Energy Regulatory Commission

[Docket No. RI78-43]

CORDILLERA CORP.

Order Granting Special Relief

SEPTEMBER 25, 1978.

On March 28, 1978, Cordillera Corp. (Cordillera) filed its initial petition for special relief pursuant to § 2.76 of the Commission's general policy and interpretations (18 CFR 2.76), requesting authorization to charge a total rate of $2.12 per Mcf for the sale [1] of 100 percent of its working interest in the gas produced from the Sugar Creek No. 1 well, Sugar Creek field, Carbon County, Wyo., and sold to Western Transmission Corp. (Western). On June 2, 1978, Cordillera amended its initial petition, requesting a lower total rate of $1.91 per Mcf for the sale of the subject gas. Currently, the maximum authorized rate which Cordillera may charge for the subject gas is 52.7 cents per Mcf.

Notices of the initial petition for special relief and the amendment thereto in docket No. RI78-43 were issued on April 19, 1978, and August 9, 1978, respectively. These notices were published in the FEDERAL REGISTER respectively on April 27, 1978, at 43 FR 18005 and August 16, 1978, at 43 FR 36303. Colorado Interstate Gas Co. filed a timely petition to intervene in support of Cordillera's initial petition.

As justification for the requested special relief rate, Cordillera states that the gas which would be produced from the Sugar Creek No. 1 well contains a significant amount of hydrogen sulfide (1.505 mole percent). Further, Cordillera states that due to the high hydrogen sulfide content of the gas, it has been unable to make delivery of gas to Western in accordance with the terms of their gas sale contract. Additionally, Cordillera states that it proposes to remedy the situation by installing an amine unit to remove hydrogen sulfide from the gas and by installing, in order to meet environmental standards, a sulfur recovery unit, all at a total cost of $547,000. Also, Cordillera proposes the installation of a water disposal system to dispose of saltwater produced as a byproduct of extracting the gas from the subject well; the cost of installing the water disposal unit would be $54,000. Moreover, Cordillera asserts that if special relief is granted, permitting it to install the proposed facilities, then it will be able to recover an estimated gross remaining 1,422,405 Mcf of gas over the next 7 years. If special relief is denied, Cordillera states that it will seek abandonment of the subject well.

In connection with this proceeding, staff conducted a field investigation. Based on the results of that investigation, staff determined that Cordillera's remaining net book investment of $191,419, proposed new investment of $601,000, and estimated production expenses of $1,214,549 over the estimated 7 years of production were reasonable.

After utilizing the above cost figures in a traditional cost study [2] wherein the modified Btu method was used to allocate cost between gas and liquids, staff concludes that, in order for Cordillera to recover the cost associated with this project—including a 15-percent rate of return—over a 7-year life, the special relief rate should be $1.91 per Mcf.

Upon consideration of the data submitted by petitioner and staff's analysis thereof, we conclude that the proposed rate is cost justified and that the granting of the proposed rate is in the public interest.

The Commission orders: (A) The petition for special relief, as amended, is hereby granted.

(B) Petitioner is authorized to collect a total rate of $1.91 per Mcf at 14.73 psia for the sale of natural gas from its Sugar Creek No. 1 well in Sugar Creek field, Carbon County, Wyo., to Western effective on the date of completion of the proposed work or the date of the issuance of this order, whichever is later, subject to Cordillera filing a statement signed by Western attesting to the fact that the proposed work has been completed to Western's satisfaction within 30 days of the effective date specified above.

(C) This order is further conditioned upon the filing by Cordillera, within 30 days of the issuance of this order, of an executed amendment to its contract with Western providing for payment of the rate granted above and a notice of independent producer rate change reflecting the above authorized rate.

(D) Colorado Interstate Gas Co. is permitted to intervene in this proceeding subject to the rules and regulations of the Commission: *Provided, however,* That the participation of such intervenor shall be limited to matters affecting asserted rights and interests as specifically set forth in said petition for leave to intervene: *And provided, further* That the admission of such intervenor shall not be construed as recognition by the Commission that the intervenor might be aggrieved because of any order or orders of the Commission entered in this proceeding.

By the Commission.

KENNETH F. PLUMB,
Secretary.

APPENDIX A.—*Cordillera Corp., Docket No. RI78-43*

[Unit cost of gas]

Line No.	Item (a)	Amount (b)
1.	Net working interest volumes:	
2.	Gas—Mcf at 14.73 psia [1]	1,244,604
3.	Liquids—Bbls [2]	12,379
4.	Cost of production:	
5.	Return on rate base at 15 pct [3]	$435,690
6.	D.D. & A. [4]	660,387
7.	Production expense [5]	1,214,549
8.	Subtotal	2,310,625
9.	Allocated to gas [6]	2,128,549
10.	Regulatory expense [7]	1,245
11.	Total cost of production	2,129,794
12.	Unit cost of gas (cents per Mcf):

Office of Hearings and Appeals

NOTICE OF CASES FILED WITH THE OFFICE OF HEARINGS AND APPEALS

Week of September 1 through September 8, 1978

Notice is hereby given that during the week of September 1, 1978, through September 8, 1978, the appeals and applications for exception or other relief listed in the appendix to this notice were filed with the Office of Hearings and Appeals of the Department of Energy.

Under the DOE's procedural regulations, 10 CFR, Part 205, any person who will be aggrieved by the DOE action sought in such cases may file with the DOE written comments on the application within 10 days of service of notice, as prescribed in the procedural regulations. For purposes of those regulations, the date of service of notice shall be deemed to be the date of publication of this notice or the date of receipt by an aggrieved person of actual notice, whichever occurs first. All such comments shall be filed with the Office of Hearings and Appeals, Department of Energy, Washington, D.C. 29461.

MELVIN GOLDSTEIN,
Director, Office of Hearings and Appeals.

SEPTEMBER 27, 1978.

APPENDIX.—*List of Cases Received by the Office of Hearings and Appeals*

[Week of Sept. 1 through Sept. 8, 1978]

Date	Name and location of applicant	Case No.	Type of submission
Sept. 1, 1978	El Paso Natural Gas Co., El Paso, Tex	DEE-1810	Price exception (sec. 212.165). If granted: El Paso Natural Gas Co. would be permitted to increase its prices to reflect nonproduct cost increases in excess of $0.005 per gallon for natural gas liquid products produced at the Midkiff plant.
Do	Special Counsel, Washington, D.C	DEX-0105	Supplemental order. If granted: An escrow account would be established for refunds made by Gulf Oil Corp. pursuant to a consent order entered into by Gulf and the Office of Special Counsel.
Sept. 5, 1978	Bultman, Inc., Jefferson City, Mo	DEH-0106	Request for evidentiary hearing. If granted: An evidentiary hearing would be convened with respect to a statement of objections submitted by Bultman, Inc., in response to a proposed decision and order issued to the firm (case No. DEO-0106).
Do	Cabot Corp., Houston, Tex	DXE-1816 and DXE-1817.	Extension of relief granted in *Cabot Corporation*, case Nos. DXE-0535 and DXE-0536 (decided Apr. 25, 1978) (unreported decision). If granted: The applicant would be permitted to increase its prices to reflect non-product cost increases incurred in producing natural gas liquids and natural gas liquid products at its Beaver and Estes plants.
Do	Gene L. Bolin, Philmath, Oreg	DRD-0026 and DRH-0026.	Motion for discovery request for evidentiary hearing. If granted: An evidentiary hearing would be convened in connection with a statement of objections submitted by Gene L. Bolin in response to a proposed remedial order issued to the firm. Discovery would be granted to Mr. Bolin with respect to his objection to a proposed remedial order issued DOE region X.
Do	Hill, Christopher, & Phillips, Washington, D.C.	DFA-0208	Appeal of freedom of information request denial. If granted: Hill, Christopher, & Phillips' freedom of information request of Aug. 1, 1978, would be deemed denied and the firm would be granted access to documents relating to strategic petroleum reserve program.
Do	Mapco, Inc., Tulsa, Okla	DEE-1819	Price exception (sec. 212.165). If granted: Mapco, Inc., would be permitted to increase its prices to reflect nonproduct cost increases in excess of $0.005 per gallon for natural gas liquid products produced at the Southwest Davis plant.
Do	Quincy Oil Co., Boston, Mass	DRH-0026	Request for evidentiary hearing. If granted: An evidentiary hearing would be convened in connection with Quincy Oil Co.'s objections to a proposed decision and order issued with respect to an application for exception which the firm filed.

APPENDIX.—*List of Cases Received by the Office of Hearings and Appeals*—Continued

[Week of Sept. 1 through Sept. 8, 1978]

Date	Name and location of applicant	Case No.	Type of submission
Do	Sun Company, Inc., Dallas, Tex	DXE-1818	Extension of relief granted in *Sun Company, Inc.*, case No. DXE-0853 (decided Apr. 28, 1978) (unreported decision). If granted: The applicant would be permitted to increase its prices to reflect nonproduct cost increases incurred in producing natural gas liquids and natural gas liquid products at its Red Fish Bay plant.
Do	Taunton Municipal Lighting Plant, Taunton, Mass.	DRH-0029	Request for evidentiary hearing. If granted: An evidentiary hearing would be convened in connection with Taunton's objections to a proposed decision and order issued with respect to an application for exception submitted by Quincy Oil Co.
Sept. 7, 1978	Acomi Corp., Peabody, Mass	DEE-1821	Exception to change supplier. If granted: Acomi Corp. would be assigned a new supplier of petroleum to replace its base period suppliers, Frontier Petroleum and North East Petroleum.
Do	Chevron, U.S.A., Inc., San Francisco, Calif.	DEE-1820	Application for exception to pricing and entitlements classifications. If granted: Chevron U.S.A., Inc., would receive exceptions to pt. 212, subpt. D and pt. 211, subpt. C with respect to the crude oil produced from the State lease PRC 1824 South Flank Pool Property.
Do	Cities Service Co., Tulsa, Okla	DEE-1822	Price exception (sec. 212.83). If granted: Cities Service Co. would be granted an exception from the provisions of 10 CFR 212.83 with respect to the firm's propane prices.
Do	Hedrick & Lane, Washington, D.C.	DFA-0209	Appeal of an information request denial. If granted: The DOE July 19, 1978, information request denial would be rescinded and Hedrick & Lane would be granted access to DOE data concerning the document "Joint Committee, Policy and Program: A Chronology of Leading Events, Jan. 1, 1953, *AEC*" and other documents included therewith.
Do	Special Counsel for Compliance, Washington, D.C.	DSG-0029	Petiton for special redress. If granted: The Office of Hearings and Appeals would promulgate procedures for handling claims for refunds filed by purchasers of Conoco motor gasoline and No. 2 heating oil from Foremost Petroleum Co. and M & A Petroleum Co. in connection with proposed consent orders entered into on Aug. 11, 1978.

FEDERAL COMMUNICATIONS COMMISSION

[CC Docket No. 78-241; Transmittal Nos. 91-92; FCC 78-635]

MCI TELECOMMUNICATIONS CORP.

Memorandum Opinion and Order Instituting Investigation

Adopted: September 14, 1978.

Released: October 2, 1978.

By the Commission: Commissioner Washburn dissenting; Commissioner Fogarty dissenting and issuing a statement; Commissioner White concurring in the result.

In the matter of MCI Telecommunications Corp., revisions to tariff F.C.C. No. 1, transmittal Nos. 86 and 88, CC Docket No. 78-241; MCI Telecommunications Corp., revisions to tariff F.C.C. No. 1, metered use service, transmittal No. 91; revisions to tariff F.C.C. No. 1, shared private line service, transmittal No. 92.

1. On June 2, 1978, MCI Telecommunications Corp. (MCI) filed its transmittal No. 91 to modify the rate structure for its metered use service and to add another option to that service. That filing is to become effective on October 1, 1978. On June 13, 1978, MCI filed its transmittal No. 92, which contains revisions to the shared private line service (SPLS) rate structure, and adds a new option to the service. That filing is scheduled to become effective September 15, 1978.

2. American Telephone & Telegraph Co. (A.T. & T.) filed a petition for suspension and investigation of MCI's transmittal No. 91 on June 27, 1978, to which MCI replied. On July 7, 1978, A.T. & T. filed a petition for suspension and investigation of MCI's transmittal No. 92. MCI replied to that petition also. Since the revisions to the

OCT 6 1978

V 43 / 195
OCT 6 1978

metered use service and SPLS offerings are interrelated and the issues raised against both tariff filings are essentially the same, we will consider them together.

I. Description of the Tariff Revisions

A. Transmittal No. 91 (Metered Use Service)

3. Metered use service[1] consists of several arrangements for originating and terminating calls. Common to these options are an MCI premises in the originating city, switched intercity circuits shared by all subscribers to the service between the city pairs and an MCI premises in the terminating city. As we understand MCI's tariff, the individual metered use service options can originate via: (a) A dedicated access line provided by MCI from the customer premises to the MCI premises, (b) calls from the customer's local exchange service into shared access facilities obtained by MCI at its premises, or (c) a customer-provided means of access. Likewise, the various options can terminate via: (a) A dedicated access line provided by MCI from the MCI premises to the customer premises, (b) MCI obtained shared access facility and exchange service, or (c) a customer-provided exit facility. Our interpretation of the MCI tariff provisions leads us to believe that any one of the access arrangements can be coupled with any of the terminating configurations to form a metered use service option. However, we note that MCI's cost support material filed with transmittal Nos. 91 and 92 apparently contemplates customers will use only the following three options. The first, known as Execunet, allows the customer, through the telephone company's local exchange service, to access the MCI premises in the originating city. This requires MCI subscription to local exchange service also. In the terminating city, calls are terminated through local exchange service subscribed to by MCI and shared among customers, thereby allowing the caller to complete calls to any telephone company subscriber of local exchange service in the terminating city. The second, called Service 12, utilizes a dedicated access line from a customer premises to the MCI premises in the originating city. This option terminates in the distant city through local exchange facilities obtained by MCI and shared with other customers. The third option added by this filing includes a dedicated access line to originate and terminate the service (hereinafter referred to as "Option III").

4. MCI proposes metered use service rate structure revisions which primarily focus on the intercity circuit rate element.[2] A flat distance insensitive rate of $0.0265 per minute, subject to a $75 monthly minimum per subscriber charge, would replace the distance sensitive rate. This change would result, for example, in an intercity rate of $1.59 for a 6-minute metered use service call between any two cities served. The current rate for the intercity portion of a 6-minute call between Washington, D.C., and New York City is $1.46 and between New York City and Phoenix is $2.13. The same $75 minimum is currently applicable. Based on this comparison, it appears the customer making a call between two city pairs close in distance will experience a rate increase because of the distance insensitive intercity rate element. While the $0.265 rate would be applicable to all Execunet calls, alternative rates for the intercity portion of the service would be available for Service 12 and option III. The alternative for Service 12 requires a $910 monthly minimum charge for intercity facilities for each dedicated access facility used to access the service. This enables a customer to obtain a 55 percent reduction of rates for intercity usage to $0.119 per minute for that customer's calls between metered use service cities. It should be noted that a customer would have to make 7,647 minutes of calls per month at $0.119 per minute to reach the $910 charge. However, a customer agreeing in advance to take service under the $910 minimum would still pay less than the $0.265 per minute rate if that customer makes over 3,434 minutes of calls per month. The alternative offered in conjunction with option III involves a $6.50 monthly minimum charge for each set of dedicated facilities used to access and exit the service. Such customers also pay a $0.119 per minute rate for use of intercity facilities. This alternative was not available previous to this filing. Similar to the situation with Service 12, an option III customer would have to make 5,462 minutes of calls per month at $0.119 per minute to reach the $650 charge, but would still pay less than the $0.265 per minute rate if that customer makes over 2,453 minutes of calls per month.

5. MCI also proposes to revise the metered use service rate structure to change the access charge which relates to a customer's entry to an exit from the shared intercity circuits via local exchange facilities leased by MCI. These facilities are utilized at both the originating and terminating end of Execunet and at the terminating end of Service 12. The revised charge is to be based on the customer's usage and is prorated as a per-minute charge. The rate is to be based on the local telephone company's local exchange service charges. MCI would eliminate the current maximum on prorated access charges. MCI has provided basic discrete billing information without charge but imposed a $5 monthly charge for the first additional 25 individuals for which the information was provided and a $1 monthly charge for every individual thereafter. Under the new revisions, MCI would charge $10 monthly for the basic discrete billing information and $8 per month for each additional individual or group of individuals for which the information is provided.

B. Transmittal No. 92 (SPLS)

6. SPLS[3] consists of a dedicated customer access line from a customer premises to MCI premises, switched intercity circuits shared by all SPLS subscribers between the city pairs, and MCI premises in the terminating city, and one of several alternative distant location connections. The first option utilizes a dedicated access line to terminate the service in the distant city (hereinafter referred to as "Option I"). The second option terminates the service in the distant city by using customer-obtained lines or service (hereinafter referred to as "Option II"). MCI proposes to add a third option to SPLS in this filing which would provide for termination of SPLS calls through local exchange facilities obtained by MCI and shared with other customers (hereinafter referred to as "Option III").

7. The SPLS rate structure would be revised in several respects.[4] The rates for the intercity circuits would be based on a subscriber's total cumulative monthly usage of the service in hours from all individual originating locations. This hourly rate would consist of the sum of a customer's usage over all the access facilities used by that customer in each originating location. The distance insensitive rate would be $13.98 per hour (0.233 per minute) for the first 60 hours of use per month, $10.98 per hour (0.183 per minute) for 61 to 240 hours of use per month, and $3.48 per hour (0.058 per minute) for each hour over 240. All customers, regardless of total number of hours, used in a month would pay the $13.98 rate for the first 60 hours each month and the $10.98 rate for 61 to 240 hours. This would replace the present intercity circuit charge, which varies for each city pair, and would eliminate the monthly minimum charge for designated city pairs and cumulative total monthly minimums now found in the SPLS rate structure. Thus, for example, the new rate for the intercity portion of a 6-minute SPLS call between any two cities served would be $1.40 where the customer's total monthly usage is 60 hours or less, or $1.10 for usage between 61-240 hours and $0.35 for usage over 240 hours. The current rate for the intercity portion of the same call between Washington, D.C., and New York City is $0.75 and between New York City and Phoenix it is $0.93, both of which are subject to a minimum monthly usage charge. Based on this comparison, all customers would experience a rate increase for their first 240 hours of calls each month, with the greater increases being for the first 60 hours of calls and for those calls between city pairs closer in distance. Of course, customers making over 240 hours of calls per month would have a rate decrease for those additional calls. The fact that the minimum usage charge for each city pair and the cumulative total minimums would be replaced with an intercity rate based on total usage among all city pairs could mitigate the apparent differences between the old and new rates in the above examples, depending upon a customer's usage configuration among given city pairs.

8. MCI would further revise the SPLS rate structure to reduce the monthly charge for terminating customer dedicated access facilities in an MCI switch located in the originating city from $50 to $10. MCI calls this a dedicated access arrangement charge. The nonrecurring installation charge for each dedicated access arrangement and each distant location dedicated access line to a customer designated premises would be increased from $50 to $60. Finally, MCI proposes to expand the number of cities in which SPLS is offered so that SPLS and metered use service would be offered among the same designated city pairs.

[1] See appendix I, attached, for an illustration of the specific metered use service options described in this paragraph.

[2] See appendix II, attached.

[3] See appendix I, attached, for an illustration of the SPLS options.

[4] See appendix II, attached.

II. Contentions of the Parties

A. A.T. & T.

9. *General public interest questions.* In its petition against the SPLS revisions, A.T. & T. contends that the new SPLS option constitutes a public switched message service and, as such, raises the same public interest questions as the expansion of Execunet (MCI transmittals Nos. 86 and 88). A.T. & T. also argues that when the Commission rejected the same SPLS option as being outside the scope of MCI's service authorizations in *MCI Telecommunications corporations (SPLS II)*, 63 FCC 2d 237 (1977), it did not reach the public interest issues raised by that offering, and therefore they should be considered now. A.T. & T. relies on *MCI Telecommunications Corporation* v. *FCC (Execunet I)*, 561 F. 2d 365 (D.C. Cir. 1977), *cert. denied*, 54 L. Ed. 2d 790 (1978) and *MCI Telecommunications corporation* v. *FCC (Execunet II)*, No. 76-2071 (D.C. Cir. April 14, 1978).

10. *Cost support material.* A.T. & T. contends that the cost support material submitted with the metered use service and the SPLS tariff filings is deficient and in violation of the requirements of § 61.38 of the Commission's rules, 47 CFR 61.38. Specifically, A.T. & T. argues that MCI has failed to supply cost justification for either the metered use service or the SPLS distance insensitive rate structures. Although overall costs for metered use service are provided, A.T. & T. contends that costs are not supplied for each of the service options, such as Execunet, Service 12 and the newly added option. A.T. & T. alleges that total costs for all of MCI's services and for each service individually are not included in the cost support material for either the metered use service of the SPLS revisions. Furthermore, A.T. & T. claims that the reduction in the charge for the dedicated access line, the increase in installation charges and the elimination of the minimum charges for SPLS are not cost justified. A.T. & T. argues that the allocation of indirect costs to both metered use service and SPLS is not adequately cost supported. It states that these indirect costs represents approximately 50 percent of the total costs reported for each of the two services. A.T. & T. contends that MCI bases its metered use service allocation on the number of metered use circuits used in relation to MCI's total installed circuits, but that MCI has not demonstrated that the allocated costs are related to the number of circuits. In addition, A.T. & T. argues that MCI has not provided justification for total costs to be allocated to SPLS for the 3-year projections or for the percentage allocations assumed. Also, A.T. & T. questions the SPLS cost assumptions when compared to past experience. In particular, A.T. & T. claims that MCI shows that its direct and indirect costs increased by 128 percent from April 1977 to March 1978, but that MCI's projections show direct costs will increase 1,848 percent each year over the next 3-years and indirect costs increasing only 298 percent by comparison.

11. A.T. & T. also argues that the traffic and revenue material submitted with both MCI filings is deficient and violative of § 61.38(a)(ii) of the rules. A.T. & T. maintains that the market forecasts for neither service are substantiated, thereby making it impossible to assess their reasonableness or their derivation. A.T. & T. further contends that both MCI filings are deficient in providing estimates of changes in traffic and revenues resulting from the proposed revisions.

12. A.T. & T. questions the basis for the change in MCI's position in transmittal No. 91 that no cross-elasticity existed between metered use service and SPLS to the estimate made my MCI in transmittal No. 92 that 10 percent to 25 percent of the traffic and revenues could be diverted from metered use service to SPLS.

13. *Like services.* A.T. & T. contends that the new metered use service Option III and the SPLS dedicated access option are like services at different rates. A.T. & T. claims that both services provide the customer with the same service configuration, including dedicated access to MCI facilities, shared intercity lines, and termination over customer provided local exchange facilities or a dedicated facility between the local MCI office and the customer's premises. A.T. & T. raises the question of whether MCI uses the same intercity switching and facilities for metered use service and SPLS. A.T. & T. also contends that the new SPLS Option III and Service 12 option are like services offered at different rates. In this regard, A.T. & T. argues that both services provide dedicated access to MCI facilities, shared intercity lines and temination over exchange service provided to MCI by the local telephone companies.

B. MCI

14. *Public interest questions.* MCI argues that the public interest issues raised by A.T. & T. are properly the subject of the *MTS/WATS Market Structure Inquiry*, CC Docket No. 78-72, FCC 78-144 (released Mar. 3, 1978), and not of individual tariff revisions.

15. *Cost support material.* MCI replies to A.T. & T.'s contentions by stating that it has adequately justified the changes to its metered use service and SPLS tariffs. In regard to the distance insensitive rate structures, MCI argues that they more appropriately distribute the costs. This is so, MCI contends, because each call for these services must pass through an MCI switch prior to its completion, to route the call and enable call records to be made. Since the MCI switches are located in only 4 of the 24 cities served, MCI maintains that calls emanating from cities where switches are not present must pass over intercity lines to reach the appropriate switch and to reach the destination city. For example, MCI maintains that a call from Los Angeles to Phoenix would have to pass through the MCI switch in Dallas. Thus, MCI claims that the majority of the calls traverse distances which significantly differ from the actual mileage between the originating and terminating cities. MCI acknowledges that the disparity between airline miles and actual route miles does not occur for all city pairs served by metered use service and SPLS, but claims that as these services expand to

V 43 / 195 OCT 6 78

additional cities, the condition of disparity will increase in the short run. Since MCI argues that a majority of the traffic does not bear this direct relation to airline miles between originating and termination locations, it takes the position that the portion of costs related to the intercity network should not be allocated in direct proportion to distance. MCI also notes that most of the other costs related to metered use service and SPLS are not related to distance. MCI claims that other carriers have distance insensitive rate structures.

16. MCI contends that § 61.38 of the rules does not require a carrier to provide costs for each option within a particular service, or to provide the costs of service for services not affected by the filing or for the carrier as a whole. Thus, MCI admits that cost data for each individual option is not supplied in its metered use service or SPLS filings. MCI responds to A.T. & T.'s contentions regarding allocated or indirect costs by maintaining that such costs cannot be directly attributed to a particular service but by definition are allocated on a percentage basis from total costs. MCI argues that the indirect costs for metered use service were allocated on the basis of the number of circuits used for that service compared to the total number of MCI's installed circuits. MCI expands its contentions in regard to SPLS and explains that it employs several different allocation methods to assign the indirect costs associated with SPLS. These methods are based on such factors as direct costs, backbone costs, active circuits, number of customers and revenue contribution, MCI explains. In addition, MCI argues that A.T. & T.'s comparison of direct and indirect cost increases for SPLS have no significance in determining the lawfulness of rates. MCI contends that most indirect costs do not increase in direct proportion to volume increases in a given service and, if they did, they would not be considered indirect costs.

17. MCI further contends that it has provided the necessary traffic and revenue data to comply with the requirements of § 61.38. MCI claims that it has no incentive to exaggerate its metered use service market forecasts to justify low rates. It also maintains that since the revisions to the metered use service rates are not intended to change overall rate levels, no difference in impact or traffic and revenues for other services is expected. MCI argues that an estimate (in terms of percentage diversion) of the effects of the changes in SPLS traffic and revenues are provided and that the actual changes can be determined from the cost information provided. In addition, MCI claims that its intent in making the SPLS rate structure revisions is to make it more viable and, therefore, any estimates of changes would have little significance. MCI contends that historical information concerning past sales and installations generally is not useful in preparing future forecasts and, in such instances, MCI bases the forecasts on marketing estimates.

18. Finally, in response to A.T. & T.'s contentions regarding the changes in cross-elasticity estimates, MCI argues that when the metered use service revisions were filed, the SPLS revisions had not been made and no cross-elasticity existed. However, when the SPLS revisions were submitted, MCI states that new cross-elasticity became apparent and was reflected in the more recent studies.

19. *Like services.* MCI distinguishes the different options of metered use service and SPLS which A.T. & T. argues are like services on the basis of different rates. MCI acknowledges that there are "similarities" in the provision of the services. MCI contends that its service options are designed to offer different combinations of service features and rates to meet customer demand and that they do not constitute a violation of section 202(a).

III. Discussion

20. Several fundamental changes to the metered use service and SPLS tariff offerings have been proposed by MCI. These revisions and the arguments of A.T. & T. and MCI are significant and require our careful consideration. In evaluating the tariff revisions, we find that it is necessary to discuss the merits of the parties' contentions and our concerns in several contexts. First, we will address the public interest questions raised by A.T. & T. Then, we will consider the adequacy of MCI's filings and the accompanying justification against the standards set forth in our rules and the Communications Act. Specifically, we will evaluate the compliance of MCI's submissions with § 61.38 of the rules, which requires a carrier to supply certain information in support of its tariff charges. We will also consider the justification for the revised rate structures based on the just and reasonable criteria of section 201(b) of the Act, 47 U.S.C. 201(b). Finally, we will address different discrimination issues raised under section 202(a) of the Act, 47 U.S.C. 202(a), such as whether the metered use service pricing alternatives constitute an unjust and unreasonable discrimination and whether various metered use service and SPLS options constitute like services and, if so, whether different rates for the same elements are unreasonably discriminatory.

A. Public interest questions

21. The arguments advanced by A.T. & T. are, by A.T. & T.'s own admission, the same as those made against the expansion of Execunet to 16 additional cities. We rejected A.T. & T.'s position in *MCI Telecommunications Corporation*, CC Docket No. 78-241, FCC 78-565 (released Aug. 18, 1978), para. 10. We find no new reason in this case to deviate from our determination made there that the public interest issues concerning competition in the interstate MTS field should be considered in the *MTS/WATS Market Structure Inquiry, supra*, rather than to seek separate resolution in connection with individual tariff filings.

B. Cost support material

22. At the outset, it should be noted that except for the cost of service study for SPLS, MCI's cost support material filed with both transmittal Nos. 91 and 92 is substantially the same as that supplied with its earlier filings expanding Execunet to an additional 6 and 10 cities (transmittal Nos. 86 and 88, respectively). Because of the similarity of this data, it is appropriate to consider the supplemental cost material supplied by MCI on May 16, 1978 in connection with transmittal Nos. 86 and 88. The economic and financial support data remains essentially unchanged from the earlier submissions. On the basis of insufficiencies in the data accompanying transmittal Nos. 86 and 88, we designated those MCI filings for investigation in CC Docket No. 78-241, FCC 78-565 (released Aug. 18, 1978).

23. In the metered use service filing, costs in the 3-year projections are shown to increase 10 percent each year. No explanation is given for this amount and therefore its validity cannot be verified. In the SPLS filing, MCI utilized a revised method for allocating costs and in its reply to the A.T. & T. petition, MCI offers an explanation of the methodology used. However, MCI does not show how any of the allocation factors are derived or supplied.

24. We do not believe that the changes in MCI's cross-elasticity projections between the two tariff filings are, in and of themselves, cause for great concern. A period of time existed between the two filings. In this case we do not necessarily expect MCI to include the effects of future tariff filings in present revisions.

C. Justification for rate structure

25. Closely related to the question of whether MCI has complied with the requirements of § 61.38 of the rules is the issue of whether the rate structure changes for metered use service and SPLS have been adequately cost justified and can be considered just and reasonable. We have consistently held that the costs of providing a service are a primary basis for determining whether a carrier's rates are just and reasonable within the meaning of section 201(b) of the Act. In considering the rate structure changes to metered use service and SPLS, we must examine the cost justification for the distance insensitive intercity rate, the pricing alternatives to those basic intercity rates, and the local exchange service charges.

26. Although the actual intercity rates for the two services differ, MCI relies on the same rationale for the distance insensitive aspect of both rate structures, i.e., that most of the costs involved in providing the intercity portion of the services are distance insensitive. An analysis of MCI's costs for both metered use service and SPLS indicates that certain distance insensitive costs are present. In the case of metered use service, MCI identifies such categories of costs as data processing, local interconnection, switches and salaries as being distance insensitive, representing approximately 58 percent of the total metered use service costs. In the case of SPLS, MCI categories costs such as communication system operation (engineering and maintenance), sales and marketing, customer service and installation, local interconnection, data processing and switches as distance insensitive, which comprise about 72 percent of the total estimated SPLS costs. These percentages are based on MCI's costs, which have not been adequately substantiated. We also question the categorization of some of the items as distance insensitive, such as the engineering and maintenance costs for SPLS. Those costs generally increase with distance, since more plant requires additional engineering and maintenance. Several other cost categories cannot be identified as being distance sensitive or not because of the lack of explanation offered by MCI of these cost categories. We are not convinced that a cost level of 58 percent or 72 percent is adequate to support a distance insensitive rate.

27. In addition, MCI supports this portion of its rate structure on the proposition that airline miles bear no relationship to the route miles a particular call travels. By way of illustration, in its reply to A.T. & T.'s petition against the metered use service filing, MCI sets forth a comparison between airline miles and route miles between selected city pairs for Execunet calls. A representative sample of these are repeated below:

Originating city	Terminating city	Airline miles	Route miles
Washington	Pittsburgh	191	522
Detroit	New York	481	949
Cleveland	Detroit	91	885
Los Angeles	Phoenix	359	2,128
Kansas City	Dallas	499	1,210
St. Louis	Tulsa	359	855

While MCI may have shown that, at least for some calls, airline miles between the originating city and the terminating city bear no consistent direct relationship to route miles between those locations, MCI has failed to show that no relationship exists between the two sets of mileage figures. MCI acknowledges that calls between several city pairs (particularly where MCI switches are located) travel much the same mileage as airline miles. In effect, MCI seems to be saying that it cannot define the relationship between the differing sets of mileage figures and thus that mileage is to be disregarded as a rate factor. Although as a common carrier, MCI's intercity facilities (both leased and owned) are primarily terrestrial and therefore have basically distance sensitive costs, we do not take the position that its rates must necessarily track these costs. But if MCI's rates do significantly vary from its costs, there must be justification for such deviation (e.g., bear costs that are caused by other users. In this case we are concerned that short haul users may unreasonably bear costs that are imposed by long haul users.

28. As previously stated, various pricing alternatives are offered to customers of certain Metered Use Service options whereby the customer pays only 45 percent of the basic $0.265 per minute rate (or $0.119) for intercity facilities if that customer agrees to pay a higher monthly minimum intercity charge. (See para. 4 above and appendix II, attached.) This minimum is $910 for Service 12 and $650 for Option III. MCI has provided no justification for either the amount of reduction in the per minute rate or the amount of the monthly minimums.[5] Also, the SPLS rate structure requires all customers to pay a given rate for intercity facilities for the first 60 hours of use per month, a lower rate for 61 to 240 hours and an even lower rate for over 240 hours. (See para. 7 above and appendix II, attached.) While the step method of employing discounts has been used by common carriers (see footnote 5), MCI has offered no justification for its selection of the various usage steps or the rate levels within each step.

29. Several questions relating to the cost justification for the MCI obtained exchange service portion of both metered use service and SPLS arise when the figures are compared with earlier MCI filings. In transmittal No. 91, MCI states that the current total monthly cost of 4,000 such local exchange lines is $314,000. This number excludes the 700 lines which MCI considers to be inactive and results in a per circuit cost of approximately $80 per month. In transmittal No. 92, MCI uses the same total costs, which we assume are based on the same figures, but it offers no explanation for these costs. Earlier, in transmittal Nos. 86 and 88, MCI provided a figure of $320,000 as the monthly cost of 3,200 active local exchange lines. This resulted in a per circuit cost of about $100 per month. However, in response to the Bureau's May 10, 1978, request for additional information, MCI stated that the total monthly cost for local exchange lines varied from $328,000 to $337,000 for 4,710 circuits which meant an average monthly cost of between $69.66 and $71.63 per circuit. MCI stated that those figures included inactive lines, which tended to reduce the average cost. Although MCI offers a superficial explanation for each of the above sets of figures, the frequency of change in these local exchange line costs and the number of lines included cause us to question further the validity of the most recent set of figures and the consistency in treatment of costs for local access lines.

30. The costs incurred by MCI in acquiring these exchange access lines from the telephone company are apportioned among MCI's metered use service and SPLS customers on a pro

[5] The traditional way of applying bulk discounts is by steps, with all usage within a step paying the same rate. For example, all usage under 100 hours pays x rate, 100-200 hours y rate, and above 200 hours z rate. Such a rate structure presumably reflects declining costs as volume increases. In MCI's metered use services rate structure, on the other hand, the same discounted rate is applied to all usage by high volume customers, i.e., those agreeing to the higher minimum charge in advance but is not given to other customers even if their usage exceeds the high volume minimum. In contrast, it is interesting to note that MCI does employ the step rate structure for its SPLS, but does not provide any significant reason for the different approaches between the services.

V 43 / 195

rata basis. MCI determines a per minute cost based on the total number of minutes of usage of the exchange access lines divided by the total charges to MCI for the lines. Then, each customer's charge is computed by multiplying the per minute cost times the individual customer's number of minutes of usage. However, it is not clear whether this charge is calculated on a systemwide or servicewide basis. But more inportantly there is no apparent way a customer could calculate the charges applicable to him since these would depend on the number of lines leased by MCI in any given month and their average use by other customers. Even the maximum charge applied in the current tariff would be eliminated.

31. Section 61.55(f) of the rules, 47 CFR 61.55(f), states that explanatory statements shall be "in clear and explicit terms regarding the rates and regulations contained in the tariff as may be necessary to remove all doubt as to their proper application." Moreover, subsection (h) of that same rule states that tariffs shall contain "[a]n explicit statement of the charges in cents or in dollars and cents of United States currency, per chargeable unit of service for all communications services" * *." Therefore, aside from the general question of the reasonableness of a rate element that the customer has no way of calculating or reasonably ascertaining in advance, it appears that the instant filings may be contrary to the Commission's rules.

D. DISCRIMINATION

32. In paragraphs 25-31 above, we were concerned with the adequacy and reasonableness of specific charges, which is treated in section 201(b). Pursuant to section 202(a), we also must consider the justness and reasonableness of the relationship between different charges for "like communication services." Two separate issues arise under this subject. The first is whether the discounts for two of the metered use service options are discriminatory. The second involves the question of whether metered use service and SPLS, or various options within these categories, are like services and therefore whether rate differentials between them must be justified.

PRICING ALTERNATIVES

33. In brief summary, the various rates for the intercity facilities portion of the metered used service are as follows:

Service option	Minimum monthy charge	Per minute charge
Option I (Execunet)	$75	$0.265
Option II (Service 12)	75	.265
Option III	910	.119
	75	.265
	650	.119

For SPLS the same intercity portion is available for all options at the following rates:

Monthly hours use	Per minute charge
0 to 60	$0.233
61 to 240	.183
Over 240	.058

Before addressing the like service question, it become immediately obvious that there are two different rate schedules for metered use service Options II and III and that subscribers to those service options pay two different rates. While it is possible that MCI could justify differences in these rate schedules on the basis of costs or some other nationale, it has not attempted to do so. Absent any such justification these rate differentials within these service options would appear to be clearly discriminatory.

34. *Like services.* As already noted, MCI's response to A. T. & T.'s like services argument is primarily that the rates for the particular service options are different and that the individual options are offered to meet customer demand. The test for like services is whether the services in question differ in "any material functional respect." See *American Trucking Association, Inc.* v. *FCC*, 377 F. 2d 121, 127 (1966), *cert. denied*, 386 U.S. 943 (1967); *Commodity News Service, Inc.* v. *FCC*, Case No 75-2057 (D.C. Cir Aug. 5, 1977); *A.T. & T*, Series 7000, FCC 77-804 (released Mar. 30, 1978). MCI does not address the functional differences between any of the service options. However, it is evident that each of the SPLS options has a corresponding metered use service option which embodies the same type of access and terminating configurations, as well as the shared intercity facilities. This becomes apparent if we utilize the diagrams of appendix I to compare the options. Metered use Service 12 apparently corresponds to SPLS Option III, both of which utilize a dedicated access line to originate a call, shared intercity circuits and MCI obtained shared access facilities and exchange service in the terminating city. The new metered use service Option III appears to correspond to SPLS Option I, where dedicated access lines are utilized on both the originating and terminating ends and shared intercity circuits are used. SPLS Option II apparently corresponds to another metered use service option (not illustrated)[6] where a dedicated access line is used to originate a call, shared intercity circuits are utilized, and a customer obtained line or service is used to terminate the call. These facility comparisons raise substantial questions as to whether SPLS and metered use service options are like serivces since the facilities used for the various options appear to be identical and to perform the same functions. From the perception of the customer, the functions of each of the two options within the three sets of options compared would appear to be identical except for the differing charges incurred.

35. The rates for the metered use service and SPLS options compared above are clearly different. This can be seen from appendix II, where the rates for the various options of metered use service and SPLS are calculated based on 8,000 minutes of use per month. The comparisons of charges for the relevant options are repeated below:

Metered use service	SPLS
Option II (Service 12)	Option III
1. $2,177.90 plus prorated exit line	$1,711.53 plus prorated exit line.
2. $1,009.90 plus prorated exit line	

Option III	Option I
1. $2,235.80	$1,779.43.
2. $1,067.80	

Despite MCI's claim, rate differentials are not relevant in reaching a determination whether services are like. The costs of providing the service do not enter into the determination of whether there is a discrimination, but are only relevant to show whether a discrimination may be a reasonable one under the Act. See *A. Lindberg & Sons, Inc.*, v. *U.S.*, 408 F. Supp. 1032 (W.D. Mich. 1976); A. T. & T., series 7000, supra. Rate differentials are thus an indication of a possible discrimination rather than a justification for such a discrimination. We have already stated that MCI has offered no cost justification for these different charges.

36. Therefore, we have a situation in MCI's two filings which raises substantial questions as to whether the various options are like services and, if so, whether the rate differentials are justified to the extent that no lawful discrimination exists, pursuant to section 202(a) of the Act. In fact, since the various options seem to be functionally the same, it is imperative to raise

[6] This metered use service configuration appears to be available from tariff descriptions.

the question of whether metered use service and SPLS are like services at this time. If it is found that these services or options within them are like, MCI will have the burden of proving that the varying charges are not unreasonably discriminatory.[7]

IV. CONCLUSION

37. we have set forth what we find to be the major deficiencies with MCI's tariff filings before us. These problems fall within two separate categories: (1) Deficiencies which are so substantial that their unlawfulness is almost certain; and (2) deficiencies which need to be investigated to determine whether they are lawful or unlawful.

38. The first category includes the absence of specific charges for MCI obtained exchange access lines in the tariff (see pars. 29-31 above) and the pricing alternatives for the intercity circuits in the charges for metered use service 12 and option III (see par. 33 above). We are prescribing a different procedural approach for dealing with these two deficiencies than the other category. In so doing, we recognize that MCI is a relatively small carrier involved in competitive markets and does not exert a dominant influence in those markets. Moreover, since the current MCI tariff is already in hearing, consolidation of these filings with that proceeding will be administratively convenient. Therefore, we will not reject MCI's tariff revisions at this time.[8] Instead, we give MCI 30 days from the release date of this decision to either fully justify or modify the two tariff provisions set forth above. In the case of the exchange access lines, MCI should provide a detailed explanation of the reasons, as well as seek a waiver of § 61.55(h) of the rules, if it is unwilling to specify an exact charge or a formula by which a charge may be calculated in advance by the customer. With regard to the metered use service pricing alternatives, MCI should either provide complete justification for the alternative charges or remove one of the alternatives from the tariff and include specific justification for the remaining charge. All interested parties will have 15 days from the date of MCI's submission to comment and MCI will have 10 days from the date comments are filed to reply. Based on these submissions, we will reach a determination as to the lawfulness of those particular tariff provisions involved, insofar as rejection is concerned, prior to the suspended effective date of the tariff revisions.

39. The deficiencies included in the second category include the cost justification for changes to the metered use service and SPLS offerings, the justness and reasonableness of the distance insensitive intercity rate for both metered use service and SPLS and the block intercity rates for SPLS customer, and possible unreasonable discrimination among various options of metered use service and SPLS. These deficiencies are sufficient to warrant investigation. Because of the commonality of the cost data between the filings already being investigated in CC docket No. 78-241 and the filings before us here, we will consolidate the investigation of transmittal Nos. 91 and 92 with the investigation previously initiated in CC docket No. 78-241. This will allow a more complete investigation into the major aspects of and interrelationships between MCI's metered use service and SPLS offerings. In consolidating the investigations, we believe that the main thrust of the hearing should focus on the revised tariffs, reflecting the changes made in transmittal Nos. 91 and 92, rather than on the earlier revisions, which expanded Execunet service to additional cities. We believe the issues in the existing proceeding are sufficient to cover the specific issues we have raised herein with regard to transmittal Nos. 91 and 92. This also pertains to the like service questions discussed above, which are to be included in the section 202(a) issue of the designation order in CC docket No. 78-241.

40. We have already indicated that metered use service customers making calls between city-pairs close in distance will experience rate increases because of the distance insensitive intercity rate element. We also stated that all SPLS customers will realize a rate increase when making 240 or fewer hours of calls per month. In addition, substantial questions exist concerning the issues of discrimination among different customers to metered use service 12 and option III and between similar options of metered use service and SPLS. Because of the anticipated increases and the possibility that unreasonable discrimination exists, we are suspending the effectiveness of MCI's transmittal Nos. 91 and 92 for the full 5-month statutory period, pursuant to section 204 of the Act, 47 U.S.C. 204.

41. Accordingly, *It is ordered*, That, pursuant to sections 4(i), 4(j), 201, 202, 204, 205, and 403 of the Communications Act of 1934, as amended, an investigation is instituted into the lawfulness of the tariff schedules filed by MCI Telecommunications Corp. with transmittal Nos. 91 and 92.[9]

42. *It is further ordered*, That, pursuant to the provisions of section 204 of the Act, the revised tariff schedules filed by MCI with transmittal No. 91 are hereby suspended until March 1, 1979, and the revised tariff schedules filed by MCI with transmittal No. 92 are hereby suspended until February 15, 1979.

43. *It is further ordered*, That MCI will have 30 days from the release of this decision to make the appropriate filings concerning the issues specified in paragraph 38 above, that all interested parties will have 15 days from the date of MCI's submission to file comments, and that MCI will have 10 days from the date any comments are filed to reply.

44. *It is further ordered*, That, pursuant to sections 4(i) and 4(j) of the Act, hearings in this investigation on the issues specified in paragraph 39 above are consolidated with those already established in CC docket No. 78-241.

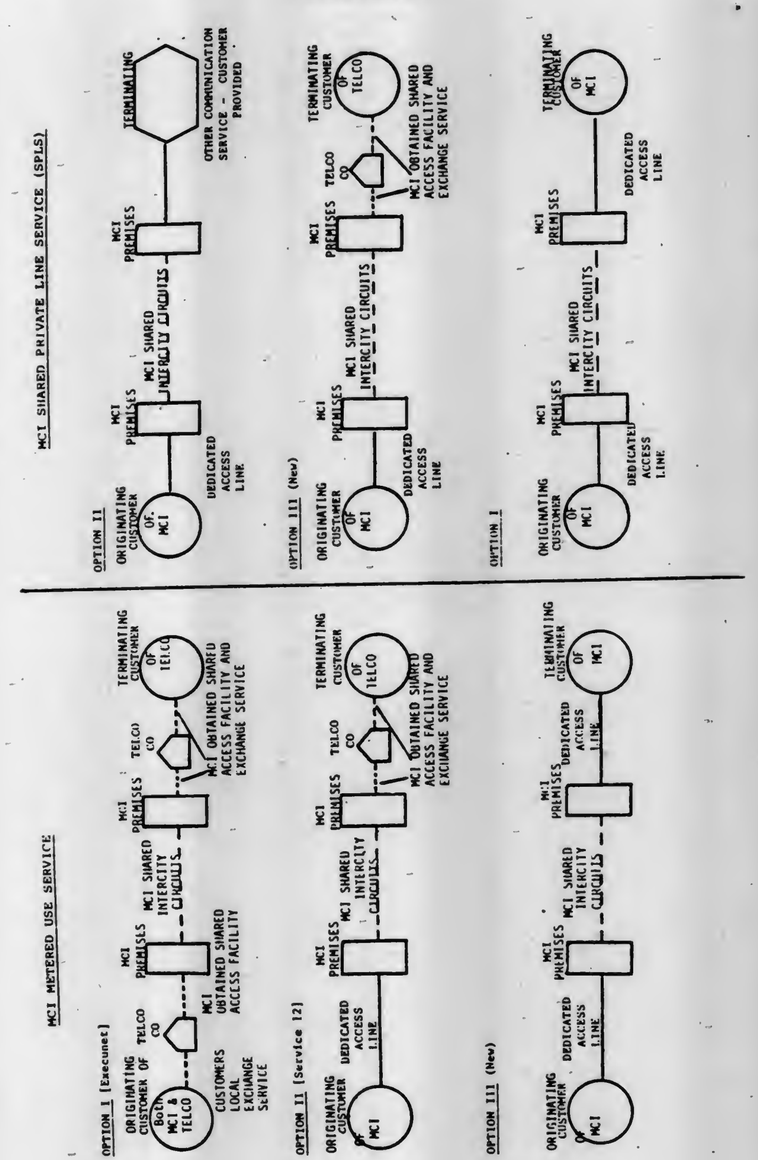
45. *It is further ordered*, That the petitions to suspend and investigate filed by American Telephone & Telegraph Co. are granted to the extent indicated herein but otherwise are denied.

46. *It is further ordered*, That, the Secretary shall cause a copy of this order to be published in the FEDERAL REGISTER.

FEDERAL COMMUNICATIONS COMMISSION,[10]
WILLIAM J. TRICARICO,
Secretary.

[7] Even if these services are not determined to be like, a significant question remains as to whether the different rate levels for similar service elements, e.g., the intercity circuits, are reasonable.

[8] As we indicated in our Aug. 18, 1978 order (FCC 78-565) concerning MCI's previous tariff filing, the courts have not held that the duty to reject is absolute. Rather, they have recognized the need of agencies to exercise reasonable discretion not to reject when this best serves administrative purposes. *Municipal Light Boards* v. *FPC*, 450 F. 2d 1341 (D.C. Cir. 1971); *Associated Press* v. *FCC*, 448 F. 2d 1095 (D.C. Cir. 1971); *American Farm Lines* v. *Black Ball Freight Services*, 397 U.S. 532 (1970).



[9] Subsequent to the adoption of this memorandum opinion and order, but prior to its release, MCI withdrew both transmittal Nos. 91 and 92. Thus, there will be no investigation of those particular transmittals.

[10] See attached dissenting statement of Commissioner Joseph R. Fogarty.

OCT 6 1978

Appendix I

NOTE.—Appendix II "Summary of Monthly Rates for Metered Use Service and SPLS Options" has been deleted. For information related to this document, contact Mr John W. Hunter, 202-632-5550, Federal Communications Commission. Appendix II is filed as part of the original document.

DISSENTING STATEMENT OF COMMISSIONER JOSEPH R. FOGARTY

In re: MCI Telecommunications Corp. transmittals No. 91 and 92.

The majority here faces two tariff filings which, without question, violate on their face sections 202(a), 203(a), 203(c) of the Communications Act and §§ 61.38, 61.55(g), and 61.55(h) of our rules. Yet it merely finds that the filings raise questions of reasonableness and suspends them. Why?

These filings contain without question discriminatory rates for like services. MCI has made no attempt even to allege that there is a justification for this statutory [11] violation. These filings make the tariff so unclear that the Commission cannot determine what services are being offered. MCI has made no attempt to define its services, despite statutory and regulatory language requiring tariffs to delineate services clearly.[12] These filings contain no specific rates for local channels. MCI specifies a rate in its sales literature but not in the tariff, despite statutory and regulatory language requiring rates to be specified in the tariff [13] and making unlawful the marketing of services at any other rate.[14]

Under these circumstances, what is there to investigate? In order to cure the clarity and rate specificity defects, MCI must file a tariff revision. In order to make the discrimination lawful, MCI must present and support some justification. We cannot impute a justification under circumstances where the factors used in developing the rate are known only to MCI.

During the suspension period, the majority hopes to elicit additional information to enable the Commission to make a summary judgment. What more information do we need? MCI might make an attempt to justify the discrimination, but no additional pleadings or data can cure the other defects.

During the Commission meeting discussing this tariff, it was suggested that we should consider holding the specialized carriers to a standard different from that which we apply to A.T. & T. While it may be appropriate to modify our filing requirements to some extent to meet the realities of the competitive marketplace, we certainly should not summarily waive the rules on an ad hoc basis. Further, the Commission has no right to waive the Act, and no modification of our requirements could cure the statutory violations here. However, any modifications we do adopt should be after an inquiry or rulemaking proceeding, not on the basis of a particular tariff filing.

Meanwhile, our limited staff resources will be spent conducting a hearing on a tariff which "is so patently a nullity as a matter of substantive law, that Administrative efficiency and justice are furthered by obviating any docket at the threshold • • •" *Municipal Light Boards* v. *F.P.C.*, 450 F. 2d 1341, 1346 (D.C. Cir., 1974). I would reject.

FEDERAL MEDIATION AND CONCILIATION SERVICE

FMCS ARBITRATION SERVICES ADVISORY COMMITTEE

Recertification

Pursuant to section 9(c) of the Federal Advisory Committee Act of October 6, 1972 (Pub. L. 92-463, 86 Stat. 770-776), the Federal Mediation and Conciliation Service announces the intent to file recertification with the appropriate committees of the Senate and the House of Representatives on or before December 8, 1978.

The objectives of the committee are as follows: (1) Advise the Director of FMCS on the means and methods of providing better arbitration services; (2) review and evaluate the existing criteria for determining selection of applicants to the FMCS roster of arbitrators; (3) advise on the promulgation of new criteria to be utilized in selecting applicants; (4) advise on means to achieve a more efficient and effective utilization of the existing roster of arbitrators; (5) advise the Director of Arbitration Services on ways to utilize training programs and other technical assistance to and in improving arbitration services; (6) serve as a forum for exchange of ideas and opinions of interested persons.

Additional information regarding the FMCS Arbitration Services Advisory Committee may be obtained from John Grimes, Advisory Committee Management Officer, Federal Mediation and Conciliation Service, Washington, D.C. 20427, telephone 653-5226.

CHENOA CORP.

Formation of Bank Holding Company

Chenoa Corp., Farmer City, Ill., has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company by acquiring 51 percent or more of the voting shares of Bank of Chenoa, Chenoa, Ill. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Chenoa Corp., Farmer City, Ill., has also applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and section 225.4(b)(2) of the Board's regulation Y (12 CFR 225.4(b)(2)), for permission to continue to perform certain nonbanking activities. Notice of the application was published on July 13, 1978 in the Clipper Times and Journal, a newspaper circulated in McLean County, Ill.

Applicant states that it would engage in the activity of serving as broker for the sale of credit life insurance and credit accident and health insurance directly related to extensions of credit by Bank. Such activities have been specified by the Board in section 225.4(a) of regulation Y as permissible for bank holding companies, subject to

OCT 6 1978

V 43/195 OCT 6 78

Board approval of individual proposals in accordance with the procedures of section 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question should be accompanied by a statement summarizing the evidence the person requesting the hearing proposes to submit or to elicit at the hearing and a statement of the reasons why this matter should not be resolved without a hearing.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Chicago.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, not later than October 25, 1978.

Board of Governors of the Federal Reserve System, October 2, 1978.

OKLAHOMA NATIONAL BANSHARES, INC.

Formation of Bank Holding Company

Oklahoma National Banshares, Inc., Oklahoma City, Okla., has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company by acquiring more than 80 percent (less directors' qualifying shares) of the voting shares of Oklahoma National Bank & Trust Co., Oklahoma City, Okla. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Oklahoma National Banshares, Inc., Oklahoma City, Okla., has also applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and section 225.4(b)(2) of the Board's regulation Y (12 CFR 225.4(b)(2)), for permission to acquire the beneficial interest in Myriad Co., Oklahoma City, Okla., a proposed business trust which will own shares of Myriad Insurance Agency, Inc., Oklahoma City, Okla., a proposed corporate insurance agency. Notice of the application was published on August 9, 1978 in The Daily Oklahoman, a newspaper circulated in Oklahoma County, Okla.

Applicant states that the proposed subsidiary would engage in the activities of offering credit life insurance and credit accident and health insurance in connection with extensions of credit by its proposed subsidiary bank. Such activities have been specified by the Board in section 225.4(a) of regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of section 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question should be accompanied by a statement summarizing the evidence the person requesting the hearing proposes to submit or to elicit at the hearing and a statement of the reasons why this matter should not be resolved without a hearing.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Kansas City.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, not later than October 26, 1978.

Board of Governors of the Federal Reserve System, September 29, 1978.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Alcohol, Drug Abuse, and Mental Health Administration

MINORITY ADVISORY COMMITTEE

Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (5 U.S.C. Appendix I), announcement is made of the following National Advisory body scheduled to assemble during the month of October 1978:

Minority Advisory Committee, ADAMHA, October 23-25, 9 a.m. to open Meeting, Springfield Hilton Hotel, 6550 Loisdale Road, Springfield, Va. 22150. Contact: Ernest F. Hurst, room 13C-15, Parklawn Building, 5600 Fishers Lane, Rockville, Md. 20857, 301-443-3838.

Purpose. The Minority Advisory Committee, ADAMHA, advises the Secretary, Department of Health, Education, and Welfare, and the Administrator, Alcohol, Drug Abuse, and Mental Health Administration, on needs, programs, and activities regarding minority alcohol, drug abuse, and mental health matters, and makes recommendations for possible solutions which meet the needs and concerns of minority groups throughout the United States. The Committee functions in an advisory capacity to the Administrator, ADAMHA, on these matters which relate to the National Institute on Alcohol Abuse and Alcoholism, the National Institute on Drug Abuse, and the National Institute of Mental Health.

Agenda. The Committee is meeting concurrently with the ADAMHA Annual Conference of the State and Territorial Alcohol, Drug Abuse, and Mental Health Authorities. Agenda items on October 23 include a status report of ADAMHA's response to recommendations of the First Annual Conference on Minority Group Alcohol, Drug Abuse, and Mental Health Issues, and discussions with Executive Directors of National alcohol, drug abuse, and mental health associations. On October 24, the Committee will attend the Annual Conference. On October 25, 1 p.m., the Committee will reconvene to discuss the 1978-79 workplan and hear members' reports on liaison and special assignments. Mr. James C. Helsing, Deputy Director, Office of Public Affairs, ADAMHA, will furnish, on request, summaries of the meeting and a roster of the Committee members. Mr. Helsing is located in room 6C-15, Parklawn Building, 5600 Fishers Lane, Rockville, Md. 20857, 301-443-3783.

Dated: October 3, 1978.

ELIZABETH A. CONNOLLY,
Committee Management Officer, Alcohol, Drug Abuse, and Mental Health Administration.

Food and Drug Administration

[Docket No. 78D-0330]

CLINICAL EVALUATION OF SLOW-ACTING DRUGS AGAINST RHEUMATOID ARTHRITIS

Availability of Proposed Guideline

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: This notice announces the availability of a proposed guideline that is intended to reflect acceptable standards for clinical evaluation of slow-acting drugs used to treat rheumatoid arthritis. The guideline is being made available for public comment to provide the agency and the Arthritis Advisory Committee with views to be considered for incorporation into the final published guideline.

DATES: Comments by February 5, 1979.

ADDRESS: Written comments to the Hearing Clerk (HFA-305), Food and Drug Administration, Room 4-65, 5600 Fishers Lane, Rockville, Md. 20857.

FOR FURTHER INFORMATION OR FOR COPIES OF THE GUIDELINE CONTACT:

Joyce Creamer, Bureau of Drugs (HFD-150), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857, 301-443-4260.

SUPPLEMENTARY INFORMATION: The Food and Drug Administration (FDA) is making available for comment a proposed guideline, prepared with assistance from the FDA Arthritis Advisory Committee, which describes procedures for clinical evaluation of slow-acting drugs for treating rheumatoid arthritis. If, following the receipt of comments, the Commissioner concludes that the guideline reflects acceptable procedures for the evaluation of these drugs, the guideline will be made available under § 10.90(b) of agency regulations (21 CFR 10.90(b)). That section provides for use of guidelines to establish procedures of general applicability which are not legal requirements but which are acceptable to FDA. A person who follows a guideline is assured that his or her conduct will be acceptable to FDA. A person may also choose to use alternative procedures or standards even though they are not provided for in the guideline. A person who chooses to do so may discuss the matter further with the agency to prevent expenditure of money and effort or work that later may be determined to be unacceptable by FDA.

The Commissioner has determined that this document does not contain an agency action covered by § 25.1(b) and, therefore, consideration by the agency of the need for preparing an environmental impact statement is not required.

The proposed guideline has been placed in the public file of guidelines and is available for public inspection at the office of the FDA hearing clerk (address given above), between 9 a.m. and 4 p.m., Monday through Friday. Copies may be obtained by contacting Joyce Creamer, Executive Secretary, Arthritis Committee, Division of Oncology and Radiopharmaceutical Drug Products (HFD-150), Bureau of Drugs, Food and Drug Administration, 5600 Fishers Lane, Rockville, Md. 20857, 201-443-4260.

On October 19, 1978, a subcommittee of the Arthritis Advisory Committee will meet to discuss the proposed guideline. The meeting will be held from 9 a.m. to 5 p.m. at the Food and Drug Administration, third floor, Conference Room G, 5600 Fishers Lane, Rockville, Md. Interested persons are invited to attend and participate in the discussion and review of the proposed guideline. Instructions for those who wish to participate in the discussion are contained in the notice of the meeting published in the FEDERAL REGISTER of September 15, 1978 (43 FR 41273), or may be obtained from the contact person named in this notice.

All comments received will be considered before the agency issues the final guideline.

Dated: October 2, 1978.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Regulatory Affairs.

[4110-03]

[Docket No. 78D-0326]

DRUG COMBINATIONS FOR USE IN ANIMALS

Notice of Availability of Guidelines and Open Meeting

AGENCY: Food and Drug Administration.

ACTION: Notice.

V 43 / 195
OCT 6 78

SUMMARY: The agency announces the availability of the Bureau of Veterinary Medicine's revised guidelines regarding combination drug for use in animals. The agency also announces that a Combination Drug Workshop will be held for the purpose of illustration and exposition of these guidelines.

DATE: Open meeting on Wednesday, November 8, 1978, 9:30 a.m.

ADDRESS: Open meeting will be held in Conference Room G, Parklawn Building, 5600 Fishers Lane, Rockville, Md. 20857; comments on the guidelines to the Hearing Clerk (HFA-305), Food and Drug Administration, Room 4-65, 5600 Fishers Lane, Rockville, Md. 20857.

FOR FURTHER INFORMATION CONTACT:

Robert J. Condon, Bureau of Veterinary Medicine (HFV-105), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857, 301-443-1580.

SUPPLEMENTARY INFORMATION: Section 514.1(b)(8)(v) of the procedural new animal drug regulations (21 CFR 514.1(b)(8)(v)) establishes principles upon which new animal drug applications for combination products are reviewed. The section provides that:

> • • • Each ingredient designated as active in any new animal drug combination must make a contribution to the effect in the manner claimed or suggested in the labeling, and, if in the absence of express labeling claims of advantages for the combination such a product purports to be better than either component alone, it must be established that the new animal drug has that purported effectiveness.

The guidelines address more specifically the kind of data required to justify the approval of applications for new animal drugs containing more than one active ingredient.

Interested persons are invited to attend the combination Drug workshop being held at the time and place given above for the purpose of illustration and exposition of these guidelines.

The guidelines are available for public examination in the office of the hearing clerk at the address above, between 9 a.m. and 4 p.m., Monday through Friday. Written requests for single copies may be sent to the Food and Drug Administration, Bureau of Veterinary Medicine, Industry Information Branch (HFV-226), 5600 Fishers Lane, Rockville, Md. 20857.

Written comments on the guidelines may be submitted to the hearing clerk, preferably following the open meeting. All comments shall be identified by docket No. 78D-0326. Such comments will be considered in determining whether amendments or revisions to the guidelines are warranted.

Dated: October 2, 1978.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Regulatory Affairs.

NATIONAL CONFERENCE ON REFERRAL CRITERIA FOR X-RAY EXAMINATIONS

Meeting

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administratioon (FDA) is announcing a Conference on Referral Criteria for X-Ray Examinations. The conference is being convened by the Honorable Paul G. Rogers, Chairman, Subcommittee on Health and the Environment of the Committee on Interstate and Foreign Commerce, U.S. House of Representatives, and Mr. Joseph A. Califano, Jr., Secretary, Department of Health, Education, and Welfare (HEW). Details of the Conference are being arranged by FDA and the Health Care Financing Administration. The conference is being held to foster collaboration between the private sector and the Government in formulating strategies to: (1) Reduce unnecessary X-ray procedures; (2) produce, disseminate, and evaluate the use of X-ray referral criteria; (3) ameliorate problems concerning defensive radiology; (4) eliminate unwarranted, administratively required X-ray examinations; and (5) heighten consumer understanding of the benefits and limitations of diagnostic radiology. Representatives of health-related Federal agencies, State health departments, various medical specialties, third-party carriers, and the legal profession, and consumers have been invited to participate.

DATE: The Conference will be open to the public from 9 a.m. to 6:30 p.m. on October 25, 1978; from 8:30 a.m. until 4 p.m. on October 26, 1978; and from 8:30 a.m. to adjournment on October 27, 1978.

ADDRESS: The general sessions on October 25 and 27, 1978, will be held in the HEW North Auditorium, 330 Independence Avenue SW., Washington, D.C. 20201. Workshop sessions on October 26, 1978, will be held in the Hubert H. Humphrey Building, 200 Independence Avenue SW., Washington, D.C. 20201. Participation in the workshops is by invitation, and attendance by the public will be limited to space available.

FOR FURTHER INFORMATION OR TO RESERVE SEATS FOR OBSERVATION OF THE WORKSHOP SESSIONS CONTACT:

Phyllis Segal, Bureau of Radiological Health (HFX-70), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857, 301-443-4600.

Dated: October 2, 1978.

[Docket No. 77N-0238]

VENDING OF FOOD AND BEVERAGES

Revision of Model Sanitation Ordinance

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration has completed revision of the model sanitation ordinance, "Vending of Food and Beverages," which was last revised in 1965. The purpose of this model ordinance is to provide the vending machine industry with sanitary standards and State and local governments with a comprehensive model law.

FOR FURTHER INFORMATION CONTACT:

A. Sidney Davis, Bureau of Foods (HFF-220), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C Street SW., Washington, DC 20204, 202-245-1511.

SUPPLEMENTAL INFORMATION: In a notice published in the FEDERAL REGISTER of October 7, 1977 (42 FR 54626), the Commissioner of Food and Drugs proposed revisions in the model ordinance, "Vending of Food and Beverages," and invited comment on the proposal. The comment period closed on January 5, 1978.

A total of 14 letters containing 98 comments was received. The comments, which were used extensively in preparing the final document, dealt primarily with vending machine design and clarification of the language of the ordinance. Revision of the ordinance has been completed and submitted to the Government Printing Office.

A notice will be published in the FEDERAL REGISTER announcing availability of the model ordinance and procedures for obtaining copies. Prepublication copies of the ordinance are being sent to Federal and State offices for their review, and a prepublication copy is available for public review in the office of the Hearing Clerk, Food and Drug Administration, Room 4-65, 5600 Fishers Lane, Rockville, Md. 20857.

Dated: September 29, 1978.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Regulatory Affairs.

WHITMOYER LABORATORIES

Whitmoyer Pink Eye Powder; Withdrawal of Approval of New Animal Drug Application

AGENCY: Food and Drug Administration.

AGENCY: Notice.

SUMMARY: The agency withdraws approval of a new animal drug application providing for use of Whitmoyer Pink Eye Powder intended for use in treating pink eye in cattle and in treating minor wounds in cattle, sheep, goats, and horses. This action is taken in response to a request by the sponsor, Whitmoyer Laboratories.

EFFECTIVE DATE: October 6, 1978.

FOR FURTHER INFORMATION CONTACT:

Andrew J. Beaulieu, Bureau of Veterinary Medicine (HFV-214), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857, 301-443-4093.

SUPPLEMENTARY INFORMATION: Whitmoyer Laboratories, 19 North Railroad Street, Myerstown, Pa. 17067, is the sponsor of NADA 12-797 providing for Whitmoyer Pink Eye Powder which is intended for use in the treatment of pink eye in cattle and for the treatment of minor wounds in cattle, sheep, goats, and horses. The product contains 2 percent neomycin sulfate, 2.5 percent *para*-aminomethylsulfonamide-hydrochloride, 1 percent benzocaine, and 94.5 percent boric acid. The application was originally approved on February 4, 1963.

The sponsor informed the agency by letter of December 16, 1977, that the product is no longer manufactured, that marketing had been discontinued in March of 1971, and that no remaining stocks of the product were in inventory. The sponsor requested withdawal of approval of the application and waived opportunity for a hearing.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(e), 82 Stat. 345-347 (21 U.S.C. 360(e))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1) and redelegated to the Director of the Bureau of Veterinary Medicine (21 CFR 5.84), and in accordance with § 514.115 *Withdrawal of approval of applications* (21 CFR 514.115), notice is given that approval of NADA 12-797 and all supplements for Whitmoyer Pink Eye Powder is hereby withdrawn, effective October 6, 1978.

Dated: September 28, 1978.

LESTER M. CRAWFORD,
Director, Bureau of Veterinary Medicine.

Health Care Financing Administration

MEDICARE PROGRAM

Schedule of Guidelines for Physical Therapy Services

The Health Care Financing Administration (HCFA) has established an updated schedule of guidelines for medicare program reimbursement for the costs of physical therapy services furnished under an arrangement between a therapist and a hospital or other institution.

Section 1861(v)(5) of the Social Security Act requires that the Health Care Financing Administration establish criteria for determining the reasonable cost of services furnished by a therapist under an arrangement with a provider of services, a clinic, a rehabilitation agency, or a public health agency. The services include physical therapy, occupational therapy, speech therapy, and other therapy services and services of other health specialists (other than physicians). Medicare program reimbursement for these services may not exceed an amount equal to the prevailing salary, plus an allowance for fringe benefits and other expenses related to furnishing therapy services. The requirements of the statute are implemented under regulations at 42 CFR 405.432.

Section 405.432 provides that HCFA will issue guidelines, with updates as necessary, to be used by medicare program fiscal intermediaries as a maximum hourly amount to be reimbursed to providers for physical therapy services furnished to medicare beneficiaries under an arrangement. These guidelines apply only to the amount of reimbursement the medicare program will make to a provider for physical therapy services obtained under an arrangement. The guidelines do not mandate how the provider pays the contracting therapist, who may make any arrangements with the provider that he wishes.

Under this authority, the initial guidelines to evaluate physical therapy services were published in the FEDERAL REGISTER on February 7, 1975, and were effective for provider cost reporting periods beginning on or after April 1, 1975 (40 FR 5810). Updated schedules were published in the FEDERAL REGISTER on:

February 19, 1976—effective for physical therapy services performed on or after April 1, 1976 (41 FR 7542), as revised by notice in

V 43 / 195

the FEDERAL REGISTER on August 3, 1976 (41 FR 36531).

August 3, 1977—effective for physical therapy services performed on or after October 1, 1977 (42 FR 39277).

The initial guidelines established a basic adjusted hourly salary equivalency amount consisting of the prevailing salary, plus a factor that accounts for fringe benefits and other expenses incurred in furnishing therapy services under arrangements and a standard travel allownace.

The pyhsical therapy guidelines are based on data from the latest Bureau of Labor Statistics (BLS) Triennial Hospital Wage Survey. The survey was conducted in August 1975 (January 1976 on the west coast) in 23 major standard metropolitan statistical areas (AMSA's) throughout the United States. The Health Care Financing Administration designated 10 geographic regions to group the data and develop the guideline amount for each State by using either salary data directly from that State or by using a regional average.

The prevailing salary is based on the 75th percentile of salary ranges paid by hospitals in each SMSA to physical therapists employed full time. The 75th percentile of the salary ranges has been used in accordance with the recommendations of the Senate Committee on Finance (p. 251, S. Rept. 92-1230).

The fringe benefit and expenses factor that is added to the basic salary amounts obtained from the BLS data includes amounts which are generally received by an employee therapist, such as vacation pay, insurance premiums, pension payments, as well as expenses for maintaining an office, appropriate insurance, etc., an individual not working as an employee might incur in furnishing services under arrangements. Provider overhead expenses such as space, heat, light, etc., are not included since these costs are absorbed by the provider, even when therapy services are provided under arrangements. In developing the guidelines, it was determined by the Health Care Financing Administration that this frings benefit and expenses factor would be 50 percent of the BLS salary amounts.

The fringe benefit component of this factor was derived from an analysis of a BLS study reported in Bulletin 1873, Employee Compensation in the Private Nonfarm Economy, 1972, and remains proximate according to the most recently available study reported in Bulletin 1963 issued in 1977. The expense component was developed from an analysis of data derived from trade journals and outside business organizations on the cost of maintaning an office.

This revised schedule of guidelines has been prepared using the same methodology as the original schedule and updated for inflation by using the most recently available figures for overall hospital wages determined by BLS (BLS Employment and Earnings Bulletin, line SIC-806 for April 1978). These figures were then used with the comparable figures for the month of the BLS Triennial Hospital Wage Survey (August 1975 or January 1976 as explained above) to obtain an overall percentage increase which was then applied to the physical therapy salary data.

EFFECTIVE DATE: The revised schedule of physical therapy guidelines which reflects an increase of approximately 13 percent will be applicable to physical therapy services performed on or after December 1, 1978, without regard to the beginning dates of providers' cost reporting periods; and will remain in effect until the effective date of any revised schedule that may be published.

FOR FURTHER INFORMATION CONTACT:

Mr. William Goeller, Medicare Bureau, Room 405 East Building, 6401 Security Boulevard, Baltimore, Md. 21235, 301-594-9820.

MEDICARE PROGRAM

Schedule of Guidelines for Respiratory Therapy Services

The Health Care Financing Administration (HCFA) has established a schedule of guidelines for medicare program reimbursement for the costs of respiratory therapy services furnished under an arrangement between a therapist and a hospital or other institution.

Section 1861(v)(5) of the Social Security Act requires that HCFA establish criteria for determining the reasonable cost of services furnished by a therapist under an arrangement with a provider of services, a clinic, a rehabilitation agency, or a public health agency. These services include physical therapy, occupational therapy, speech therapy, and other therapy

services and services of other health specialists (other than physicians). Medicare program reimbursement for these services may not exceed an amount equal to the prevailing salary, plus an allowance for fringe benefits and other expenses related to furnishing therapy services. The requirements of the statute are implemented under regulations at 42 CFR 405.432.

Section 405.432 provides that HCFA will issue guidelines, with updates as necessary, to be used by medicare program fiscal intermediaries as a maximum hourly amount to be reimbursed to providers for therapy services furnished to medicare beneficiaries under an arrangement. These guidelines apply only to the amount of reimbursement the medicare program will make to a provider for therapy services obtained under an arrangement. The guidelines do not mandate how the provider pays the contracting therapist, who may make any arrangements with the provider that he wished.

The Health Care Financing Administration has already issued proposed guidelines on the cost of physical therapy services, one of the most common types of therapy services obtained under such arrangements (41 FR 7542). This schedule of guidelines covers respiratory therapy services, the next most common therapy services obtained under such arrangements. Previously, medicare program providers have been charged by therapy contractors on a fee-for-service basis or a percentage of the provider's billed charges and the providers have simply passed on these charges to the medicare program as costs. Thus, where therapy services were furnished under an arrangement, the costs claimed by providers for medicare program reimbursement may have had little relation to the actual cost of the services.

These guidelines establish a basic adjusted hourly salary equivalency amount that consists of the prevailing salary, plus a factor that accounts for fringe benefits and other expenses incurred in furnishing therapy services under arrangements. Additional allowances for travel, equipment, and supplies, and administrative responsibilities are also included as provided in 42 CFR 405.432.

The guidelines are based on data on salaries of hospital personnel from the latest Bureau of Labor Statistics (BLS) triennial hospital wage survey. The survey was conducted in August 1975 (January 1976 on the west coast) in 23 major standard metropolitan statistical areas (SMSA's) throughout the United States. The Health Care Financing Administration designated 10 geographic regions to group the data and develop the guideline amount for each State by using either the salary data from the survey data directly from that State or by using a regional average.

These data have been updated to account for inflation by using the most recently available figure for overall hospital wages determined by the BLS (BLS Employment and Earnings Bulletin line SIC-806 for April 1978). This figure was used with the comparable figure for the month of the BLS triennial hospital wage survey (August 1975 or January 1976 as explained above) to obtain an overall percentage increase, which was then applied to the respiratory therapy salary data.

The prevailing salary is based on the 75th percentile of salary ranges paid by hospitals in each SMSA to respiratory therapists employed full time. The 75th percentile of the salary ranges has been used in accordance with the recommendations of the Senate Committee on Finance (page 251, S. Rept. 92-1230).

The fringe benefit and expense factor that is added to the basic salary amounts obtained from the BLS data includes amounts which are generally received by an employee therapist, such as vacation pay, insurance premiums, pension payments, as well as expenses for maintaining an office, appropriate insurance, etc., an individual not working as an employee might incur in furnishing services under arrangements.

Provider overhead expenses such as space, heat, light, etc., are not included since these costs are absorbed by the provider, even when therapy services are provided under arrangements. In developing the guidelines, it was determined by the Health Care Financing Administration that this fringe benefit and expense factor would be 50 percent of the BLS salary amounts.

The fringe benefit component of this factor was derived from an analysis of a BLS study reported in Bulletin 1873, Employee Compensation in the Private Nonfarm Economy, 1972. (It remains proximate according to the most recent available study reported in Bulletin 1963 issued in 1977.) This BLS study has been used because of the large sample size on which the BLS study is based, as well as the explicit direction of the Congress to use BLS data where feasible (page 251, S. Rept. 92-1230).

The expense component of the factor was developed from an analysis of data derived from trade jounals and outside business orgainizations on the costs of maintaining an office.

The same factor has been used for the physical therapy guidelines to maintain consistency within the program. Any actual differences in the therapies will be recognized by differ-

OCT 6 1978

V 43 / 195 OCT 6 78

ing BLS salary amounts or in equipment and supply costs.

In addition to the adjusted hourly salary equivalency amount, payment may be made under the medicare program for certain other costs for respiratory therapy services provided under arrangements.

As provided in 42 CFR 405.432, there are allowances for administrative or supervisory responsibilities, and for supplies and equipment that include full depreciation, interest, and tax expenses on equipment furnished by the therapist. The guidelines also include a standard travel allowance that accounts for the time (30 minutes on the average) it takes the therapist to travel to the provider site. Furthermore, there is an additional travel expense factor that accounts for actual costs of traveling to the provider site, as well as allowances for the costs of assistants and aides furnished by the therapist, and for overtime.

This schedule contains separate guideline amounts for registered and certified respiratory therapists. This difference in amounts acknowledges the fact that registered respiratory therapists are more extensively trained and, on the whole, have greater responsibility and authority than do certified respiratory therapists and as a result, constitute distinct occupational categories. Moreover, section 1861(v)(5) requires that reimbursement be based on the salaries actually paid to employed therapists and the BLS survey clearly shows that registered respiratory therapists are paid more than certified respiratory therapists.

A registered respiratory therapist is defined as a graduate of a respiratory care education and training program approved by the American Medical Association, or an individual with equivalent training and qualifications who has been registered by the American Registry of Inhalation Therapists, Inc. (ARIT), following successful completion of the ARIT examination. A certified respiratory therapist is an individual who has success fully completed a 1-year respiratory care training program, usually in a hospital or junior college, and who has been certified by the American Association for Respiratory Therapy (AART) following successful completion of the certification examination administered by the AART.

As recommended by the Senate Committee on Finance, the guidelines were sent, in proposed form, to the organizations which have an interest in the application of guidelines to the cost of respiratory therapy services. Comments and suggestions received and our responses are summarized below:

1. *Applicability of section 1861(v)(5) of the Social Security Act to respiratory therapy.* A number of commentors stated that due to substantial differences between physical therapy, which is life-enhancing, and respiratory therapy, which is life-supporting, the same reimbursement methodology should not apply. They believe that respiratory therapy is not covered by section 1861(v)(5). In our view, the statute does not distinguish between life-enhancing and life-supporting therapies. The statutory terms are sufficiently broad to cover respiratory therapy and there is no indication that it was not intended to do so. These guidelines are designed to reflect the extent to which there are differences between the types of therapy.

2. *Effect on rural areas.* Some commentors felt that the guidelines will disadvantage rural areas which frequently have to obtain respiratory therapy services under arrangements. No evidence has been submitted to indicate that BLS data are inappropriate for rural areas. Survey data obtained from the Department of Commerce indicate that salaries in the health care field are generally lower in rural areas. Therefore, applying the higher urban salary rates from the BLS data does not disadvantage rural providers.

3. *Cost of equipment and supplies.* A number of commentors believed the guidelines do not include an allowance for the high costs of equipment required by respiratory therapists. As noted above, the reasonable costs of equipment and supplies are covered in accordance with 42 CFR 405.432.

EFFECTIVE DATE: This schedule is applicable to respiratory therapy services furnished on or after December 1, 1978, without regard to the beginning dates of providers' cost reporting periods; and will remain in effect until the effective date of any revised schedule that may be published.

REPORT ON BIOASSAY OF 2-CHLORO-P-PHENYLENEDIAMINE SULFATE FOR POSSIBLE CARCINOGENICITY

Availability

2-Chloro-p-phenylenediamine sulfate (CAS 61702-44-1) has been tested for cancer-causing activity with rats and mice in the Bioassay Program, Division of Cancer Cause and Prevention, National Cancer Institute. A report is available to the public.

Summary: A bioassay for possible carcinogenicity of 2-chloro-p-phenylenediamine sulfate was conducted using Fischer 344 rats and B6C3F1 mice. Applications of the chemical include use as an ingredient of hair dyes. 2-Chloro-p-phenylenediamine sulfate was administered in the feed, at either of two concentrations, to groups of 50 male and 50 female animals of each species.

Under the conditions of this bioassay there was insufficient evidence that dietary administration of 2-chloro-p-phenylenediamine sulfate was carcinogenic to Fischer 344 rats or B6C3F1 mice.

Single copies of the report are available from the Office of Cancer Communications, National Cancer Institute, Building 31, Room 10A21, National Institutes of Health, Bethesda, Md. 20014.

(Catalog of Federal Domestic Assistance Program No. 13.393, Cancer Cause and Prevention Research.)

REPORT ON BIOASSAY OF IODOFORM FOR POSSIBLE CARCINOGENICITY

Availability

Iodoform (CAS 75-47-8) has been tested for cancer-causing activity with rats and mice in the Bioassay Program, Division of Cancer Cause and Prevention, National Cancer Institute. A report is available to the public.

Summary. A bioassay for possible carcinogenicity of technical-grade iodoform was conducted using Osborne-Mendel rats and B6C3F1 mice. Applications of the chemical include use as an antiseptic. Iodoform in corn oil was administered by gavage, at either of two dosages, to groups of 50 male and 50 female animals of each species.

Under the conditions of this bioassay, no convincing evidence was provided for the carcinogenicity of iodoform in Osborne-Mendel rats or B6C3F1 mice.

Single copies of the report are available from the Office of Cancer Communications, National Cancer Institute, Building 31, Room 10A21, National Institutes of Health, Bethesda, Md. 20014.

REPORT ON BIOASSAY OF CHLOROTHALONIL FOR POSSIBLE CARCINOGENICITY

Availability

Chlorothalonil (CAS 1897-45-6) has been tested for cancer-causing activity with rats and mice in the Bioassay Program, Division of Cancer Cause and Prevention, National Cancer Institute. A report is available to the public.

Summary: A bioassay of technical-grade chlorothalonil for possible carcinogenicity was conducted by administering the test chemical in the diet to Osborne-Mendel rats and B6C3F1 mice. Applications of the chemical include use as an agricultural fungicide and as an ingredient in paints and other products.

It is concluded that under the conditions of this bioassay, technical-grade chlorothalonil was carcinogenic to Osborne-Mendel rats, producing tumors of the kidney. Chlorothalonil was not carcinogenic for B6C3F1 mice.

Single copoes of the report are available from the Office of Cancer Communications, National Cancer Institute, Building 31, Room 10A21, National Institutes of Health, Bethesda, Md. 20014.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Federal Disaster Assistance Administration

[FDAA-564-DR; Docket No. NFD-645]

ARKANSAS

Amendment to Notice of Major Disaster Declaration

AGENCY: Federal Disaster Assistance Administration, HUD.

ACTION: Notice.

SUMMARY: This notice amends the notice of major disaster declaration for the State of Arkansas (FDAA-564-DR), dated September 15, 1978.

DATED: September 19, 1978.

FOR FURTHER INFORMATION CONTACT:

John Perry, Program Support Staff, Federal Disaster Assistance Administration, Department of Housing and Urban Development, Washington, D.C. 20410, 202-634-7825.

NOTICE: The notice of major disaster for the State of Arkansas dated September 15, 1978, is hereby amended to include the following area among those areas determined to have been adversely affected by the catastrophe declared a major disaster by the President in his declaration of September 15, 1978.

The county of Cross.

(Catalog of Federal Domestic Assistance No. 14.701, Disaster Assistance.)

[FDAA-564-DR; Docket No. NFD-646]

ARKANSAS

Major Disaster and Related Determinations

AGENCY: Federal Disaster Assistance Administration, HUD.

ACTION: Notice.

SUMMARY: This is a notice of the Presidential declaration of a major disaster for the State of Arkansas (FDAA-564-DR), dated September 15, 1978, and related determinations.

DATED: September 15, 1978.

FOR FURTHER INFORMATION CONTACT:

John Perry, Program Support Staff, Federal Disaster Assistance Administration, Department of Housing and Urban Development, Washington, D.C. 20410, 202-634-7825.

NOTICE: Pursuant to the authority vested in the Secretary of Housing and Urban Development by the President under Executive Order 11795 of July 11, 1974, and delegated to me by the Secretary under Department of Housing and Urban Development Delegation of Authority, docket No. D-74-285; and by virtue of the Act of May 22, 1974, entitled "Disaster Relief Act of 1974" (88 Stat. 143); notice is hereby given that on September 15, 1978, the President declared a major disaster as follows:

I have determined that the damage in certain areas of the State of Arkansas resulting from severe storms and flooding, beginning about September 13, 1978, is of sufficient severity and magnitude to warrant a major disaster declaration under Pub. L. 93-288. I therefore declare that such a major disaster exists in the State of Arkansas.

Notice is hereby given that pursuant to the authority vested in the Secretary of Housing and Urban Development under Executive Order 11795, and delegated to me by the Secretary under Department of Housing and Urban Development Delegation of Authority, docket No. D-74-285, I hereby appoint Mr. Joe D. Winkle of the Federal Disaster Assistance Administration to act as the Federal coordinating officer for this declared major disaster.

I do hereby determine the following areas of the State of Arkansas to have been adversely affected by this declared major disaster.

The counties of Pulaski and Saline.

OCT 6 78

NOTICE: Pursuant to the authority vested in the Secretary of Housing and Urban Development by the President under Executive Order 11795 of July 11, 1974, and delegated to me by the Secretary under Department of Housing and Urban Development Delegation of Authority, docket No. D-74-285; and by virtue of the Act of May 22, 1974, entitled "Disaster Relief Act of 1974" (88 Stat. 143); notice is hereby given that on September 20, 1978, the President declared a major disaster as follows:

I have determined that the damage in certain areas of the State of Louisiana resulting from severe storms and flooding, beginning about September 15, 1978, is of sufficient severity and magnitude to warrant a major disaster declaration under Pub. L. 93-288. I therefore declare that such a major disaster exists in the State of Louisiana.

Notice is hereby that pursuant to the authority vested in the Secretary of Housing and Urban Development under Executive Order 11795, and delegated to me by the Secretary under Department of Housing and Urban Development Delegation of Authority, docket No. D-74-285, I hereby appoint Mr. William H. Mayer of the Federal Disaster Assistance Administration to act as the Federal coordinating officer for this declared major disaster.

I do hereby determine the following areas of the State of Louisiana to have been adversely affected by this declared major disaster.

The parishes of Ouachita and Richland. (Catalog of Federal Domestic Assistance No. 14.701, Disaster Assistance.)

WILLIAM H. WILCOX,
Federal Disaster Assistance Administration.

DEPARTMENT OF THE INTERIOR

Geological Survey

COTEAU, N. DAK.

Known Recoverable Coal Resource Area

Pursuant to authority contained in the Act of March 3, 1879 (43 U.S.C. 31), as supplemented by Reorganization Plan No. 3 of 1950 (43 U.S.C. 1451, note), 220 Departmental Manual 2, Secretary's Order No. 2948, and section 8A of the Mineral Leasing Act of February 25, 1920, as added by section 7 of the Federal Coal Leasing Amendments Act of 1975 (Pub. L. 94-377, Aug. 4, 1976), Federal lands within the State of North Dakota have been reclassified as subject to the coal leasing provisions of the Mineral Leasing Act of February 25, 1920, as amended (30 U.S.C. 201). The name of the area, effective date, and total acreage involved are as follows:

(34) NORTH DAKOTA

Coteau (North Dakota) known recoverable coal resource area; March 24, 1978; 20,626 acres previously classified (Velva known recoverable coal resource area), 1,400 acres deleted, and 112,947 acres added. Total area now reclassified 132,173 acres.

A diagram showing the boundaries of the area classified for leasing has been filed with the appropriate land office of the Bureau of Land Management. Copies of the diagram and the land description may be obtained from the Conservation Manager, Central Region, U.S. Geological Survey, MS 609, Box 25046, Federal Center, Denver, Colo. 80225.

Dated: September 28, 1978.

W. A. RADLINSKI,
Acting Director.

DEPARTMENT OF JUSTICE

Antitrust Division

UNITED STATES V. ALLIED MAINTENANCE CORP., ET AL.

Consent Judgment and Competitive Impact Statement Thereon

Notice is hereby given pursuant to the Antitrust Procedures and Penalties Act, 15 U.S.C. 16 (b) through (h), that a proposed consent judgement and a competitive impact statement as set out below have been filed with the U.S. District Court for the Southern District of New York in *United States of America v. Allied Maintenance Corporation, et al.*, Civil No. 76 Civ. 286. The complaint in this action alleges that the 11 corporate defendants conspired among themselves and other coconspirators to allocate customers for building maintenance services between and among themselves; to refrain from competing for customers so allocated; to submit noncompetitive, collusive, and complementary bids for contracts with customers and potential customers for building maintenance services; and to compensate each other for customers lost to one another in violation of section 1 of the Sherman Act. The proposed judgment enjoins each of the defendants for a period of 10 years from entering into any agreement with a competing contractor to fix prices for the rendering of any building maintenance service; to submit noncompetitive, collusive, or rigged bids to customers for the performance of such services; to not compete for or allocate customers of such services; or to compensate a competitor for the transfer of its building maintenance customer by payment of moneys, exchange or return of customers, or by any other means.

The defendants, under the decree, will be permitted only to agree to not compete for customers transferred in connection with the purchase or sale of a building maintenance business or any part thereof or for customers transferred under a subcontracting agreement in which one of the agreeing parties undertakes to render building maintenance services to the customer of the other agreeing party. Further, a defendant is permitted under the decree to pay or receive compensation for the transfer of a customer to or from a competitor only if it is in connection with the purchase or sale of a business or any part thereof or in connection with a subcontract agreement.

The proposed judgment also requires the defendants to send a copy of it to each of its customers for whom they rendered building maintenance services during the period from January 1, 1970, through October 31, 1974. In addition thereto, each defendant desiring to transfer a customer to a competitor, except in connection with the sale of business or part thereof, must notify such customer of the intended transfer not less than 15 days before the transfer becomes effective and identify the name and address of the transferee.

Public comment is invited within the 60-day statutory time period. Such comments and response thereto will be published in the FEDERAL REGISTER and filed with the court. Comments should be directed to Ralph T. Giordano, Chief, New York Office, Antitrust Division, Department of Justice, 26 Federal Plaza, New York, N.Y. 10007.

Dated: September 28, 1978.

RICHARD J. FAVRETTO,
Deputy Director of Operations.

U.S. DISTRICT COURT FOR THE SOUTHERN DISTRICT OF NEW YORK

United States of America, Plaintiff, v. *Allied Maintenance Corp.; Alpine Industries, Inc.; Anchor Cleaning Service, Inc.; Arcade Cleaning Contractors, Inc.; Coastal Enterprises, Inc.; Eastern Maintenance Service, Inc.; MacClean Service Co., Inc.; National Kinney Corp.; Prudential Building Maintenance Corp.; Temco Service Industries, Inc.; and Triangle Maintenance Service, Inc.*, Defendants.

Civil Action No. 76 Civ. 286 (CMM).

Filed: September 28, 1978.

STIPULATION

It is stipulated by and between the undersigned parties, by their respective attorneys, that:

1. A final judgment in the form hereto attached may be filed and entered by the court, upon the motion of any party or upon the court's own motion, at any time after compliance with the requirements of the Antitrust Procedures and Penalties Act (15 U.S.C. 16), and without further notice to any party or other proceedings, provided that plaintiff has not withdrawn its consent, which it may do at any time before the entry of the proposed final judgment by serving notice thereof on defendants and by filing that notice with the court.

2. In the event plaintiff withdraws its consent or if the proposed final jugment is not entered pursuant to stipulation, this stipulation shall be of no effect whatever and making of this stipulation shall be without prejudice to plaintiff or defendants in this or any other proceeding.

Dated: September 27, 1978.

Civil Action No. 76, Civ. 286 (CMM).

Filed: September 28, 1978.

FINAL JUDGMENT

Plaintiff, United States of American, having filed its complaint herein on January 16, 1976; and all parties by their attorneys having severally consented to the making and entry of this final judgment, without admission by any party in respect to any issue and without this final judgment constituting evidence or an admission by any party with respect to any such issue;

Now, therefore, before any testimony has been taken herein, without trail or adjudication of any issue of fact or law herein, and upon consent of the parties hereto, it is hereby

Ordered, adjudged and decreed, as follows:

I

This court has jurisdiction of the subject matter hereof and the parties consenting hereto. The complaint states claims upon which relief may be granted against the defendants under section 1 of the Act of Congress of July 2, 1890, as amended (15 U.S.C. 1), commonly known as the Sherman Act.

II

As used in this final judgment:

(A) "Person" shall mean any individual, partnership, corporation, association, or any other business or legal entity.

(B) The term "building maintenance" shall mean the providing of janitorial, repair, security, elevator, landscaping, and other services in connection with the use and occupancy of commerical, industrial, or institutional buildings, including but not limited to: Interior cleaning and dusting, washing and waxing floors: vacuuming and cleaning carpets; cleaning and washing windows, walls and window coverings; servicing washrooms; operating and repairing elevator, heating, lighting, and ventilation facilities; providing security guard services; caring for landscaping; preparation of new buildings for occupancy and other related activities.

(C) The term "subcontracting agreement" shall mean any agreement or understanding to perform one or more building maintenance services or provide materials therefor so as to discharge a part or the whole of the obligation for which a supplier of building maintenance had committed itself to another person.

III

(A) Except as otherwise specifically stated herein, the provisions of this final judgment shall apply to the defendants, their respective officers, agents, servants, and employees, and to those persons in active concert or participation with any of them who shall receive actual notice of this final judgment by personal service or otherwise.

(B) The provisions of this final judgment shall not apply to activities between a defendant, and its officers, directors, agents, or employees, or between any of them, and its parent or subsidiary companies, their affiliate corporation (in which 50 percent or more of the voting stock is owned by a defendant, its parent or subsidiary company or a single individual owning more than 50 percent of a defendant) or their officers, directors, agents, or employees.

IV

Each defendant is hereby enjoined and restrained from the following:

(A) Entering into any agreement with any supplier of building maintenance services to fix prices for such services, except in connection with subcontracting agreements;

(B) Entering into any agreement with any supplier of building maintenance services to submit noncompetitive, collusive, or rigged bids to customers for the performance of such services;

(C) Entering into any agreement with any supplier of building maintenance services to not compete for, or to allocate, customers of such services, except in connection with transactions for the purchase or sale of a business or any part thereof, or in connection with a subcontracting agreement;

(D) Compensating another supplier of building maintenance services for the latter's transfer of a customer by payment of moneys, exchange, or return of customers, or any other means, except with regard to compensation to a seller for customers transferred in connection with the purchase or sale of a business, its shares, or any part of either.

V

Each of the defendants, and its subsidiaries and affiliates (as defined in paragraph III (B)), is ordered and directed to mail or cause to be mailed,

(A) To each of its customers of building maintenance services in New York County for the period January 1, 1970, through October 31, 1974, a copy of this final judgment together with the notice annexed hereto as exhibit A within sixty (60) days after the entry of this final judgment, and, within one hundred and twenty (120) days from the aforesaid date of entry, to file an affidavit with the clerk of this court setting forth the fact and manner of compliance with this section V(A); and

(B) To any customer in New York County it intends to transfer to another supplier of building maintenance services, not less than fifteen (15) days before such transfer, a statement of its intention to transfer any such customer to said supplier of building maintenance services, including therein the name and address of such transferee, except in connection with the sale of a business or shares thereof, or a subsidiary or division of said business.

VI

(A) For the purpose of determining or securing compliance with this final judgment,

V 43/195 OCT 6 78

any duly authorized representative of the Department of Justice shall, on written request of the Attorney Geneal or the Assistant Attorney General in charge of the Antitrust Division, and on reasonable notice to such defendant at its principal office, be permitted, subject to any legally recognized privilege:

(1) Access during the office hours of such defendant to inspect and copy all books, ledgers, accounts, correspondence, memoranda, and other records and documents in the possession or under the control of such defendant, who may have counsel present, relating to any matters contained in this final judgment; and

(2) Subject to the reasonable convenience of such defendant and without restraint or interference from it, to interview any officers, directors, agents, partners, or employees of such defendant, any of whom may have counsel present, regarding any such matters.

(B) Each defendant, upon the written request of the Attorney General or the Assistant Attorney General in charge of the Antitrust Division, shall submit such reports in writing with respect to any of the matters contained in this final judgment, as may from time to time be requested, subject to any legally recognized privilege.

No information obtained by the means provided in this section shall be divulged by any representative of the Department of Justice of any person other than a duly authorized representative of the executive branch of the United States, except in the course of legal proceedings to which the United States is a party, or for the purpose of securing compliance with this final judgment, or as otherwise required by law.

If at any time information or documents are furnished by any defendant to plaintiff pursuant to this section and such defendant represents that the material, or any portion thereof, in any such information or documents is of a type described in rule 26(c)(7) of the Federal Rules of Civil Procedure, and the defendant identifies such material in writing and marks each pertinent page thereof, "Subject to claim of protection under Rule 26(c)(7) of the Federal Rules of Civil Procedure," then plaintiff shall give such defendant ten (10) days notice prior to divulging such material in any legal proceeding (other than a Grand Jury proceeding) to which such defendant is not a party.

VII

Jurisdiction is retained by this court for the purpose of enabling any of the parties to this final judgment to apply to this court at any time for such further orders and directions as may be necessary or appropriate for the construction or carrying out of this final judgment, for the modification of any of the provisions thereof, and for the enforcement of compliance therewith and punishment of violations thereof.

VIII

This final judgment shall terminate and cease to be effective ten (10) years from the date of its entry.

IX

Entry of this final judgment is in the public interest.

Dated: ————————, 1978.

————————,
U.S. District Judge.

U.S. DISTRICT COURT FOR THE SOUTHERN DISTRICT OF NEW YORK

United States of America, Plaintiff, v. *Allied Maintenance Corp.; Alpine Industries, Inc.; Anchor Cleaning Service, Inc.; Arcade Cleaning Contractors, Inc.; Coastal Enterprises, Inc.; Eastern Maintenance Service, Inc.; MacClean Service Co., Inc.; National Kinney Corp.; Prudential Building Maintenance Corp.; Temco Service Industries, Inc.; and Triangle Maintenance Service, Inc.*, Defendants.

Civil Action No. 76, Civ. 288 (CMM).

LEGAL NOTICE OF FINAL JUDGMENT IN CIVIL ACTION BROUGHT BY GOVERNMENT

Pursuant to a final judgment entered on consent in the above action in this court on ————————, 1978, notice is being sent to all persons who purchased building maintenance services from the above-named defendants, their subsidiaries or affiliates in New York County from January 1, 1970, through October 31, 1974, to inform you that the above civil action, brought by the United States of America, has been settled on the consent of all parties.

This action was brought under section 1 of the Sherman Act, and was based upon the allegations of a separate Government proceeding that the defendants had conspired to restrain competition in New York County from January 1, 1970, to October 31, 1974. A separate class action, based on substantially the same allegations, was commenced in this court by four plaintiffs on behalf of customers of defendants, their subsidiaries and affiliates in New York County during the relevant period. That action is not affected by this settlement.

This action has been settled without the trial or adjudication of any issue of fact or law, and without admission by any party concerning any issue.

A copy of the final judgment is enclosed.

Dated: New York, N.Y., ————————, 1978.

U.S. DISTRICT COURT, SOUTHERN DISTRICT OF NEW YORK,
RAYMOND F. BURGHARDT,
Clerk of the Court.

U.S. DISTRICT COURT, SOUTHERN DISTRICT OF NEW YORK

United States of America, Plaintiff, v. *Allied Maintenance Corp.; Alpine Industries, Inc.; Anchor Cleaning Service, Inc.; Arcade Cleaning Contractors, Inc.; Coastal Enterprises, Inc.; Eastern Maintenance Service, Inc.; MacClean Service Co., Inc.; National Kinney Corp.; Prudential Building Maintenance Corp.; Temco Service Industries, Inc.; and Triangle maintenance Service, Inc.*, Defendants.

Civil No. 76 Civ. 286.

Filed: September 28, 1978.

PROPOSED CONSENT DECREE: COMPETITIVE IMPACT STATEMENT

The United States of America, pursuant to section 2(b) of the Antitrust Procedures and Penalties Act (15 U.S.C. 16(b)), hereby submits this competitive impact statement relating to the proposed consent judgment submitted for entry in this civil antitrust proceeding.

I. NATURE OF THE PROCEEDING

The United States, on January 16, 1976, filed a civil antitrust action under section 4 of the Sherman Act (15 U.S.C. 4) alleging that the above-named defendants and unnamed coconspirators from before 1970 had combined and conspired in violation of section 1 of the Sherman Act (15 U.S.C. 1) to allocate customers for building maintenance services between and among themselves; to refrain from competing for customers so allocated; to submit non-competitive, collusive, and complementary bids for contracts with customers and potential customers for building maintenance services; and to compensate each other for customers lost to one another. The complaint alleges further that, as a result of the said conspiracy, the prices for furnishing building maintenance services has been maintained and stabilized at artificial and noncompetitive levels; competition in building maintenance industries in New York has been restrained and eliminated; and customers of building maintenance companies in New York have been deprived of the right to purchase building maintenance services in an open and competitive market.

Entry by the court of the proposed consent judgment will terminate the action, except that the court will retain jurisdiction over the matter for possible further proceedings, within the 10 years next ensuing, which may be needed to interpret, modify, or enforce the judgment or to punish alleged violations of any of the provisions of the judgment.

II. DESCRIPTION OF THE PRACTICES INVOLVED IN THE ALLEGED VIOLATIONS

The defendants are among the largest building maintenance companies in the State of New York, who, in 1974, accounted for over $192 million in sales of building maintenance services in New York County alone. Building maintenance is broadly defined both in the complaint and the proposed consent judgment as the providing of janitorial, repair, security, elevator, landscaping, and other services in connection with the use and occupancy of commercial, industrial, or institutional buildings. During the period beginning as early as 1970, the defendants regularly purchased substantial quantities of materials, supplies, and equipment which were essential to the furnishing of building maintenance services. Substantial portions of such goods were shipped in a continuous and uninterrupted flow in interstate commerce from manufacturers outside the State of New York directly to the defendants or the customers of the defendants within the State. The rendering of building maintenance services and the use of the supplies described above were essential for the operation of buildings in New York county devoted to the use and occupancy by commercial, charitable, and quasi-public enterprises.

III. EXPLANATION OF THE PROPOSED CONSENT JUDGMENT

The United States and the defendants have stipulated that the proposed consent judgment, in the form negotiated by and among the parties, may be entered by the court at any time after compliance with the Antitrust Procedures and Penalties Act. The stipulation among the parties provides that there has been no admission by any party with respect to any issue of fact or law. Under the provisions of section 2(e) of the

Antitrust Procedures and Penalties Act, entry of the proposed judgment is conditioned upon a determination by the court that the proposed judgment in is the public interest.

A. PROHIBITED CONDUCT

The proposed judgment will prohibit each of the defendants from entering into any agreement with a competing contractor to fix prices for the rendering of any building maintenance service; to submit noncompetitive, collusive, or rigged bids to customers for the performance of such services; to not compete for or allocate customers of such services; or to compensate a competitor for the transfer of its building maintenance customer by payment of moneys, exchange, or return of customers, or by any other means. The defendants will be permitted under the decree to agree to not compete for customers only with a competitor to whom defendant has transferred such customer in connection with the purchase or sale of a building maintenance business or any part thereof or for customers transferred under a subcontracting agreement in which one of the agreeing parties undertakes to render building maintenance services to the customer of the other agreeing party. Also, a defendant is permitted under the decree to pay or receive compensation for the transfer of a customer to or from a competitor only if it is in connection with the purchase or sale of a business or any part thereof or in connection with a subcontract arrangement.

Each defendant will be required within 60 days after entry of judgment to furnish a copy of the judgment to each of its customers for whom they rendered building maintenance services during the period from January 1, 1970, through October 31, 1974. Each defendant within 120 days from the date of entry of the judgment must file an affidavit with the clerk of the court setting forth the fact and manner of compliance to the foregoing. In addition thereto, each defendant desiring to transfer a customer to a competitor must notify such customer of the intended transfer not less than 15 days before such transfer becomes effective, identifying in such notice the name and address of the transferee. A limited exception is allowed to each defendant permitting the transfer of a customer without providing any notice to the customer in those instances in which the customer is to be transferred in connection with the sale of a business or part thereof to the transferee.

B. SCOPE OF THE PROPOSED JUDGMENT

The proposed judgment applies to each defendant, its officers, agents, servants, and employees and to those persons in active concert or participation with any of them who shall receive actual notice of this final judgment by personal service or otherwise. Unless the court either modifies or vacates the proposed judgment, the defendants are bound by its prohibition for a period of 10 years from the date of its entry and thereafter the judgment shall terminate and cease to be effective.

The judgment would apply to the defendants activities wherever they may occur in the United States.

EFFECT OF THE PROPOSED JUDGMENT ON COMPETITION

The relief encompassed in the proposed consent judgment is designed to prevent any recurrence of the conduct alleged in the complaint. The prohibitive language of the judgment should insure that no future agreements or combinations will be arranged by, between or among the defendants to not compete or to allocate customers; to submit noncompetitive, collusive, and complementary bids to customers or potential customers of any contractor rendering building maintenance services or to compensate each other for customers lost to one another.

The judgment provides methods for determining defendants' compliance with the tems of the judgment. The Department of Justice, through duly authorized representatives, may interview officers, employees, and agents of each defendant regarding defendant's compliance with the judgment. the Government also is given access, upon reasonable notice, to examine each defendant's records for possible violations of the judgment and to request defendants to submit reports to the Government on matters contained in the judgment.

It is the opinion of the Department of Justice that the proposed consent judgment provides fully adequate provisions to prevent continuance or recurrence of violations of the antitrust laws charged in the complaint. In the Department's view, disposition of the lawsuit without further litigation is appropriate in that the proposed judgment provides all the relief which the Government sought in its complaint, and the additional cost of litigation necessarily involved if the issues were litigated would not result in any additional relief. Accordingly, the public benefit is best served by the consent disposition of the action herein proposed.

IV. ALTERNATIVE REMEDIES CONSIDERED BY THE GOVERNMENT

The defendants made several proposals for a consent judgment which the Government concluded would not insure that the conspiracy charged in the complaint would not continue or recur. The Division, at the request of the defendants, made a counterproposal from which the consent judgment was negotiated. Briefly, summarized, the points of difference that ultimately were compromised between the parties involved the Government's demand that the decree be nationwide and that each defendant notify its customers of the conclusion of the within action by forwarding to each customer a copy of the final judgment after it had been approved and entered by the court. The defendants admitted that some of them, in addition to operating in New York State, operated in other States; however, they pointed out the Government alleged wrongful conduct only in the State of New York. Under these circumstances, the defendants contended, there would be no basis to require defendants to give notice to their customers outside of the State. The defendants further urged that to give notice to customers outside New York would subject them to needless embarrassment and hardship. The defendants concluded, therefore, that if notice were limited to the customers of each defendant in New York County during the period alleged in the companion criminal case (*U.S.A. v. Allied Maintenance et al.*, 76 Cr. 613 S.D.N.Y.), i.e., from prior to January 1, 1970, through October 31, 1974, all persons that could have been adversely affected by the acts charged in the complaint, would receive notice of the judgment in this action. The Government accepted the defendants' arguments and the judgment contains the more limited notice requirements while remaining national in scope. The Government believes that the persons adversely affected by the defendants' covert actions during the period of their wrongful conduct as alleged in the complaint will receive notice of the consent judgment so that, if they so choose, they may pursue any private rights they may have against the defendants.

The Government, therefore, agreed to the limitation proposed by the defendants provided any future transfer of customers could be effected only after notice was given to the customer to be transferred. The Government's qualified acceptance of defendants' proposal, the defendants argued, would be acceptable except in those instances in which customers were transferred in connection with the sale of a building maintenance service business or a part thereof. In such instances, the defendants pionted out the value of the business or part thereof sold depended on the goodwill of such business, i.e., the maintenance service contracts in existence with customers at the time of the sale. Business realities, the defendants urged, mandates that customers be transferred without any prior notice of such sale since otherwise the goodwill of the vendor would deteriorate. Thus, if the judgment required that notice be given to such customers before the sale of a business or a part thereof, it would render the business unsalable regardless of the state of its goodwill. Accordingly, the defendants would agree to a judgment that required defendants to notify customers to be transferred only if defendants would be exempted from this obligation in those instances when such customer transfers were in connection with the sale of the business or part thereof. The Government does not dispute the defendants' analysis, and it has accepted defendants' requested exception. The Government notes further that the exception requested by the defendants, in light of the remaining injunctions in the judgment, will not enable the conduct alleged in the complaint to continue or recur.

V. REMEDIES AVAILABLE TO POTENTIAL PRIVATE LITIGANTS

Section 4 of the Clayton Act (15 U.S.C. 15) provides that any person who has been injured as a result of conduct prohibited by the antitrust laws may bring suit in federal court to recover three times the damages such person has suffered as well as costs and reasonable attorney fees. Entry of the proposed consent judgment in this proceeding will neither impair nor assist the bringing of any such private antitrust actions. Under the provisions of section 5(a) of the Clayton Act (15 U.S.C. 16(a)) this consent judgment has no prima facie effect in any lawsuits which may be pending or hereafter brought against the defendants.

VI. PROCEDURES AVAILABLE FOR MODIFICATION OF THE PROPOSED JUDGMENT

As provided by the Antitrust Procedures and Penalties Act, any person believing that the proposed judgment should be modified may submit written comments to Robert A. McNew, Antitrust Division, U.S. Department of Justice, Room 3630, 26 Federal Plaza, New York, N.Y. 10007, within the 60-day period provided by the Act. These comments, and the Department's responses to them, will be filed with the court and pub-

V 43 / 195 OCT 6 1978 UMI

lished in the FEDERAL REGISTER. All comments will be given due consideration by the Department of Justice, which remains free to withdraw its consent to the proposed judgment at any time prior to its entry if it should determine that some modification of it is necessary. The proposed judgment provides that the court retains jurisdiction over this action, and the parties may apply to the court for such order as may be necessary or appropriate for its modification, interpretation, or enforcement.

VII. ALTERNATIVES TO THE PROPOSED CONSENT JUDGMENT

The alternative to the proposed judgment considered by the Antitrust Division was a full trial of the issues on the merits and on relief. The Division considers the substantive language of the final judgment to be of sufficient scope and effectiveness to make litigation on the issues unnecessary, as the judgment provides appropriate relief against the violations charged in the complaint.

VIII. OTHER MATERIALS

No materials and documents of the type described in section 2(b) of the Antitrust Procedures and Penalties Act (15 U.S.C. 16) were considered in formulating this proposed judgment. Consequently, none are submitted pursuant to such section 2(b).

Dated: New York, N.Y., September 28, 1978.

IMPORTER OF CONTROLLED SUBSTANCES

Registration

By notice dated July 28, 1978, and published in the FEDERAL REGISTER on August 8, 1978 (43 FR 35123), Applied Science Laboratories, Inc., Brush Valley Road, Oak Hall, Pa. 16827, made application to the Drug Enforcement Administration to be registered as an importer of tetrahydrocannabinol, organic (7371), a basic class of controlled substance listed in schedule I.

No comments or objections have been received. Additionally, there are currently no registered domestic bulk manufacturers or applicants therefor, of the substance listed. The substance, if imported will be supplied exclusively for authorized research or as chemical analysis standards. Therefore, in accordance with 21 U.S.C 952(a)(2)(B) and 21 CFR 1311.42, and pursuant to section 1008(a) of the Comprehensive Drug Abuse Prevention and Control Act of 1970, the above firm is granted registration as an importer of the basic class of controlled substance listed above.

Dated: October 2, 1978.

PETER B. BENSINGER,
Administrator Drug
Enforcement Administration.

DEPARTMENT OF LABOR

Employment and Training Administration

EMPLOYMENT TRANSFER AND BUSINESS COMPETITION DETERMINATIONS UNDER THE RURAL DEVELOPMENT ACT

Applications

The organizations listed in the attachment have applied to the Secretary of Agriculture for financial assistance in the form of grants, loans, or loan guarantees in order to establish or improve facilities at the locations listed for the purposes given in the attached list. The financial assistance would be authorized by the Consolidated Farm and Rural Development Act, as amended, 7 U.S.C. 1924(b), 1932, or 1942(b).

The Act requires the Secretary of Labor to determine whether such Federal assistance is calculated to or is likely to result in the transfer from

one area to another of any employment or business activity provided by operations of the applicant. It is permissible to assist the establishment of a new branch, affiliate, or subsidiary, only if this will not result in increased unemployment in the place of present operations and there is no reason to believe the new facility is being established with the intention of closing down an operating facility.

The Act also prohibits such assistance if the Secretary of Labor determines that it is calculated to or is likely to result in an increase in the production of goods, materials or commodities, or the availability of services or facilities in the area, when there is not sufficent demand for such goods, materials, commodities, services, or facilities to employ the effficient capacity of existing competitive commercial or industrial enterprises, unless such financial or other assistance will not have an adverse effect upon existing competitive enterprises in the area.

The Secretary of Labor's review and certification procedures are set forth at 29 CFR Part 75. In determining whether the applications should be approved or denied, the Secretary will take into consideration the following factors:

1. The overall employment and unemployment situation in the local area in which the proposed facility will be located.

2. Employment trends in the same industry in the local area.

3. The potential effect of the new facility upon the local labor market, with particular emphasis upon its potential impact upon competitive enterprises in the same area.

4. The competitive effect upon other facilities in the same industry located in other areas (where such competition is a factor).

5. In the case of applications involving the establishment of branch plants or facilities, the potential effect of such new facilities on other existing plants or facilities operated by the applicant.

All persons wishing to bring to the attention of the Secretary of Labor any information pertinent to the determinations which must be made regarding these applications are invited to submit such information in writing within 2 weeks of publication of this notice to:

Deputy Assistant Secretary for Employment and Training, 601 D Street NW., Washington, D.C. 20213.

Signed at Washington, D.C., this 2d day of October 1978.

ERNEST G. GREEN,
Assistant Secretary for
Employment and Training.

APPLICATIONS RECEIVED DURING THE WEEK ENDING SEPTEMBER 28, 1978

Name of applicant, location of enterprise, and principal product or activity

Columbian Rope Co., Auburn, N.Y.; manufacture of cordage and twine.
Coombs & Haddad, Ltd., Laurel County, Ky.; shopping center.
Wilcox Inc., Effingham, Ill.; auto/truck stop.
Buckhart Land Co., Ltd., Sherman, Ill.; shopping and business center.
Spears Carpet Mills, Inc., Hope, Ark.; manufacture of carpets.
Old Tucson Corp., between Henderson and Boulder City, Nev.; amusement and recreation service.

Office of the Secretary

MIGRANT AND OTHER SEASONALLY EMPLOYED FARMWORKER PROGRAMS UNDER THE COMPREHENSIVE EMPLOYMENT AND TRAINING ACT

Competition

NOTE.—This document originally appeared in the FEDERAL REGISTER for October 4, 1978. It is reprinted in this issue to meet requirements for publication on an assigned day of the week. (See OFR notice 41 FR 32914, August 6, 1976.)

AGENCY: Employment and Training Administration.

ACTION: Announcement of additional jurisdictions to be open for competition and grantees to be funded without competition.

SUMMARY: This notice announces additional areas to be open for competition as outlined in the FEDERAL REGISTER of July 14, 1978, "Change of Funding Cycle and Related Changes." Also announced are grantees that will be funded without competition.

EFFECTIVE DATE: September 22, 1978.

FOR FURTHER INFORMATION CONTACT:

Harry Kranz, Acting Director, Office of Farmworker Programs, U.S. Department of Labor, 601 D Street NW., Washington, D.C. 20213, 202-376-6128.

ADDITIONAL AREAS OPEN FOR COMPETITION

On July 14, 1978, the following areas were announced as open for competition: Alabama; county of Los Angeles, Calif.; Iowa; Louisiana; Massachusetts; Michigan; Minnesota; New Jersey; New Mexico; Tennessee; Texas (all counties); and Wisconsin. The purpose of this notice is to announce additional jurisdictions open for competition pursuant to section 97.204(c)(4), title 29, subtitle A, for migrant and other seasonally employed farmworker programs operated under title III, section 303, of the Comprehensive Employment and Training Act. These additional areas are Pennsylvania, Nebraska, Oregon, and Idaho.

Preapplications for Federal assistance, standard form 424, must be submitted no later than October 10, 1978, to serve the four new States. Grant applications from potential grantees seeking to serve migrant and seasonal farmworkers in jurisdictions subject to competition must be submitted no later than November 1, 1978. Funding requests will be prepared in accordance with CFR, January 7, 1977, sections 97-212 through 97-218.

GRANTEES TO BE EXTENDED WITHOUT COMPETITION

Noncompetitive grantees will be extended by the major modification process for the period January 1, 1979, through September 30, 1979. Modifications for existing section 303 grants for continuing grantees must be submitted no later than October 23, 1978. These grantees, by State, are listed below:

ARIZONA

Migrant Opportunity Programs, Phoenix, Ariz.

ARKANSAS

Arkansas Council for Farmworkers, Inc., Little Rock, Ark.

CALIFORNIA

Center for Employment Training of the Central Coast Counties, San Jose, Calif.
Proteus Adult Training, Inc., Visalia, Calif.
Campesinos Unidos, Brawley, Calif.
California Human Development Corp., Santa Rosa, Calif.
Central Coast Counties Development Corp., Aptos, Calif.
City of Stockton, Stockton, Calif.

List of Requests

OFFICE OF MANAGEMENT AND BUDGET

CLEARANCE OF REPORTS

The following is a list of requests for clearance of reports intended for use in collecting information from the public received by the Office of Management and Budget on September 29, 1978 (44 U.S.C. 3509). The purpose of publishing this list in the FEDERAL REGISTER is to inform the public.

The list includes the title of each request received; the name of the agency sponsoring the proposed collection of information; the agency form number(s), if applicable; the frequency with which the information is proposed to be collected; an indication of who will be the respondents to the proposed collection; the estimated number of responses; the estimated burden in reporting hours; and the name of the reviewer or reviewing division or office.

Requests for extension which appear to raise no significant issues are to be approved after brief notice thru this release.

Further information about the items on this daily list may be obtained from the clearance office, Office of Management and Budget Washington, D.C. 20503, 202-395-4529, or from the reviewer listed.

THE PRESIDENT'S COMMISSION ON COAL

HEARINGS

The President's Commission on Coal (see 43 FR 41105) will hold public hearings at the following locations and times:

OCTOBER 20, 1978

State Capitol Conference Center, 1900 Washington Street East, State Capitol Complex, Charleston, W. Va.

OCTOBER 26, 1978

Main Auditorium, University of Denver College of Law, 200 West 14th Avenue, Denver, Colo.

These hearings are the first of several which will be held around the country to assure that the views of the public are heard and considered by the Commission in its study.

The Commission was created to conduct a comprehensive review of the state of the coal industry in the United States with particular emphasis on matters pertaining to productivity, capital investment, and the general economic health of industry; collective bargaining, grievance procedures, and such other aspects of labor-management relations as the Commission deems appropriate; health, safety, and living conditions in the Nation's coal fields; the development and application of new technologies to the industry; the impact on the coal industry of Federal regulations and such other matters as the Commission deems appropriate.

Both the Charleston and Denver sessions will begin at 9 a.m. and continue, with a lunch break, until approximately 5 p.m. The Commission will also accept written statements for a period of 30 days following the hearing from anyone unable to appear in person.

Anyone wishing to testify at either hearing, or to submit a written statement, should contact Mr. James Childress, President's Commission on Coal, Box 1424, Washington, D.C. 20013, or call 202-673-7925.

Dated: October 3, 1978.

MICHAEL S. KOLEDA,
Executive Director, President's Commission on Coal.

[8010-01]

SECURITIES AND EXCHANGE COMMISSION

[(File No. SR-BSECC-78-2) Rel. No. 15192]

BOSTON STOCK EXCHANGE CLEARING CORP.

Order of Summary Abrogation

SEPTEMBER 26, 1978.

Notice is hereby given that the Securities and Exchange Commission has issued an order, pursuant to section 19(b)(3)(C) of the Securities Exchange Act of 1934 (the "Act") (15 U.S.C. 78s(b)(3)(C)), summarily abrogating a rule of the Boston Stock Exchange Clearing Corp. ("BSECC").

On August 30, 1978, BSECC filed with the Commission a rule change (the "Rule Change") establishing a charge on its members for the clearance and settlement of transactions effected through the Intermarket Trading System ("ITS").[1] BSECC designated the Rule Change to take effect upon filing with the Commission pursuant to section 19(b)(3)(A) of the Act (15 U.S.C. 78s(b)(3)(A)) and, on September 1, 1978, the Commission published notice of the filing and effectiveness of the Rule Change.[2] In its notice, the Commission specifically noted that section 19(b)(3)(C) of the Act provides that, within 60 days of the filing of the Rule Change, it may summarily abrogate the Rule Change if its appears that such action is necessary or appropriate in the public interest, for the protection of investors or otherwise in furtherance of the purposes of the Act.[3]

The Rule Change imposes an additional charge for the clearance and

[1] The ITS, which has been implemented by the American, Boston, Midwest, New York, Pacific, and Philadelphia Stock Exchanges in accordance with a "Plan for the Purpose of Creating and Operating an Intermarket Communications Linkage" (the "ITS Plan"), links the participating market centers and provides facilities for (i) the rapid and efficient routing of orders and administrative messages between and among participants and (ii) participation, under certain conditions, by members of all participating markets in opening transactions in these markets. The ITS Plan was filed with the Commission by the participating exchanges and, on Apr. 14, 1978, the Commission issued a temporary order, pursuant to section 11A(a)(3)(B) of the Act, authorizing the filing exchanges to act jointly in planning, developing, operating, and regulating the ITS in accordance with the terms of the ITS Plan for a period of 120 days from the date of the order (Securities Exchange Act Release No. 14661 (Apr. 14, 1978), 43 FR 17419). On Aug. 11, 1978, the Commission extended its temporary approval for an additional period of 1 year (Securities Exchange Act Release No. 15058 (Aug. 11, 1978)).

[2] Securities Exchange Act Release No. 15120 (Sept. 1, 1978), 43 FR 40968 (the "Notice").

[3] Id. at 2.

V 43 / 195

settlement of transactions effected through ITS of 2 cents per share plus 1 day's interest on the dollar value of the securities traded, based upon the interest rate charged at that time by BSECC's principal lender.[4] BSECC has indicated that the imposition of this additional fee was necessary to reimburse it for additional expenses incurred in connection with the clearance and settlement of transactions effected through ITS, primarily personnel required to reconcile and report ITS transactions and finance charges incurred in order to make payments in other cities prior to receiving payments in Boston.

As stated in the notice, an organization representing specialists on the Boston Stock Exchange has expressed opposition to the imposition of these charges. Moreover, it appears that the Rule Change raises important questions relating to the Commission's statutory responsibility to facilitate the establishment of a national market system,[5] particularly whether the imposition of these charges will act as a disincentive to the use of the ITS.[6] In addition, the Commission believes that the procedures provided by section 19(b)(2) will provide a more appropriate mechanism for determining whether the Rule Change is consistent with the provisions of the Act. Therefore, it appears to the Commission that it would be appropriate in the public interest, for the protection of investors and otherwise in furtherance of the purposes of the Act for it to abrogate the Rule Change.

* * * * *

It is hereby ordered, pursuant to section 19(b)(3)(C) of the Act, that the BSECC Rule Change (File No. BSECC-78-2) is summarily abrogated as of this date, and that, if BSECC chooses to refile the Rule Change, it do so pursuant to section 19(b)(2) of the Act.

By the Commission.

SHIRLEY E. HOLLIS,
Assistant Secretary.

[FR Doc. 78-28219 Filed 10-5-78; 8:45 am]

[4] The text of the Rule Change was published as exhibit 1 to the notice.

[5] See Sec. 11A(a)(2) of the Act.

[6] See also the ITS Plan which provides that any fee or charge imposed by a participant not be of such size or so structured as to discourage use of the ITS.

[8010-01]

[(812-4369) Rel. No. 10422]

CAPITOL LIFE INSURANCE CO. AND MERRILL LYNCH HIGH INCOME FUND, INC.

Notice of Application for an Order Approving a Certain Offer of Exchange for Exemptions

SEPTEMBER 29, 1978.

Notice is hereby given that the Capitol Life Insurnce Co. ("Capitol Life"), Capitol Life Separate Account M, 1600 Sherman Street, Denver, Colo. 80203, a Colorado stock life insurer, Capitol Life Separate Account M ("Separate Account"), a separate account of Capitol Life, which is registered as a unit investment trust under the Investment Company Act of 1940 ("Act") and Merrill Lynch High Income Fund, Inc. ("Fund"), 165 Broadway, New York, N.Y. 10080, an open end management investment company registered under the Act (hereinafter collectively referred to as "Applicants") filed an application on September 26, 1978, and an amendment thereto on September 28, 1978, pursuant to section 11 of the Act for an order approving an offer of exchange and pursuant to section 6(c) of the Act for exemption from the provisions of section 26(a) and 27(c)(2) of the Act, to the extent noted below. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein which are summarized below.

Capitol Life is a wholly owned subsidiary of Providence Capitol Corp. and an indirect subsidiary of Gulf & Western Industries, Inc.

The Separate Account was established by Capitol Life pursuant to Colorado law in connection with the proposed issuance of certain group and individual variable annuity contracts (hereinafter, collectively "Contracts"). Assets of Separate Account will be invested in shares of the Fund. The Fund is managed by Fund Asset Management, Inc., an affiliate of Merrill Lynch Funds Distributor, Inc., the distributor for the Fund.

The Fund's primary objective is to maximize current income by investing in a diversified portfolio of fixed income securities, such as corporate bonds and notes, convertible securities, preferred stocks, and government obligations which it believes will offer high yields without undue risk. As a secondary objective, the Fund intends to seek capital apreciation when consistent with its primary objective.

The Fund's shares will be offered during an initial period which is expected to end on October 27, 1978. The minimum initial and subsequent purchase amounts are $1,000 and $300 respectively. Shares are sold at net asset value plus a maximum 4-percent sales load.

Applicants propose that Fund shares may be exchanged by a shareholder who has held same for a 45-day period for a variable annuity contract issued by Capitol Life and the Separate Account. Two types of Contracts would be offered: Group single payment variable annuity contracts ("Group Contracts"), and individual single payment variable annuity contracts ("Individual Contracts"). Purchase payments for the Contracts are amounts which result from the redemption of shares of the Fund by a shareholder who has elected to purchase a Contract. The amount of the purchase payment is the net asset value of the Fund shares redeemed for the purpose of purchasing a Contract at the time the election to purchase is made. The minimum single purchase payment is required to be the value of 500 shares of the Fund. A conversion fee of $100 is deducted at the time an initial purchase payment is received for an Individual Contract or for a certificate under a Group Contract. This conversion fee is allocated, $20 for reimbursement of policy issue expense, and $80 for expected conversion expenses. That portion of the conversion fee allocated to conversion expenses may be deemed to be a sales charge pursuant to section 2(a)(35) of the Act.

An administrative charge of $20 is deducted from an individual's account on each anniversary of the date it was established. A $10 charge is made against an individual's account for each partial surrender and upon complete surrender of the account. When annuity payments begin, the value of an individual's account will be transferred to Capitol Life's general asset account in order to provide fixed annuity payments. Fixed annuity payments, once determined, may not be decreased by Capitol Life regardless of investment, mortality, or expense experience.

SECTION 11

Section 11(a) of the Act, as here pertinent, provides that it is unlawful for any registered open end investment company (or its principal underwriter) to make an offer to the holders of its securities (or of the securities of any other open end investment company), to exchange his shares for the shares of the same or another such company on any basis other than the relative net asset values of the respective securities, unless the terms of the offer have first been submitted to and approved by the Commission. Section 11(c) provides that section 11(a) is applicable, in any event, to any type of offer of exchange of the securities of registered unit investment trusts for the securities of any other investment company.

The Applicants state that such exchange as proposed would occur on the application of the individual, and that any issued certificates would be tendered to the transfer agent for this purpose. The exchange would be on the basis of the net asset values of the securities to be exchanged except for the $100 conversion charge deducted at the time of exchange.

The Applicants assert that such conversion charge is deducted as reimbursement for the cost of establishing the variable annuity account, issuing the contract, and to cover expected expenses which result from the exchange of Fund shares for the variable annuity contracts. The amounts received from the conversion fee are not used to pay sales commissions but are devoted to costs related to initial administration and conversion expenses.

SECTIONS 26(a) AND 27(c)(2)

Section 26(a) of the Act, as here pertinent, provides, in substance, that a registered unit investment trust, and any depositor and underwriter for the trust, are prohibited from selling trust certificates unless the proceeds of all payments other than sales load are deposited with a qualified bank as trustee or custodian and held under an indenture or agreement containing specified provisions. Such agreement must provide, in part, that: (i) The custodian bank shall have possession of all the property of the unit investment trust and shall segregate and hold the same in trust; (ii) the custodian bank shall not resign until either the unit investment trust has been liquidated or a successor custodian has been appointed; (iii) the custodian may collect fees from the income and, if necessary, from the corpus of the trust for services performed and for reimbursement for expenses incurred; and (iv) that no payment to the depositor or principal underwriter shall be allowed the custodian bank as an expense, except a fee, not exceeding such reasonable amounts as the Commission may prescribe, as compensation for performing bookkeeping and other administrative expenses normally performed by the custodian. Although the assets of the Separate Account are held under a safekeeping agreement with the State Street Bank & Trust Co. of Boston, Mass. ("Bank"), a bank having the qualifications described in section 26(a) of the Act, the agreement does not create a trust with respect to the assets of Separate Account because Capitol Life, as a life insurance company, must retain ownership of and control of the disposition of its property under Colorado law. Accordingly, an exemption is requested to the extent necessary, from the requirement that the assets be held in a trust.

In support of the requested exemption from the foregoing provisions of the Act, Applicants state that, under the custodian agreement, Capitol Life will pay the expenses for the safekeeping of Separate Account assets. Applicants also state that the ownership of Fund shares by Separate Account will be held in an open account so that the ownership of Fund shares by Separate Account will be indicated only on the books of the Fund and Separate Account and not evidenced by transferable stock certificates; and that, under the agreement, the assets of the Separate Account will be kept physically segregated by the Bank and held separate from the assets of any other firm, person or corporation. The Bank will maintain a record of all purchases and redemptions of Fund shares and will assist in the preparation of reports to the Commission.

Applicants further state that Capitol Life is subject to the extensive supervision and control by the Colorado insurance commissioner and the comparable official of each State in which it does business. Such supervision requires Capitol Life to file complete and detailed periodic reports. Applicants also state that the activities of Capitol Life are subject to review by the Colorado Insurance Department and its representatives at all times and are subject to comprehensive examinations periodically. Applicants allege that any substitution of an underlying Fund of the Separate Account can only take place by a majority vote of those having an interest in the Fund and with the prior approval of the Commission. Applicants finally state that Capitol Life maintains directly and through its parent, Providence Capitol, fidelity bonds covering its employees in the amount of $2 million.

Applicants contend that the foregoing laws, regulations, and arrangements will provide substantial assurance that all obligations under the Contracts issued by Separate Account will be performed.

Applicants have consented that the foregoing requested exemption may be made subject to the following conditions: (1) That the charge under the Contracts for administrative services shall not exceed such reasonable amounts as the Commission shall prescribe, jurisdiction being reserved for such purpose, and (2) that the payment of sums and charges out of the assets of Separate Account shall not be deemed to be exempted from regulation by the Commission by reason of the requested order, provided that Applicants' consent to this condition shall not be determined to be a concession to the Commission of authority to regulate the payment of sums and charges out of such assets, other than the charges for administrative services, and Applicant reserve the right in any proceeding before the Commission, or in any suit or action in any court, to assert that the Commission has no authority to regulate the payment of such other sums and charges.

Applicants assert that the $10 charge levied upon a partial or total surrender of the Contract is a transaction charge designed to reimburse actual expense incurred upon processing surrender requests but that such charge may be deemed to be a redemption fee. Accordingly, Applicants request an exemption to the extent necessary from sections 26(a) and 27(c)(2) to permit the imposition of this charge.

SECTION 6(c)

Section 6(c) of the Act provides, in part, that the Commission may conditionally or unconditionally exempt any person, security, or transaction, or any class or classes of persons, securities, or transactions from any provisions of the Act, or of any rule or regulation under the Act, if and to the extent such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Notice is further given that any interested person may, not later than October 24, 1978, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request and the issues of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicants at the address stated above. Proof of such service (by affidavit or in case of an attorney at law by certificate) shall be filed contemporaneously with the request. As provided by rule 0-5 of the rules and regulations promulgated under the Act, an order disposing of the application will be issued as of course following October 24, 1978, unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive notice of further developments in this matter, including the date of the hearing, if ordered, and any postponement thereof.

[Rel. No. 20720 (70-6163)]

CENTRAL & SOUTHWEST CORP., ET AL.

Notice of Proposed Revisions to System Money Pool Arrangement

SEPTEMBER 29, 1978.

In the matter of Central & South West Corp., Central & South West Services, Inc., 2700 One Main Place, Dallas, Tex. 75250, Central Power & Light Co., P.O. Box 2121, Corpus Christi, Tex. 78403, Southwestern Electric Power Co., P.O. Box 21106, Shreveport, La. 71156, Public Service Company of Oklahoma, P.O. Box 201, Tulsa, Okla. 74102, West Texas Utilities Co., P.O. Box 841, Abilene, Tex. 79604.

Notice is hereby given that Central & South West Corp. ("CSW"), a registered holding company, and five of its subsidiary companies, Central Power & Light Co. ("CPL"), Southwestern Electric Power Co. ("SWEPCO"), West Texas Utilities Co. ("WTU"), Public Service Company of Oklahoma ("PSO") and Central & South West Services, Inc. ("CSWS") (collectively the "subsidiaries") have filed with this Commission post-effective amendments to their application-declaration previously filed and amended in this matter pursuant to sections 6, 7, 9(a), 10, 12(b) and 12(f) of the Public Utility Holding Company Act of 1935 ("Act") and rules 43, 45 and 50 promulgated thereunder concerning the following proposed transactions. All interested persons are referred to the amended application-declaration, which is summarized below, for a complete statement of the proposed transactions.

By orders dated December 30, 1976, December 29, 1977, January 13, 1978, and June 30, 1978 (HCAR Nos. 19829, 20355, 20385 and 20608), applicants-declarants were authorized to establish a CSW System money pool ("money pool") to coordinate their short-term borrowings and to make borrowing outside the money pool from banks and through the issuance of commercial paper. The money pool is composed from time to time of funds from the following sources: (i) Surplus funds of CSW; (ii) surplus funds of any of the subsidiaries; (iii) borrowings by CSW or the subsidiaries from banks; and (iv) proceeds from CSW's sales of commercial paper. The current money pool authorization, effective through December 31, 1979, provides for an aggregate borrowing limitation of $200,000,000 and individual borrowing limitations in the following amounts: CSW, $200,000,000; CPL, $71,000,000; PSO, $74,000,000; SWEPCO, $50,000,000; WTU, $20,000,000, and CSWS, $2,000,000.

CSW administers the money pool by matching up, to the extent possible, short-term cash surpluses and loan requirements of itself and its subsidiaries. Subsidiary requests for short-term loans are met first from surplus funds of the other subsidiaries which are available to the money pool and then from CSW's corporate funds, to the extent available. When these sources of funds are insufficient to meet short-term loan requests, borrowings are made from outside the system. To that end CSW was authorized to issue and sell its commercial paper to A-G Becker & Company, Inc. ("Becker"), at a discount rate not in excess of the discount rate per annum prevailing at the time of issuance for commercial paper of comparable quality and maturity sold by issuers to commercial paper dealers, and at an interest cost not exceeding the effective cost of money for unsecured prime-rate commercial bank loans prevailing on the date of issue of such commercial paper.

CSW and its subsidiaries were also authorized, in the event that such borrowings would produce a lower effective cost of money than the issuance by CSW of its commercial paper, to borrow from banks to meet short-term borrowing needs which could not be met by the money pool. Such bank borrowings were also authorized even when the cost of such borrowings is not less than the cost of equivalent borrowings through the money pool if and only to the extent that such bank requires that the borrowings be made as a condition of maintaining the subsidiary's line of credit with the bank, subject to an aggregate limit at any one time outstanding of $10,000,000 for all such bank borrowings and of $5,000,000 for any one subsidiary.

The interest rate applicable to all loans of surplus funds through the money pool is the rate published in the Wall Street Journal for commercial paper placed directly by a major finance company and having a term most nearly equal to the term of the particular money pool loan in question. The interest rate applicable to the funds borrowed by CSW from external sources and loaned through the money pool is equal to CSW's net cost for the external borrowings.

By post-effective amendments applicants-declarants seek authorization:

(1) For CSW to issue and sell commercial paper to dealers other than Becker;

(2) To allocate costs of CSW's external borrowings upon a basis approximating the peak load requirements of the operating subsidiaries; and

(3) To borrow from banks in addition to the banks heretofore authorized.

Applicants-declarants state it has now become possible, with some although not all commercial paper dealers, to split business among several dealers. By doing so alternative quotations may be secured on particular transactions as to interest rate and/or the dealer's discount, and the paper may be sold to the dealer quoting the lowest cost of money. CSW requests authority to establish arrangements with one or more prospective dealers and to select the dealer or dealers who, in the judgment of its executive vice president and chief financial officer or its treasurer, will furnish the lowest net cost to CSW on the commercial paper it issues. Each dealer would be restricted to sales to not more than 200 institutional purchasers on a list furnished to this Commission.

Concerning the allocation of costs it is stated that in the case of compensating balances and fees paid to banks to maintain credit lines, it is not possible to allocate costs accurately as part of any particular loan, since the principal function of credit lines is to be an available credit source in addition to CSW's commercial paper. Applicants-declarants propose to allocate costs in such cases upon the basis of 10 percent to WTU, 30 percent to CPL, 30 percent to PSO and 30 percent to SWEPCO, such percentages reflecting the approximate peak load of the subsidiary to CSW's total peak load. Determination of the cost of compensating balances will be done on a monthly basis by (1) Calculating the weighted average daily cost incurred by CSW and the subsidiaries for borrowings from external sources during the month (or, if there were no such borrowings, then the most recent direct issue commercial paper rate); (2) multiplying such daily cost times the aggregate amount of compensating balances maintained on each day during the month; and (3) adding the products obtained. In the event that a borrowing is made from a source other than the lowest available cost of money pursuant to the exception referred to earlier, the cost incurred in excess of the cost of the alternative lowest cost borrowing will be deemed to be the equivalent of a compensating balance or other indirect cost, and will be distributed on the same basis proposed for such costs rather than borne entirely by the direct borrower involved. At the end of each calendar year the costs allocated on the basis of the percentages specified above will be retroactively reallocated for the year

among the subsidiaries (and CSW, should CSW borrow for its own corporate needs) pro rata on the basis of the relative weighted average principal amounts of borrowings incurred from external sources during the year for the benefit of each of such companies.

Concerning bank borrowings applicants-declarants seek authorization to borrow from the banks listed below. Borrowings would be at the prime rate in all cases except for loans from First National Bank in Dallas, Republic National Bank & Irving Trust Co., in all three cases the rate being 107 percent of prime, and except for loans from Texas Commerce Bank, the terms of which are set forth below. Assuming a prime rate of 9 percent, the interest cost (including compensating balances and fees) would be 10 percent per annum for the nonfee banks, 10.52 percent for First National Bank in Dallas and 10.47 percent for the other fee banks. Applicants-declarants' bank lines as of August 31, 1978, were as follows:

Bank	Amount of line	Compensation basis[a]
Bankers Trust Co	$25,000,000	Balances.
First National Bank of Chicago	15,000,000	Do.
First National Bank in Dallas	[b]6,500,000	Balances and fees.
Republic National Bank	[c]5,000,000	Do.
Irving Trust Co	[c]5,000,000	Do.
Bank of Delaware	4,500,000	Balances.
Harris Trust & Savings	2,000,000	Do.
First City National Bank	2,000,000	Do.
Service area banks:		
Central Power & Light Co. (24 local banks)	29,345,000	Do.
Public Service Co. of Oklahoma	9,500,000	Do.
Southwestern Electric Power Co. (37 local banks)	20,615,000	Do.
West Texas Utilities (6 local banks)	8,515,000	Do.
Total	132,975,000	

[a] Balances maintained in support of lines of credit are generally nonsegregated working funds of the applicants and are not restricted as to withdrawal. These nonsegregated balances generally aggregate approximately 10 pct. of the line of credit. Substantial usage under these lines of credit could result in increased compensating balance requirements. Where a fee basis is maintained, a designated portion of the total line of credit is supported by a fee equal on an annual basis to the principal amount of that portion × 7 pct. × the prime rate. The balance of the line of credit in these situations is maintained on the compensating balances basis described above.

[b] $4 million is supported by compensating balances and $2.5 million by fees.

[c] $2.5 million is supported by compensating balances and $2.5 million by fees.

Borrowings of up to $10,000,000 from Texas Commerce Bank would be from funds managed by its trust department, pursuant to a short-term borrowing agreement. The notes would be payable on demand or a stated maturity date not exceeding 6 months from date of issuance, would bear interest at a rate equal to the 90-day rate on General Motors Acceptance Corp.'s commercial paper, or, if CSW has outstanding commercial paper with a 90- to 180-day maturity, at the highest effective rate to the ultimate purchases of such paper.

The proceeds of short-term borrowings will be used (i) in the case of borrowings by CPL, PSO, SWEPCO, and WTU, for the interim financing of their construction programs and to provide for other temporary working capital needs; (ii) in the case of borrowings by CSW, for loans or contributions to capital to the subsidiaries for such purposes; (iii) in the case of borrowings by CSWS, to provide working capital for its operations; and (iv) to repay borrowings previously incurred for such purposes.

The estimated capital programs for 1978 and 1979 for the operating companies are as follows:

	1978	1979
CPL	$247,000,000	$216,000,000
PSO	257,000,000	251,000,000
SWEPCO	110,000,000	142,000,000
WTU	21,000,000	24,000,000

None of the proceeds from such borrowings shall be utilized to pay the cost of facilities ("interconnection facilities") which would not be needed to provide service to customers of any of the operating companies if such operating company were not part of the CSW System, nor will any expenditures be made by any of the operating companies for the construction or acquisition of any facility not so needed prior to the time all funds covered by this application-declaration have been expended. For the purposes of the foregoing representation, there is included within the meaning of the term "interconnection facilities" all facilities, construction or acquisition of which is or would be part of any proposal for synchronous interstate operation of the CSW System forming the subject of the proceedings in *Central and South West Corporation, et al.* (Admin. Proc. file No. 3-4951) which would not also be required for the continuation of dissynchronous interstate/intrastate operation in the mode presently prevailing in the Central and South West System.

CSW requests exemption from the competitive bidding requirements of rule 50 under the Act in connection with the proposed issuance of commercial paper pursuant to paragraph (a)(5)(B) thereof.

No State commission and no Federal commission, other than this Commission, has jurisdiction over the proposed transactions. The additional fees and expenses to be incurred in connection with the proposed transactions are estimated at $750.

Notice is further given that any interested person may, not later than October 24, 1978, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said application-declaration, as further amended by said posteffective amendments, which he desires to controvert or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail upon the applicants-declarants at the above-stated addresses, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date the application-declaration, as further amended by said posteffective amendments, or as it may be further amended, may be granted and permitted to become effective as provided in rule 23 of the general rules and regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[Rel. No. 20716 (70-6206)]

CENTRAL & SOUTH WEST CORP.

Notice of Proposed Issue and Sale of Unissued Common Stock Pursuant to an Employees Investment Plan and Request for Exception From Competitive Bidding

SEPTEMBER 27, 1978.

Notice is hereby given that Central & South West Corp. ("CSW"), One Main Place, Dallas, Tex. 75250, a registered holding company, has filed an application-declaration with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("Act") designating sections 6(a) and 7 of the Act and rules 20(a), 50 and 100(a) promulgated thereunder regarding the proposed transaction. All interested persons are referred to the application-declaration, which is summarized below for a complete statement of the proposed transaction.

CSW proposes to issue and sell not to exceed 1,000,000 shares of its authorized and unissued common stock par value $3.50 per share (the "additional shares") pursuant to a CSW Employees Thrift Plan (the "Plan").

The Plan provides a means by which eligible employees of CSW and its direct and indirect subsidiaries, Central Power & Light Co., Central & South West Fuels, Inc., Central & South West Services, Inc., Public Service Company of Oklahoma, Transok Pipe Line Co., Southwestern Electric Power Co. and West Texas Utilities Co. (together, "CSW Subsidiaries"), may maintain a regular savings program and to provide additional benefits for such employees upon retirement. Under the Plan, the participating employers, i.e., the CSW Subsidiaries, make contributions of cash monthly, out of net income in an amount equal to 50 percent of the basic deposit made by each employee with less than 20 years of service and 75 percent of the basic deposit for those employees with 20 years of service or more.

The Plan permits each participating employee to make monthly payments to his plan account in an amount equal to 2 percent, 4 percent or 6 percent of his annual salary, and to make additional deposits in amounts not to exceed 4 percent of his annual salary for each year of service since he became a participant in the Plan.

The deposits by participating employees and the corresponding contributions by employers are paid monthly to the trustee under the Plan, the First National Bank in Dallas, for investment.

The trustee pursuant to written direction from each participating employee invests funds held in each such employee's Plan account. Presently purchases of common stock of CSW by the trustee are made in the open market. It is herein proposed that such purchases will in the future be satisfied through the issuance and sale from time to time of the additional shares.

The purchase price at which any of the additional shares shall be sold to the Plan shall be the average of the closing prices of the common stock of CSW reported as New York Stock Exchange Composite for the 20 consecutive trading days ending with the last trading day of the month in respect of which the employer contributions and employee basic deposits being invested were made.

It is stated that the purpose of the proposed transaction is to provide CSW with an additional source of common equity capital at an economical cost.

CSW requests an exception from the competitive bidding requirements of rule 50 under the Act for the sale of the additional shares pursuant to paragraph (a)(5) of that rule.

It is stated that no State commission and no Federal commission, other than this Commission has jurisdiction over the proposed transaction. Fees and expenses to be incurred in connection with the proposed transaction are estimated at $51,500 including $38,500 in annual fees to the trustee of the Plan, and $1,000 in legal fees.

Notice is further given that any interested person may, not later than October 23, 1978, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said application-declaration which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail upon the applicant-declarant at the above-stated address and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the application-declaration, as filed or as it may be amended, may be granted and permitted to become effective as provided in rule 23 of the general rules and regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in rules 20(a) and 100 thereof or take such other actions as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

SHIRLEY E. HOLLIS,
Assistant Secretary.

[8010-01]

[(File No. SR-NASD-78-11) Rel. No. 15198]

NATIONAL ASSOCIATION OF SECURITIES DEALERS, INC.

Order Approving Proposed Rule Change

SEPTEMBER 28, 1978.

On September 15, 1978, the National Association of Securities Dealers, Inc. ("NASD") 1735 K Street NW., Washington, D.C. 20006, filed with the Commission, pursuant to section 19(b) of the Securities Exchange Act of 1934 (the "Act") and rule 19b-4 thereunder, copies of a proposal (the "Proposal") to reduce NASDAQ subscription rates for the fiscal year ending September 30, 1978, by refunding 10 percent of total billings for that fiscal year to NASDAQ subscribers. The refund will be made by NASDAQ, Inc., a wholly owned subsidiary of the NASD which owns and operates the NASDAQ system, and will be payable to NASDAQ level 1, 2, and 3 subscribers on a pro rata basis.

Notice of the Proposal, together with the terms of substance thereof, was given by publication of a Commission release (Securities Exchange Act Release No. 34-15172, September 19, 1978).

The Commission finds that the Proposal is consistent with the requirements of the Act and the applicable rules and regulations thereunder, and, in particular, the requirements of section 15A of the Act and the rules and regulations thereunder. In making that finding, the Commission has relied on the NASD's representation that it and NASDAQ, Inc. expect to have sufficient assets, independent of the amount included in the refund, to meet reasonably foreseeable expenses in connection with possible modifications or expansion of the NASDAQ system and fulfillment of self-regulatory obligations (including those relating to surveillance). Further, the Commission finds good cause for approving the Proposal prior to the 30th day after publication of notice of filing thereof. According to the NASD, unless all events necessary to establish the refund are accomplished prior to fiscal year end, September 30, 1978, there is a potential tax liability of up to 48 percent of the funds to be utilized for the refund should NASDAQ, Inc., be determined to be a taxable company.

It is therefore ordered, pursuant to section 19(b)(2) of the Act, that the Proposal be, and it hereby is, approved.

By the Commission.

SHIRLEY E. HOLLIS,
Assistant Secretary.

[FR Doc. 78-28223 Filed 10-5-78; 8:45 am]

[8010-01]

[(SR-NYSE-78-20) Rel. No. 15202]

NEW YORK STOCK EXCHANGE, INC.

Order Approving Proposed Rule Change

SEPTEMBER 29, 1978.

On April 23, 1978, the New York Stock Exchange, Inc. ("NYSE") 11 Wall Street, New York, N.Y. 10005, filed with the Commission, pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1) (the "Act") and rule 19b-4 thereunder, copies of a proposed rule change (the "Proposal") to amend NYSE rule 345.15 to (a) allow registered representatives whose activities are limited solely to the solicitation of the sale or purchase of investment company securities and variable contracts, real estate securities, and direct participation programs to meet the NYSE's qualification standards by fulfilling specialized training and examination requirements either of the NYSE, or other self-regulatory organizations whose requirements are acceptable to the NYSE, and (b) to enable the NYSE to create specialized training and examination requirements for registered representative candidates engaged in limited activities other than those enumerated above. Notice of the Proposal together with its terms of substance was given by publication of a Commission release (Securities Exchange Act Release No. 14689, April 20, 1978) and by publication in the FEDERAL REGISTER (43 FR 19089, May 3, 1978).

On July 24, 1978, the NYSE submitted an amendment (the "Amendment") to the Proposal. The Amendment deleted paragraph 345.15(3) of the Proposal. That paragraph was the portion of the Proposal which would have enabled the NYSE to create specialized training and examination requirements for registered representative candidates engaged in limited activities other than the solicitation of the sale or purchase of investment company securities and variable contracts, real estate securities, and direct participation programs.

Notice of the Proposal, as amended (the "Amended Proposal") together with its terms of substance was given by publication of a Commission release (Securities Exchange Act Release No. 15072, August 16, 1978) and by publication in the FEDERAL REGISTER (43 FR 37506, August 23, 1978). All written statements with respect to the Proposal or the Amended Proposal which were filed with the Commission and all written communications relating to the Proposal or the Amended Proposal between the Commission and any person were considered and (with the exception of those statements or communications which may be withheld from the public in accordance with the provisions of 5 U.S.C. § 552) were made available to the public at the Commission's Public Reference Room.

The Commission finds that the Amended Proposal is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and in particular, the requirements of section 6 and the rules and regulations thereunder.

It is therefore ordered, pursuant to section 19(b)(2) of the Act, that the above-mentioned proposed rule change be, and it hereby is, approved.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[Rel. No. 34-15194]

FAIR TREATMENT OF CUSTOMER ACCOUNTS

Notice to Broker Dealers

The Securities and Exchange Commission today expressed concern about certain practices engaged in by broker-dealers. During recent months the Commission has received investor complaints regarding:

(a) Issuance to customers of checks drawn on distant banks, a practice referred to as "remote checking";

(b) Retention of interest and dividend payments rather than disbursing such payments to customers promptly upon receipt, without affording customers adequate prior notice and a reasonable opportunity to elect either immediate or deferred payment;

(c) Imposition of increased commission rates without adequate prior notice;

(d) Imposition of custodial fees on "inactive" customer accounts without adequate prior notice; and

(e) Failure to transfer customer accounts promptly to another broker-dealer in response to customer requests.

REMOTE CHECKING

Many investors have complained that they are being deprived of the prompt use of their funds by a device currently being used by some broker-dealers. That practice, commonly referred to as "remote checking," involves the issuance of checks drawn on banks located far away from customers in order to delay clearance of those checks and thereby to prolong a broker-dealer's use of its customers' funds. For example, some brokerage firms have implemented a policy of paying customers located east of the Mississippi River with checks drawn on west coast banks and paying customers located west of the Mississippi with checks drawn on east coast banks. In fact, certain broker-dealers have acknowledged that they have engaged in this practice specifically to prolong the firms' use of customers' funds.

The selection of a distant bank for the purpose of prolonging a broker-dealer's use of customer funds unfairly deprives customers of their immediate use of funds, is inconsistent with a broker-dealer's obligation to deal fairly with its customers[1] and is inconsistent with just and equitable principles of trade.[2] Such a purpose may be inferred from the circumstances surrounding the selection of a distant bank and is particularly evident in cases where a broker-dealer arranges its use of two or more disbursing banks with a view to paying customers in a particular region from a bank in a distant location.[3]

RETENTION OF INTEREST AND DIVIDEND PAYMENTS

It has been reported to the Commission that customers of several broker-dealers have experienced prolonged delays in receiving dividend and interest payments on securities held for them by broker-dealers. In particular, it appears that some broker-dealers have recently instituted the practice

[2] See, e.g., art. III, sec. 1 of the National Association of Securities Dealers, Inc. bylaws, NASD Manual (CCH) par. 2151; art. XIV, sec. 8 of the New York Stock Exchange constitution, 2 New York Stock Exchange, Inc. Guide (CCH) par. 1656.

[3] The Commission recognizes, however, that it may be a desirable business practice for broker-dealers to limit the number of banks used for disbursing funds to customers, or indeed to use only a single bank for that purpose, so long as customers are not deprived of reasonably prompt access to their funds. As a result, some brokerage firm customers will be paid with checks drawn on out-of-State banks.

V 43 / 195

of disbursing dividend and interest payments monthly rather than promptly upon receipt of the funds, and have done so without notifying their customers in advance or offering them the alternative of immediate payment. While the Commission recognizes that some customers, if adequately informed, may decide to receive payments on a monthly basis, it believes that dividend and interest payments should not be deferred unless the customer has been so informed sufficiently in advance and has been given a reasonable opportunity to elect either immediate or deferred payment. Indeed, the imposition of a system of deferred payments without informed and timely notice is inconsistent with a broker-dealer's obligation to deal fairly with its customers and is inconsistent with just and equitable principles of trade.

IMPOSITION OF INCREASED COMMISSION RATES WITHOUT PRIOR NOTICE

One of the most common investor complaints since the abolition of fixed commission rates has been that broker-dealers raise their commission rates without adequate prior notice. In some egregious cases, investors have been charged commissions exceeding those quoted at the time they placed their orders. That practice is inconsistent with a broker-dealer's obligation to deal fairly with its customers and is inconsistent with its responsibilities under the Federal securities laws. In other cases, customers have placed orders with broker-dealers with which they have recently done business and have not been notified of commission rate increases until the transactions were confirmed. In those situations, the customer's reasonable expectations with respect to the commission rates to be charged based on his prior dealings with the broker-dealer have not been fulfilled. The imposition of an increased rate in that fashion is inappropriate and, the Commission believes, is inconsistent with a broker-dealer's duty to deal fairly with its customers and inconsistent with just and equitable principles of trade.

IMPOSITION OF CUSTODIAL FEES ON CUSTOMER ACCOUNTS WITHOUT PRIOR NOTICE

It has also been reported to the Commission that a number of broker-dealers have recently imposed charges for custodial services on inactive accounts without giving adequate advance notice to enable customers to consider closing or transferring their accounts. The Commission believes that this practice is also inconsistent with a broker-dealer's obligation to deal fairly with its customers and inconsistent with just and equitable principles of trade.

DELAY IN TRANSFERRING ACCOUNTS

Finally, a number of investors have complained that, when they attempt to transfer their accounts from one broker-dealer to another, the broker-dealer who has the account does not transfer it promptly. Those investors have encountered unusual delays, frequently accompanied by attempts to persuade them to allow their accounts to remain with the first broker-dealer. During such delays, customers may experience difficulty in liquidating securities positions held in those accounts unless the transactions are effected through the broker-dealers retaining the accounts.

The Commission recognizes that unusual circumstances may necessitate some delay in transferring a customer's account. Where such circumstances do exist, they should, of course, always be explained to the customer. Where unusual circumstances are not present, however, such delays are improper and are inconsistent with a broker-dealer's obligation to deal fairly with its customers and inconsistent with just and equitable principles of trade.

* * * * *

The Commission is particularly disturbed to discover that many of the practices described above appear not to be isolated occurrences, but instead to reflect established policies and practices of several of the Nation's leading broker-dealers. The Commission believes that action to correct these abuses is overdue and should be undertaken promptly by broker-dealers and self-regulatory organizations. In addition to violating standards of fair dealing, and the rules of various self-regulatory organizations requiring members to refrain from conduct that is inconsistent with just and equitable principles of trade, some instances of the practices described above appear to violate the antifraud provisions of the Federal securities laws. Customers of broker-dealers who believe they have been victims of these practices should write to the Office of Consumers Affairs, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549. Brokers and dealers should be fully aware that the Commission will take prompt enforcement action against individual firms and persons if such action is warranted.

By the Commission.

GEORGE A. FITZSIMMONS,
Secretary.

SEPTEMBER 28, 1978.

[8010-01]

[Release No. 34-15200; File No. SR-CBOE-78-27]

CHICAGO BOARD OPTIONS EXCHANGE, INC.

Self-Regulatory Organizations; Proposed Rule Change

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1) as amended by Pub. L. No. 94-29, 16 (June 4, 1975), notice is hereby given that on September 11, 1978, the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

STATEMENT OF THE TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGE

PROCEDURE FOR ARBITRATION PROCEEDINGS

Rule 18.2(a)-(f) (no change).

INTERPRETATIONS AND POLICIES

.01 (No change.)

.02 The Submission Agreements, Statement of Claim, Answer and related counter claim or third party claim shall be forwarded by the Secretary to the Arbitration Committee which shall determine to accept or reject such filings for arbitration. If jurisdiction is not so declined, the Arbitration Committee shall assign the matter to a panel of arbitrators selected in accordance with rule 18.3.

PURPOSE OF PROPOSED RULE CHANGE

The proposed interpretation to rule 18.2 would allow for the Arbitration Committee to continue its policy of reserving discretion to deny jurisdiction over a proceeding submitted to them in the event any such submission would not be a proper matter to come before the committee. As a result of making recent amendments to this chapter, this policy of the Arbitration Committee was inadvertently omitted.

BASIS UNDER THE ACT FOR PROPOSED RULE CHANGE

The basis under the Act for the proposed interpretation is section 6(b)(5) in that the exchange believes the proposed interpretation will enhance its ability to protect investors and the public interest and provide a fair procedure for the hearing of arbitration matters between members and the public.

COMMENTS RECEIVED FROM MEMBERS, PARTICIPANTS, OR OTHERS ON PROPOSED RULE CHANGE

No comments were solicited or received on the proposed rule change.

BURDEN ON COMPETITION

The exchange does not believe that the proposed rules change will impose any burden on competition.

The foregoing rule change has become effective, pursuant to section 19(b)(3) of the Securities Exchange Act of 1934. At any time within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Securities Exchange Act of 1934.

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons desiring to make written submissions should file 6 copies thereof with the Secretary of the Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and all written submission will be available for inspection and copying in the Public Reference Room, 1100 L Street NW., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted October 27, 1978.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

SEPTEMBER 29, 1978.

MIDWEST STOCK EXCHANGE, INC.

Self-Regulatory Organizations; Proposed Rule Change

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. No. 94-29, 16 (June 4, 1975), notice is hereby given that on September 5, 1978, the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

STATEMENT OF THE TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGE

Brackets ([]) indicate deletions; *Italics* indicate new material

ARTICLE VIII

Arbitration of Small Claims

Rule 23. (a) Any dispute, claim or controversy, arising between a public customer(s) and a registered person, member, principal partner, principal stockholder, officer, director or member organization, involving a dollar amount not exceeding $2500.00, exclusive of attendant costs and interest, may upon demand of the customer(s) or by written consent of the parties be arbitrated as hereinafter provided.

(b) The claimant shall file with the Director of Arbitration one (1) executed Submission Agreement and one (1) copy of the Statement of Claim of the controversy in dispute, together with documents in support of the claim. The Statement of Claim shall specify the relevant facts, the remedies sought and whether or not a hearing is requested.

(c) The Claimant shall pay the sum of $15.00 upon filing of the Submission Agreement. The final disposition of this sum shall be determined by the arbitrator.

(d) The Director of Arbitration shall endeavor to serve promptly by mail or otherwise on the Respondent(s) one (1) copy of the Submission Agreement and one (1) copy of the Statement of Claim. The Respondent(s) shall within twenty (20) calendar days from receipt of service file with the Director of Arbitration one (1) executed Submission Agreement and one (1) copy of the Respondent's answer, together with supporting documents. The Answer shall designate all available defenses to the Claim and may set forth any related Counterclaim and/or related Third Party Claim the Respondent(s) may have against the Claimant or any other person. A related Counterclaim is defined as related to a customer's account or accounts with an Exchange member organization. If the Respondent(s) has interposed a Third Party Claim, the Director of Arbitration shall endeavor to serve promptly by mail or otherwise a copy of same together with a copy of the Submission Agreement on such Third Party who shall respond in the manner herein provided for response to the Claim. If the Respondent(s) files a related Counterclaim exceeding $2500.00, the arbitrator may refer the Claim, Counterclaim and/or Third Party Claim, if any, to a panel of three (3) or five (5) arbitrators or, he may dismiss the Counterclaim and/or Third Party Claim without prejudice to the Counterclaimant(s) and/or Third Party Claimant(s) pursuing the Counterclaim and/or Third Party Claim in a separate proceeding. The costs to the Claimant under either proceeding shall in no event exceed $15.00.

(e) The Director of Arbitration shall endeavor to serve promptly by mail or otherwise on the Claimant a copy of the Answer, Counterclaim, Third Party Claim or other responsive pleading, if any. The Claimant shall within ten (10) calendar days file a Reply to any Counterclaim with the Director of Arbitration who will serve a copy of the Reply on the Respondent(s). In his discretion, the arbitrator may, at the request of any party, permit such party to submit additional documentation relating to the pleadings.

(f) The dispute, claim or controversy shall be submitted to a single arbitrator knowledgeable in the securities industry selected by the Director of Arbitration. Unless the public customer demands or consents to a hearing, or the arbitrator(s) calls a hearing, the arbitrator shall decide the dispute, claim or controversy solely upon the pleadings and evidence filed by the parties. If a hearing is necessary, such hearing shall be held as soon as practicable at a locale selected by the Director of Arbitration.

(g) The Director of Arbitration may grant extensions of time to file any pleading upon a showing of good cause.

(h) The arbitrator shall be authorized to require the submission of further documentary evidence as he in his sole discretion deems advisable.

(i) The arbitrator may, in his sole discretion, request that the Director of Arbitration appoint two (2) additional arbitrators so that the matter in controversy will be decided by three (3) arbitrators.

(j) In any case where there is more than one (1) Arbitrator, the majority will be public arbitrators.

STATEMENTS OF BASIS AND PURPOSE

The basis and purpose of the foregoing proposed rule change is as follows:

PURPOSE OF PROPOSED RULE CHANGE

The proposed rule change was drafted by the Securities Industry Conference on Arbitration in answer to an SEC directive to the securities industry to establish a uniform system for the resolution of customers' small claims against brokers.

BASIS UNDER THE ACT FOR PROPOSED RULE CHANGE

The proposed rule change seeks to remove impediments to the establishment of a national market system and seeks to protect the public investors by creating a uniform rule for the resolution of customer disputes involving small claims.

[8010-01]

[Release No. 34-15199; File No. SR-PSD-78-4]

PACIFIC SECURITIES DEPOSITORY TRUST CO.

Self-Regulatory Organization; Proposed Rule Change

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. No. 94-29, 16 (June 4, 1975), notice is hereby given that on August 11, 1978, the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

STATEMENT OF THE TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGE

The proposed rule change, as amended, involves the implementation of a third party delivery service in the interface between Pacific Securities Depository Trust Co. ("PSDTC") and the Depository Trust Co. ("DTC").

STATEMENT OF BASIS AND PURPOSE

The basis and purpose of the foregoing proposed rule change are as follows:

The purpose of the proposed rule change is to implement a third party delivery service in the interface between PSDTC and DTC. This third party delivery service permits any participant in one depository to deliver securities to, or receive securities from, any participant in the other depository free (without money settlement) or for payment. Previously, only a participant affiliated with both depositories could use the interface and then only to move positions between its accounts in PSDTC and DTC.

The proposed rule change would carry out the purposes of section 17A of the Securities Exchange Act of 1934 by facilitating the prompt and accurate clearance and settlement of securities transactions for which PSDTC is responsible in that the proposed rule change eliminates the need for dual participants in PSDTC and DTC to initiate multiple book-entry movements with attendant charges to effect interdepository movements and the proposed rule change enables sole participants of one depository to effect book-entry deliveries to sole participants of the other depository, which would otherwise necessitate physical deliveries by intercity securities shipments.

PSDTC announced in its newsletter of November 1976 and March 1977 the progress of the interface with DTC. The final stage, full interface capability, including third party delivery service was announced to all participants by PSDTC member information notice attached as exhibit 2 to PSDTC's filing on form 19b-4A, file No. SR-PSD-78-1.

PSDTC perceives no burden on competition by reason of the proposed rule change.

Within 35 days of the date of publication of this notice in the FEDERAL REGISTER, or within such longer period: (i) As the Commission may designate up to 90 days of such date if it finds such longer periods to be appropriate and publishes its reasons for so finding, or (ii) as to which the above-mentioned self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons desiring to make written submissions should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549.

Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the Public Reference room, 1100 L Street NW., Washington, D.C. Copies of such filing will also be available for inspection and copying at the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted by October 27, 1978.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

DEPARTMENT OF STATE

[Public Notice CM-8/114]

ADVISORY COMMITTEE ON THE LAW OF THE SEA

Meeting

In accordance with section 10(d) of the Federal Advisory Committee Act (Pub. L. 92-463) as amended by Pub. L. 94-409 section 5(c), notice is hereby given that the Advisory Committee on the Law of the Sea will meet in closed sessions on Monday, October 30, and in both open and closed sessions on Tuesday, October 31, 1978. The open session of the meeting will convene Tuesday at 2:30 p.m., in the Loy Henderson Conference Room, U.S. Department of State, 21st and C Streets NW., Washington, D.C.

The purpose of the closed meeting is to discuss specific conference issues and formal planning and policy preparations for the U.S. Delegation to the Eighth Session of the Third United Nations Conference on the Law of the Sea to be held in Geneva beginning March 19, 1979. During these closed sessions, documents classified under the provisions of Executive Order 11652 will be discussed.

These documents relate to the issues which the United States will be negotiating at the Conference. The documents are exempt under 5 U.S.C. 552(b)(1), and are required to be withheld from disclosure in the public interest.

The issues cover such subjects as freedom of navigation on the high seas and in international straits, national security interests, the nature of a deep seabeds mining regime and proposed deep seabed mining legislation, the breadth of the continental margin, the juridical status of the economic zone, fisheries, vessel source pollution, scientific research, dispute settlement, and other related topics involving U.S. national security matters. Premature disclosure of the contents of these documents could adversely affect our foreign relations interests and jeopardize the chances of obtaining a timely and satisfactory Law of the Sea Treaty.

The open session of the Advisory Committee meeting will discuss all principal agenda issues to be considered during the Third United Nations Conference on the Law of the Sea, including those issues stated above, but will not examine the classified items discussed during the closed session.

The Advisory Committee on the Law of the Sea represents a broad cross-section of industries, professions, academic disciplines, and other public groups. As such, it will comprehensively review the proposals which will come before the Conference.

At the open session, beginning at 2:30 p.m., October 31, the general public attending may participate in the discussion subject to instructions of the Chairman.

As entrance to the State Department is controlled, members of the public who wish to attend the open session should contact Mr. Thomas Okada by October 24 and provide their name and affiliation to facilitate their attendance. Mr. Okada's telephone number is (area code 202) 632-9616.

ALAN BERLIND,
Director, Office of the Law of the Sea Negotiations.

[4710-02]

Agency for International Development

ZAMBIA

Determination and Waiver Pursuant to Section 533(c)(2) of the Foreign Assistance Act of 1961, as Amended

The Agency for International Development has proposed a grant to Africare in the amount of $1 million. The primary purpose of the grant is to undertake a program of assistance to civilian refugees in the northern Zambian settlement of Meheba. The program is designed to assist the refugees in becoming agriculturally self-sufficient; to provide for more of their basic needs through sale of surplus farm products; and to assist in developing a local capability to sustain improved environmental health conditions and improved health care delivery. An Africare representative stationed in Lusaka will provide liaison with the Government of Zambia and will place major emphasis on developing additional refugee assistance activities.

These refugees at Meheba are mainly civilian Angolans who have settled in the northwestern province. They are quite apart from refugees who enter Zambia to join liberation movements who go to camps in the southern part of the country. The latter group is the Ministry of Defense's responsibility. The civilians are the responsibility of the Ministry of Home Affairs (the Commissioner for Refugees).

Funding for the proposed grant will be drawn from the southern African special requirements funds (FAA section 533).

FAA section 533(c)(2) prohibits utilization of southern African special requirements funds for Zambia unless it is determined that such assistance would further foreign policy interests of the United States.

Zambia occupies a key geographic and policital position in southern Africa. The number of refugees entering Zambia has increased dramatically as a result of turbulence in neighboring states. Considerable emphasis has been placed in the education of thousands of civilian school-age children. However, the Government of Zambia cannot sufficiently meet the financial demands of much needed classroom extensions, additional teachers, and housing.

U.S. foreign policy in southern Africa is to support self-determination, majority rule, equal rights, and human dignity for all people of the region. It is U.S. policy to assist the region in establishing foundations for economic and social growth and political stability.

The Government of Zambia's educational and self-help objectives for its civilian refugees is extremely important in contributing to the economic and social stability of southern Africa. These objectives reflect basic concerns and objectives of the United States.

The proposed grant to Africare will have a direct bearing on helping the Zambian Government meet its goals of providing education for refugee children and helping the refugees to become agriculturally self-sufficient and to maintain better health conditions.

Pursuant to the authority set forth in section 533(c)(2) of the Foreign Assistance Act of 1961, as amended, and delegated to me by Executive Order 10973 and Department of State delegation of authority 104, and for the reasons stated above, I hereby determine that it would further the foreign policy interests of the United States to provide assistance to Zambia from the southern African special requirements funds and hereby waive the prohibition set forth in the above cited provision of law with respect to Zambia.

This determination and waiver shall be reported to the Congress and shall be published in the FEDERAL REGISTER.

Dated: September 22, 1978.

JOHN J. GILLIGAN,
Administrator.

[7035-01]

INTERSTATE COMMERCE COMMISSION

[I.C.C. Order No. 73, under Revised Service Order No. 1252]

ALTON & SOUTHERN RAILWAY CO., ET AL.

Rerouting Traffic

In the matter of the Alton & Southern Railway Co., Burlington Northern Inc., the Baltimore and Ohio Railroad Co., Chicago & North Western Transportation, Co., Chicago, Rock Island & Pacific Railroad Co., Consolidated Rail Corp., Illinois Central Gulf Railroad Co., Illinois Terminal Railroad Co., Louisville & Nashville Railroad Co., Manufacturers Railway Co., Missouri-Kansas-Texas Railroad Co., Missouri Pacific Railroad Co., Norfolk & Western Railway Co., St. Louis-San Francisco Railway Co., St. Louis Southwestern Railway Co., Southern Railway Co., Terminal Railroad Association of St. Louis.

In the opinion of Joel E. Burns, agent, the Terminal Railroad Association of St. Louis is unable to transport traffic over its lines because of a strike of certain of its employees.

It is ordered, That

(a) The Terminal Railroad Association of St. Louis being unable to transport traffic over its line because of a strike of certain of its employees, that line and its connections, are hereby authorized to reroute or divert such traffic via any available route. Traffic necessarily diverted by authority of this order shall be rerouted so as to preserve as nearly as possible the participation and revenues of other carriers provided in the original routing.

(b) *Concurrence of receiving roads to be obtained.* The railroad desiring to divert or reroute traffic under this order shall receive the concurrence of other railroads to which such traffic is

V 43 / 195

to be diverted or rerouted, before the rerouting or diversion is ordered.

(c) *Notification to shippers.* Each carrier rerouting cars in accordance with this order shall notify each shipper at the time each car is rerouted or diverted and shall furnish to such shipper the new routing provided under this order.

(d) Inasmuch as the diversion or rerouting of traffic is deemed to be due to carrier disability, the rates applicable to traffic diverted or rerouted by said agent shall be the rates which were applicable at the time of shipment on the shipments as originally routed.

(e) In executing the directions of this Commission and of such agent provided for in this order, the common carriers involved shall proceed even though no contracts, agreements, or arrangements now exist between them with reference to the divisions of the rates of transportation applicable to said traffic. Divisions shall be, during the time this order remains in force, those voluntarily agreed upon by and between said carriers; or upon failure of the carriers to so agree, said divisions shall be those hereafter fixed by the Commission in accordance with pertinent authority conferred upon it by the Interstate Commerce Act.

(f) *Effective date.* This order shall become effective at 10:30 a.m., September 22, 1978.

(g) *Expiration date.* This order shall expire at 11:59 p.m., September 30, 1978, unless otherwise modified, changed, or suspended.

This order shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads, subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association. A copy of this order shall be filed with the Director, Office of the Federal Register.

Issued at Washington, D.C., September 22, 1978.

INTERSTATE COMMERCE COMMISSION,
JOEL E. BURNS,
Agent.

[7035-01]

[Rev. S.O. 1252, I.C.C. Order No. 75]

ATCHISON, TOPEKA & SANTA FE RAILWAY CO. AND FERROCARRIL DE CHIHUAHUA AL PACIFICO, S.A. DE C.V.

Rerouting of Traffic

To all railroads:

In the opinion of Robert S. Turkington, Agent, The Atchison, Topeka & Santa Fe Railway Company (ATSF) and the Ferrocarril de Chihuahua al Pacifico, S.A. de C.V. (CHP) are unable to interchange traffic routed via Presidio, Tex., and Ojinago, Chihuahua, Mex., because of damage to the bridge connecting these points.

It is ordered, That

(a) *Rerouting traffic.* The ATSF and the CHP, being unable to interchange traffic routed via Presidio, Tex., and Ojinago, Chihuahua, Mex., because of the damage to the bridge connecting these points, are authorized to reroute or divert such traffic over any available route to expedite the movement, regardless of the routing designated on the waybill. The billing covering all such cars rerouted or diverted shall carry a reference to this order as authority for the rerouting. Traffic necessarily diverted by authority of this order shall be rerouted so as to preserve as nearly as posssible the participation and revenues of other carriers provided in the original routing.

(b) *Concurrence of receiving roads to be obtained.* The railroad desiring to divert or reroute traffic under this order shall receive the concurrence of other railroads to which such traffic is to be diverted or rerouted, before the rerouting or diversion is ordered.

(c) *Notification to shippers.* Each carrier rerouting cars in accordance with this order shall notify each shipper at the time each car is rerouted or diverted and shall furnish to such shipper the new routing provided under this order.

(d) Inasmuch as the diversion or rerouting of traffic is deemed to be due to carrier disability, the rates applicable to traffic diverted or rerouted by said Agent shall be the rates which were applicable at the time of shipment on the shipments as originally routed, to the extent that these rates apply to movements within the United States.

(e) In executing the directions of the Commission and of such Agent provided for in this order, the common carriers involved shall proceed even though no contracts, agreements, or arrangements now exist between them with reference to the divisions of the rates of transportation applicable to said traffic; divisions shall be, during the time this order remains in force, those voluntarily agreed upon by and between said carriers; or upon failure of the carriers to so agree, said divisions shall be those hereafter fixed by the Commission in accordance with pertinent authority conferred upon it by the Interstate Commerce Act.

(f) *Effective date.* This order shall become effective at 5 p.m., September 27, 1978.

(g) *Expiration date.* This order shall expire at 11:59 p.m., November 15, 1978, unless otherwise modified, changed, or suspended.

This order shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association. A copy of this order shall be filed with the Director, Office of the Federal Register.

Issued at Washington, D.C., September 27, 1978.

[Rev. S.O. 1332, Exception No. 5 under Section (a), Paragraph (1), Part (v)]

BURLINGTON NORTHERN INC.

Exception

Decided: September 22, 1978.

By the Board:

The Western Pacific Railroad Co. (WP) has purchased one-hundred (100) new boxcars which will be delivered to Burlington Northern Inc. (BN), at Portland, Oreg., for movement to the WP. WP has allowed BN to load these cars on the west coast for movement to the WP. Reduced loadings of these cars on the BN to destinations a s directed by WP means the BN will hold some of the cars beyond the 60 hours permitted in section (a)(2)(ii) of this order prior to placing of cars for loading.

Order. Pursuant to the authority vested in the Railroad Service Board by section (a)(1)(v) of Revised Service Order No. 1332, Burlington Northern Inc., is authorized to assemble and hold up to one-hundred (100) new Western Pacific Railroad Co. (WP) boxcars for loading as directed by WP, regardless of the provisions of section (a)(2)(ii) of this order.

These cars shall become fully subject to all provisions of Revised Service Order No. 1332 when loading is completed and instructions for forwarding are received from the shipper.

Effective: September 22, 1978.

Expires: October 31, 1978.

JOEL E. BURNS,
Chairman,
Railroad Service Board.

[7035-01]

[Revised S.O. 1252, Rev. I.C.C. Order 65, Amdt. No. 5]

CP RAIL AND DETROIT, TOLEDO & IRONTON RAILROAD CO.

Rerouting of Traffic

To All Railroads:

Upon further consideration of Revised I.C.C. Order No. 65 (CP Rail and Detroit, Toledo & Ironton Railroad Co.), and good cause appearing therefor:

It is ordered, That

Revised I.C.C. Order No. 65 is amended by substitutng the following paragraph (g) for paragraph (g) thereof:

(g) *Expiration date.* This order shall expire at 11:59 p.m., October 15, 1978, unless otherwise modified, changed or suspended.

Effective date. This amendment shall become effective at 11:59 p.m., September 30, 1978.

This amendment shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association. A copy of the amendment shall be filed with the Director, Office of the FEDERAL REGISTER.

Issued at Washington, D.C., September 28, 1978.

INTERSTATE COMMERCE COMMISSION,
ROBERT S. TURKINGTON,
Agent.

[7035-01]

[Second Rev. S.O. 1332; exception No. 1 under Section (a), Paragraph (1), Part (v)]

CAR SERVICE RULES

Exception

Decided: September 29, 1978.

To all railroads:

By the board.

the following exceptions to Revised Service Order No. 1332, issued to various railoads, are adopted in their entireties as exceptions to Second Revised Service Order No. 1332.

Exception No. 3 issued September 11, 1978.
Exception No. 4 issued September 20, 1978.
Exception No. 5 issued September 22, 1978.
Exception No. 6 issued September 27, 1978.
Exception No. 7 issued September 27, 1978.

Exceptions not listed above are no longer in effect.

Authority Section (a), Paragraph (1), Part (v) of Second Revised Service Order No. 1332.

Effective: September 30, 1978.

Expires: November 30, 1978.

ROBERT S. TURKINGTON,
Acting, Chairman,
Railroad Service Board.

[FR Doc. 78-28298 Filed 10-5-78; 8:45 am]

[7035-01]

[Rev. S.O. 1332; Exception No. 6 Under Section (a), Paragraph (1), Part (v)]

CAR SERVICE RULES

Exception

Decided: September 27, 1978.

To: Chicago, Milwaukee, St. Paul & Pacific Railroad Co.

By the Board.

The Western Pacific Railroad Co. (WP) has purchased one-hundred (100) new boxcars which will be delivered to Chicago, Milwaukee, St. Paul & Pacific Railroad Co. (MILW) at Portland, Oreg., for movement to the WP. WP has allowed MILW to load these cars on the west coast for movement to the WP. Reduced loadings of these cars on the MILW to destinations as directed by WP means the MILW will hold some of the cars beyond the 60 hours permitted in section (a)(2)(ii) of this order prior to placing of cars for loading.

Order. Pursuant to the authority vested in the Railroad Service Board by section (a)(1)(v) of Revised Service Order No. 1332, Chicago, Milwaukee, St. Paul & Pacific Railroad Co., is authorized to assemble and hold up to one-hundred (100) new Western Pacific Railroad Co. (WP) boxcars for loading as directed by WP, regardless of the provisions of section (a)(2)(ii) of this order.

These cars shall become fully subject to all provisions of Revised Service Order No. 1332 when loading is completed and instructions for forwarding are received from the shipper.

Effective: September 27, 1978.

Expires: October 31, 1978.

ROBERT S. TURKINGTON,
Acting Chairman,
Railroad Service Board.

[FR Doc. 78-28299 Filed 10-5-78; 8:45 am]

[7035-01]

[Ex Parte No. 241, Rule 19, 50th Revised Exemption No. 90]

MANDATORY CAR SERVICE RULES

Exemption

To all railroads:

It appearing, That certain of the railroads named below own numerous 50-ft. plain boxcars; that under present conditions, there are substantial surpluses of these cars on their lines; that return of these cars to the owners would result in their being stored idle; that such cars can be used by other carriers for transporting traffic offered for shipments to points remote from the car owners; and that compliance with Car Service Rules 1 and 2 prevents such use of these cars, resulting in unnecessary loss of utilization of such cars; and

It further appearing, That there are substantial shortages of 50-ft. plain boxcars throughout the country; that the carriers identified in this exemption by the symbol (%) have 150% or more of their ownership of these cars on their lines; and that such a disproportionate use of the total supply of such cars causes shippers served by other lines to be deprived of their proper share of such cars.

It is ordered, That, pursuant to the authority vested in me by Car Service rule 19, 50-ft. plain boxcars described in the Official Railway Equipment Register, ICC-RER No. 408, issued by W. J. Trezise, or successive issues thereof, as having mechanical designation "XM," and bearing reporting marks assigned to the railroads named below, shall be exempt from provisions of Car Service Rules 1, 2(a), and 2(b).

[Rev. S.O. 1332; Exception No. 7 Under Section (a), Paragraph (1), Part (v)]

CAR SERVICE RULES

Exception

Decided: September 27, 1978.

To all railroads:

By the Board.

Because of a series of work stoppages by their employees, numerous railroads are unable to move freight cars within the time limits established by Service Order No. 1332.

Order. Pursuant to the authority vested in the Railroad Service Board by Section (a)(1)(v) of Revised Service Order No. 1332, the provisions of Service Order No. 1332 are suspended at any point or points at which a work stoppage of employees occurs effective with the time such work stoppage occurs and expiring at 11:59 p.m., of the second day following the day on which the employees return to duty.

Effective: September 27, 1978.

Expires: October 6, 1978.

ROBERT S. TURKINGTON,
Acting Chairman,
Railroad Service Board.

[No. MC-126118 (Sub-No. 36), et al.]

CRETE CARRIER CORP.

Decision

In the matter of Crete Carrier Corp., Paper Products Conversion (No. MC-126118 (Sub-No. 36)), Crete Carrier Corp., Extension—Taylorville, IL, (No. MC-128375 (Sub-No. 149)), and Crete Carrier Corp., Extension—St. Francisville, LA (Lincoln, NE), (No. MC-128375 (Sub-No. 149)).

Decided: September 27, 1978.

Applicant is presently both a common and contract carrier. The title proceeding is one of five applications seeking conversion to certificates of public convenience and necessity of applicant's outstanding contract carrier authority. The other four "conversion" applications have been the subject of favorable final decisions. The title proceeding—which seeks to convert permits authorizing the transportation of paper and paper products for Western Paper Co., a division of Hammermill Paper Co.—is before us on applicant's exceptions to the Administrative Law Judge's recommended partial denial.

The embraced proceedings were filed as contract carrier applications seeking extension of authority to serve Western. They were initially processed under the modified procedure, but subsequently assigned along with the title proceeding for oral hearing to insure consistent disposition with respect to the status of the proposed operations as either contract or common carriage. The Administrative Law Judge recommended that common carrier authority be granted in these proceedings, subject to certain restrictions. No exceptions were filed in the embraced proceedings, but they will be reopened on our own motion.

The Administrative Law Judge's statement of facts, as supplemented and modified here, is correct and we adopt it as our own. We disagree with the recommended partial denial of the title proceeding and with the imposition of "for the account of" restrictions in each proceeding. We find that the public convenience and necessity require the operations proposed by applicant in each proceeding. Provision is made for publication in the FEDERAL REGISTER of the authority granted.

ORAL HEARING AND STIPULATIONS

The three proceedings were orally heard at the same time. Appearing in opposition were motor common carriers Michigan & Nebraska Transit Co., Inc., National Refrigerated Transport, Inc., and WNI, Inc. (opposing only the conversion proceeding), as well as Trans-National Truck, Inc., and Schneider Transport, Inc. (opposing both the conversion proceeding and the Sub-No. 148 application). The Sub-No. 149 application is unopposed.

By stipulation, it was agreed that (1) Schneider and affiliates derive about 60 percent of their revenue from paper and paper products traffic, (2) at least $8.5 million in revenue would be subject to diversion upon an unrestricted grant of the conversion applicaiton, (3) such diversion would "* * * so adversely affect Schneider and affiliates that it would materially diminish their ability to serve its [sic] shipping public * * *", (4) the imposition of appropriate interchange and "for the account of" restrictions was necessary adequately to protect protestants' interests, and (5) applicant expressly acknowledges that failure to impose a restriction of the type published in the Federal Register would necessitate reopening and rehearing the conversion proceeding. The restrictions referred to above were likewise proposed for the Sub-No. 148 application. Protestant Michigan & Nebraska's motion to intervene in that proceeding was granted. Documentary evidence submitted by Michigan & Nebraska was stipulated, as well.

The Administrative Law Judge recommended that the embraced applications be granted and that the conversion application be granted, in part. He recommended imposition of a "for the account of" restriction in each proceeding. The administrative Law Judge recommended denying authority to serve destinations in Alabama, Colorado, Idaho, Kentucky, Minnesota, Mississippi, Montana, Nevada, New Mexico, South Dakota, and Wyoming, reasoning that "* * * extremely limited traffic moving to such destinations over a substantial period of time * * *" rendered the authority dormant, notwithstanding shipper evidence of future need. A favorable recommendation on traffic moving from Hoquiam, WA, (except to Wyoming) was based on evidence of *Hammermill* traffic moving to that area,[1] as well as the asserted need for coloading Hammermill and Western traffic at the involved origin. No explanation is given for the recommended denial of authority to serve Kansas City, MO.

APPLICANT'S EXCEPTIONS

As the Administrative Law Judge recommended granting both embraced applications, applicant has excepted only to the recommended partial denial of the title conversion proceeding. The Administrative Law Judge assertedly erred in not according proper weight to (1) evidence establishing the substantiality of applicant's past operations for Western, (2) evidence of need for service beyond the scope of applicant's pertinent permits, (3) evidence of future need, and (4) the effect which a grant would have upon Hammermill's private carriage operations.

"FOR THE ACCOUNT OF" RESTRICTIONS

Restrictions on operating authority should generally be imposed only when consistent with the public interest and with effective and efficient regulation. *Fox-Smythe Transportation Co. Extension—Oklahoma,* 106 MCC 1, 9 (1967). Section 203(a)(14) of the Interstate Commerce Act defines the term "common carrier by motor vehicle" as "any person which holds itself out to the *general public* to engage in the transportation by motor vehicle in interstate of foreign commerce of passengers or property * * * for compensation * * *" (Emphasis supplied.) The proposed "for the account of" restrictions would preclude the rendition of service to the general public. As such, the restrictions are repugnant to the concept of common carriage and will not be imposed. Compare *North Star Transport, Inc., Extension—Lumber,* 128 MCC 803 (1978).

PUBLIC CONVENIENCE AND NECESSITY

Since we will not impose a restriction which is clearly contrary to the statutory definition of common carriage, we will determine whether the record suports a grant of common carrier authority in each proceeding.

THE CONVERSION PROCEEDING

A public need is shown for the proposed service. Western's use of applicant on traffic moving to points in Mississippi, Alabama, Minnesota, and South Dakota assertedly has increased. Applicant's traffic exhibits (7 through 12) do not substantiate this claim, but applicant asserts that these exhibits do not reflect the full extent of its operations for Western. The record establishes that applicant transported Western traffic to points in Kentucky and Montana. Representative destinations in Minnesota, Mississippi, Montana, and Kentucky are listed, as well as representative mulitple delivery shipments involving stopoffs at Mississippi, Minnesota, North Dakota, and Alabama points. Applicant's traffic abstracts establish that multiple deliveries to such points have in fact been made.

Western maintains branch "houses" where stocks are kept from which to serve customers at North Kansas City, MO (here Western maintains, as well, an office under the trade name Midwestern Paper Company), Fargo, ND, Salt Lake City, UT, and Billings, MT, among other places.

Substantial Hammermill traffic moves in private carriage from various involved origins to points in Alabama, Colorado, Kentucky, Minnesota, Mississippi, Montana, New Mexico, and South Dakota. Hammermill also has customers in Utah, Idaho, Nevada and Wyoming. Hammermill seeks to supplant its extensive private operations east of the Mississippi River with applicant's service, coloading traffic of its several divisions or filing out loads at various origins. The Administrative Law Judge appears to have accorded such evidence little weight, apparently reasoning that evidence of need for service beyond the scope of applicant's pertinent permits is irrelevant. We disagree. Conversion of permits to certificates endows the carrier with capbilities and obligations it would not possess as a contract carrier. Evidence of a present or future public need for services not performed under outstanding permits but within the scope of the conversion application is relevant to the determination of public convenience and necessity. See *Refrigerated Foods, Inc., Ext.—Conversion,* 125 MCC 887, 894-5 (1976) and *Continen-*

[1] The Administrative Law Judge notes that "virtually no" Western traffic is shown moving from Hoquiam save three shipments to Utah.

OCT 6 1978

V 43 / 195
OCT 6 1978

tal Contract Car. Corp., Conversion Applic., 129 MCC 554, 560 (1978).

The Administrative Law Judge appears, as well, to have accorded little weight to evidence of future need, reasoning that there was "no probative evidence" of such need. We again disagree. Future need for a proposed service may be established by a showing that the supporting shipper is actually soliciting business or has some definite plan upon which it can reasonably be found that the proposed service will be used in the foreseeable future. *Gibbon Extension—Liquid Petroleum Wax*, 67 MCC 252, 253 (1956). Though it must have some foundation, proof of future need will be, in the nature of things, less definite than proof of existing need. *Miller Transporters Extension—Urea*, 84 MCC 684, 687 (1961).

Shipper lists representative multiple delivery shipments. Significantly, applicant's traffic abstracts substantiate this testimony: Five of nine shipments moving to Mississippi points involved multiple stops at points in Tennessee; all shipments to Minnesota points involved multiple stops, chiefly at points in North Dakota; one shipment from Mobile, AL, to Fargo, ND, involved a stop at Lincoln, NE—the Administrative Law Judge recommended denial of authority to serve Mississippi and Minnesota points, as well as points in North Dakota from Mobile, AL. We fail to see any rational basis for denial of authority to serve contiguous States on these facts.

Michigan & Nebraska, unlike Schneider and affiliates, holds limited territorial authority which would preclude it from rendering the complete service contemplated in the proposed operation. Though some diversion of traffic may occur, we are convinced that the proposed operation will serve a useful public purpose as detailed above. Though this purpose might conceivably be served as well by Schneider and affiliates, the present record does not warrant such a finding.

THE EMBRACED PROCEEDINGS

With regard to the embraced Sub-No. 148 application, Schneider is authorized to transport paper and paper products from Taylorville, IL, to points in Iowa. By interlining with its affiliate Trans-National Truck, Inc., at Oskaloosa, IA, Schneider can serve points in Kansas (except 16 named major points) and Nebraska as well. Schneider and affiliate hold no pertinent authority to serve points in Missouri. Michigan & Nebraska holds no authority to originate the involved traffic. Protestants chief interest appears to be in protecting their operations from additional competition—not in serving Western, and, hence, the "general public." Schneider and affiliate's inability to meet Western's expressed need for multiple deliveries is apparent. Michigan & Nebraska's interests will be protected by imposition of an appropriate "originating at" restriction.

The Sub-No. 149 application is unopposed and the evidence warrants a grant of the authority sought.

Service will be authorized as set forth in the appendix. While the "for the account of" restrictions must be eliminated, each grant of authority will be subject to an appropriate restriction against interlining, as requested. Cf. *Ferree Moving and Storage, Inc., Conversion Applic.*, 110 MCC 375, 379 (1969), *Bass Transp. Co., Inc., Ext.—St. Louis, Mo.*, 125 MCC 233, 256 (1976) and *Continental, supra*, at page 562.

REPUBLICATION

Since the authority conditionally granted in this decision will not include "for the account of" restrictions, we will require republication in the FEDERAL REGISTER. Within 30 days of the date of publication of this notice any person prejudiced by this deletion may file a petition to intervene setting forth in detail the precise manner in which it has been prejudiced by deletion of the restrictions. If parties already of record wish to file additional evidence they should advise the Commission of their desire to do so within the same 30 day period. At the end of the 30 day period disposition will be made of any petitions to intervene and an appropriate decision will be entered providing for submission of additional evidence by the protestants and intervenors.

We find:

The present and future public convenience and necessity require operation by applicant, in interstate or foreign commerce, as a common carrier by motor vehicle, over irregular routes, performing the service described in the appendix. Applicant is fit, willing, and able properly to perform such service and to conform to the requirements of the Interstate Commerce Act and the Commission's regulations. Appropriate certificates should be granted, subject to the cancellation and republication conditions set forth in the appendix. This decision does not significantly affect the quality of the human environment.

It is ordered, That the proceedings in No. MC-128375 (Sub-Nos. 148 and 149) are, on our own motion, reopened for reconsideration on the present record.

By the Commission, Division 2, Commissioners Stafford, Gresham, and Christian. Commissioner Gresham dissenting to the extent that the majority requires further delay through notice and comment.

H. G. HOMME, Jr.,
Acting Secretary.

APPENDIX

AUTHORITY CONDITIONALLY GRANTED

I. No. MC-126118 (Sub-No. 36).

Paper and paper products

(1) From Erie and Lock Haven, PA, Indianapolis, IN, Oswego, NY, and points in Michigan, Ohio and Wisconsin to points in Arkansas, Florida, Iowa, Kansas, Louisiana, Missouri, Nebraska, North Dakota, Oklahoma, Tennessee, Texas, Utah, Alabama, Colorado, Idaho, Kentucky, Minnesota, Mississippi, Montana, Nevada, New Mexico, South Dakota, and Wyoming.

(2) From Mobile, AL, to points in Arkansas, Iowa, Kansas, Missouri, Nebraska, Oklahoma, Montana, Idaho, Nevada, Utah, Wyoming, North Dakota, South Dakota, Minnesota, Colorado, and New Mexico.

(3) From Hoquiam, WA, to points in Idaho, Montana, Nevada, Utah, and Wyoming.

(4) From Pinebluff, AR, to Kansas City, MO, and points in Nebraska.

(5) From Portland, OR, to points in Nebraska.

II. No. MC-128375 (Sub-No. 148) [To be issued under No. MC-126118 and an appropriate subnumber.]

Paper and paper products

From Taylorville, IL, to points in Iowa, Kansas, Missouri and Nebraska.

III. No. MC-128375 (Sub.-No. 149) [To be issued under No. MC-126118 and an appropriate subnumber.]

Paper and paper products

From St. Francisville, LA, to Memphis, TN, and points in Iowa, Kansas, Missouri, and Nebraska.

RESTRICTION

The authority granted in all three proceedings is restricted to traffic originating at the named origins and destined to the named destinations authorized above.

SPECIAL CONDITION FOR ISSUANCE OF CERTIFICATES IN I, II, AND III

Issuance of a certificate in each proceeding is subject to (1) coincidental cancellation of the carrier's outstanding permits in No. MC-128375 and subnumbers and (2) republication in the FEDERAL REGISTER of a notice of the authority actually granted.

[Rev. S.O. No. 1252, ICC Order No. 74]

REROUTING OF TRAFFIC

To All Railroads: In the opinion of Robert S. Turkington, Agent, various railroads are unable to transport traffic over their lines because of work stoppage by certain of their operating employees.

It is ordered:

(a) *Rerouting traffic.* Certain railroads being unable to transport traffic over their lines because of work stoppage by certain of their operating employees these carriers and their connections are hereby authorized to reroute or divert such traffic over any available route to expedite the movement, regardless of the routing designated on the waybill. The billing covering all such cars rerouted or diverted shall carry a reference to this order as authority for the rerouting. Traffic necessarily diverted by authority of this order shall be rerouted so as to preserve as nearly as possible the participation and revenues of other carriers provided in the original routing.

(b) *Concurrence of receiving roads to be obtained.* The railroad desiring to divert or reroute traffic under this order shall receive the concurrence of other railroads to which such traffic is to be diverted or rerouted, before the rerouting or diversion is ordered.

(c) *Notification to shippers.* Each carrier rerouting cars in accordance with this order shall notify each shipper at the time each car is rerouted or diverted and shall furnish to such shipper the new routing provided under this order.

(d) Inasmuch as the diversion or rerouting of traffic is deemed to be due to carrier disability, the rates applicable to traffic diverted or rerouted by said Agent shall be the rates which were applicable at the time of shipment on the shipments as originally routed.

(e) In executing the directions of the Commission and of such Agent provided for in this order, the common carriers involved shall proceed even though no contracts, agreements, or arrangements now exist between them with reference to the divisions of the rates of transportation applicable to said traffic; divisions shall be, during the time this order remains in force, those voluntarily agreed upon by and between said carriers; or upon failure of the carriers to so agree, said divisions shall be those hereafter fixed by the Commission in accordance with pertinent authority conferred upon it by the Interstate Commerce Act.

(f) *Effective date.* This order shall become effective at 4:30 p.m., September 27, 1978.

(g) *Expiration date.* This order shall expire at 11:59 p.m., October 3, 1978, unless otherwise modified, changed, or suspended.

This order shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association. A copy of this order shall be filed with the Director, Office of the Federal Register.

Issued at Washington, D.C., September 27, 1978.

[Notice No. 183]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

OCTOBER 10, 1978.

The following are notices of filing of applications for temporary authority under section 210a(a) of the Interstate Commerce Act provided for under the provisions of 49 CFR 1131.3. These rules provide that an original and six (6) copies of protests to an application may be filed with the field official named in the FEDERAL REGISTER publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the FEDERAL REGISTER. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in the ICC Field Office to which protests are to be transmitted.

MOTOR CARRIERS OF PROPERTY

MC 40898 (Sub-20TA), filed August 4, 1978. Applicant: S. & W. MOTOR LINES, INC., P.O. Box 11439, Greensboro, NC 27409. Representative: A. W. Flynn, Jr., 314 South Eugene Street, P.O. Box 180, Greensboro, NC 27402. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Glass containers*, from Clarion, PA, to Eden, Greensboro, and Clemmons, NC, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): Owens-Illinois, Inc., P.O. Box 1035, Toledo, OH 43666. Send protests to: Archie W. Andrews, District Supervisor, Interstate Commerce Commission, 624 Federal Building, 310 New Bern Avenue, P.O. Box 26896, Raleigh, NC 27611.

MC 103051 (Sub-44TA), filed August 4, 1978. Applicant: FLEET TRANSPORT CO., INC., P.O. Box 90408, Nashville, TN 37209. Representative: Russell E. Stone, P.O. Box 90408, Nashville, TN 37209. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Blackstrap molasses and blackstrap molasses based feed ingredients*, (in bulk, in tank vehicles), from Nashville, TN, to points in IN, for 180 days. Supporting shipper(s): National Molasses Co., Willow Grove, PA 19090. Send protests to: Joe J. Tate, District Supervisor, Bureau of Operations, Interstate Commerce Commission, Suite A-422, U.S. Court House, 801 Broadway, Nashville, TN 37203.

MC 109294 (Sub-25TA), filed July 26, 1978. Applicant: COMMERCIAL TRUCK CO., LTD., 90 Leeder Avenue, Coquitlam, BC, Canada V3J 6Z9. Representative: Michael B. Crutcher, 2000 IBM Building, Seattle, WA 98101. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Rolled paper*, from Longview, WA, to the United States-Canadian boundary at Blaine and Sumas, WA, restricted to shipments moving on specialized rolled paper flatbed equipment, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): Mac Millan Bloedel Ltd., 1075 West Georgia, Vancouver, BC. Send protests to: Hugh H. Chaffee District Supervisor, Bureau of Operations, Interstate Commerce Commission, 858 Federal Building, Seattle, WA 98174.

MC 110012 (Sub-47TA), filed August 4, 1978. Applicant: ROY WIDENER MOTOR LINES, INC., 707 North Liberty Hill Road, P.O. Box 68, Morristown, TN 37814. Representative: John R. Sims, Jr. 915 Pennslyvania Building, 425 13th Street NW., Washington, DC 20004. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *New furniture and returned shipments of new furniture*, from the plantsites of Lea Industries, Inc., Division of Sperry-Hutchinson Co., located at or near Richmond and Kenbridge, VA, to Morristown, TN, for 180 days. Applicant intends to tack the authority herein applied to their authority held in Subs-1, 7, 23 and 24. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): Lea Industries, Inc., Division of Sperry-Hutchinson Co., P.O. Box HP No. 3, 1 Plaza Center, High Point, NC 27261. Send protests to: Joe J. Tate, District Supervisor, Bureau of Operations, Interstate Commerce Commission, Suite A-422, U.S. Courthouse, 801 Broadway, Nashville, TN 37203.

MC 113751 (Sub-24TA), filed July 31, 1978. Applicant: HAROLD F. DUSHEK, INC., 10th and Columbia Street, P.O. Box 47, Waupaca, WI 54981. Representative: James A Spiegel, Olde Towne Office Park, 6401 Odana Road, Madison, WI 53719. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Charcoal and charcoal briquettes, and wood chips, vermiculite, lighter fluid, and accessories* used in outdoor cooking, in mixed loads with charcoal and charcoal briquettes, from plants of Husky Industries, Inc., located at Waupaca, WI, and Isanti, MN, to points in LA, MD, NC, NY, SC, TN, and VA, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): Husky Industries, Inc., 62 Perimeter Center East, Atlanta, GA 30346 (Vernon LeRoy Ekedahl Sr., vice president). Send protests to: John E. Ryden, District Supervisor, Interstate Commerce Commission, Bureau of Operations, U.S. Federal Building and Courthouse, 517 East Wisconsin Avenue, Room 619, Milwaukee, WI 53202.

MC 114725 (Sub-88TA), filed August 2, 1978. Applicant: WYNNE TRANSPORT SERVICE, INC., 2222 North 11th Street, Omaha, NE 68110. Representative: Donald F. Swerczek (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Anhydrous ammonia* (in bulk), from the facilities of Chevron Chemical Co. near Friend, KS, to CO, NE, OK, TX, and WY, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): Jonah Pollack, traffic representative, Chevron Chemical Co., 3001 L. B. J. Freeway, Suite 130, Dallas, TX 75234. Send protests to: Carroll Russell, District Supervisor, Interstate Commerce Commission, Suite 620, 110 North 14th Street, Omaha, NE 68102.

MC 115092 (Sub-70TA), filed July 31, 1978. Applicant: TOMAHAWK TRUCKING, INC., P.O. Box 0, Vernal, UT 84078. Representative: Walter Kobos, 1016 Kehoe Drive, St. Charles, IL 60174. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Scrap or waste paper*, from points in CA, to Toledo, OR, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): Georgia-Pacific Corp., 900 Southwest Fifth Avenue, Portland, OR 97204 (John R. Tuttle, Transportation Analyst-Motor). Send protests to: L. D. Helfer, District Supervisor, Interstate Commerce Commission, 5301 Federal Building, Salt Lake City, UT 84138.

MC 116063 (Sub-149TA), filed July 31, 1978. Applicant: WESTERN COMMERCIAL TRANSPORT, P.O. Box 270, 72929 West 5th Street, Fort Worth, TX 76101. Representative: W. H. Cole, P.O. Box 270, Fort Worth, TX 76101. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Vegetable oils* (in bulk, in tank vehicles), from Opelousas, LA, to points in MS, TN, GA, FL, AR, and KS, for 180 days. Supporting shipper(s): Lou Ana Foods, Inc., 731 North Railroad Avenue, Opelousas, LA 70570. Send protests to: Robert J. Kirspel, District Supervisor, Room 9A27, Federal Building, 819 Taylor Street, Fort Worth, TX 76102.

MC 119700 (Sub-39TA), filed July 31, 1978. Applicant: STEEL HAULERS, INC., 306 Ewing Avenue, Kansas City, MO 64125. Representative: Frank W. Taylor, Jr., Suite 600, 1221 Baltimore Avenue, Kansas City, MO 64105. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Lumber, lumber mill and wood products, plywood, particleboard, preservatively treated or untreated*, from the facilities of Willamette Industries, Inc., at Zwolle and Natchitoches, LA, to points in AR, IL, IN, IA, MI, MO, OH, and WI, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): Willamette Industries, Inc., P.O. Box 606, Ruston, LA 71270. Send protests to: Vernon V. Coble, District Supervisor, Interstate Commerce Commission, 600 Federal Building, 911 Walnut Street, Kansas City, MO 64119.

MC 119726 (Sub-138TA), filed August 4, 1978. Applicant: N.A.B. TRUCKING CO., INC., 1644 West Edgewood Avenue, Indianapolis, IN 46217. Representative: James L. Beattey, Suite 1000, 130 East Washington Street, Indianapolis, IN 46204. [Notice No. 182]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

October 6, 1978.

The following are notices of filing of applications for temporary authority under section 210a(a) of the Interstate Commerce Act provided for under the provisions of 49 CFR 1131.3. These rules provide that an original and six (6) copies of protests to an application may be filed with the field official named in the Federal Register publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the Federal Register. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, DC, and also in the ICC Field Office to which protests are to be transmitted.

Motor Carriers of Property

MC 48441 (Sub-21 TA), filed July 12, 1978, and published in the Federal Register issue of September 13, 1978, as MC 48441 (Sub-15 TA), and republished as corrected this issue. Applicant: R. M. E., INC., P.O. Box 418, Streator, IL 61364. Representative: E. Stephen Heisley, 666 11th Street NW., No. 805, Washington, DC 20001. Supporting shipper: The Firestone Tire & Rubber Co., 1200 Firestone Parkway, Akron, OH 44317. Sent protests to: Herbert W. Allen, District Supervisor, Bureau of Operations, Interstate Commerce Commission, 518 Federal Building, Des Moines, IA 50309.

MC 145148 (Sub-1TA), filed August 2, 1978. Applicant: SUTTER TRUCKING & EQUIPMENT, INC., 277 Versailles Road, Irving, NY 14081. Representatives: S. Michael Richards and Raymond A. Richards, P.O. Box 225, Webster, NY 14580. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: (1) *Wire and wire products*, from Tonawanda, NY, to all points in CT, DE, GA, KY, ME, MD, MA, MO, NC, ND, NH, NJ, OH, PA, RI, SC, SD, TN, VT, VA, and WV, and, (2) *Materials, supplies, and equipment used in the manufacture of wire and wire products*, from all points in the destination States in (1) above to Tonawanda, NY, under continuing contract or contracts with New York Wire Mills Corp., a subsidiary of Ivaco Industries, Ltd., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Ernest R. LaFever, General Traffic Manager, New York Wire Mills Corp., a subsidiary of Ivaco Industries, Ltd., 3937 River Road, Tonawanda, NY 14150. Send protests to: Interstate Commerce Commission, 910 Federal Building, 111 West Huron Street, Buffalo, NY 14202.

MC 145151 (Sub-1TA), filed July 31, 1978. Applicant: GARY STEWART TRUCKING, INC., Rural Route No. 3, Box 112, Johnson Creek, WI 53038. Representative: Ronald E. Laitsch, 113 North Third Street, Watertown, WI 53094. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Snow throwers and lawnmowers, and accessories, attachments, and parts* for snow throwers and lawnmowers, from Lake Mills, WI, to Agawam, Southboro, and West Newton, MA; Cleveland, OH; Fort Custer and Springfield, MI; Mankato, MN; Philadelphia, PA; Syracuse and Tonawanda, NY; Barington, IL, and Fargo, ND, under a continuing contract, or contracts, with Wisconsin Marine, Inc., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Wisconsin Marine, Inc., P.O. Box 28, Lake Mills, WI 53551 (Dean Moon, Manufacturing Manager). Send protests to: John E. Ryden, District Supervisor, Interstate Commerce Commission, Bureau of Operations, U.S. Federal Building and Courthouse, 517 East Wisconsin Avenue, room 619, Milwaukee, WI 53202.

MC 145183TA, filed August 2, 1978. Applicant: R. L. LEE, d.b.a. L & T TRUCKING CO., Route 2, Box 132-B, Keithville, LA 71047. Representative: Eleanor B. Lee (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Crossties, finished lumber, poles, pallets, roofing materials, and plywood*, between all points in LA, AR, TX, and MI, for 180 days. Supporting shipper(s): Southern Forest Products of Louisiana, Inc., P.O. Box 36890, 810 East 70th Street, Suite, E, Shreveport, LA 71103; Maston Nance, P.O. Box 244, Plain Dealing, LA 71064; A & M Wood Treating, Route 2, Box 81B, Greenwood, LA 71033. Send protests to: Connie A. Guillory, Interstate Commerce Commission, T-9038, U.S. Postal Service Building, 701 Loyola Avenue, New Orleans, LA 70113.

MC 145199TA, filed August 2, 1978. Applicant: WESTERFELD TRUCK LEASING, INC., Rural Route 10, Greensburg, IN 47240. Representative: Robert W. Loser, 1009 Chamber of Commerce Building, Indianapolis, IN 46204. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Foodstuffs*, in vehicles equiped with mechanical refrigeration, between the plantsite of KB Specialty Foods at or near Greensburg, IN; Atlanta, GA; Charleston, WV; OH, MI, MO; Little Rock, AR; KY; Memphis and Nashville, TN; IL; Salem and Roanoke, VA; Houston and Dallas, TX; and Irwin and Pittsburgh, PA, from the facilities of the Kroger Co., Cincinnati, OH, to St. Louis, MO; Indianapolis, IN; Louisville, KY; and Detroit, MI, for 180 days. Restriction: The operations authorized herein are limited to a transportation service to be performed under a continuing contract, or contracts, with the Kroger Co. Supporting shipper: Kroger Co., 1014 Vine Street, Cincinnati, OH 45202. Send protests to: Beverly J. Williams, Transportation Assistant, Interstate Commerce Commission, Federal Building and U.S. Courthouse, 46 East Ohio Street, room 429, Indianapolis, IN 46204.

By the Commission.

H. G. HOMME, Jr.,
Acting Secretary.

1

[M-167, Amdt. 3; Sept. 29, 1978]

CIVIL AERONAUTICS BOARD.

Notice of addition of item to the September 29, 1978, agenda.

TIME AND DATE: 1 p.m., September 29, 1978.

PLACE: Room 1027, 1825 Connecticut Avenue NW., Washington, D.C. 20428.

SUBJECT: 21a. Docket 30356, *Transcontinental Low-Fare Route Proceeding* (Instructions to staff).

STATUS: Open.

PERSON TO CONTACT:

Phyllis T. Kaylor, the Secretary, 202-673-5068.

SUPPLEMENTARY INFORMATION: The Board heard oral argument on this case yesterday, September 28, 1978, and had announced its intention to issue instructions to staff at its October 2, 1978, meeting. As announced by Meeting Announcement Amendment No. 168, Amdt. 1, issued today, the Board will not be meeting on Monday, October 2, 1978. The Chairman will not be available for Board meetings in Washington from October 4 through October 16. So that the Chairman can participate and the Board can continue its policy of issuing instructions to staff as soon as possible after the oral argument, the following Members have voted that agency business requires the addition of item 21a to the September 29, 1978, agenda and that no earlier announcement of this addition was possible:

Chairman, Alfred E. Kahn
Member, Richard J. O'Melia
Member, Elizabeth E. Bailey
Member, Gloria Schaffer

2

[M-167, Amdt. 4; Sept 29, 1978]

CIVIL AERONAUTICS BOARD.

Notice of deletion from the September 29, 1978, meeting.

TIME AND DATE: 1 p.m., September 29, 1978.

PLACE: Room 1027, 1825 Connecticut Avenue NW., Washington, D.C. 20428.

SUBJECT: 17. Dockets 28366 and 32710, *Denver-Alaska Service Investigation, San Francisco-Reno-Albuquerque-Texas Service Investigation*—Orders on Reconsideration (Memo 8193, OGC).

STATUS: Open.

PERSON TO CONTACT:

Phyllis T. Kaylor, the Secretary, 202-673-5068.

SUPPLEMENTARY INFORMATION: At the Board meeting today, the Bureau of Administrative Law Judges requested that item 17 on the agenda be deleted so that the Bureau could submit an additional memorandum to the Board on this subject. Accordingly, the following Members have voted that agency business requires the deletion of item 17 from the September 29, 1978, meeting and the addition of that item to the October 5, 1978, agenda as item 6a and that no earlier announcement of these changes was possible:

Chairman, Alfred E. Kahn
Member, Richard J. O'Melia
Member, Gloria Schaffer

FRIDAY, OCTOBER 6, 1978
PART II

DEPARTMENT OF LABOR

Employment Standards Administration

MINIMUM WAGES FOR FEDERAL AND FEDERALLY ASSISTED CONSTRUCTION

General Wage Determination Decisions

V 43 / 195
OCT 6 78

[4510-27]

DEPARTMENT OF LABOR

Employment Standards Administration

MINIMUM WAGES FOR FEDERAL AND FEDERALLY ASSISTED CONSTRUCTION

General Determination Decisions

General Wage Determination Decisions of the Secretary of Labor specify, in accordance with applicable law and on the basis of information available to the Department of Labor from its study of local wage conditions and from other sources, the basis hourly wage rates and fringe benefit payments which are determined to be prevailing for the described classes of laborers and mechanics employed in construction activity of the character and in the localities specified therein.

The determinations in these decisions of such prevailing rates and fringe benefits have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24-70) containing provisions for the payment of wages which are dependent upon determination by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of Part 1 of Subtitle A of Title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates (37 FR 21138), and of Secretary of Labor's Orders 12-71 and 15-71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in effective date as prescribed in that section, because the necessity to issue construction industry wage determination frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General Wage Determination Decisions are effective from their date of publication in the FEDERAL REGISTER without limitation as to time and are to be used in accordance with the provisions of 29 CFR Parts 1 and 5. Accordingly, the applicable decision together with any modifications issued subsequent to its publication date shall be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR, Part 5. The wage rates contained therein shall be the minimum paid under such contract by contractors and subcontractors on the work.

MODIFICATIONS AND SUPERSEDEAS DECISIONS TO GENERAL WAGE DETERMINATION DECISIONS

Modifications and Supersedeas Decisions to General Wage Determination Decisions are based upon information obtained concerning changes in prevailing hourly wage rates and fringe benefit payments since the decisions were issued.

The determinations of prevailing rates and fringe benefits made in the Modifications and Supersedeas Decisions have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24-70) containing provisons for the payment of wages which are dependent upon determination by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of Part 1 of Subtitle A of Title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates (37 FR 21138) and of Secretary of Labor's Orders 13-71 and 15-71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in foregoing General Wage Determination Decisions, as hereby modified, and/or superseded shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federallly assisted construction projects to laborers and mechanics of the specified classes engaged in contract work of the character and in the localities described therein.

Modifications and Supersedeas Decisions are effective from their date of publication in the FEDERAL REGISTER without limitation as to time and are to be used in accordance with the provisons of 29 CFR Parts 1 and 5.

Any person, organization, or governmental agency having an interest in the wages determined as prevailing is encouraged to submit wage rate information for consideration by the Department. Further information and self-explanatory forms for the purposes of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Office of Special Wage Standards, Division of Wage Determinations, Washington, D.C. 20210. The cause for not utilizing the rulemaking procedures prescribed in 5 U.S.C. 553 has been set forth in the original General Wage Determination Decision.

MODIFICATIONS TO GENERAL WAGE DETERMINATION DECISIONS

The numbers of the decisions being modified and their dates of publication in the FEDERAL REGISTER are listed with each State.

Georgia—GA77-1117; GA77-1118	Sept. 30, 1977
Kansas—MO78-4047; MO78-4048	May 5, 1978
Kentucky—KY77-1124	Sept. 30, 1977
Maryland—MD78-3020	Apr. 14, 1978
Massachusetts—MA78-2079; MA78-2081	Sept. 22, 1978
Michigan:	
MI78-2001	Feb. 3, 1978
MI78-2054	June 2, 1978
New Jersey—NJ77-3092	Oct. 7, 1977
Pennsylvania:	
PA78-3005	Feb. 24, 1978
PA78-3012	Apr. 28, 1978
PA78-3013	Apr. 14, 1978
PA78-3014	Mar. 24, 1978
PA78-3015; PA78-3043	May 13, 1978
PA78-3054	Aug. 11, 1978
South Dakota —78-5001	Jan. 20, 1978
Texas:	
TX78-4041	Apr. 14, 1978
TX78-4079	Aug. 11, 1978
TX78-4080	Aug. 4, 1978
TX78-4081	Aug. 18, 1978
TX78-4082; TX78-4083; TX78-4084; TX78-4085; TX78-4087; TX78-4088	Aug. 25, 1978
TX78-4096	Sept. 22, 1978

SUPERSEDEAS DECISIONS TO GENERAL WAGE DETERMINATION DECISIONS

The numbers of the decisions being modified and their dates of publication in the FEDERAL REGISTER are listed with each State. Supersedeas Decision numbers are in parentheses following the numbers of the decisions being superseded.

Florida—FL78-1105(FL78-1086)	Sept. 17, 1976
Louisiana—LA78-4077(LS78-4099)	Aug. 11, 1978
Missouri—MO77-4269(MO78-4098)	Sept. 30, 1977
New Hampshire:	
NH77-2001(NH78-2100)	Jan. 21, 1977
NH77-2003(NH78-2101)	Jan. 28, 1977
Pennsylvania:	
PA77-3125(PA78-3069)	Sept. 9, 1977
PA78-3048(PA78-3071)	Aug. 11, 1978
Utah—UT78-5012(UT78-5128)	Mar. 17, 1978
Vermont—VT76-2170(VT78-2091)	Dec. 10, 1976

CANCELLATION OF GENERAL WAGE DETERMINATION DECISIONS

General Wage Determination Decision No. CA78-5106, Fresno County, Calif., *only* is cancelled. Agencies with residential construction projects pending in this location should utilize the project determination procedure by submitting form SF-308. See Regulations Part 1 (29 CFR), § 1.5. Contracts for which bids have been opened shall not be affected by this notice, and consistent with 29 CFR 1.7(b)(2), the incorporation of Decision No. CA78-5106 in contract specifications the opening of bids for which is within ten (10) days of this notice need not be affected.

Signed at Washington, D.C., this 29th Day of September 1978.

DOROTHY P. COME,
Assistant Administrator,
Wage and Hour Division.

[FR Doc. 78-28013 Filed 10-5-78; 8:45 am]

LABORERS - ZONE 1 (CLASSIFICATION DEFINITIONS)

GROUP 1 - Building and labor construction

GROUP 2 - Stone mason helpers; mechanical tool operators; sewermen (bottom men, caulkers, tenders, joint wipers, hot pot, grade carriers, layers & ditchers 4 ft. or over); tender of all crafts; sandblaster (nozzlemen); sandblaster (pot tender); laying non-metallic pipe over 4 ft. deep, including sewer, drain & underground tile; septic tank diggers & installers, over 4 ft. deep; gas & oil pipeline laborers & wrappers

GROUP 3 - Gunite tool operators

LABORERS ZONE 2

GROUP 1 - Building laborer; rotary drill laborers; foundation drill crewman

GROUP 2 - Mason mixer; plaster mixer; mechanical tool op.; sandblaster; laying concrete, clay, plastic, asbestos cement, casing & corrugated metal pipe, as sewer, drain & underground tile (caulkers, joint wrappers, hot pot & pipe layers); gas & oil pipeline laborers, wrappers & dopers

LABORERS - ZONE 3

GROUP 1 - Building & general laborer; tenders (carpenter, plaster, cement finisher, mason); tank & vessel cleaners

GROUP 2 - Air tool op. (except jackhammer); interior of closed tanks & vessels power equipment

GROUP 3 - Mortar mixers

GROUP 4 - Blasterers

GROUP 5 - Blaster helpers; concrete cutters behind paving machine & puddlers; form setters & liner asphalt worker

GROUP 6 - Wiping joints, laying pipe & tile from pumpcrete

GROUP 7 - Interior of closed tanks & vessels manually

LABORERS - ZONES 4 & 5

GROUP 1 - Building and general laborers, carpenter tenders

GROUP 2 - Power tool ops. (hammer men, tamper, vibrators, power buggies, concrete chippers or cutters, chain saw ops., etc.); pipelayers (non-metallic)

GROUP 3 - Mason tenders, plaster tenders, cement mix (wet or dry) tenders, hod carrier tender; mortar mixers & cement mixers (wet or dry)

LABORERS - ZONE 6

GROUP 1 - Building laborers

GROUP 2 - Laborers handling steel pans, stone masons helpers, mechanical tool ops., sewermen (bottom men, caulkers, tenders, joint wipers, hot pot, grade carriers, layers & ditchers 4 ft. & over), sand blaster (nozzlemen & pot tender); laying non-metallic pipe over 4 ft. deep, septic diggers & installers over 4 ft. deep, gas & oil pipeline laborers & wrappers

GROUP 3 - Gunite tool operators

GROUP 4 - Bricklayers tenders and mason tenders

GROUP 5 - Hod carriers using prime mover to serve a bricklayer; mortar mixers

LABORERS - ZONE 7

GROUP 1 - Common laborers

GROUP 2 - Jackhammermen, sewermen, mason tenders, plasterer tenders, stone masons helpers, vibratormen

GROUP 3 - Mortar mixers

LABORERS - ZONE 8

GROUP 1 - Common laborers; carpenter helpers; mason tenders (other than cement); plasterers tenders; stone masons helpers; concrete workers; scaffold builders

GROUP 2 - Air tool ops. (jackhammer, vibrator & tamper); sewer pipe joiners & setters; concrete cutters; hod carriers; creosote materials handler; acid worker; mason tenders (cement); Mortar mixer (wet or dry); motorized buggy op.; water proofers (mastic); form setters (steel paving forms)

GROUP 3 - Chain saw operator

GROUP 4 - Asphalt raker, tamper, smoother & shovelers; sewer pipelayers; blaster helpers

GROUP 5 - Powderman

LABORERS - ZONE 9

GROUP 1 - Building laborers

GROUP 2 - Mason tenders, plaster tenders; asphalt rakers, asphalt smoothers

GROUP 3 - Mortar mixers

GROUP 4 - Air jack op.; vibrator ops.; sewer pipelayers, sewer pipe wrappers

LABORERS - ZONE 10

GROUP 1 - Laborers, tenders (brickmasons, stonemasons, cement masons, carpenters, plasterers, stripping & dismantling; concrete form work; loading, unloading, carrying & handling steel & steel mesh; assisting to the setting of cut stone, granite or artifical stone; building scaffolds; shoring

GROUP 2 - Mechanical tool op. (air, electric, motor, engine, etc.); sewer pipelayers; mortar mixers (hand or machine); gunite op.; tile, terrazzo & marble setters helpers

GROUP 3 - Pipe dopers & burners

ZONE 1 - St. Tammany (as far south as Bayou Lacombe & east to the Miss. State Line at Pearlington), Tangipahoa (all but southwestern corner) & Washington Parishes

ZONE 2 - Acadia, Iberia, Lafayette, St. Landry, St. Martin, St. Mary (excluding that part of Parish to the Calumet Locks west) & Vermilion Parishes

ZONE 3 - Allen, Beauregard, Calcasieu, Cameron, Jefferson Davis & Vernon Parishes

ZONE 4 - All of Ascension, East Baton Rouge, East Feliciana, Iberville, Pointe Coupee, West Baton Rouge & West Feliciana Pars.; Parts of Assumption, St. James, St. John the Baptist Pars. (north of a line drawn from the southern limits of the town of St. James in St. James Par. to the northern limits of the town of Napoleonville in Assumption Par. & then directly west to the Par. line, all of St. James Par. except that part which is east of a line drawn from Lutcher to U. S. Hwy 61 (Airline Hwy). then west on U. S. 61 to Blind River & on a direct line to Manchac)

ZONE 5 - Livingston, St. Helena & Tangipahoa (south & west of a line running from the western Par. line to a point directly east which touches the northern limits of the town of Independence, then directly south to Lake Pontchartrain) Parishes

ZONE 6 - Jefferson (except Grand Isle), Orleans, Plaquemines, St. Bernard, St. Charles, St. John the Baptist (on the west bank of the Miss. River & the portion of St. John the Baptist on the east bank of the Miss. RIver as far as the Sycamore Inn at Lutcher & north to Blind River & Manchac & St. Tammany (north as far as Bayou Lacombe, east to th Miss. State Line at Pearlington) Parishes

ZONE 7 - Assumption (north of Napoleonville), Jefferson (Grand Isle), Lafourche, St. James (on the west bank & including the town of Vacherie), St. Mary (that part of Parish to the Calumet Locks west) & Terrebonne Parishes

ZONE 8 - Avoyelles, Evangeline, Grant, LaSalle, Natchitoches, Rapides & Winn Parishes

ZONE 9 - Bienville, Bossier, Caddo, Claiborne, DeSoto, Red River, Sabine & Webster Pars.

ZONE 10 - Caldwell, Catahoula, Concordia, East Carroll, Franklin, Jackson, Lincoln, Madison, Morehouse, Ouachita, Richland, Tensas, Union & West Carroll Pars.

ZONE 2 - GROUP 1 - Brush; taping; floating & texture
GROUP 2 - Sandblasting, industrial & steel
ZONE 3 - GROUP 1 - Painters, paperhangers & sheetrock tapers & floaters
GROUP 2 - Structural steel painters of new buildings under construction; the following overall of 30 ft.; tanks, airconditioning, towers, smoke stacks sprinkler systems, wharves & structural steel in old buildings; spray painters, swing stage painter
GROUP 3 - Industrial
ZONE 4 - GROUP 1 - Brush
GROUP 2 - Brush swing stage
GROUP 3 - Brush industrial
GROUP 4 - Spray; spray-steel; sandblasting
GROUP 5 - Spray swing stage
GROUP 6 - Paperhanger
GROUP 7 - Sheetrock finishers
ZONE 5 - GROUP 1 - Painters, paperhangers; tapers, floaters; commercial steel, such as churches or any commercial building with closed roof deck or walls
GROUP 2 - Other commercial work-brush spray, stage, window jacks, flagpoles & steeple work
GROUP 3 - All industrial work including sandblasting or power tools of any kind
ZONE 7 - GROUP 1 - Painters, paperhangers, tapers, floaters
GROUP 2 - Stage, window jacks, bosun chairs, structural steel, rollers, equipment painting; sandblasting, spray, stack, sign, tank painting, steeple jack
GROUP 3 - Structural steel brush
ZONE 1 - Allen (except northeast corner), Beauregard, Calcasieu, Cameron, Jefferson Davis & Vernon Parishes
ZONE 2 - Acadia, Ascension (north of Hwy. 22), Assumption (north of Hwy. 22) East Baton Rouge, East Feliciana, Iberia, Iberville, Lafayette, Livingston (north of Hwy. 22), Pointe Coupee, St. Helena, St. Landry (south half), St. Martin, St. Mary (except Morgan City Area), Tangipahoa (west of Hwy. 51), Vermilion, West Baton Rouge & West Feliciana Pars.
ZONE 3 - Ascension (south of Hwy 22), Assumption (south of Hwy. 22), Lafourche, Livingston (south of Hwy. 22), Jefferson, Orleans, Plaquemines, St. Bernard, St. Charles, St. James, St. John the Baptist, St. Mary (Morgan City Area), St. Tammany (southern portion) & Terrebonne Parishes
ZONE 4 - St. Tammany (northern 2/3, everything north of a straight line running east & west from Pearl River to Mandoville), Tangipahoa (everything east of Rt. 51 & everything north of a straight line running east & west from Madisonville through Ponchatoula) & Washington Parishes

NOTICES

46457

ZONE 5 - Allen (northeastern most corner, north of Rt. 10), Avoyelles, Catahoula, Evangeline, Grant, LaSalle, Natchitoches (southern half, everything south of Rt. 6 including City of Natchitoches), Rapides, St. Landry (northern portion) & Winn (southern half from a line running east & west through the intersection of Rts. 84 & 71, including the town of Winnfield at that intersection) Parishes
ZONE 6 - Bienville (western half), Bossier, Caddo, Claiborne, DeSoto, Natchitoches (to City of Natchitoches), Red River, Sabine & Webster Parishes
ZONE 7 - Bienville (eastern portion, everything east of Rt. 9 inclusive), Caldwell, Concordia, East Carroll (western 2/3, everything west of Rt. 65 inclusive), Franklin, Jackson, Lincoln, Madison (western half, everything west of Rt. 65 inclusive), Morehouse, Ouachita, Richland, Tensas (west 3/4, everything west of Rt. 65), Union, West Carroll & Winn (northern half, everything north of a line running east & west through Winfield, excluding Winfield) Parishes

POWER EQUIPMENT OPERATORS - ZONES 1, 2, 3 & 4 (CLASSIFICATION DEFINITIONS)
GROUP 1 - Oiler
GROUP 2 - Mechanic helper
GROUP 3 - Oiler-Driver
GROUP 4 - Scaleman
GROUP 5 - Air compressor; asphalt plant; bulldozers, D-4 & equivalent & under; bullfloats; concrete spreader; finishing machines; concrete mixer (16-s or less); concrete saw; distributors (bitum surface); dowell bar machine; farm-type tractor (with all attachments except backhoe); fireman; fork lifts (other than setting steel, machinery or pipe); hoist, 1 drum less than 4 stories; kolum buff machine; pull cats; pump (3" & over); pump, concrete (under 6"); rollers, except on asphalt or brick; straddle buggies; sweepers on streets & roads (motorized); winch truck, A-frame (other than handling steel or pipe)
GROUP 6 - Asphalt spreader; backhoe; bulldozer, over D-4 & equivalent; cableways; concrete mixer, over 16-s; cranes; derricks; ditching or trenching machines; draglines; fork lifts (setting steel, machinery or pipe); front end loaders (except farm-type tractors); grease serviceman; hoist, 1 drum, 4 stories or more or 40 ft. (on structures other than buildings), hoist, 2 drums & over; hydrolifts; heavy duty mechanic; motor patrols; piledrivers; pump, concrete (6" & over); road pavers; rollers on asphalt or brick; scoopmobiles; scrapers; sideboom cats; shovels; tractorvators; welder, journeyman; well point system; winch cats (hoisting); winch truck, A-frame (handling steel or pipe)

POWER EQUIPMENT OPERATORS - ZONE 5
GROUP 1 - Scale op.; oiler-driver on motor crane; batch plant
GROUP 2 - Pumps under 3 inch suction; mechanic helper
GROUP 3 - Oiler
GROUP 4 - Fireman
GROUP 5 - Combination oiler-compressor; combination oiler-fireman; asphalt spreaders; backhoe (all types); bulldozers; cableways; cherry pickers (all types); concrete mixers (over 1 sack); cranes; deck winch (2 drums or over); derricks; ditching or trenching machines (riding type); draglines; dredges; fork lifts (other than farm type); outside warehouses; foundation drill; front end loaders (except farm type); grease serviceman; hoist-1 drum (4 stories or more on buildings); hoist-1 drum (over 40 ft. on structures other than buildings); hoist (2 drums or over); locomotives (all types); mechanic; mixer plant-central mix; motor patrols; piledrivers; pull cat; pump crete-6" & over discharge; push cat; road pavers; rollers (plant mix asphalt); scrapers; shovels; sidebooms; unit op.; welder, journeyman; well point system; whirleys; winch cats (Cat D-4 & over); winch truck with A-frame (5 ton & over); work boats-requiring licensed op.
GROUP 6 - Bush hog; compressor; concrete pump-under 6" discharge; concrete saw; deck winch (1 drum); distributors; ditching or trenching machines (non-riding type); dowel bar machine; farm-type tractors (when used to pull discs, grass-cutters, etc.); hoist-1 drum (under 4 stories on building); hoist-1 drum (40 ft. or under on structures other than buildings); Kolum buff machines; mixers (1 sack & under); motorized street sweepers self-propelled; pump (3" & over); test pump-internal combustion engine powered; water blast pumps
GROUP 7 - Asphalt plant; boom trucks; bullfloats; concrete spreader; farm-type front end loaders; finishing machines (roadway, riding type); roller (other than plant mix asphalt); straddle buggies; winch truck with A-frame (under 5 tons); workboat-not requiring licensed operator

POWER EQUIPMENT OPERATORS - ZONE 6
GROUP 1 - Snatch cat; pumps, 3 inch suction or more
GROUP 2 - Pumps, under 3 inch suction; mechanic helper
GROUP 3 - Oiler
GROUP 4 - Batch plant operator
GROUP 5 - Air compressor; asphalt plant engineer; blade grader; distributor (bitum surface); finishing machine (concrete, paving); hoist-1 drum, less than 4 stories; concrete mixer under 16S; Oiler driver; pump crete; street & road sweeper; roller (except on asphalt or brick); roller, asphalt or brick (under 5 tons); post-hole digger; tractor operated bush hog & similar grass or bush cutting equipment
GROUP 6 - A-frame truck; crew boat op.; fireman; fork lift; straddle buggy; traxcavator; scoopmobile & similar front-end loading equipment with scoop or bucket under 1 cu. yd. capacity; locomotive; well point system; unit op.; hoist-1 drum, 4 stories or over
GROUP 7 - Backhoe; cableway; concrete mixer, 16S & up; derrick; crane; dragline; dredge; equipment maintenance mechanic; hoist-2 drums; locomotive crane; paving mixer; piledriver; road paver; roller on asphalt or brick (5 tons or over); shovel; sideboom cats; bulldozer; motor patrol; scraper; hydrolift crane, hydrolift truck, yard crane, cherry picker, etc.; foundation, boring & reaming machine; cement stabilizer; trenching machine; asphalt spreader; traxcavator & similar front end loading equipment with scoop or bucket of 1 cu. yd. or more capacity; tug boat op.; turnapull, euclid, DW-10 & other similar self-loading earth moving equipment; concrete pump (not pump crete)
GROUP 8 - Crane, 60 tons & over; crane, boom 100 ft. & over; piledriver, leads 100 ft. & over
GROUP 9 - Crane, 100 tons & over; crane, boom 150 ft. & over; piledriver leads 150 ft. & over

GROUP 10 - Crane, boom 250 ft. & over; piledriver, leads over 250 ft.

POWER EQUIPMENT OPERATORS - ZONE 7

GROUP 1 - Assistant master mechanic

GROUP 2 - Master mechanic

GROUP 3 - Oilers

GROUP 4 - Batch plant op.; mechanic helpers; oilers (drivers)

GROUP 5 - A-frame truck, except when working with ironworkers or pipefitters; air compressors, asphalt plant engineers; asphalt finisher, screed men; blade graders; boat op.; bullfloats, concrete joining machines; concrete mixers, 16s & under; concrete spreader; crushers; deck winch (1); distributors, asphalt "Ditch Witch" & similar equipment; electric elevators (inside); finishing machine; fireman; form grader; fork lifts; hoist, 1 drum, under 4 stories; power subgrader; pug mill; pull tractors; pump, pump crete; rollers, except on brick & asphalt; rubber tired front end loaders (with or without blade attachments) less than 1 cu. yd. capacity; scale op.; scoopmobile; snatch cats; spray machines; stabilizers, less than 3 drums; straddle buggy; track mahines & equivalent machines; tractors or bulldozers smaller than D-6

GROUP 6 - A-frame truck, when working with ironworkers & pipefitters; bulldozers D-6 & larger; cableways; concrete mixers, over 16-s paving machines; cranes, derricks; draglines & clam shells; deck winches (2); gradealls; hi-ho & similar type equipment; hoist, 1 drum, 4 stories & over; hoist, 2 drums or more, hydro cranes; mechanic; motor patrols; piledrivers; rollers on brick & asphalt; rubber tired front end loader, with or without attachments, 1 cu. yd. capacity or more; scrapers; shovels; backhoes (all types); sideboom cats; stabilizers, 3 drums or more; traxcavators; trenching machines; unit op.; welder, journeymen; well point systems (gas, diesel, electric, etc.); concrete pump-boom combinations

ZONE 1 - Bienville, Bossier, Caddo, Claiborne, DeSoto, Red River & Webster Parishes

ZONE 2 - Avoyelles, Evangeline, Grant, LaSalle, Natchitoches, Rapides, Sabine & St. Landry & Winn Parishes

ZONE 3 - All of Acadia, Lafayette & Vermilion Pars.; Parts of Iberia, St. Martin & St. Mary Pars. (west of a line drawn from the city of Berwick to the Junction of Iberville-St. Landry Pars. border)

ZONE 4 - Caldwell, Catahoula, Concordia, East Carroll, Franklin, Jackson, Lincoln, Madison, Morehouse, Ouachita, Richland, Tensas, Union & West Carroll Parishes

ZONE 5 - Allen, Beauregard, Calcasieu, Cameron, Jefferson Davis & Vernon Pars

ZONE 6 - All of Ascension, East Baton Rouge, East Feliciana, Iberville, Pointe Coupee, St. Helena, West Baton Rouge & West Feliciana Pars.; Parts of Assumption & St. James Pars. (northwest of a straight line drawn from the city of Berwick to the city of Lutcher); Parts of Iberia & southern & northern St. Martin Pars. (east & west of a line from the city of Berwick north to the eastern boundary of the city of Krotz Springs); Parts of Livingston, Tangipahoa & Washington Pars. (west of a line drawn north from the city of Lutcher to the east side of the city of Hammond to the La.-Miss. border)

ZONE 7 - All of Jefferson, Lafourche, Orleans, Plaquemines, St. Bernard, St. Charles, St. John the Baptist, St. Tammany & Terrebonne Pars.; Parts of Assumption, Livingston, St. James, St. Martin, St. Mary, Tangipahoa & Washington Pars. (that portion of southeastern La. bounded on the north by the State of Miss., on the east by the State of Miss. & the Miss. Sound, on the south by the Gulf of Mexico & on the west by a line drawn as follows: beginning at a point on the La.-Miss. boundary in Washington Par., due north of the town of Hackley, thence southwesterly in a straight line to a point on the east bank of the Miss. River at the southernmost point of Lutcher (including Gramercy in the area), thence in a more southwesterly direction in a straight line to midstream of the Atchafalaya River at Morgan City-Berwick (including Morgan City in this area), thence southerly on a line following midstream of the Atchafalaya River to Atchafalaya Bay & in a line due south to the Gulf of Mexico)

DECISION NO. PA78-3069

Welders - receive rate prescribed for craft performing operation to which welding is incidental.

PAID HOLIDAYS (Where Applicable):
A-New Year's Day; B- Memorial Day; C-Independence Day; D-Labor Day; E-Thanksgiving Day; F-Christmas Day.

FOOTNOTES:
a. 9 paid holidays, A through F and Washington's Birthday, Good Friday and Christmas Eve provided the employee has worked 45 full days for the employer during the 120 days prior to the holiday, and is available for work the days preceding and following the holiday.

b. Employer contributes 8% basic hourly rate for 5 years or more of service or 6% basic hourly rate for 6 months to 5 years of service as Vacation Pay Credit.

c. Six paid holidays: A through F, plus the Friday after Thanksgiving.

d. Paid holidays: Election Day and Labor Day.

e. Employer contributes $58.37 per month to a Health and Welfare.

f. Employer contributes $43.34 per month to a Pension Fund.

g. Paid Holidays: Washington's Birthday; Good Friday; Memorial Day; Labor Day; Presidential Election Day; Veteran's Day and Thanksgiving Day.

CLASSIFICATIONS DEFINITIONS

GROUP 1 - Machines doing hook work, any machine handling machinery, cable spinning machines, helicopters, machines similar to the above

GROUP 2 - All types of cranes, all types of backhoes, cableways, draglines, keystones, all types of shovels, derricks, trench shovels, trenching machines, hoist with two towers, pavers 21E and over all types overhead cranes, building hoists (double drum) gradalls, mucking machines in tunnel, all front end loaders 3-½ c.y. and over, tandem scrapers, pippin type backhoes, boat Captains, batch plant operators (concrete) drills, self-contained rotary drills, fork lift, 20 ft lift and over machine to the above

GROUP 3 - Conveyors, building hoists (single drum) scrapers and tournapulls, spreaders, high or low pressure boilers, concrete pumps, well drillers, bulldozers and tractors, asphalt plant engineers, roller (high grade finishing), ditch witch type trencher, all loaders under 3-½ cu. yds., mechanic-welders, motor patrols, drill helper-self contained rotary drills, core drill operators, forklift trucks under 20 ft lift, machines similar to the above

GROUP 4 - Welding machines, well points, compressors, pumps, heaters, farm tractors, form line graders, fine grade machines, road finishing machines, concrete breaking machines, rollers, seaman pulverizing mixer, power broom, seeding spreader, tireman (for power equipment), machines similar to the above

GROUP 5 - Fireman, grease truck

GROUP 6 - Oilers and deck hands (personnel boats), core driller helper

GROUP 7 - All machines with booms (including jib, masts, leads, etc.): 100 ft and over

GROUP 7A - 150 ft. and over

GROUP 7B - 200 ft. and over

FOOTNOTE:
a. Paid Holidays: New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day provided the employee works the day before and after the holiday.

SUPERSEDEAS DECISION

STATE: Pennsylvania COUNTY: Erie
DECISION NO.: PA78-3071 DATE: Date of Publication
Supersedes Decision No. PA78-3048, dated August 11, 1978, in 43 FR 35865.
DESCRIPTION OF WORK: Building Erection and Foundation Excavation, (does not include single family homes and garden type apartments up to and including 4 stories).

POWER EQUIPMENT OPERATORS

Class 1: Auger (truck or tractor mounted), Austin Western or similar type, Austin Western or similar type up to 25 tons (25 tons or over requires an oiler), Backhoe, Backhoe (under 5/8 yd.), Batch Plant - Automatic, Boom - side, Cableways, Conveyors Belts - up to 4 floors, Conveyor Belts - over 4 units, Crane - Tower (climbing type), Derrick (all types), Derrick - Traveler, Dragline, Drill - Caisson, Electro Matic or similar, Gradall (remote control or otherwise), Helicopter, Helicopter - hoisting operating Hi-lift (3 yards or over), Hoist - on 50 ft. stack or over, Hoist on slip form job, Hoist - hod (single cage), Hoist - hod (2 cages up to 10 floors), Hop-to or similar type with 360 degree swing, Hop-to or similar type with 360 degree swing under 5/8 yd., Koehring Scooper, Kocal or similar type, Leverman, Mix Mobile or similar type, Mixer - concrete paving, Mixer - paving (self-propelled), Multiple Bowel Machines or Multi-engine, Pile Driver - Franki or similar type, Pile Driver (when assistance is required it will be an operating engineer), Placer - belt (concrete), Plant - Central Mix, Quad Nine, Shovels (all types), Shovels under 5/8 yd.) Tractors - Boom mounted (all types), Tugboat, Whirlers, Boat - job work (inboard or outboard), Bull-dozer, Carrier Ross or similar type, Compactor - (with blade attached), Curb Builder - self-propelled, Drill - Core, Drill - Well and Core (truck mounted), Engineer - mantenance (daily rated) Grader, Grader - Elevating, Greaser - equipment, Hi-lift (less than 3 yards), Hoist 2 drums in one unit, Hop-to or similar type with 180 degree swing, Tractors (all types with hydraulic back-hoe attached), Cranes, Tower, Metro Chip Harvester (or similar type), Mixer - paving mixer - mortar - over 10 cu. ft., Plant - crushing and screening, Pump-crete - mobile or similar type, Road Builder - Automatic, Scoop - self-powered and Tractor drawn (single bowl), Spray Cure Machine (power drivern), Spreader, Steam Jenny (or similar type), Syphon (steam or air) Tractors (all types with hydraulic backhoe attached)

DECISION NO. PA78-3071

POWER EQUIPMENT OPERATORS (Cont'd)

Class 1-A: Austin Western or similar type with jib + 25¢, Austin Western or similar type 25 tons or over with jib + 25¢, Cranes (excluding over head cranes), Crane - placed on building structure, Hoist single cage with Chicago Boom attached + 25¢, Engineer - lead, Hoist hod (2 cages over 10 floors), Cranes - 100 feet to 150 feet.

Class 1-B: Cranes - 150 feet to 200 feet

Class 1-C: Cranes - 200 feet and over

Class 2: Backfilling Machine, Boat - material or personnel, Compressor and air pump, Compressor and air tugger, Compressor and gunite machine (combination), Compressors and sandblasting unit (combination), Compressors (two), crane - overhead, Fork lift - elevating - lull or similar type generators - two Grade - sub, Jumbo - power, Layer - cable, Layer - pipe - no joint, Lift Slab Machine, Locomotive Machines - other minor, machines - small (two), Mucking Machine, Mobile Tower, Pipe - bending Machine (pipeline only), Pipe - cleaning machine, Pipe - wrapping machine, Plant - asphalt operator, Plant - portable crushing and screening, Plant - refrigeration pump - grout, Spreader-concrete, Asphalt and Stone, Well point systems (Section IC), Winch Truck (handling steel), Wire wrapping machine - pre-stress, Drill - Davey or similar, Drill - truck mounted and/or core drill for testing, Elevator (new buildings and major remodeling of old), Hoist one drum, Paver - asphalt, Post Driver - guard rail (other than truck mounted), post Driver - guard rail (truck mounted), Pumpcrete or similar type (not self-propelled), Tire Repairman, Trencher Machine, Welder, Welding Machines (up to and including 4)

Class 3: Boiler, Breaker - pavement (self-propelled or ridden), Compactor (ridden or self-propelled), Crane - carry, Crusher - stone, Drill - well (horizontal), Drill (self-propelled and self contained), Elevator (alterations of old buildings), Finisher - broom (C.M.I. or similar type), Finishing Machine and Spreader (concrete), Forklifts (ridden or self-propelled), Form Line Machine, Minor equipment (all other), Motorman, Pipe Dream, Roller, Saw - concrete (ridden or self-propelled), Soil Stabilizer, Tractors (when used for snaking and hauling), Truck - winch, Tugger

DECISION NO. PA78-3071

POWER EQUIPMENT OPERATORS (Cont'd)

Class 4: Compressors single over 65 cu. ft. regardless of power used, Hoist - monorail (regardless of power used), Pump (over 1½ inch discharge regardless of power used), Oiler - truck crane (50 tons or over and Fireman)

Class 5: Blaster - water, Boring Machine, Broom - power, Compressor - 65 cu. ft. or under (regardless of power used) (2 gun painters), Conveyor - 1 story (regardless of power used), Conveyor (over 1 and up to 3 units regardless of power used), Generator (4 KW or over), Hauck Machine or similar type, Heaters - up to and including four), Jack and Pump - motor hydraulic, Jenny - steam (or similar type), Ladevator, Mixer - concrete (regardless of power used), Mixer - mortar (over 10 cu. ft. regardless of power used), Mobile - track (or similar type), Mulching Machine, Pin Puller, Pulverizer, Pump - 1½ inch discharge or less, Regulator - Ballast, Seeding Machine, Shoulder, Spray Cure Machine, Syphon - (steam or air), Tie Tamper (multiple heads), Tractor - farm (when used for landscaping), Welding machine - single (300 amp. or over), Oiler, Truck Crane.

Class 6: Brake man, Deck hand, Helicopter, signalman, Oiler, Mechanic helper

Class 6-A: Oiler, Truck crane

Class 6-B: Oiler, Truck crane (50 tons or over)

DECISION NO. PA78-3071

PAID HOLIDAYS: (Where Applicable)
A-New Year's Day; B-Memorial Day; C-Independence Day; D-Labor Day; E-Thanksgiving Day; F-Christmas Day.

FOOTNOTES:

a. Employer contributes 4% basic hourly rate for 5 years or more of service or 6% basic hourly rate for 6 months to 5 years of service as Vacation Pay Credit.

b. Holidays: A through F, plus Friday after Thanksgiving Day.

c. Employer agree to contribute $67.94 per month to a Health and Welfare Fund.

d. Employer agree to contribute $20.00 per week to a pension fund.

e. One week vacation after 1 years work; two weeks vacation after five years of service.

*POWER EQUIPMENT OPERATORS - AREA DEFINITIONS: See "Area Definition" - following Truck Drivers

POWER EQUIPMENT OPERATORS
Building Construction

Group 1: Assistant to engineer; Elevator operator; Hydraulic monitor; Material loader or conveyor operator

Group 2: Air compressor operator; Concrete mixer operator (skip-type); Concrete pump or pumpcrete gun operator; Generator operator (100 KW or over); Mixer box operator or similar (concrete or asphalt plant continuous mix); Pump operator; Truck crane oiler

Group 3: Front end loader (up to and including 1 cu. yds. struck M.R.C.); Hoist operator - 1 drum; Slip form pumps

Group 4: Heavy duty repairman and welder

POWER EQUIPMENT OPERATORS (Cont'd)
Building Construction

Group 5: Air Compressor Operator (2 or more compressors); Signalman; Small Rubber-tired Tractor; Small self-propelled pneumatic rollers; Towermobile Operator; Welding Machine (2 or more); Concrete Conveyor, building site

Group 6: A Frame Truck and Tugger Hoist; Fork Lift (construction jobsite); Kolman Loader and similar; Loader Operator (over 1 cu. yd. up to and including 2 cu. yds. struck M.R.C.); McGinnis Internal Full Slab Vibrator (on airports, highways, canals and warehouses); Mixermobile Operator; Ross Carrier or similar type; Small rubber-tired tractor (with attachments, including backhoe); Small rubber-tired Trenching Machine; Small Tractor with boom; Gradesetter

Group 7: Bridge Crane; Concrete Mixer Operator (paving or batch plant); Drilling Machine Operator (well or diamond); Dual Drum Mixers; Hoist Operator - 2 drums; Lull High-lift (40 ft. or similar); Roller Operator or self-propelled Compactors; Tractor Operator (Sheep's foot and compacting equipment); Trenching Machine; Concrete Conveyor or Concrete Pump, Truck or equipment mounted (boom length to apply); Self-propelled Compactor with or without dozer

Group 7-A: Tractor Operator (bulldozer or tractor-drawn scraper or drag-type Shovel or boom attachment, up to and including D-7 or similar)

Group 8: Chicago Boom (including Stiff Leg and Sheer Pole); Concrete Batch Plant (multiple units); Loader Operator (over 2 cu. yds. up to and including 5 cu. yds. struck M.R.C.); Self-propelled Boom type Lifting Device (center mount) (10 ton capacity or less M.R.C.)

Group 8-A: Heavy Duty Repairman or Welder; Tractor Operator (bulldozer or tractor-drawn scraper or drag-type shovel or boom attachment, larger than D-7 or similar)

Group 9: Motor Patrol

Group 10: Loader Operator (over 5 cu. yds. up to and including 12 cu. yds. struck M.R.C.); Universal Equipment Operator (shovel, backhoe, dragline, derrick, derrick barge, clamshell, crane, grade-all, etc.) (up to and including 5 cu. yds. struck M.R.C.); Self-propelled Boom type Lifting Device (center mount); Tower Crane (Linden type or similar designs and capacity)

Group 11: Remote Controlled Cranes and Derricks; Tower Cranes Mobile

Group 11-A: Loader Operator (over 12 cu. yds. struck M.R.C. up to 18 cu. yds. M.R.C.)

Group 11-B: Operator of helicopter (when used in erection work)

Group 12: Cranes over 125 tons

*SEE AREA DEFINITION following TRUCK DRIVERS

Underground and Shaft Work:
Underground Work: Employees working underground shall receive $.30 per hour in addition to their straight-time hourly wage rate.
Shaft Work: Employees working within Shafts, Stopes and Raises shall receive $.50 per hour in addition to their straight-time hourly rate.

POWER EQUIPMENT OPERATORS (Cont'd)
Heavy and Highway Construction

Group 1: Asphalt plant fireman; Assistant to engineer; Brakeman-locomotive; Elevator operator; Fireman; Hydraulic monitor; Material loader or conveyor operator; Partsman-field; Repairman helper-field; Chainman; Rodman

Group 2: Air compressor operator; Concrete mixer operator (skip-type); Concrete pump or pumpcrete gun operator; Engineer, dinky operator; Generator operator (100 KW or over); Mixer box operator or similar (concrete or asphalt plant continuous mix); Pump operator; Screedman; Self-propelled, automatically applied concrete curing machine (on street, highways, airports and canals); Truck crane oiler; Boxman, asphalt plant

Group 3: Ballast jack tamper; Ballast regulator; Ballast tamper-multiple-purpose; Front end loader (up to and including 1 cu. yd. struck MRC); Hoist

Group 4: Slurry Seal Machine or similar

POWER EQUIPMENT OPERATORS (Cont'd)
Heavy and Highway Construction

Group 5: Air Compressor Operator (2 or more compressors); Batch Operator (asphalt plant); Motorman; Pavement Breaker Operator (Essco and similar type); Shuttlecar; Signalman; Small rubber-tired tractor; Small self-propelled pneumatic rollers; Tower-mobile Operator; Welding Machine (2 or more); Lube and Service Engineer (mobile and grease rack); Concrete Conveyor (building site)

Group 6: A-Frame Truck and Tugger Hoist; Concrete Saws (self-propelled units on streets, highways, airports and canals); Engineer-locomotive; Fork Lift (construction jobsite); Kolman Loader (and similar); Loader Operator (over 1 cu. yd. up to and including 2 cu. yds. struck MRC); Maginnis Internal Full Slab Vibrator (on airports, highways, canal and warehouses); Mixermobile Operator; Pipe Bending Machine Operator; Pipe Cleaning Machine; Pipe Wrapping Machine; Power Jumbo Operator (setting slip forms, etc., in tunnels); Road Mixing Machine Operator; Ross Carrier or similar type; Small rubber-tired tractor (with attachments, including backhoe); Small rubber-tired Trenching Machine; Small Tractor with boom; Surface Heater (self-propelled); Gradesetter

Group 7: Bridge Crane; Chip Box Spreader (Flaherty-type and similar); Concrete Mixer Operator (paving or batch plant); Deck Engineer (Marin); Drilling Machine Operator (well or diamond); Dual Drum Mixers; Elevating Grader Operator; Fuller Kenyon Pump and similar types; Heavy Duty Rotary Drill Rigs (such as Quarry Master, Joy Drills or equal); Hoist Operator - 2 drums; Lull High Lift (40 ft. or similar); Mechanical Finisher Operator (asphalt or concrete); Mine or Shaft Hoist; No-Joint Pipe Laying Machine; Pavement Breaker; Pavement Breaker with Compressor Combination; Pavement Breaker, truck mounted, compressor combination; Refrigeration Plant; Roller Operator or self-propelled Compactor; Self-propelled Pipeline, Wrapping Machine (Perault, CRC, or similar types); Slusher Operator; Tractor Compressor Drill combination; Tractor Operator (Sheep's foot and compacting equipment); Trenching Machine; Concrete Conveyor or Concrete Pump, truck or equipment mounted (boom length to apply); Mechanical Burm, Curb and/or Curb and Gutter Machine, Concrete or Asphalt; Self-propelled Compactor with or without dozer; Drilling and Boring Machinery, Horizontal and Vertical (not to apply to waterliners, wagon drills or jackhammers); Self-propelled Compactor (with multiple-propulsion power units)

Group 7-A: Side Boom Operator; Tractor Operator (Bulldozer or tractor-drawn scraper or drag-type shovel or boom attachment, up to and including D-7 or similar); Instrument Man

POWER EQUIPMENT OPERATORS (Cont'd)
Heavy and Highway Construction

Group 8: Chicago Boom (including Stiff Leg and Sheer Pole); Combination Slusher and Motor Operator; Concrete Batch Plant (multiple units); Do-more Loader and Adams Elegrader; Euclid Loader and similar types; Koehring Skooper (or similar) (up to 5 cu. yds. struck MRC); Loader Operator (over 2 cu. yds. up to and including 5 cu. yds. struck MRC); Mechanical Trench Shield; Mucking Machine Operator; Rubber-tired Scrapers (under 35 cu. yds. struck MRC); Saurman-type Dragline (under 5 cu. yds. struck MRC); Self-propelled Boom-type Lifting Device (center mount) (10 ton capacity or less MRC); Self-propelled Elevating Grade Planer; Soil Stabilizer (P&H or equal); Subgrader (automatic subgrader - fine grader); Tri-batch Paver; Tunnel Mole (or similar); Asphalt Plant Engineer; Engineer, crushing plant; Combination Backhoe and Loader (3/4 yds. and over struck MRC)

Group 8-A: Heavy Duty Repairman or Welder; Tractor Operator (bulldozer or tractor-drawn scraper or drag-type shovel or boom attachment, larger than D-7 or similar)

Group 9: Combination Mixer and Compressor (gunite); Highline Cableway Signalman; Motor Patrol; Tower Crane (Linden-type or similar designs and capacity)

Group 10: D.W. 10, 20, etc. (Tandem Scrapers); Highline Cableway Operator; Lift Slab Machine (Vagtborg and similar types); Loader Operator (over 5 cu. yds. up to and including 12 cu. yds. struck MRC); Locomotive (over 100 tons) (single or multiple units); Prestress Wire Wrapping Machine; Saurman-type Dragline (5 cu. yds. and over struck MRC); Tractor (tandem scrapers); Universal Equipment Operator (shovel, backhoe, dragline, derrick, derrick barge, clamshell, crane, gradeall, etc.) (up to and including 5 cu. yds. struck MRC); Self-propelled Boom-type lifting device (center mount (over 10 tons)

Group 11: Automatic Concrete Slip Form Paver; Koehring Skooper (or similar) (5 cu. yds. and over struck MRC); Multiple Propulsion power unit earth movers (up to and including 75 cu. yds. struck MRC); Power Equipment with Shovel-type controls (over 5 cu. yds. up to and including 7 cu. yds. struck MRC); Remote-controlled Cranes and Derricks; Rubber-tired Scrapers (35 cu. yds. and over struck MRC); Slip Form Paver (concrete or asphalt); Tandem Tractors; Tower Cranes Mobile

Group 11-A: Loader Operator (over 12 cu. yds. struck MRC up to 18 cu. yds. MRC); Multi-purpose earth moving machines (2 or more scrapers) (over 75 cu. yds. struck MRC); Power Shovels and Draglines (over 7 cu. yds. struck MRC)

Group 11-B: Operator of Helicopter (when used in erection work); Loader (18 cu. yds. and over)

Group 12: Cranes (over 125 tons)

AREA DEFINITIONS

Laborers
(Heavy and Highway Construction)
Power Equipment Operators
(Building Construction)
(Heavy and Highway Construction)
Truck Drivers

Area 1: All areas included in the description defined below which is based upon township and range lines as referenced to the Salt Lake City Base and Meridian:

Commencing at the intersection of the Utah/Nevada border and the Southerly line of township 35 south;
Thence easterly to the S.E. corner of township 35 south, range 17 west;
Thence northerly to the S.E. corner of township 34 south, range 17 west;
Thence easterly to the S.E. corner of township 34 south, range 16 west;
Thence northerly to the S.E. corner of township 30 south, range 16 west;
Thence easterly to the S.E. corner of township 30 south, range 15 west;
Thence northerly to the S.E. corner of township 25 south, range 15 west;
Thence easterly to the S.E. corner of township 25 south, range 14 west;
Thence northerly to the S. E. corner of township 24 south, range 14 west;
Thence easterly to the S.E. corner of township 24 south, range 13 west;
Thence northerly to the S.E. corner of township 23 south, range 13 west;
Thence easterly to the S.E. corner of township 23 south, range 12 west;
Thence northerly to the S.E. corner of township 18 south, range 12 west;
Thence easterly to the S.E. corner of township 18 south, range 11 west;
Thence northerly to the S.E. corner of township 16 south, range 11 west;
Thence easterly to the S.E. corner of township 16 south, range 10 west;
Thence northerly to the S.E. corner of township 15 south, range 10 west;
Thence easterly to the S.E. corner of township 15 south, range 9 west;

POSTED STOCKYARDS

Rates and Charges

V 43 / 195
OCT 6 1978

[3410-02]

Title 9—Animals and Animal Products

CHAPTER II—AGRICULTURAL MARKETING SERVICE (PACKERS AND STOCKYARDS), DEPARTMENT OF AGRICULTURE

PART 203—STATEMENTS OF GENERAL POLICY UNDER THE PACKERS AND STOCKYARDS ACT

Posted Stockyards; Rates and Charges

AGENCY: Packers and Stockyards—Agricultural Marketing Service, Department of Agriculture.

ACTION: Statement of general policy.

SUMMARY: On March 30, 1978, Packers and Stockyards—AMS issued a proposed statement of general policy and revisions to the regulations issued under the Packers and Stockyards Act (7 U.S.C. 181 et seq.) (43 FR 13488). Comments were elicited and considered in connection with the new statement of general policy which follows. The new policy reduces the Department's regulations of stockyard rates and charges by providing that the agency will not investigate the reasonableness of rates and charges stockyard operators and market agencies assess livestock producers unless a valid complaint is filed with the Department or compelling circumstances warrant such an investigation. Stockyard operators and market agencies must post current tariffs in a place at the market conspicuous to consignors and file a copy with the Department. At least 10 days before tariffs are to be altered, the new rates and charges must be posted in a place at the markets conspicuous to consignors, and a copy filed with the Department. The proposed September 30, 1978, deadline for conversion to per head rates is rescinded since Congress has enacted legislation authorizing percentage tariffs.

EFFECTIVE DATE: Policy statement will be effective October 6, 1978.

FOR FURTHER INFORMATION CONTACT:

Jack W. Brinckmeyer, Chief, Rates, Services, and Facilities Branch, Livestock Marketing Division, Packers and Stockyards, AMS, USDA, Washington, D.C. 20250, 202-447-4336.

SUPPLEMENTARY INFORMATION: On March 30, 1978, a notice of a proposal was published in the FEDERAL REGISTER (43 FR 13488) concerning rates and charges at posted stockyards. Over 700 comments were filed in response to the notice. More than 500 comments were from firms subject to the Packers and Stockyards Act. Livestock producers and producer organizations filed over 170 comments. The remainder were from bankers, accountants, Members of Congress, and others.

I. Analysis

Some of the comments received opposed any form of regulation of rates while some opposed any reduction in regulation. Under the currently effective provisions of the Packers and Stockyards Act and case law, the Department is precluded from total deregulation of rates.

The proposed policy statement and revision of the regulations would have required a 30-day notice to livestock consignors before a tariff would be accepted for filing. The 30-day period was designed to allow consignors time to file any complaints they might have with the Department. Comments from most stockyard operators, some market agencies, and some auction markets opposed any additional notice requirements beyond those currently contained in the Act because they said the 30-day requirement would increase operating costs and would invite complaints from livestock producers concerning tariff charges. Some comments supported the notice requirement. The 30-day notice proposal has not been adopted since the majority of the comments were opposed to lengthening the notice period; the statute now requires only a 10-day notice period; and interested persons may file complaints during the 10-day period or thereafter.

Under the currently effective provisions of the Act, all market agencies conducting business at a terminal stockyard are required to assess rates and charges under the same tariff schedule. Comments received from market agencies at terminal stockyards in response to the Department's proposed decrease in rate regulation opposed any change in this respect. The legislative history of the recent amendments of the Act (Pub. L. 95-409) makes it clear that the amendments do not change the authority of the Secretary to prescribe or require uniform rates and charges by all market agencies operating at a particular stockyard. Accordingly, no change is being made in the requirement for uniform rates and charges at a particular stockyard. The rulemaking proposal published on March 30, 1978, included a requirement that all tariffs be on a per head basis on or before September 30, 1978. Legislation enacted by the Congress authorizes percentage tariffs. Therefore, the September 30, 1978, conversion deadline is rescinded. Tariffs containing percentage charges will be accepted for filing.

II. Effect on Existing Program

The present rate regulation program of the Department involves investigation of the business activities of each firm on an individual basis to determine if the rates and charges are just, reasonable, and nondiscriminatory. The investigation determines fair return on investment, reasonable expenses for operating the business, and compensation for any personal services that may be furnished by the owner. Rates and charges are established to provide funds to cover these costs of providing stockyard services. The policy to be established will eliminate the investigation process concerning the reasonableness of the rates and charges except when a valid complaint is filed or compelling circumstances warrant such an investigation. The notice proposed that there be no investigation unless a valid complaint is filed. However, in view of the duty imposed by the statute, it is found necessary to amend the proposal by providing for investigation under compelling circumstances in the event unforeseen circumstances develop requiring an investigation in order to fulfill the statutory duty.

Based on statements received by the Department at oral hearings in early 1978 and other data, it is likely that the new procedure will result in some increases in market charges. Many witnesses believed, however, that sufficient competition exists between markets to hold charges at a reasonable level.

The Deputy Administrator issues a new statement of general policy designated as 9 CFR 203.17 as set forth below.

Dated: October 3, 1978.

CHAS B. JENNINGS,
Deputy Administrator,
Packers and Stockyards, AMS.

A new statement of general policy 203.17 (9 CFR 203.17) is issued to read as set forth below:

§ 203.17 Statement of general policy with respect to rates and charges at posted stockyards.

(a) Requests have been received from stockyard operators, market agencies, and livestock producers urging a reduction of rate regulation at posted stockyards. Their requests are based on the belief that competition among markets will set a level of rates and charges fair to both the market operator and to the livestock producer. Packers and Stockyards—AMS will accept for filing tariffs containing any level of charges after ten (10) days' notice to the public and to the Secretary as required by the Act.

(b) Packers and Stockyards—AMS will not investigate the level of the

rates and charges established by stockyard owners and market agencies for reasonableness except upon receipt of a valid complaint or under compelling circumstances warranting such an investigation. Stockyard owners and market agencies will have substantial flexibility in setting their own rates and charges.

(c) Rates and charges for market agencies operating on the same posted stockyard shall be assessed under the same tariff.

(d) Complaints filed about the reasonableness of rates and charges will be investigated to determine the validity of such complaints and appropriate action taken if warranted.

(e) Packers and Stockyards—AMS will continue to insure that the schedules of rates and charges filed with the Department are applied uniformly and in a nondiscriminatory manner.

(f) Sections 201.17 through 201.26 of the regulations issued under the Act pertaining to schedules of rates and charges will be amended as appropriate to conform with this policy statement.

[7590-01]

NUCLEAR REGULATORY COMMISSION

COMPLIANCE WITH E.O. 11988 ON FLOODPLAINS

Plans to Revise Regulatory Guides

Executive Order 11988 expresses the policy of the Federal Government that Federal agencies should attempt to reduce the risk of flood loss and to minimize the effects of floods by avoiding, where practicable, development in floodplains. Under the order, Federal agencies with responsibilities for conducting Federal activities and programs affecting land use are required to evaluate the potential effects of any action they might take in a floodpain. In addition, each agency is to amend its regulations within one year to comply with the order and must explain what means the agency will employ to pursue non-hazardous uses of riverine, coastal, and other floodplains in connection with the activities under its authority. The NRC staff routinely considers the environmental impact of its action pursuant to the requirements of the National Environmental Policy Act of 1969, as amended (NEPA). The NRC believes that the procedures and purposes of the order can be appropriately accommodated as a part of the agency's compliance with NEPA. NRC's NEPA regulations in 10 CFR Part 51 do not specify in detail the kinds of environmental considerations that are to be addressed in the NEPA review. However, these matters are addressed in regulatory guides and other staff documents. The NRC has identified the following regulatory guides and related staff documents for revision to specifically include floodplain considerations:

1. Regulatory Guide 4.2: Preparation of Environmental Reports for Nuclear Power Stations (Revision 2).
2. Regulatory Guide 4.7: General Site Suitability Criteria for Nuclear Power Stations (Revision 1).
3. Regulatory Guide 3.8: Preparation of Environmental Reports for Uranium Mills.
4. NUREG-0180: Early Site Review, Procedures and Possible Technical Review Options.
5. NUREG-0158: Draft Environmental Standard Review Plans for the Environmental Review of Construction Permit Applications for Nuclear Power Plants.

Regulatory guides are periodically revised to reflect public comments and licensing experience. As each of the above guides is revised, floodplain considerations will be incorporated into the revision. Also, as new guides and regulations are developed, floodplain considerations will also be included. In the meantime, specific technical instructions have been given to NRC staff that will result in floodplain considerations being included in individual licensing reviews.

Dated at Washington, D.C. this 28th day of September, 1978.

For the Nuclear Regulatory Commission.

SAMUEL J. CHILK,
Secretary of the Commission.

Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408

NOTE: As of August 14, 1978, Community Services Administration (CSA) documents are being assigned to the Monday/Thursday schedule.

federal register
Area Code 202 Phone 523-5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended, 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

AIR TAXI AND COMMERCIAL OPERATORS
DOT/FAA revises requirements for regulatory review program to provide for higher level of safety and greater operational flexibility; effective 12–1–78 (Part V of this issue) 46742
DOT/FAA proposes amendment to allow for the design capabilities of propeller driven multiengine small airplanes to be more fully utilized; effective 12–11–78 (Part IV of this issue) ... 46734

FREEDOM OF INFORMATION
DOE/FERC amends regulations to provide a uniform manner of addressing and marking requests and appeals with the Commission; effective 10–2–78 46528

CERTAIN IMPORTED FISHING TACKLE
Office of Special Representative for Trade Negotiations solicits public comment on suspension of duty-free treatment; comments by 10–20–78 46612

CULTURAL RESOURCES
Interior/RB adopts regulations to establish procedures in the identification, protection, preservation and maintenance; effective 10–10–78 46538

PESTICIDES
EPA establishes tolerance for residues of *N*-(mercaptomethyl) phthalimide *S*-(o,o-dimethyl phosphorodithioate); effective 10–10–78 46537

LIFE CYCLE COSTING IN GOVERNMENT PROCUREMENT
GSA/FSS solicits comments on research support to extend use 46584

CANNED PEACHES
HEW/FDA announces an amendment to a temporary permit for market testing; effective 10–10–78 46584

CERTAIN THERMOMETER SHEATH PACKAGES
ITC gives notice of prehearing conference 1–11–79 and hearing 1–16–79 46588

GRAS SUBSTANCES
HEW/FDA proposes removing certain hypophosphite as direct human food ingredients; comments by 1–8–79 46550

MEETINGS—
AID: Board for International Food and Agriculture Development, 10–26–78 46616
CRC: Alaska Advisory Committee, 10–28–78 46559
Arkansas Advisory Committee, 11–3 and 11–4–78 46559
Idaho Advisory Committee, 11–4–78 46559
Indiana Advisory Committee, 10–30–78 46559
Iowa Advisory Committee, 11–9–78 46559
Maine Advisory Committee, 10–26–78 46560
Nebraska Advisory Committee, 10–23–78 46560
New Jersey Advisory Committee, 10–23–78 46560
New York Advisory Committee, 10–20 and 11–6–78 46560
Oregon Advisory Committee, 10–30–78 46560
Pennsylvania Advisory Committee, 11–16–78 46561
Regional Advisory Committee, 11–2 and 11–3–78 46561
Vermont Advisory Committee, 10–24–78 46561
Washington Advisory Committee, 10–21–78 46561
Commerce/Census: Census Advisory Committee of the American Marketing Association, 10–31–78 46562
Defense/Army: Winter Navigation Board on Great Lakes—St. Lawrence Seaway, 10–26–78 46562

contents

THE PRESIDENT

Executive Orders

Equal employment opportunity, contract compliance functions; consolidation 46501

EXECUTIVE AGENCIES

AGENCY FOR INTERNATIONAL DEVELOPMENT

Notices

Authority delegations:
Malawi and Zambia, Principal Diplomatic Officer 46616

Meetings:
International Food and Agricultural Development Board 46616

AGRICULTURAL MARKETING SERVICE

Proposed Rules

Celery grown in Fla 46549

AGRICULTURE DEPARTMENT

See Agricultural Marketing Service; Animal and Plant Health Inspection Service; Farmers Home Administration; Federal Grain Inspection Service; Soil Conservation Service.

ANIMAL AND PLANT HEALTH INSPECTION SERVICE

Rules

Animal and poultry import restrictions:
African swine fever; pork and pork products from Haiti 46516

ARMY DEPARTMENT

Notices

Meetings:
Winter Navigation Board 46562

ARTS AND HUMANITIES, NATIONAL FOUNDATION

Notices

Meetings:
Humanities Panel 46608

CENSUS BUREAU

Notices

Meetings:
American Marketing Association Census Advisory Committee 46562
Surveys, determinations, etc.:
Canned food distributors' stock survey 46562

CIVIL AERONAUTICS BOARD

Notices

Hearings, etc.:
American Assn. Zoological Parks et al 46558
Atlanta-Seattle/Portland Subpart N proceeding 46558
Baltimore/Washington-St. Louis route proceeding 46558
Continental-Western merger case 46558
International Air Transport Association 46557
Texas International-National acquisition case 46559

CIVIL RIGHTS COMMISSION

Notices

Meetings, State advisory committees:
Alaska 46559
Arkansas 46561
Colorado et al 46561
Idaho 46559
Indiana 46559
Iowa 46559
Maine 46560
Nebraska 46560
New Jersey 46560
New York (2 documents) 46560
Oregon 46560
Pennsylvania 46561
Vermont 46561
Washington 46561

CIVIL SERVICE COMMISSION

Rules

Privacy Act; implementation 46505

Notices

Privacy Act; systems of records 46561

COAST GUARD

Rules

Marine engineering, etc.:
Address corrections, editorial changes, etc 46544
Safety zones:
Upper Bay, New York Harbor, N.Y. 46532

COMMERCE DEPARTMENT

See Census Bureau; Industry and Trade Administration.

DEFENSE DEPARTMENT

See also Army Department.

Rules

Uniformed Services University of Health Sciences:
Procedures and delegations 46531

Notices

Meetings:
Wage Committee 46563

ECONOMIC REGULATORY ADMINISTRATION

Rules

Oil; administrative procedures and sanctions:
Interpretations of General Counsel 46517

Notices

Environmental statements; availability, etc.:
Potomac Electric Power Co 46563

EDUCATION OFFICE

Notices

Meetings:

See also Economic Regulatory Administration; Energy Information Administration; Federal Energy Regulatory Commission.

Notices

Interpretation requests filed with General Counsel's Office 46576

ENERGY INFORMATION ADMINISTRATION

Notices

Energy emergency management information system; inquiry ... 46564

ENVIRONMENTAL PROTECTION AGENCY

Rules

Pesticide chemicals in or on raw agricultural commodities; tolerances and exemptions, etc.:
N-(Mercaptomethyl) phthalimide *S*-(*O*,*O*-dimethyl phosphorodithioate) 46537

Proposed Rules

Air quality implementation plans; approval and promulgation; various States, etc.:
Massachusetts 46553
Virginia 46554
Pesticide programs:
Pesticide products, conditional registration; meeting 46555

Notices

Pesticide; tolerances, registration, etc.:
Ambush, etc 46577
Terramycin (2 documents) 46579, 46580
Pesticide registration applications 46576

FARMERS HOME ADMINISTRATION

Rules

Guaranteed loan programs:
Rural housing program loans 46505

FEDERAL AVIATION ADMINISTRATION

Rules

Air carriers certification and operations:
Air taxi and commercial operators, etc.; regulatory review program 46742
Airworthiness directives:
Gulfstream American Corp 46523
Taylorcraft Corp 46523
Control area 46525
Control zone 46526

V 43 / 196 OC 10 78

Standard instrument approach procedures 46526
Transition areas (3 documents) 46524, 46525

Proposed Rules

Airworthiness standards:
Multiengine small airplanes, reciprocating and turbopropeller powered; increase in approved takeoff weights and passenger seating capacities 46734
Transition area 46549

Notices

Meetings:
Radio Technical Commission for Aeronautics 46617
Organization and functions:
Air Traffic Control Tower, Martha's Vineyard, Mass.; decommissioning 46617

FEDERAL COMMUNICATIONS COMMISSION

Proposed Rules

Practice and Procedure:
Fee refunds and future fee program; inquiry 46658

Notices

FM broadcast applications ready and available for processing 46581
Hearings, etc.:
Hub Oil Co., Inc 46581
Real estate brokers, mobile unit licensing; policy clarification . 46581
Satellite communications; unauthorized interception and use. 46581

FEDERAL ENERGY REGULATORY COMMISSION

Rules

Freedom of information; requests and appeals 46528

Notices

Hearings, etc.:
El Paso Natural Gas Co 46571
Kansas City Power & Light Co 46572
Mississippi Power & Light Co 46572
Montana Power Co. (2 documents) 46573, 46575
Pacific Interstate Transmission Co. et al 46574
Pennsylvania Electric Co 46566
Sun Oil Co 46574
Tennessee Gas Pipeline Co. et al 46567
Texas Eastern Transmission Corp. (2 documents) .. 46569, 46571
Texas Eastern Transmission Corp. et al 46574
Transwestern Pipeline Co 46575

FEDERAL GRAIN INSPECTION SERVICE

Notices

Meetings:
Grain Standards Act Advisory Committee 46557

FEDERAL HIGHWAY ADMINISTRATION

Proposed Rules

Motor carrier safety regulations:
Parts and accessories; front tire marking requirements ... 46555

Notices

Bridge tolls, etc.:
New York and New Jersey Port Authority 46617

FEDERAL MINE SAFETY AND HEALTH REVIEW COMMISSION

Rules

Procedural rules; interim; appeals 46531

FEDERAL RAILROAD ADMINISTRATION

Proposed Rules

Operating rules:
Workmen, blue signal protection; correction 46555

FEDERAL REGISTER OFFICE

Notices

National Fire Code; standards; inquiry 46582

FEDERAL RESERVE SYSTEM

Notices

Applications, etc.:
Carthage Bancshares, Inc 46582

FEDERAL SUPPLY SERVICE

Notices

Procurement:
Life cycle costing; research support to extend use; inquiry 46584

FEDERAL TRADE COMMISSION

Proposed Rules

Octane ratings of automotive gasoline; certification and posting; hearings time and place changed 46550

Notices

Premerger notification waiting periods; early terminations:
Sanyo Electric Co., Ltd., et al 46582

FISH AND WILDLIFE SERVICE

Rules

Hunting:
Upper Mississippi River Wildlife and Fish Refuge, Iowa and Wis 46548

FOOD AND DRUG ADMINISTRATION

Rules

Animal and human drugs; good manufacturing practices; correction 46528
Animal drugs, feeds, and related products:
Penicillin and procaine penicillin G aqueous suspension (injectable); correction 46529

Proposed Rules

GRAS or prior sanctioned ingredients:
Hypophosphites 46550
Human drugs:
Over-the-counter drugs; establishment of monograph for antiperspirant drug products 46694

Notices

Peaches, canned; temporary permit for market testing; extension 46584

GENERAL SERVICES ADMINISTRATION

See Federal Register Office; Federal Supply Service; Public Buildings Service.

HEALTH, EDUCATION, AND WELFARE DEPARTMENT

See Education Office; Food and Drug Administration; Health Resources Administration; National Institutes of Health.

HEALTH RESOURCES ADMINISTRATION

Notices

Meetings:
Advisory Committees; October 46584

HERITAGE CONSERVATION AND RECREATION SERVICE

Notices

Historic Places National Register; additions, deletions, etc.:
Alabama et al 46587

HOUSING AND URBAN DEVELOPMENT DEPARTMENT

Rules

Low-income housing:
Fair market rents; new construction and substantial rehabilitation; Puerto Rico and New York 46529

Proposed Rules

Low-income housing:
Fair market rents and contract rent automatic annual adjustment factors; existing housing, units larger than six bedrooms 46552

Notices

Meetings:
Tenant Participation in Management of Low-Income Housing Task Force 46586

INDUSTRY AND TRADE ADMINISTRATION

Notices

Scientific articles; duty free entry:
University of Alabama et al.; correction 46562

IMPROVING GOVERNMENT REGULATIONS

SCHEDULE OF SEMIANNUAL AGENDAS OF REGULATIONS

Executive order 12044, Improving Government Regulations, (43 FR 12661) requires that executive agencies publish semiannual agendas of significant regulations under development. At a minimum each agenda is to describe the regulations being considered by the agency, the need for and legal basis for the action being taken, the name and telephone number of a knowledgeable agency official, and the status of regulations previously published.

The agencies have chosen the following dates to publish their agendas. The Office of the Federal Register compiled this schedule as a public service.

Agency for International Development	Feb. 15, 1979; July 16, 1979.
Civil Service Commission	Dec. 1, 1978; May 1, 1979.
Federal Mediation and Conciliation Service	May 1, 1979; Oct. 1, 1979.
Federal Reserve System	Feb. 2, 1979; Aug. 2, 1979.
Treasury Department:	
Government Financial Operations Bureau	Mar. 30, 1979; Sept. 30, 1979.
Internal Revenue Service	Mar. 31, 1979; Sept. 30, 1979.
Public Debt Bureau	Apr. 15, 1979; Oct. 15, 1979.
All other offices and bureaus	Feb. 1, 1979; Aug. 1, 1979.

NOTE.—The entry for "All other offices and bureaus" of the Treasury Department was omitted from last week's listing.

[3195-01]

Title 3—The President

Executive Order 12086 • **October 5, 1978**

Consolidation of Contract Compliance Functions for Equal Employment Opportunity

By the authority vested in me as President by the Constitution and statutes of the United States of America, including Section 202 of the Budget and Accounting Procedures Act of 1950 (31 U.S.C. 581c), in order to provide for the transfer to the Department of Labor of certain contract compliance functions relating to equal employment opportunity, it is hereby ordered as follows:

1-1. *Transfer of Functions.*

1-101. The functions concerned with being primarily responsible for the enforcement of the equal employment opportunity provisions under Parts II and III of Executive Order No. 11246, as amended, are transferred or reassigned to the Secretary of Labor from the following agencies:

(a) Department of the Treasury.
(b) Department of Defense.
(c) Department of the Interior.
(d) Department of Commerce.
(e) Department of Health, Education, and Welfare.
(f) Department of Housing and Urban Development.
(g) Department of Transportation.
(h) Department of Energy.
(i) Environmental Protection Agency.
(j) General Services Administration.
(k) Small Business Administration.

1-102. The records, property, personnel and positions, and unexpended balances of appropriations or funds related to the functions transferred or reassigned by this Order, that are available and necessary to finance or discharge those functions, are transferred to the Secretary of Labor.

1-103. The Director of the Office of Management and Budget shall make such determinations, issue such orders, and take all actions necessary or appropriate to effectuate the transfers or reassignments provided by this Order, including the transfer of funds, records, property, and personnel.

1-2. *Conforming Amendments to Executive Order No. 11246.*

1-201(a). In order to reflect the transfer of enforcement responsibility to the Secretary of Labor, Section 201 of Executive Order No. 11246, as amended, is amended to read:

"Sec. 201. The Secretary of Labor shall be responsible for the administration and enforcement of Parts II and III of this Order. The Secretary shall adopt such rules and regulations and issue such orders as are deemed necessary and appropriate to achieve the purposes of Parts II and III of this Order.".

(b) Paragraph (7) of the contract clauses specified in Section 202 of Executive Order No. 11246, as amended, is amended to read:

"(7) The contractor will include the provisions of paragraphs (1) through (7) in every subcontract or purchase order unless exempted by rules, regulations, or orders of the Secretary of Labor issued pursuant to Section 204 of

V 43/196 OCT 10 78

Executive Order No. 11246 of September 24, 1965, so that such provisions will be binding upon each subcontractor or vendor. The contractor will take such action with respect to any subcontract or purchase order as may be directed by the Secretary of Labor as a means of enforcing such provisions including sanctions for noncompliance: *Provided, however,* that in the event the contractor becomes involved in, or is threatened with, litigation with a subcontractor or vendor as a result of such direction, the contractor may request the United States to enter into such litigation to protect the interests of the United States.'".

1-202. In subsection (c) of Section 203 of Executive Order No. 11246, as amended, delete "contracting agency" in the proviso and substitute "Secretary of Labor" therefor.

1-203. In both the beginning and end of subsection (d) of Section 203 of Executive Order No. 11246, as amended, delete "contracting agency or the" in the phrase "contracting agency or the Secretary".

1-204. Section 205 of Executive Order No. 11246, as amended, is amended by deleting the last two sentences, which dealt with agency designation of compliance officers, and revising the rest of that Section to read:

"Sec. 205. The Secretary of Labor shall be responsible for securing compliance by all Government contractors and subcontractors with this Order and any implementing rules or regulations. All contracting agencies shall comply with the terms of this Order and any implementing rules, regulations, or orders of the Secretary of Labor. Contracting agencies shall cooperate with the Secretary of Labor and shall furnish such information and assistance as the Secretary may require.".

1-205. In order to delete references to the contracting agencies conducting investigations, Section 206 of Executive Order No. 11246, as amended, is amended to read:

"Sec. 206. (a) The Secretary of Labor may investigate the employment practices of any Government contractor or subcontractor to determine whether or not the contractual provisions specified in Section 202 of this Order have been violated. Such investigation shall be conducted in accordance with the procedures established by the Secretary of Labor.".

"(b) The Secretary of Labor may receive and investigate complaints by employees or prospective employees of a Government contractor or subcontractor which allege discrimination contrary to the contractual provisions specified in Section 202 of this Order.".

1-206. In Section 207 of Executive Order No. 11246, as amended, delete "contracting agencies, other" in the first sentence.

1-207. The introductory clause in Section 209(a) of Executive Order No. 11246, as amended, is amended by deleting "or the appropriate contracting agency" from "In accordance with such rules, regulations, or orders as the Secretary of Labor may issue or adopt, the Secretary or the appropriate contracting agency may:".

1-208. In paragraph (5) of Section 209(a) of Executive Order No. 11246, as amended, insert at the beginning the phrase "After consulting with the contracting agency, direct the contracting agency to", and at the end of paragraph (5) delete "contracting agency" and substitute therefor "Secretary of Labor" so that paragraph (5) is amended to read:

"(5) After consulting with the contracting agency, direct the contracting agency to cancel, terminate, suspend, or cause to be cancelled, terminated, or suspended, any contract, or any portion or portions thereof, for failure of the contractor or subcontractor to comply with equal employment opportunity provisions of the contract. Contracts may be cancelled, terminated, or suspended absolutely or continuance of contracts may be conditioned upon a program for future compliance approved by the Secretary of Labor.".

1-209. In order to reflect the transfer from the agencies to the Secretary of Labor of the enforcement functions, substitute "Secretary of Labor" for "each contracting agency" in Section 209(b) of Executive Order No. 11246, as amended, so that Section 209(b) is amended to read:

"(b) Pursuant to rules and regulations prescribed by the Secretary of Labor, the Secretary shall make reasonable efforts, within a reasonable time limitation, to secure compliance with the contract provisions of this Order by methods of conference, conciliation, mediation, and persuasion before proceedings shall be instituted under subsection (a)(2) of this Section, or before a contract shall be cancelled or terminated in whole or in part under subsection (a)(5) of this Section.".

1-210. In order to reflect the responsibility of the contracting agencies for prompt compliance with the directions of the Secretary of Labor, Sections 210 and 211 of Executive Order No. 11246, as amended, are amended to read:

"Sec. 210. Whenever the Secretary of Labor makes a determination under Section 209, the Secretary shall promptly notify the appropriate agency. The agency shall take the action directed by the Secretary and shall report the results of the action it has taken to the Secretary of Labor within such time as the Secretary shall specify. If the contracting agency fails to take the action directed within thirty days, the Secretary may take the action directly.".

"Sec. 211. If the Secretary of Labor shall so direct, contracting agencies shall not enter into contracts with any bidder or prospective contractor unless the bidder or prospective contractor has satisfactorily complied with the provisions of this Order or submits a program for compliance acceptable to the Secretary of Labor.".

1-211. Section 212 of Executive Order No. 11246, as amended, is amended to read:

"Sec. 212. When a contract has been cancelled or terminated under Section 209(a)(5) or a contractor has been debarred from further Government contracts under Section 209(a)(6) of this Order, because of noncompliance with the contract provisions specified in Section 202 of this Order, the Secretary of Labor shall promptly notify the Comptroller General of the United States.".

1-212. In order to reflect the transfer of enforcement responsibility to the Secretary of Labor, references to the administering department or agency are deleted in clauses (1), (2), and (3) of Section 301 of Executive Order No. 11246, as amended, and those clauses are amended to read:

"(1) to assist and cooperate actively with the Secretary of Labor in obtaining the compliance of contractors and subcontractors with those contract provisions and with the rules, regulations and relevant orders of the Secretary, (2) to obtain and to furnish to the Secretary of Labor such information as the Secretary may require for the supervision of such compliance, (3) to carry out sanctions and penalties for violation of such obligations imposed upon contractors and subcontractors by the Secretary of Labor pursuant to Part II, Subpart D, of this Order,".

1-213. In order to reflect the transfer from the agencies to the Secretary of Labor of the enforcement functions "Secretary of Labor" shall be substituted for "administering department or agency" in Section 303 of Executive Order No. 11246, as amended, and Section 303 is amended to read:

"Sec. 303(a). The Secretary of Labor shall be responsible for obtaining the compliance of such applicants with their undertakings under this Order. Each administering department and agency is directed to cooperate with the

V 43/196 OCT 10 78

Secretary of Labor and to furnish the Secretary such information and assistance as the Secretary may require in the performance of the Secretary's functions under this Order.".

"(b) In the event an applicant fails and refuses to comply with the applicant's undertakings pursuant to this Order, the Secretary of Labor may, after consulting with the administering department or agency, take any or all of the following actions: (1) direct any administering department or agency to cancel, terminate, or suspend in whole or in part the agreement, contract or other arrangement with such applicant with respect to which the failure or refusal occurred; (2) direct any administering department or agency to refrain from extending any further assistance to the applicant under the program with respect to which the failure or refusal occurred until satisfactory assurance of future compliance has been received by the Secretary of Labor from such applicant; and (3) refer the case to the Department of Justice or the Equal Employment Opportunity Commission for appropriate law enforcement or other proceedings.".

"(c) In no case shall action be taken with respect to an applicant pursuant to clause (1) or (2) of subsection (b) without notice and opportunity for hearing.".

1-214. Section 401 of Executive Order No. 11246, as amended, is amended to read:

"Sec. 401. The Secretary of Labor may delegate to any officer, agency, or employee in the Executive branch of the Government, any function or duty of the Secretary under Parts II and III of this Order.".

1-3. *General Provisions.*

1-301. The transfers or reassignments provided by Section 1-1 of this Order shall take effect at such time or times as the Director of the Office of Management and Budget shall determine. The Director shall ensure that all such transfers or reassignments take effect within 60 days.

1-302. The conforming amendments provided by Section 1-2 of this Order shall take effect on October 8, 1978; except that, with respect to those agencies identified in Section 1-101 of this Order, the conforming amendments shall be effective on the effective date of the transfer or reassignment of functions as specified pursuant to Section 1-301 of this Order.

Jimmy Carter

THE WHITE HOUSE,

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

[6325-01-M]

Title 5—Administrative Personnel

CHAPTER I—CIVIL SERVICE COMMISSION

PART 297—PROTECTION OF PRIVACY IN PERSONNEL RECORDS

Specific Exemptions

AGENCY: U.S. Civil Service Commission.

ACTION: Final rule.

SUMMARY: This notice announces the adoption of changes to the Commission's regulations at 5 CFR 297.117. These changes will exempt certain, limited and specific records in the Presidential Management Intern Program Records (CSC-9) system of records. The notice of adoption of that system appears elsewhere in this issue of the FEDERAL REGISTER. This exemption is designed only to assure the protection of testing or examination material used solely to determine individual qualifications for appointment or promotion in the Federal service, the disclosure of which would compromise the fairness or objectivity of the testing or examination process and does not exempt the remaining records in the system. These records will be exempt from the provisions of subsections (d), (e)(4)(H), and (f) of the Privacy Act of 1974, 5 U.S.C. 552a.

EFFECTIVE DATE: October 10, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. William H. Lynch, Bureau of Personnel Management Information Systems, 202-254-9778.

SUPPLEMENTARY INFORMATION: On page 35721 of the FEDERAL REGISTER of August 11, 1978, the Commission published a proposal to amend § 297.117(a) and to add § 297.117(b)(3) to the Commission's regulations at 5 CFR Part 297. The change to § 297.117(a) provides for reference to a new system of records (CSC-10), while the addition of § 297.117(3) provides for exemption from certain provisions of the Privacy Act of 1974, 5 U.S.C. 552a, for limited and specific records in that system. Interested persons were given 30 days in which to submit comments, suggestions, or objections regarding the proposed regulation. No comments have been received and the regulations are hereby adopted with one change, i.e., the identification symbol for the system is to be CSC-9 rather than CSC-10, necessitated by the canceling of the former CSC-9 system (see 43 FR 31426). The complete text of the changes are set forth below.

Accordingly, 5 CFR 297.117 is amended by correcting § 297.117(a) and by adding § 297.117(b)(3) as follows:

§ 297.117 Specific exemptions.

(a) Some systems of records under the Act that are maintained by the Commission contain material subject to exemptions appearing at 5 U.S.C. 552a (k) (1), (2), (5), and (6) relating to national defense and foreign policy materials, civil law enforcement in connection with the administration of the merit system, information obtained from a source who furnished such information under a properly granted promise that the identity of the source would be held in confidence, and to testing and examination materials that are used solely to determine individual qualifications for appointment or promotion in the Federal service. The systems of records published in the FEDERAL REGISTER by the Commission which are within these exemptions are: CSC-8, CSC-9, CSC/GOVT-4, and CSC/GOVT-5. The Commission hereby asserts a claim to specific exemptions of such systems of records. The materials can be exempt from 5 U.S.C. 552a (c)(3); (d); (e)(1); (e)(4) (G), (H), and (I); and (f).

(b) The specific exemptions determined to be necessary and proper with respect to systems of records maintained by the Commission or an agency for the Commission, including the reasons and parts of each system to be exempted, the provisions of the Act from which they are exempted, and the justifications for the exemptions, are as follows:

. . . . . .

(3) Presidential Management Intern Program Records. All material and information about an individual that meet the criteria stated in 5 U.S.C. 552a (k)(6) are exempt from the requirements of 5 U.S.C. 552a (d), (e)(4) (H), and (f) relating to access and contest, publication of specific material annually in the FEDERAL REGISTER, and provisions regarding agency rules, in that portions of this system relate to testing or examination materials that are used solely to determine individual qualifications for appointment or promotion in the Federal service, the disclosure of which would compromise the objectivity of fairness of the testing or examination process.

UNITED STATES CIVIL SERVICE COMMISSIOIN,
JAMES C. SPRY,
Executive Assistant to the Commissioners.

[3410-07]

Title 7—Agriculture

CHAPTER XVIII—FARMERS HOME ADMINISTRATION, DEPARTMENT OF AGRICULTURE

SUBCHAPTER P—GUARANTEED LOANS

PART 1980—GENERAL

Subpart D—Rural Housing Program Loans

AGENCY: Farmers Home Administration, USDA.

ACTION: Final rule.

SUMMARY: The Farmers Home Administration amends its regulations concerning the guaranteed rural housing program. These new provisions include limiting the eligibility for guaranteed rural housing (RH, loans to above-moderate income applicants and terminating the eligibility for moderate-income applicants in the program, having the interest rate negotiated between the lender and borrower, and removing the "graduation" requirement. The intended effect of this action is to implement the provisions of a public law as it pertains to the guaranteed rural housing program.

EFFECTIVE DATE: October 10, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. Reed J. Petersen, Rural Housing Specialist, Single Family Housing Loan Division, phone 202-447-4295.

V 43 / 196 OCT 10 78

SUPPLEMENTARY INFORMATION: Subpart D of part 1980, chapter XVIII, title 7 in the Code of Federal Regulations is amended, subchapter N is retitled as "Security Servicing", a new Subchapter P, "Guaranteed Loans" is established, part 1980 is retitled "General" and moved to subchapter P, and all regulations formerly in subchapter N are now under subchapter P. The Farmers Home Administration published a notice of proposed rulemaking at page 36952 of the FEDERAL REGISTER for Monday, August 21, 1978 regarding this regulation. Comments were received and accepted until September 20, 1978. Three comments were received. One comment was in total favor of the proposal. One comment suggested an interest rate ceiling be adopted. Section 1980.314 was, therefore, revised to say the interest rate will not exceed any applicable established usury rate. One comment suggests that paperwork requirements be kept to a minimum. The agency's intent has continually been to keep the paperwork at a minimum for the guaranteed rural housing program, and it is hoped that further reduction in paperwork will be possible in the future. Late comments received will be considered for future revisions of the regulations.

The purpose of this amendment is to implement those changes pertaining to the guaranteed rural housing program authorized by the Housing and Community Development Act of 1977.

The principal changes in the regulation are:

1. The eligibility requirement of applicants for guaranteed rural housing loans is changed from moderate to above moderate income and the above moderate income limits are defined.

2. The interest rate may be as agreed upon by the borrower and lender.

3. The "graduation" requirement is removed. Borrowers are no longer required to refinance the loan at a future date. Under the previous guaranteed loan program, borrowers were required to agree to refinance their loan if requested to do so by FmHA and if other credit was available.

4. The terms "local lender" and "minimum adequate site" are more fully defined.

5. The requirements for refinancing debts with an FmHA guaranteed loan are clarified.

6. The loan limits and down payment requirements are clarified.

7. Adequate but modest housing for above-moderate income applicants is clarified.

8. The statement signed by FmHA approving the appraisal made by the lender's appraiser is no longer required.

9. The need for a builder warranty for new construction and other improvements is clarified.

10. The proper time to prepare the conditional commitment for guarantee is clarified.

11. References to insured loans are removed because insured loans may not, under present regulations, be made to applicants with above moderate incomes.

12. Other minor corrections and changes are made for clarity.

Accordingly, the following changes are made;

1. Subchapter N of chapter XVIII—title amended to read "Security Servicing".

2. A new subchapter P is established in chapter XVIII and is titled "Guaranteed Loans".

3. The title of part 1980 is amended to read "General" and the part and all regulations in the part are moved to subchapter P.

4. As amended, subpart D of part 1980, subchapter P, chapter XVIII, title 7 in the Code of Federal Regulations reads as follows:

Title 7—Agriculture

CHAPTER XVIII—FARMERS HOME ADMINISTRATION, DEPARTMENT OF AGRICULTURE

SUBCHAPTER P—GUARANTEED LOANS

PART 1980—GENERAL

Subpart D—Rural Housing Program Loans

Sec.

1980.301 Introduction.
1980.302 Definitions.
1980.303 [Reserved]
1980.304 Lenders.
1980.305 Rural area determinations.
1980.306 Loan purposes.
1980.307 Loan limitations and special provisions.
1980.308 Transactions which will not be guaranteed.
1980.309 Loans on leasehold interest.
1980.310-1980.313 [Reserved]
1980.314 Interest rate.
1980.315 Terms of loan repayment.
1980.316 [Reserved]
1980.317 Clearinghouse considerations.
1980.318 Flood plains and wetlands.
1980.319 Flood or mudslide hazard area precautions.
1980.320 Equal opportunity and nondiscrimination requirements in use, occupancy, rental, or sale of housing.
1980.321-1980.322 [Reserved]
1980.323 Applicant equity requirements.
1980.324 Collateral.
1980.325 Promissory notes, and security instruments.
1980.326 Appraisal of property serving as collateral.
1980.327 Acquisition, construction and development.
1980.328 Overruns in development costs.
1980.329 Inspections of construction and compliance reviews.
1980.330 Borrower eligibility requirements for a loan.
1980.331 Filing and processing applications.
1980.332 FmHA evaluation of applications.
1980.333 Review of requirements.
1980.334 Conditions precedent to issuance of the Loan Note Guarantee.
1980.335 Issuance of Lender's Agreement, Loan Note Guarantee, and Assignment Guarantee Agreement.
1980.336 [Reserved]
1980.337 Loan servicing.
1980.338 Defaults by borrower.
1980.339 Liquidation.
1980.340 Protective advances.
1980.341 Additional loans or advances.
1980.342 Transfer and assumptions.
1980.343 Eligible transferee—full assumption.
1980.344 Ineligible transferee—full assumption.
1980.345-1980.400 [Reserved]

AUTHORITY: 42 U.S.C. 1480; delegation of authority by the Secretary of Agriculture 7 CFR 2.23; delegation of authority by the Assistant Secretary for Rural Development, 7 CFR 2.70.

PART 1980—GENERAL

Subpart D—Rural Housing Program Loans

§ 1980.301 Introduction.

(a) *Policy.* This subpart, supplemented by subpart A of this part, contains regulations for unsubsidized single family (SF) rural housing (RH) loans to above-moderate income families guaranteed by the Farmers Home Administration (FmHA) and applies to lenders, holders, borrowers, and other parties involved in making, guaranteeing, servicing, holding, or liquidating such loans.

(b) *Program objective.* The basic objective of the RH loan guarantee program is to assist above-moderate income families in obtaining adequate but modest, decent, safe, and sanitary dwellings and related facilities for their own use in rural areas by guaranteeing sound RH loans when loans would not be made without a guarantee.

(c) *Program administration.* The loan guarantee program, like other FmHA programs, is administered by the Administrator through a State director, serving each State, through a district director to the county supervisor. All applications for guaranteed loans should be made with an eligible lender. The county supervisor is the focal point for this FmHA loan guarantee program and the local contact person for processing and servicing guarantees although this subpart refers in various places to the duties and responsibilities of other FmHA employees.

(d) *Administrative provisions.* Throughout this regulation there appear administrative provisions for the FmHA State director, district director, and county supervisor. These provisions establish the internal duties, responsibilities, and procedures to carry out the requirements of the program. These provisions are identified as "Administrative" and follow appropriate sections of this subpart.

§ 1980.302 Definitions.

The following definitions, in addition to those in subpart A of this part, are applicable to RH loans:

(a) *Above moderate income.* An adjusted annual income of more than the maximum moderate income limit established for the State as shown in exhibit D to part 1822, subpart A (FmHA instruction 444.1, exhibit D), but not more than $20,000, except for Hawaii, Guam, and Alaska in which the maximum is $24,000, $24,000, and $30,000 respectively. (See also § 1980.330(h).)

(b) *Act.* Title V of the Housing Act of 1949, as amended. (42 U.S.C. 1471, et seq.).

(c) *Applicant.* An individual(s) who needs housing and applies for assistance in accordance with this regulation.

(d) *Development costs.* These costs include, but are not limited, to, those for acquisition, planning, construction, or repair of the proposed dwelling; purchase of buildings, land, easements, rights-of-way; and payment of interest during the period before the first principal payment becomes due, including interest on interim financing.

(e) *Dwelling.* A home suitable for the needs of a family. An existing dwelling is one which is more than 1 year old or was previously occupied as a residence.

(f) *Family.* One person or two or more persons who reside in or will reside in one dwelling.

(g) *Housing.* An adequate but modest single family dwelling and related essential equipment and facilities for which loans are authorized in § 1980.306. The term housing also includes an adequate site and related easements and appurtenances owned or being acquired by the applicant.

(h) *Minimum adequate site.* The smallest area sufficient for the dwelling and related facilities to be built, purchased or refinanced, and a yard. It is usually not more than 1 acre of nonincome producing land unless more than 1 acre is needed to comply with local code requirements or to provide for a safe and adequate water supply or waste disposal system.

(i) *Owner.* The holder of fee simple title or of a leasehold meeting the requirements of § 1980.309.

(j) *Packager.* A builder, developer, real estate agent, or other party who obtains and presents to an approved lender one or more applications from eligible applicant(s) for guaranteed RH loan(s) with which the applicant will obtain adequate housing that will be provided under an existing contract to buy, build, or repair at a fixed price.

(k) *Rural area.* Any town, village, city, or place including the immediately adjacent densely settled area which is not part of or associated with an urban area, and

(1) Has a population not in excess of 10,000 if it is rural in character; or

(2) Has a population in excess of 10,000 but not in excess of 20,000, is not contained within a standard metropolitan statistical area (SMSA), and has a serious lack of mortgage credit for low- and moderate-income families as determined by FmHA.

(l) *Senior citizen.* The term "senior citizen" refers to age only and not to nationality. It is a person who is 62 years of age or over and, in the case of a married couple, may be either spouse.

(m) *State.* Any of the 50 States, the Commonwealth of Puerto Rico, the Virgin Islands, or the territories and possessions of the United States.

§ 1980.303 [Reserved]

§ 1980.304 Lenders.

(a) *Eligible lenders.* Eligible lenders as defined in § 1980.13(b)(1) of subpart A of this part are eligible for FmHA RH loan guarantees and do not need to apply to FmHA for an eligibility determination.

(b) *Other lenders.* All other lenders will apply to FmHA for, and receive, an eligibility determination for making RH guaranteed loans in accordance with § 1980.13 of subpart A of this part, before applying for an RH loan guarantee.

(c) *Local lender.* A local lender is defined in § 1980.13(a) of subpart A of this part and must, at a minimum, be represented in its main, branch, or agent's office by an employee or agent authorized to act for the lender. A local agent who "packages" loans for or refers applicant inquiries to the lender does not meet the requirement of a local lender.

Administrative. The State director is authorized to make lender eligibility determinations for RH loan guarantees in accordance with this section and § 1980.13 of subpart A of this part. The State director will submit the lender's application and the proposed eligibility notification to the national office for review and comment before notifying the lender of the eligibility determination.

§ 1980.305 Rural area determinations.

The State director is responsible for determining the rural areas in a State in accordance with § 1822.3(c) of subpart A of part 1822 of this chapter (FmHA instruction 444.1, paragraph III C). The lender may contact the FmHA county supervisor to determine if an area is rural for purposes of the guaranteed loan program.

§ 1980.306 Loan purposes.

A loan may be guaranteed if made to an eligible applicant for such of the following purposes as are necessary to enable the applicant to obtain adequate, decent, safe, and sanitary housing in a rural area for use by the applicant's family as a permanent residence:

(a) *Purchase existing dwelling and site.* Buy an existing dwelling and a minimum adequate site on which it is located.

(b) *Purchase site.* Buy a minimum adequate site on which to place a dwelling, if the applicant does not already own such a site.

(c) *Construct or purchase and relocate dwelling.* Build a dwelling on, or purchase and move an existing dwelling onto, a site whether already owned or being acquired by the applicant.

(d) *Rehabilitate or improve existing dwellings.* Repair, enlarge, or otherwise improve or rehabilitate an existing dwelling already owned by the applicant or being acquired with loan funds, whether located on a site already owned or being acquired by the applicant.

(e) *Utilities and facilities.* Provide adequate water, sewer, electric, heating, and other utilities and facilities that are necessary to make the housing adequate.

(f) *Equipment and material.* Purchase and install essential dwelling equipment and material such as a range, oven, refrigerator, clothes washer, or clothes dryer whether or not such equipment becomes real estate or fixtures under applicable State law. When such equipment is purchased with loan funds, it shall be in connection with the purchase, construction, or rehabilitation of the dwelling and shall be considered a part of the housing.

(g) *Site preparation.* Provide grading, seeding or sodding of lawns, trees, walks, yard fences, and driveways to building sites located adjacent to a road or street, and other such facilities, when included in a loan to buy, build, or repair a dwelling.

(h) *Real estate taxes.* For initial loans, pay real estate taxes on the security property that are owed by the borrower and that are due and payable at the time of loan closing: *Provided,* The amount to be used for taxes is not a substantial part of the loan.

(i) *Expenses, fees, and social security taxes.* Pay expenses incident to obtain-

V 43 / 196 OCT 10 78

ing plans and making the loan, such as fees and charges for legal, appraisal, architectural, engineering, and other technical services, closing costs, reasonable connection fees for utilities, such as water, sewer, electric, and gas, guarantee fee, and a loan or origination fee or transfer fee, which are required to be paid by the borrower and which cannot be paid from other funds. Loan funds may also be used to pay the borrower's share of social security taxes for labor hired by the borrower in connection with making the planned improvements.

(j) *Interim financing.* Pay interim financing debts incurred for authorized loan purposes. This is not considered to be refinancing.

(k) *Refinancing.* Refinance debts owed by the applicant when all of the following conditions exist:

(1) The debts were incurred by the applicant at least 5 years before the application for the loan was made.

(2) The debts were incurred for a purpose for which a loan is authorized to be made under another paragraph of this section.

(3) The payments on the debt are so seriously delinquent that the applicant is likely to lose the dwelling at an early date if the loan is not refinanced, or if combined with a loan for improvement, rehabilitation, or repairs and not refinanced, the applicant will experience a financial hardship in repaying the debts.

(4) The applicant's present creditors will not give rates and terms on the existing debts that can reasonably be expected to be met.

(5) The debts constitute a lien against the property on which a mortgage will be taken to secure the loan.

(6) A sound loan can be made.

§ 1980.307 Loan limitations and special provisions.

(a) *Prohibited loan purposes.* A loan will not be guaranteed if loan funds are to be used to buy furniture or other personal property except essential equipment and materials authorized in § 1980.306(f).

(b) *Limitations.* A loan for new or existing housing may not be made for more than 97 percent of the market value, selling price (including the cost of marketing which includes such costs or customary earned charges and fees and other costs), or cost of improvements or construction, whichever is less, up to $25,000 and 95 percent of the amount in excess of $25,000. However, a loan may not be made for more than 90 percent of the market value or selling price, whichever is less, for dwellings less than 1 year old when the lender or lenders, representative, Department of Housing and Urban Development (HUD), Veterans Administration (VA), or FmHA did not make inspections during construction. Inspection reports and FmHA acceptance must be included in the applicant's loan file. See § 1980.323 for applicant equity requirements. No discount points in the nature of prepaid interest are to be involved in the transaction.

(c) *Type of housing.* A dwelling financed for a family with an above-moderate income must meet the following requirements:

(1) Be adequate but modest in size, design, and cost and provide decent, safe, and sanitary housing consistent with the needs of the applicant and the market in the community but must not be of elaborate or extravagant design or material. Adequate housing ordinarily can be provided within less than 1,400 square feet of living area. When the applicant has an unusually large family, a somewhat larger house may be justified to provide adequate sleeping space. Living area does not include space such as a patio, carport, garage, porch not suited for year-around use, unfinished basement, and, if the dwelling does not have a basement, space for utilities such as furnace and hot water heater; however, such space must be kept within reasonable limits and not expanded to circumvent the limitations of this paragraph. Dwellings, however, may contain features such as two complete baths, a family room, double garage, fireplace, air conditioning, and carpeting if such design features or items are customarily included in other adequate but modest homes in the area for families with similar incomes.

(2) Any dwelling purchased, repaired, enlarged, or otherwise improved or rehabilitated with loan funds must be structurally adequate and in good condition before the loan is guaranteed. Existing housing will meet the minimum property standards for existing housing. (See § 1980.327.)

(d) *Subdivision clearance and approval—5 units or more.* (1) When housing units are proposed for a new or existing subdivision, the subdivision must be approved by FmHA before issuance of a conditional commitment for guarantee. The subdivision must meet the requirements of subpart D of part 1804 of this chapter (FmHA instruction 424.5).

(2) The builder, developer, or packager will submit the following information to the lender who will furnish a copy of it to FmHA with a request for subdivision approval:

(i) Subdivision plans and specifications with sufficient detail to show the intent, extent, kind, and quality of work and materials and the house location for each lot. The builder, developer, or packager will also certify to the lender that the subdivision meets planning, zoning, development, and all other requirements.

(ii) A realistic estimate of need and demand for the number of living units of the type proposed, based on the availability of existing suitable housing in the area.

(iii) Size of tract and advice as to its ownership and existing options to purchase; also, a map showing the location and other supporting information on the neighborhood and existing facilities and services, such as medical and dental services, shopping areas, schools, churches, hospitals, recreation and communication facilities; business and industrial enterprises; streets or roads; central water, electric, gas, and sewerage systems; solid waste disposals services; public and private transportation; and police and fire protection.

(iv) A preliminary plot plan and building plan, if available; advice as to type of construction; estimated total cost per living unit; utilities to be used and whether each is or will be publicly, community, or individually owned.

Administrative: FmHA subdivision approval. If the subdivision is approved in accordance with Subpart D of Part 1804 of this chapter (FmHA instruction 424.5), the FmHA county supervisor will advise the lender by letter that FmHA will issue loan note guarantee(s) in the subdivision if all applicable requirements of this regulation are met and if guarantee funding authority is available.

§ 1980.308 Transactions which will not be guaranteed.

The following transactions will not be guaranteed by FmHA:

(a) *Lease payments.* Lease payments.

(b) *Loans by other Federal agencies.* Loans made by other Federal agencies. This does not preclude the guaranteeing of loans made by the Bank for Cooperatives, or the Federal Land Bank.

§ 1980.309 Loans on leasehold interests.

A loan may be guaranteed if made on a leasehold owned or being acquired by the applicant on land owned by a State, political subdivision, public body, or public agency, on Indian tribal lands which are not available for purchase or on land where the lender determines that long-term leasing of homesites by nonpublic bodies is a well established practice and such leaseholds are freely marketable in the area provided the lender determines that:

(a) *Unable to obtain fee title.* The applicant is unable to obtain fee title to the property.

(b) *Unexpired term.* The lease has an unexpired term, from the date of loan approval, of at least 50 years (a lease for 25 years with an option to the lessee to renew for an additional 25 years would be considered a 50-year lease), except when:

(1) A lease is granted for the purpose of permitting a family to obtain a housing loan and the time required to process and approve the loan results in the unexpired term of the lease being not less than 49 years; or

(2) A lease is in existence at last 1 year prior to the date of loan approval. A housing loan may be guaranteed: *Provided,* The unexpired term of the lease is at least 50 percent longer than the repayment period of the loan. In no case will the unexpired term of the lease be less than 15 years.

(c) *Lender certification.* The lender will certify to FmHA that the requirements of this section are met.

§§ 1980.310–1980.313 [Reserved]

§ 1980.314 *Interest rate.*

The loan shall bear interest at a rate agreed upon by the borrower and lender and must be not more than that being charged in the area by lenders for comparable loans without a guarantee. The interest rate will not exceed any applicable established usury rate. The interest rate will be shown in the conditional commitment for comparable loans guarantee and in the guaranteed loan promissory note. The interest rate will remain constant during the existence of the FmHA guarantee, except as provided in §§ 1980.343 and 1980.344 in transfer and assumption cases in which the interest rate to the transferee may be changed.

§ 1980.315 Terms of loan repayment.

(a) *Note.* Principal and interest on the loan will be due and payable as provided in the promissory note. Ordinarily, monthly payments will be made, however, when the borrower receives a majority of income on a seasonal basis such as from the sale of farm crops, the lender may structure payments annually, semi-annually, or quarterly.

(b) *Maximum term.* The maximum term allowable for final maturity of an FmHA guaranteed loan shall be not more than thirty-three (33) years from the date of the note. The term may be such shorter period as may be necessary to assure that the loan will be adequately secured. If a leasehold is involved, see § 1980.309.

§ 1980.316 [Reserved]

§ 1980.317 Clearinghouse considerations.

When the preapplication or application involves a loan or loans in a subdivision of 10 or more new dwelling units in which HUD, VA, or FmHA has not previously made, insured, or guaranteed a housing loan, the lender will see that the requirements of part 1901, subpart H, of this chapter are complied with (FmHA instruction 1901-H).

§ 1980.318 Flood plains and wetlands.

The lender is responsible for determining if the housing is located in a flood plain or a wetland. Refer to part 1940, subparts M and Q of this chapter.

§ 1980.319 Flood or mudslide hazard area precautions.

The lender is responsible for determining if the housing is located in a special flood or mudslide hazard area. Refer to § 1980.42 of subpart A of this part and subpart B of part 1806 of this chapter (FmHA instruction 426.2).

§ 1980.320 Equal opportunity and nondiscrimination requirements in use, occupancy, rental or sale of housing.

(a) *Compliance.* The lender and borrower are prohibited from discriminating or segregating on account of race, color, religion, sex, marital status, or national origin in connection with the use, occupancy, or sale of housing. The lender and borrower are responsible for seeing that no agent, lessee, or operator so discriminates or segregates. These requirements should be discussed with the applicant or packager, builder or developer, and other parties involved as early in the negotiations as possible. For specific statement of some of those responsibilities, see the following:

(1) *Executive Order No. 11063.* It is dated November 20, 1962 (27 FR 11527, 3 CFR 652 (1959–63 Compilation), 42 U.S.C.A 1982 note), and prohibits such discrimination or segregation when Federal financial assistance is involved in the provision, rehabilitation, or operation of housing and related facilities.

(2) *Fair Housing Act.* This is title VIII of the Civil Rights Act of 1968 (Pub. L. 90-294, 42 U.S.C. 3601 et seq.). It prohibits discrimination in the sale or rental of dwellings provided in whole or in part with loans guaranteed by the Federal Government; and provides for filing and handling complaints and investigations regarding, and enforcement of remedies for violations of, fair housing requirements.

(b) *Reporting.* If there is indication of noncompliance with these requirements, such facts will be reported by the borrower, lender, or county supervisor in writing to the State director for remedial action. Should the State director need assistance in handling any complaints of noncompliance, he will request assistance from the national office. Compliance and complaints will be handled in accordance with subpart E, part 1901 of this chapter.

§ 1980.321–1980.322 [Reserved]

§ 1980.323 Applicant equity requirements.

For new or existing housing, the applicant must contribute a down payment, in cash or equity in owned land and/or real estate improvements thereon, of 3 percent of the amount needed to buy, build, or improve the dwelling up to $25,000, and 5 percent of the amount in excess of $25,000. Except that a down payment of 10 percent is required for dwellings less than 1 year old if approved construction inspections have not been made. (See § 1980.329(b) for construction inspection requirements). If the down payment is in land or real estate improvements, an appraisal by the lender's appraiser must be made to determine the market value. The down payment must be from the applicant's own resources and may not be from such sources as a cash rebate, loan, reduced selling price, or agreement between the applicant and seller, builder, or any other party to the loan.

§ 1980.324 Collateral.

(a) *General.* The entire loan must be secured by a first lien, or a second lien in case of a repair loan, on the housing and the lender will maintain this lien priority. A guaranteed subsequent loan to a previously guaranteed loan must be secured by not less than a second lien. See § 1980.325 regarding provisions of security instruments. Also, see § 1980.309 regarding liens on leaseholds. The lender is responsible for seeing that proper and adequate security is obtained and maintained in existence and of record to protect the interests of the lender, holder, and FmHA.

(b) *Third party liens, suits pending, etc.* Among other things in obtaining the required security, it is necessary to ascertain that there are no claims or liens of laborers, materialmen, contractors, subcontractors, suppliers of machinery and equipment or other parties against the security property or the borrower, and that there are no suits pending or anticipated that would affect the security property or the borrower.

(c) *All collateral must secure entire loan.* All collateral must secure the entire loan unless that is legally impossible as in some Texas homestead cases. The lender cannot take separate collateral to secure only that portion of the loan or loss not covered by the guarantee. This also includes but is not limited to mortgage insurance, which, if obtained, must protect both the guaranteed and unguaranteed portions of the loan.

V 43 / 196 OCT 10 78

§ 1980.325 Promissory notes and security instruments.

The lender may use its forms of promissory notes, real estate mortgages, including deeds of trust and similar instruments, and security agreements, including chattel mortgages in Louisiana and Puerto Rico. The lender is responsible for determining that the security instruments are adequate. The security instruments must:

(a) Contain a provision making it a default if the borrower does not continue to occupy the housing as a primary residence.

(b) Not contain any provisions that are in conflict or are inconsistent with the provisions of this subpart.

§ 1980.326 Appraisal of property serving as collateral.

(a) *Qualified appraiser.* The lender is responsible for seeing that the property that will serve as collateral for loans is appraised by a qualified appraiser. The appraisal will be the appraisers opinion regarding the market value of the collateral.

(b) *Lender responsible.* The lender will be responsible for determining that appraisers have the necessary qualifications and experience to make the appraisals. If the lender has any questions in this regard, it should consult with FmHA before having an appraisal made.

(c) *Appraisal report.* The appraisal report which the lender is required to submit to FmHA as an enclosure with the application will cover any property that is to serve as security.

Administrative. A. *FmHA review of appraisals.* Appraisal reports are part of the material to be reviewed by FmHA in determining whether to issue a conditional commitment to guarantee the loan or a loan note guarantee. The review of each appraisal will be made by the FmHA county supervisor or other FmHA personnel designated by the county supervisor.

§ 1980.327 Acquisition, construction, and development.

(a) *Acquisition of property.* The lender is responsible for seeing that any property to be acquired with loan funds is acquired as planned and that the required security is obtained. The lender is also responsible when financing an existing dwelling for seeing that a termite inspection is obtained if normally required in the area, and the requirements of paragraphs (b) (2), (4), (6), and (11) of this section are met.

(b) *Construction or development.* The lender and borrower are responsible for seeing that the loan purposes are accomplished with the loan funds. This includes, but is not limited to seeing that:

(1) Part 1804 of this chapter is used as a guide for planning and performing development work (FmHA instruction 424.5).

(2) Applicable laws, ordinances, codes, and regulations, including the Minimum Property Standards (MPS) for One and Two Family Dwellings No. 4900.1, issued by the HUD are complied with. Copies of the MPS may be obtained from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

(3) Drawings, specifications, and estimates are adequate.

(4) Adequate water, electric, heating, waste disposal, and any other necessary utilities and facilities are obtained.

(5) Construction or development contracts contain adequate provisions for the undertaking and are properly awarded and executed, and contractors are bonded when the lender considers bonding necessary.

(6) Equal opportunity and nondiscrimination requirements are met. See § 1980.41 of subpart A of this part.

(7) Construction or development is performed expeditiously and properly, including inspection of sites and construction or development in various stages of completion to determine that the work and material conform with the drawings and specifications and any other requirements.

(8) Periodic or partial payments for construction or development are limited to a reasonable percentage as determined by the lender of the actual value of the work and material in place.

(9) Final payment is made only after final inspection has been made and the construction or development has been found proper in all respects.

(10) A builder's warranty is issued when new construction, repair or rehabilitation is involved, which warrants the dwelling materials and workmanship for at least 1 year from the date of completion and acceptance of the work.

(11) No claims or liens of laborers, materialmen, contractors, subcontractors, or other parties exist against the borrower or the security property.

§ 1980.328 Overruns in development costs.

When it is determined that there will be an overrun, either at bid opening or after construction has begun, the lender and borrower, with the advice of FmHA, will determine how the overrun costs will be met.

(a) *Minor changes.* Minor changes in the project which do not effect the approved loan purposes, increase the cost, or adversely affect the objectives or soundness of the loan may be approved by the borrower and lender. If any line item as reflected in the use of proceeds is changed 10 percent or less and the total loan remains the same, the lender may approve the change.

(b) *Major changes.* If major changes are necessary, which cannot be handled as provided in paragraph (a) of this section, the lender and borrower, with the advice of FmHA, will determine how the change or overrun costs will be met. FmHA will determine and inform the lender in writing whether the loan can still be guaranteed. The county supervisor may approve cost overruns and line item changes on all loans. In any event, the loan will never exceed the limits specified in § 1980.307.

Administrative. The county supervisor will submit Form FmHA 440-1 "Request for Obligation of Funds," to the Finance Office for the new amount of any increased loan. Form FmHA 440-10 "Cancellation of Loan or Grant Check and/or Obligation," will be used to cancel the original obligation. The loan note guarantee will not be issued until the revised Form FmHA 440-57 "Acknowledgement of Obligated Funds/Check Request", is received from the Finance Office. If a loan was obligated in a prior fiscal year, form FmHA 440-1 will be prepared for the increased in obligation and the form noted in the upper right-hand margin: "Increase in obligation of previous loan."

§ 1980.329 Inspections of construction and compliance reviews.

(a) *Qualified inspectors.* Inspections will be made during construction by a qualified construction inspector approved by the lender. The lender will notify FmHA when construction begins so that it can also make inspections at various stages of construction, repair, or development if it desires to do so. The lender will also notify FmHA when the construction is completed as FmHA will also always make a final inspection for the protection of its financial interest. Any inspections made by FmHA are made only to determine the adequacy of the security for the loan guarantee and will not establish a duty on FmHA either to notify the borrower or lender if the construction is not adequate or to see that any defective work is corrected. In connection with inspections of construction, equal opportunity and nondiscrimination compliance reviews will be made as required by § 1980.41(b)(6) of subpart A of this part.

(b) *Inspections required by lender.* The lender will see that the following three inspections (and any additional inspections it deems necessary or advisable) are made:

(1) When footings and foundation are ready to be placed.

(2) When shell is closed in but plumbing, electrical, and mechanical work are still exposed.

(3) When construction is completed.

Administrative. A. *FmHA inspections.* If more than $2,500 of guaranteed loan funds

are used to construct or repair buildings, provide land development work, acquire real or personal property, or for similar purposes, the county supervisor or other qualified FmHA personnel will make such inspections as the county supervisor deems necessary in the particular case to ascertain the existence and condition of such property. Regardless of the number of inspections, one inspection will always be made when construction is completed. Such inspections will be reflected on Form FmHA 424-12 "Inspection Report." The borrower need not sign form FmHA 424-12. The final inspection certification on the bottom of Form FmHA 424-12 may be revised as follows: "I certify that I have inspected the above listed items of development and those shown as 100 percent complete appear to have been completed in accordance with the plans and specifications or other descriptive material. If the final inspection reveals that construction does not meet approved plans and specifications, the loan will not be guaranteed."

§ 1980.330 Borrower eligibility requirements for a loan.

The lender must determine that the applicant meets all the following requirements:

(a) *Citizenship.* Is a natural person (individual) who is a citizen of the United States, the Commonwealth of Puerto Rico, the Virgin Islands, or the territories and possessions of the United States, or resides there after being legally admitted for permanent residence or on indefinite parole.

(b) *Legal capacity.* Possesses legal capacity to incur the obligations of the loan.

(c) *Ability and experience.* Possesses ability and experience necessary to carry out the undertakings and obligations required of the applicant in connection with the loan.

(d) *Lack of housing.* Does not own adequate, decent, safe, and sanitary housing for the applicant's use. If the loan is to include funds for a site on which to build, the applicant must be without an adequate site for the proposed dwelling.

(e) *Owner occupant.* Is or will become the owner occupant of the housing with respect to which the loan is made.

(f) *Income.* Has adequate and dependably available income to meet the living expenses, obligations, necessary capital replacements, and repayment of debts including the proposed loan.

(g) *Other credit.* Does not have sufficient resources to provide the housing on the applicant's own account, and cannot obtain credit for that purpose from other sources on terms and conditions the applicant can reasonably be expected to meet without an FmHA guarantee.

(h) *Income level.* Has an above-moderate income.

(1) *Above-moderate income.* An above-moderate income is an adjusted annual income of more than the maximum moderate income limit established for the State as shown in exhibit D to subpart A, part 1822 of this chapter (FmHA instruction 444.1, exhibit D), but not more than $20,000, except for Hawaii, Guam, and Alaska in which the maximum is $24,000, $24,000, and $30,000, respectively.

(2) *Annual income.* This consists of planned income to be received by the applicant, spouse, and all other adults who live, or propose to live, in the dwelling during the next 12 months, or, in the case of a farmer, the period which most accurately reflects the annual cycle of the farmer's operation.

(i) *Income included.* All net farm and nonfarm business income and gross income from wages, salaries, commissions, pensions, social security, welfare, GI bill, fellowships, scholarships, assistantships, unemployment compensation, alimony, and all other sources, except as indicated in paragraph (h)(2)(ii) of this section, must be counted.

(A) Welfare, social security, child support payments, and other payments made on behalf of minors will be included.

(B) All expected overtime and bonus income will be counted.

(C) Projected farm and nonfarm business losses will be considered as "0" in determining annual income.

(ii) *Exempted income.* The following income will not be counted:

(A) Earnings from employment or income from GI bill, fellowships, scholarships, or assistantships for schooling received by a full-time student who is not the applicant or spouse of the applicant.

(B) Proceeds from the sale of equipment, mineral rights, or real estate sold under short-term contract (usually 3 years or less).

(C) Cash value of food stamps, real estate tax exemptions, or similar types of assistance.

(D) Payments received for the care of foster children.

(E) The income of an applicant's spouse not living in the dwelling when:

(*1*) Legal papers have been filed with the appropriate court to commence divorce or legal separation proceedings, or

(*2*) Papers have not been filed to commence divorce or legal separation proceedings provided the spouse has been living apart from the family for at least 6 months.

(iii) *Deductions from income.* In determining the applicant's annual income the following deductions will be allowed:

(A) A deduction may be made in the same manner as outlined in Internal Revenue Service (IRS) regulations for the exhaustion, wear and tear, and obsolescence of depreciable property used in the applicant's trade, business, or farming operation. The applicant must provide an itemized schedule showing the depreciation claimed, and this schedule should be consistent with the amount of depreciation actually claimed for these items for Federal income tax purposes.

(B) A deduction may be made in the same manner as outlined in IRS regulations for necessary business expenses actually paid by the employee in excess of the amount reimbursed by the employer. The deduction must be reasonable and, in the judgment of the approving officials, should be deducted from an employee's income to reflect annual income on an equal basis with other employed persons. Deductions are not permitted for the following:

(*1*) Transportation to and from work.

(*2*) Cost of meals incurred on 1-day business trips.

(*3*) Educational expenses except those incurred to meet the minimum requirements of the employee's present position.

(*4*) Fines and penalties for violation of laws.

(C) Income deductions for child care, disabled dependent care, or care of an incapacitated husband or wife may be made for expenditures actually paid to enable the applicant to be gainfully employed. The reason for any deduction must be recorded in detail in the applicant's loan docket. Such a deduction is authorized only if all the following conditions are met:

(*1*) For dependent children under the age of 15 cared for outside the home, the maximum monthly deduction will not exceed $200 for one child, $300 for two children, or $400 for three or more children.

(*2*) Expenses for child care services performed in the home are not limited to the above but are subject to the $400 maximum deduction each month.

(*3*) A deduction not to exceed $400 each month, for incapacitated husband or wife care, or care of disabled dependents age 15 or over who are incapable of self care is authorized only when service is performed in the home.

(*4*) In no case will the aggregate of all deductions for child care, disabled dependent care, or incapacitated husband or wife care exceed $400 per month.

(*5*) Payments for these services must have been to other than close relatives or dependent members of the applicant's household. Close relatives include: Son or daughter and their descendants, stepson or stepdaughter, brother or sister, stepbrother or stepsister, father or mother and their ancestors, stepfather or stepmother, nephew or niece, uncle or aunt, son-in-law or daughter-in-law, father-in-law

V 43 / 196 OCT 10 78

or mother-in-law, and brother-in-law or sister-in-law.

(3) *Adjusted annual income.* This is annual income as defined in paragraph (h)(2) of this section, less 5 percent thereof and less an additional $300 for each minor person, excluding the applicant and applicant's spouse, who is a member of the immediate family and lives in the home. The immediate family includes those persons related to the applicant by blood, marriage, or operation of law, such as adoption or legal guardianship.

§ 1980.331 Filing and processing applications.

(a) *Applicant's contact.* Applicants desiring loan assistance as provided in this subpart must file loan applications with an eligible lender.

(b) *Loan priorities.* Applications and preapplications for loan guarantees received by FmHA from eligible lenders will be considered in the order received.

(c) *Veteran preference.* Applications for guarantees received for loans to veterans and from spouses and children of deceased servicemen who died in service during one of the periods described in this paragraph will be given preference by FmHA. A veteran is a person who has been discharged or released from the active forces of the U.S. Army, Navy, Air Force, Marine Corps, or Coast Guard under conditions other than dishonorable and who served on active duty in such forces: (1) During the period April 6, 1917, through March 31, 1921; (2) during the period of December 7, 1941, through December 31, 1946; (3) during the period of June 27, 1950, through January 31, 1955; or (4) for a period of more than 180 days, any part of which occurred after January 31, 1955, but on or before May 7, 1975. Discharges under conditions other than dishonorable include "clemency discharges."

(d) *Filing preapplications and applications.* Lenders may file preapplications as described in paragraph (e) of this section if they desire an expression of FmHA interest before assembling the complete application and request for loan note guarantee or they may present the complete application, in one package, including the material required in paragraphs (e) and (g) of this section.

(e) *Preapplications.* Lenders may file preapplications with the county office. They shall include:

(1) An application form or letter which shall include:

(i) Name, address, telephone number, statement of current annual family income and expenses, net worth, age, and citizenship status of each applicant. If not a citizen of a State or the United States, include evidence of being legally admitted for permanent residence or indefinite parole. The sex, race, and veteran status of the applicant(s) will also be submitted to the county office when provided by the applicant(s).

(ii) Amount of loan request.

(iii) Name of the proposed lender, its address, contact person, and telephone number.

(iv) Brief description of the housing to be financed.

(v) Amount of applicant's equity.

(vi) Anticipated loan maturity.

(2) Comments of substate and State A-95 agencies when the preapplication involves a loan or loans for construction in a subdivision of 10 or more new dwelling units in which HUD, VA, or FmHA has not previously made, insured, or guaranteed a housing loan.

(3) Statement from the applicant certifying that the applicant does not own adequate, decent, safe, and sanitary housing for the use of the applicant's family and the applicant is unable to obtain the required credit without a guarantee at reasonable rates and terms in the community in or near the applicant's location(s) from private or cooperative lending sources who normally make loans for similar purposes and periods of time.

(4) Statement from lender that it will not make the loan as requested by the borrower without a guarantee and that applicant has received, in writing, a warning that the applicant is subject to criminal action if the applicant knowingly and willfully gives false information to obtain a federally guaranteed loan.

(f) *Preliminary determination by FmHA.* If preapplication information indicates the housing will not meet FmHA's minimum standards, the applicant is not eligible, or that guarantee authority is not available, FmHA will so inform the lender with specific reasons and reconsideration rights. (See § 1980.80.) The lender will notify the applicant in writing of all reasons for the decision reached. If the applicant may be eligible, the housing may meet FmHA standards, and loan guarantee authority may be available, FmHA might inform the lender in writing that it may submit a complete application.

(g) *Applications will consist of:* (1) Application for loan on a form approved by the lender, which includes at a minimum the information requested in paragraph (e) of this section. If a preapplication was submitted, it will be sufficient to verify that the information in the preapplication is still valid or provide revisions to the preapplication information.

(2) Architectural or engineering plans for dwelling and site if repair or new construction is planned, including a soils map and foundation design, if applicable.

(3) Cost estimates and forecasts of contingency funds to cover inflation or project changes.

(4) Appraisal reports.

(5) Credit report obtained by the lender.

(6) Form FmHA 400-1 "Equal Opportunity Agreement," if construction costing more than $10,000 is planned.

(7) Copies of building permits, if applicable, and any necessary certifications and recommendations of appropriate regulatory or other agencies having jurisdiction including any pollution control agency. (See also § 1980.44 of subpart A of this part.)

(8) A plot plan showing location of house and utilities, topography, landscaping, drainage, and other site development such as driveways, sidewalks, curbs, streets, etc.

(9) Information about the dwelling location with respect to the neighborhood and community services and facilities, business and industrial enterprises, and streets or roads serving the housing.

(10) Proposed loan documents between the borrower and lender (See paragraph VIII of Form FmHA 449-35 "Lender's Agreement").

(11) Evidence of compliance with the Privacy Act of 1974:

(i) Form FmHA 410-9 "Statement Required by the Privacy Act." The lender will furnish all applicants two copies of Form FmHA 410-9 at the time an application is filed. The applicant will sign both copies, retaining one and providing one to the lender which becomes a part of the loan file.

(ii) Form FmHA 410-10 "Privacy Act Statement to References." If the lender or FmHA desires to obtain information concerning the applicant from any source, two copies of Form FmHA 410-10 will be provided to the source. The source will sign both copies, retain one, and return the other copy, which becomes a part of the loan file.

(12) Any additional information required by FmHA.

(h) *Use of forms.* Lenders should use their forms, real estate mortgages, security instruments, and other agreements, provided such forms do not contain any provisions that are in conflict or are inconsistent with provisions of this subpart.

Administrative. The county supervisor will determine if the material and information submitted are complete and fill out a Form FmHA 444-2 "Single Family Housing Fund Analysis," for the county office file only.

§ 1980.332 FmHA evaluation of applications.

FmHA will evaluate the application. FmHA will make a determination as to whether the borrower is eligible, the proposed loan is for an eligible purpose and there is reasonable assurance of repayment ability, sufficient collateral, and sufficient equity. If FmHA determines it is unable to guarantee the loan, the lender will be informed in writing by use of Form FmHA 449-13 "Denial Letter." Such notification will include the reasons for denial of the guarantee. If FmHA is able to guarantee the loan, the county supervisor will proceed in accordance with administrative paragraph A of this section.

Administrative. A. When FmHA determines it is able to guarantee the requested loan, the county supervisor will prepare Form FmHA 440-1 in accordance with the forms manual insert (FMI). the county supervisor, except for the last 45 days in the fiscal year (FY), will then contact the State office by phone and request verbal authorization to immediately issue Form FmHA 449-14 to the lender. If the requested authorization is given, the county supervisor will complete Form FmHA 449-14, listing all requirements for such guarantee, sign the form, and forward the original and one copy to the lender. The county supervisor will record the actual date of lender notification on the remaining copy of Form FmHA 440-1 and make such copy a permanent part of the county office loan file. A copy of Form FmHA 440-1 will, in all cases, be mailed to the lender at the same time the form is mailed to the Finance Office for obligation of funding authority. The Finance Office, upon receipt of Form FmHA 440-1, will obligate guarantee authority and forward the original and one copy of Form FmHA 440-57 to the county office. During the last 45 days of each fiscal year and in all other cases when the State office declines phone authorization, the county supervisor will not issue Form FmHA 449-14 until the Form FmHA 440-1 has been mailed to the Finance Office and lender and Form FmHA 440-57 is received from the Finance Office indicating that guarantee authority has been obligated for the requested loan. Under no circumstances will the county office phone the Finance Office for authorization to issue a Form FmHA 449-14.

B. Each State office is authorized to give phone confirmation that guarantee authority is available to cover the loan guarantee requested and authorize the county supervisor to immediately issue Form FmHA 449-14 unless such confirmation would result in the State exceeding 80 percent of its guarantee authority for the current period, or the request for verbal authorization is received during the last forty-five (45) days of the fiscal year.

§ 1980.333 Review of requirements.

(a) *Accepting conditions.* Immediately after reviewing the conditions and requirements in Form FmHA 449-14, and the options listed on the back of the form, the lender should complete and sign the "Acceptance or Rejection of Conditions," and return a copy to the county supervisor. If conditions cannot be met, the lender and borrower may propose alternate conditions to FmHA. These alternatives will be considered and the lender will be advised of FmHA's decision. If altered conditions are acceptable, Form FmHA 449-14 will be revised.

(b) *Canceling commitment.* If the lender indicates in the "Acceptance or Rejection of Conditions" that it desires to obtain a loan note guarantee and subsequently decides at any time after receiving a conditional commitment that it no longer wants a loan note guarantee, the lender should immediately advise the county supervisor.

Administrative. A. The county supervisor will negotiate with the lender any changes, consistent with this regulation, to the initially issued or proposed Form FmHA 449-14.

B. The county supervisor will notify the Finance Office, in accordance with § 1980.61(e), of subpart A of this part, if a commitment is canceled.

§ 1980.334 Conditions precedent to issuance of the loan note guarantee.

(a) *Borrower copies.* The lender will see that the borrower is provided the original or copy, as appropriate, of:

(1) Drawings and specifications.

(2) Plot plan.

(3) Truth-in-Lending and Real Estate Settlement Procedures Act disclosure statements.

(4) Builder's warranty.

(5) Deed and mortgage or security instruments.

(b) *Lender file.* The lender will maintain a file for each guaranteed RH loan containing originals or copies, as appropriate, of all documents pertaining to that loan.

Administrative. A. *The county supervisor:* 1. Reviews all items required in accordance with § 1980.60 of subpart A of this part.

2. Reviews materials to see that all conditions imposed by Form FmHA 449-14 have been complied with.

3. Makes an onsite inspection of the property if the county supervisor has not already done so. Such inspection will be reflected on Form FmHA 424-12 as indicated in administrative paragraph A of § 1980.329 of this subpart.

4. Under no circumstances will the county supervisor issue Form FmHA 449-34 before Form FmHA 440-57 is received from the Finance Office.

B. To assure that all requirements of this regulation have been met, the District Director may conduct a postguarantee internal audit of selected cases before returning the loan documents to lenders and will document this review in the loan files examined.

§ 1980.335 Issuance of lender's agreement, loan note guarantee and assignment guarantee agreement.

Administrative (with reference to § 1980.61 of subpart A of this part): A. *See § 1980.61(a).* The original Form FmHA 449-35, will be kept in the county office. Paragraphs XC10 and XII4 of Form FmHA 449-35 will be crossed out for housing loans. Paragraphs XC 5 and 11 will be completed by adding -0- in the blank for housing loans.

B. *See § 1980.61(b)(1).* Copy(s) of all issued loan note guarantee(s) will be kept in the county office.

C. *See § 1980.61(b)(3).* For reporting purposes when multinotes are issued, the loan to the borrower will be counted as one loan regardless of the number of notes issued.

D. *See § 1980.61(b)(4).* The State director will notify the Finance Office of the transaction.

E. *See § 1980.61(d).* County supervisor signs all forms FmHA 449-13.

F. *See § 1980.61(f). The County supervisor will:* 1. Review Form FmHA 449-19 "Guarantee Fee Report," for completeness.

2. Forward the guarantee fee and original form FmHA 449-19 to Finance Office.

3. Retain in the county office loan file the original of Form FmHA 449-35 and copies of Form FmHA 449-19, Form FmHA 449-34, and Form FmHA 449-36 "Assignment Guarantee Agreement."

§ 1980.336 [Reserved]

§ 1980.337 Loan servicing.

The lender is responsible for loan servicing. See paragraph X of Form FmHA 449-35. Loan servicing is a preventive rather than a curative action. Prompt followup by the lender on delinquent payments and early recognition and solution of problems are keys to resolving many delinquent loan cases.

Administrative. A. The county supervisor is authorized to approve any servicing action consistent with customary and reasonable private sector servicing practices, but not more lenient than subpart A of part 1872 of this chapter (FmHA instruction 465.1).

B. The State director may consult with the National Office on any servicing problem and if it cannot be handled at the State level, the file will be forwarded to the National Office with recommendations.

C. County supervisor: 1. Assists in loan monitoring.

2. When the county supervisor has been notified by the lender of borrower's failure to fulfull any conditions of the loan documents, the county supervisor will forward the notification, the financial reports, and any recommendations through the District Director to the State director indicating the date reports were received in the county office and requesting advice for future loan servicing.

3. Is responsible for establishing an office management system for guaranteed loans in accordance with FmHA instruction 405.1.

D. District Director: 1. Will make sure that the county supervisor obtains from the lender the necessary reports and that the county supervisor transmits them to the State director.

2. Will provide guidance and assistance to the county supervisor if a loan develops into a problem case.

§ 1980.338 Defaults by borrower.

Refer to paragraph XI of Form FmHA 449-35. In case of default, the lender will arrange a meeting with the borrower to resolve the problem. A memorandum of the meeting, individuals who attended, a summary of the problem, and proposed solutions will

V 43/196 OCT 10 78

be forwarded to the county supervisor to be retained in the loan file.

Administrative. A. If the county supervisor receives a notice of default on a loan, the county supervisor will notify the State director in writing of the details. The county supervisor will notify the lender of decisions reached by FmHA.

B. Purchase of guaranteed portions by FmHA: See lender's agreement and assignment guarantee agreement.

1. The county supervisor monitoring the loan will normally coordinate and process requests for FmHA to purchase when the holder(s) are located in close proximity to the local lender. If holders are located outside the area, the State director of the State where the loan was made may handle the transaction and notify the county supervisor and District Director.

2. The county supervisor will review the material submitted, verify the amounts due the holder(s), and transmit the request by memorandum to the State director with copies to the District Director. Copies of evidence of ownership will be included. Any original evidence of ownership will be retained in the county office. A proposed payment date will be established to calculate the interest due the holder(s).

3. The State director will verify the amounts payable to the holder(s) and assure that all necessary material has been obtained. The State director will request a check to pay the holder(s) on the appropriate data entry form. (See § 1980.63 of subpart A of this part.)

4. If FmHA owns any guaranteed portion of the loan, it will be considered in any future report of loss calculations. A record of any purchase by FmHA will be maintained in the loan file.

§ 1980.339 Liquidation.

Refer to paragraph XII of form FmHA 449-35. If either the lender or FmHA concludes that liquidation of a guaranteed loan account is necessary because of one or more defaults of third-party actions that the borrower cannot or will not cure or eliminate within a reasonable period of time, it will notify the other party and the matter will be handled in accordance with paragraph XII of form FmHA 449-35.

Administrative. A. *Paragraph XIIB of Form FmHA 449-35.* FmHA will exercise the option to liquidate only when there is reason to believe the lender's liquidation plan will likely not result in maximum recovery. State directors are authorized to approve lender liquidation plans or exercise the FmHA option to liquidate.

B. *Paragraph XIID of Form FmHA 449-35.* County supervisors are responsible for review and acceptance of accounting reports submitted by lenders and for submission of such reports to lenders when FmHA is conducting liquidation.

C. *Paragraph XIIE2 of Form FmHA 449-35.* County supervisors are authorized to accept report of loss determinations on Form FmHA 449-30 "Loan Note Guarantee Report of Loss," from lenders and forward them to the State director. The State director will submit Form FmHA 449-30 to the Finance Office for payment of verified losses. The Finance Office forward loss payment checks to lender.

D. *Paragraph XIIE3 of form FmHA 449-35.* Final loss payments will be made within the 60 days required but only after an audit to assure all collateral for the loan has been properly accounted for. State directors are responsible to see that such audits are accomplished in time to be reviewed and accepted or otherwise resolved within the 60-day period. County supervisors may conduct such audits.

§ 1980.340 Protective advances.

(See subpart A, 1980.65.)

Administrative. A. It is not intended that protective advances be made in lieu of additional loans. Prior approval of the county supervisor is required on all protective advances in excess of $500. The county supervisor will consider the following when approving such advances:

1. The total amount of outstanding advances, the amount of those for which approval is requested, the outstanding loan balance, whether the account is current, and, if not, the extent of the delinquencies.

2. The borrower's ability to pay the remaining loan balance and any future advances in accordance with the repayment schedule.

§ 1980.341 Additional loans of advances.

(See subpart A, 1980.66.)

Administrative. Any additional loan that is to be guaranteed will meet the requirements of this regulation including area eligibility. The FmHA may approve additional loans or advances provided the approval official determines there will be no adverse changes in the borrower's financial situation and that such loan or advance is not likely to adversely affect the collateral or the guaranteed loan.

§ 1980.342 Transfer and assumptions.

(a) *FmHA approval.* All transfers and assumptions must be approved in writing by FmHA.

(b) *Eligibility preference.* Preference will be given to applicants who, after the transfer and assumption are made, will meet the eligibility requirements for the loan.

(c) *Eligible and ineligible.* Available transfer and assumption options to applicants include the following:

(1) The total indebtedness may be transferred to another eligible borrower.

(2) The total indebtedness may be transferred to an ineligible borrower.

(d) *Release of liability.* In any transfer and assumption case, the transferor may be released from liability by the lender with FmHA written concurrence.

(e) *Forms and case numbers.* The assumption will be made on the lender's form of assumption agreement. The assumption agreement must contain the FmHA case numbers of the transferor and the transferee.

(f) *Notations and notices.* It is the lender's responsibility to see that all transfers and assumptions will be noted on the loan note guarantee. The lender must give FmHA a copy of the transfer and assumption agreement. Notice must be given by the lender to FmHA indicating whether the loan and security can be properly transferred, the conveyance instruments filed, registered, or recorded, as appropriate, and whether the borrower will be released from liability.

(g) *Holder not consulted.* The holder, if any, need not be consulted on a transfer and assumption case unless there is a change in loan terms.

(h) *Loan note guarantee.* The existing loan note guarantee will continue in effect, so a new loan note guarantee will not be issued. However, as soon as the transfer and assumption have been completed, the lender will so indicate on the original loan note guarantee by inserting a check in the assumption agreement box and inserting the name of the assuming party for those purposes on the loan note guarantee. If the loan note guarantee is held by a holder, the lender will notify the holder of the changes.

Administrative. A. The county supervisor may consent:

1. To all transfer and assumption cases that meet the requirements of this regulation.

2. To the release of the transferor from liability on the loan. The county supervisor may approve or disapprove the transfer and will notify the lender and the appropriate parties of his decision in writing. The loan note guarantee will be endorsed in the space provided on the form.

B. A copy of the assumption agreement will be retained in the county office file and the county supervisor will send a copy to the State director.

§ 1980.343 Eligible transferee—full assumption.

An "eligible transferee" is one who meets the eligibility requirements of this regulation. An eligible transferee is also one who meets the requirements of this regulation except that the housing being transferred is in an area which has ceased to be rural.

(a) *Changes in promissory note or security instrument provisions.* If the assumption arrangement changes the repayment schedule or interest rate, the changes must be approved in writing by the present debtors if they are not to be released from personal liability and by the holder. The interest rate may be any legal rate agreed to by the lender and the assuming parties provided the rate does not exceed rates charged on similar loans in the area. Any new repayment schedule needed to meet the repayment ability of the transferee may cover a period not to exceed 33 years from the date of the transfer. The lender's request for approval to FmHA will be accompanied by:

(i) An explanation of the reasons for the proposed change in the provisions of the promissory note or security instrument.

(2) A statement that the lender's determinations required by paragraph (b) of this section can be made.

(3) Advice as to whether the present debtors will sign an agreement to indicate their continued liability or will be released from personal liability.

(b) *Determinations by lender.* Before the transfer and assumption can be approved, the lender must determine that all of the following conditions exist or can be met:

(1) The transferee is an eligible applicant.

(2) The transferee will acquire all of the property securing the guaranteed loan balance.

(3) The transferee cannot acquire the security property without the guaranteed loan credit.

(4) The market value of the security property being acquired by the transferee is at least equal to the amount of the secured indebtedness against it.

(5) The priorities of the existing lien or liens securing the guaranteed loan will be maintained or improved.

(6) The transferee appears to have the ability and desire to pay the amount to be assumed.

(7) Proper hazard insurance will be obtained.

(8) The transaction can be properly closed and the conveyance instruments will be filed, registered, or recorded, as appropriate and legally permissible.

(c) *Closing transfer and assumption.* As soon as the lender finds that it will be able to make the determinations required in paragraph (b) of this section and has received FmHA's approval, the lender may proceed with closing the transfer and assumption transaction. The closing will include, but will not be limited to, obtaining execution and delivery of the conveyance instruments and the assumption agreement, compliance with any legal requirements, and the filing, registration, or recordation of said conveyance instruments, as appropriate and legally permissible.

(d) *Material furnished to FmHA after closing.* Immediately after the transfer and assumption have been closed, the lender will furnish to FmHA:

(1) Two conformed copies of the executed assumption agreement.

(2) A statement showing:

(i) What changes, if any, have been made in the provisions of the promissory note or security instruments.

(ii) That all of the conditions and requirements of paragraph (b) of this section have been met.

(iii) That insertions have been made on the original loan note guarantee as required in § 1980.342(h).

(iv) Whether the present debtors have been released from personal liability or have signed an agreement of continued personal liability.

Administrative. A. *Concurrrence of FmHA.* If the county supervisor approves the proposed transfer, including any proposed changes in the promissory note or security instrument provisions, the county supervisor will so advise the lender in writing and the lender may proceed with the transfer and assumption.

B. *Conformed copies—sent to and checked by FmHA county supervisor.* When the county supervisor receives the two conformed copies of the executed assumption agreement and the original statement from the lender as required in paragraph (d) of this section, the county supervisor will examine them to see whether they are proper in all respects.

(1) If county supervisor finds any errors or ommissions in the conformed copies, the county supervisor will return the defective material to the lender so that the errors or omissions may be corrected. If the original assumption agreement contains the same defects, it will first have to be corrected and the corrections initialed by the assuming parties and the lender and also by the present debtors if they will remain personally liable.

(2) If the county supervisor finds the material to be in proper order, either before or after correction, the county supervisor will notify the Finance Office in order that the Finance Office records may be adjusted accordingly.

§ 1980.344 Ineligible transferee—full assumption.

An "ineligible transferee" is one that does not meet the eligibility requirements of this regulation.

(a) *Continued liability of present debtors.* Since the terms of the promissory note will be changed in the assumption agreement, the present debtors will be required to sign the agreement of continued liability on the bottom of the assumption agreement if their continued personal liability is required because the assumption agreement repayment period is more than 5 years or for any other reason.

(b) *Interest rate and term of assumption.* The interest rate may be any legal rate agreed to by the lender and the assuming parties provided the rate does not exceed rates charged on similar loans in the area. The term in these cases cannot exceed 5 years except it may be up to 15 years if:

(1) The present debtors are not released from personal liability.

(2) FmHA makes a written determination that a period longer than 5 years is necessary to protect the financial interests of FmHA as guarantor.

(c) *Determinations by lender.* Before the transfer and assumption are consummated, the lender must obtain all holders' and FmHA's approval of the transaction. As a basis for obtaining that approval, the lender must furnish to FmHA a completed but unexecuted copy of the transfer document and a statement showing that the following determinations have been made:

(1) That the transferee is not an eligible applicant.

(2) That the proposed transfer and assumption appear to be the best method for most adequately protecting the financial interests of the lender and FmHA.

(3) That the market value of the security property to be transferred is equal to or more than the unpaid balance on the guaranteed loan plus any prior liens, or that the financial situation of the transferee is such that any difference could be readily collected.

(4) That the determinations, conditions and requirements of § 1980.343(b) (2), (5), (6), (7), and (8) are made.

(5) That the proposed term of the assumption is necessary and meets the requirements of paragraph (b) of this section.

(6) Whether the present debtors will sign an agreement of continued liability or will be released from personal liability.

(d) *Closing transfer and assumption.* Upon receipt of FmHA's approval letter, the lender may proceed with closing the transfer and assumption transaction. The closing will include, but will not be limited to, obtaining execution and delivery of the conveyance instruments and the assumption agreement, compliance with any legal requirements, and filing, registration, or recordation of said conveyance instruments, as appropriate.

(e) *Material furnished to FmHA after closing.* Immediately after the transfer and assumption have been closed, the lender will furnish to FmHA:

(1) Two conformed copies of the executed assumption agreement.

(2) A statement showing:

(i) That all of the conditions and requirements have been met in accordance with the approval letter issued by FmHA.

(ii) That the insertions have been made on the original loan note guarantee as required in § 1980.342(h).

(iii) Whether the present debtors have been released from personal liability or have signed an agreement of continued liability.

Administrative. A. *Approval by FmHA.* If the county supervisor approves the lender's determinations and agrees that the transfer and assumption should be made as proposed, the county supervisor will send a letter of approval to the lender. If the assumption term exceeds the 5-year limitation in paragraph (b) of this section, the letter will contain FmHA's express determination that the longer term is necessary to protect its financial interest as guarantor. If FmHA determines that it cannot approve the pro-

V 43/196
OCT 10 78

posed transaction, it will inform the lender in writing of the reasons. If the lender satisfies FmHA's objections, it may submit the matter for reconsideration.

B. *Conformed copies—Sent to and checked by FmHA county supervisor.* The procedure set forth in § 1980.343 administrative paragraph B of this subpart will be followed in examining and handling the material furnished under paragraph (e) of this section.

§§ 1980.345–1980.400 [Reserved]

General administrative. A. *Office of the General Counsel (OGC).* In performing the FmHA functions, the advice and assistance of OGC may be sought and followed on any legal matter. However, in loanmaking, it is the responsibility of the lender to ascertain that all requirements for making, securing, and servicing the loan are duly met. If FmHA has any questions concerning the lender's resolution of these matters, only FmHA may consult with OGC.

B. *Delegation of authority.* The State director may delegate to State office rural housing and support staff those administrative duties and responsibilities set forth in the administrative sections of this subpart.

(42 U.S.C. 1480; delegation of authority by the Secretary of Agriculture, 7 CFR 2.23; delegation of authority by the Assistant Secretary for Rural Development, 7 CFR 2.70.)

Dated: September 29, 1978.

GORDON CAVANAUGH,
Administrator,
Farmers Home Administration.

Title 9—Animals and Animal Products

CHAPTER I—ANIMAL AND PLANT HEALTH INSPECTION SERVICE, DEPARTMENT OF AGRICULTURE

SUBCHAPTER D—EXPORTATION AND IMPORTATION OF ANIMALS (INCLUDING POULTRY) AND ANIMAL PRODUCTS

PART 94—RINDERPEST, FOOT-AND-MOUTH DISEASE, FOWL PEST (FOWL PLAGUE), NEWCASTLE DISEASE (AVIAN PNEUMOENCEPHALITIS), AFRICAN SWINE FEVER, AND HOG CHOLERA: PROHIBITED AND RESTRICTED IMPORTATIONS

Pork and Pork Products From Countries Where African Swine Fever Exists or is Reasonably Believed To Exist and Change in Disease Status of Haiti

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: This document amends the regulations concerning the importation of pork and pork products from countries where African swine fever, a contagious and infectious disease of swine, exists, to include countries where African swine fever is reasonably believed to exist, under conditions constituting a risk of introduction or spread of the disease into the United States. This document also designates Haiti as a country in which the contagion of African swine fever is believed to exist, under conditions constituting a risk of introducing African swine fever into this country. The intended effect of this amendment is to restrict the entry into the United States of pork and pork products from countries where African swine fever is reasonably believed to exist.

EFFECTIVE DATE: October 3, 1978.

FOR FURTHER INFORMATION CONTACT:

Dr. James D. Roswurm, USDA, APHIS, VS, Room 819, Federal Building, Hyattsville, Md. 20782, 301-436-8499.

SUPPLEMENTARY INFORMATION: African swine fever is potentially the most dangerous and destructive of all communicable swine diseases. The causative virus of African swine fever is highly virulent and may be present in pork and pork products originating in countries where the disease exists. Such products constitute a grave danger to healthy swine. The only known practical method of destroying the disease virus in pork and pork products is by heat treatment.

In order to protect domestic swine from the effects of this disease, it is necessary to control the entry of all pork and pork products which may contain active African swine fever virus. On occasion, situations exist where there is reason to believe that African swine fever exists in a country, but a definitive diagnosis of the disease has not been made or if made is not reported expeditiously to the United States to allow appropriate measures to be taken to prevent the introduction or spread of the disease into this country. The present regulations only provide for restricting the importation of pork and pork products into the United States from countries in which the disease is known to exist. Therefore, it is necessary to amend the regulations in 9 CFR 94.8 to restrict the entry of pork and pork products into the United States from countries where African swine fever is reasonably believed to exist when such action is necessary to prevent the risk of introducing African swine fever into this country.

A reasonable determination of the probable existence of African swine fever within a country can be made by the Administrator, on a case by case basis, upon the following factors:

1. When a country allows the importation of host animals, pork or pork products or vectors of the disease from a country affected with African swine fever under conditions less stringent than those prescribed for importing host animals, pork or pork products or vectors of the disease into the United States from a country affected with African swine fever; or

2. When a country allows the movement or use of African swine fever virus or cultures under conditions less stringent than those prescribed for similar movements or use into or within the United States; or

3. The proximity of a country to another country or countries with known outbreaks of African swine fever; or

4. A country's lack of a disease detection, control or reporting system capable of detecting or controlling the disease and reporting it to the United States in time to allow the United States to take appropriate action to prevent the introduction of African swine fever into this country; or

5. Any other fact or circumstance found to exist which constitutes a risk of introduciton of the disease into the United States.

It is imperative that the entrance of pork and pork products into the United States from such countries be controlled as quickly as possible.

Section 94.8 of title 9 of the Code of Federal Regulations was amended to add the Dominican Republic as a country in which African swine fever exists on July 11, 1978, because of the confirmation of African swine fever in swine herds in that country. Since then, extensive outbreaks of the disease have occurred in the Dominican Republic.

Reports have been received that shipments of pork products, including smoked ham, salami, bologna, and sausage, move into Haiti from the Dominican Republic. Further, it is reported to be a common practice for Dominican Republic and Haitian officials stationed at border points on the Haiti-Dominican Republic international boundary to barter various items, including livestock, back and forth across the border. Consequently, there is a strong probability that swine from the Dominican Republic have moved into Haiti. Additionally, excessive death losses are reported to have occurred in swine on both sides of the Haiti-Dominican Republic international boundary and the Haitian government has been unable to either confirm the existence of the disease in the country of deny its existence.

On the basis of the available evidence, the Department has determined that African swine fever can be reasonably believed to exist in Haiti. Therefore, in order to prevent the introduction or dissemination of the contagion of African swine fever into the United States, the Department is designating Haiti in 9 CFR 94.8 as a country where it is reasonable to believe that African swine fever exists and restricting the importation of pork and pork products from that country into the United States.

This designation restricts the entry into the United States of pork and pork products from Haiti to pork and pork products which have been commercially sterilized by heat in hermetically sealed containers, or which are allowed controlled entry into the United States for further processing by heat in accordance with 9 CFR 94.8.

Accordingly, Title 9, Part 94, Code of Federal Regulations, is hereby amended in the following respects:

1. The title of § 94.8 is amended to read:

§ 94.8 Pork and pork products from countries where African swine fever exists or is reasonably believed to exist.

* * * * *

2. In § 94.8, the colon is deleted and the following is added to the end of the introductory paragraph: "• • • or the administrator has reason to believe the disease exists because of the following factors:

"1. When a country allows the importation of host animals, pork or pork products or vectors of the disease from a country affected with African swine fever under conditions less stringent than those prescribed for importing host animals, pork or pork products or vectors of the disease into the United States from a country affected with African swine fever; or

"2. When a country allows the movement or use of African swine fever virus or cultures under conditions less stringent than those prescribed for similar movements or use into or within the United States; or

"3. The proximity of a country to another country or countries with known outbreaks of African swine fever; or

"4. A country's lack of a disease detection, control or reporting system capable of detecting or controlling the disease and reporting it to the United States in time to allow this country to take appropriate action to prevent the introduction of African swine fever into this country; or

"5. Any other fact or circumstance found to exist which constitutes a risk of introduction of the disease into the United States."

3. In § 94.8, following the introductory paragraph, the name of Haiti is added after the reference to "France" and before "Italy."

4. In § 94.8 (a) and (c), the phrase "where African swine fever exists," is deleted and the phrase "listed in this section" is inserted in lieu thereof.

(Sec. 2, 32 Stat. 792, as amended (21 U.S.C. 111); 37 FR 28464, 28477; 38 FR 19141.)

This amendment is of an emergency nature and must be made effective immediately to protect domestic swine against the introduction of African swine fever from Haiti. It excludes intransit shipments of pork and pork products that are aboard a carrier moving to the United States at the time of issuance hereof. Such intransit shipments, upon arrival in the United States, shall either be allowed entry or be disposed of only under such specific requirements and in such a manner as the Administrator may determine, in each specific case, to be necessary and adequate to safeguard against the introduction or dissemination of African swine fever into the United States.

Accordingly, under the administrative procedure provisions in 5 U.S.C. 553, it is found upon good cause that notice and other public procedure with respect to the amendment are impracticable and contrary to the public interest, and good cause is found for making it effective less than 30 days after publication in the FEDERAL REGISTER.

NOTE.—The Animal and Plant Health Inspection Service has determined that this document does not contain a major proposal requiring preparation of an inflation impact statement under Executive Order 11821 and OMB Circular A-107.

Done at Washington, D.C., this 3d day of October 1978.

PIERRE A. CHALOUX,
Deputy Administrator,
Veterinary Services.

Title 10—Energy

CHAPTER II—FEDERAL ENERGY ADMINISTRATION*

PART 205—ADMINISTRATIVE PROCEDURES AND SANCTIONS

1978 Interpretations of the General Counsel

AGENCY: Department of Energy.

ACTION: Notice of interpretations.

SUMMARY: Attached are the interpretations issued by the Office of the General Counsel of the Department of Energy under 10 CFR Part 205, subpart F, during the period September 1, 1978, through September 30, 1978. Also attached is a modification of interpretation 1978-33, issued to the Independent Oil Compounders Association on June 6, 1978. See appendix below for subjects and interpretations issued.

FOR FURTHER INFORMATION CONTACT:

Diane Stubbs, Office of the General Counsel, Department of Energy, 12th and Pennsylvania Avenue NW., Room 1121, Washington, D.C. 20461, 202-566-9070.

SUPPLEMENTARY INFORMATION: Interpretations issued pursuant to 10 CFR part 205, subpart F, are published in the FEDERAL REGISTER in accordance with the editorial and classification criteria set forth in 42 FR 7923, February 8, 1977, as modified in 42 FR 46270, September 15, 1977.

These interpretations depend for their authority on the accuracy of the factual statement used as a basis for the interpretation (10 CFR 205.84(a)(2)) and may be rescinded or modified at any time (§ 205.85(d)). Only the persons to whom interpretations are served are entitled to rely on them (§ 205.85(c)). An interpretation is modified by a subsequent amendment to the regulation(s) or ruling(s) interpreted thereby to the extent that the interpretation is inconsistent with the amended regulation(s) or ruling(s) (§ 205.85(e)). The interpretations published below are not subject to appeal.

Also published today is interpretation 1978-33 which was modified in accordance with 10 CFR 205.85(d). The modification does not alter the decision reached in interpretation 1978-33.

Issued in Washington, D.C., October 3, 1978.

EZRA C. LEVINE,
Acting Assistant General Counsel for Interpretations and Rulings, Office of General Counsel.

* EDITORIAL NOTE.—Chapter II will be renamed at a future date to reflect that it contains regulations administered by the Economic Regulatory Administration of the Department of Energy.

V 43 / 196 OCT 10 78 UNT

FACTS

Gulf Oil Company—U.S. (Gulf), a division of Gulf Oil Corporation, has for each month in 1972 and subsequent thereto sold motor gasoline to Yellow Cab Company of Philadelphia (Yellow Cab), the largest taxicab company operating in the Philadelphia metropolitan area. Yellow Cab is a wholesale purchaser-consumer [1] and its relationship with Gulf for the purchase of motor gasoline is therefore subject to the provisions of the Mandatory Petroleum Allocation Regulations.

Prior to April 1, 1978, and throughout 1972, the payment terms applicable to the supply of motor gasoline by Gulf to Yellow Cab were cash on delivery (c.o.d.) at Yellow Cab's delivery locations. Pursuant to these terms, Yellow Cab paid by check a total of XXXXXXXXXX on March 29 and 31, 1978, for deliveries of motor gasoline made on those dates.

On April 1, 1978, Yellow Cab filed a petition for arrangement under Chapter XI of the Federal Bankruptcy Act with the United States District Court for the Eastern District of Pennsylvania. In that proceeding, the bankruptcy judge ordered:

"that the bank accounts presently maintained by the Debtor [Yellow Cab] shall be closed, and all funds presently on deposit to the credit of the Debtor in said accounts shall be transferred to new accounts to be opened in said banks, or certain of said banks, entitled 'YELLOW CAB COMPANY OF PHILADELPHIA, Debtor-in-Possession.'"

As a result of this order, Yellow Cab lost all authority to pay out any sums of money for indebtedness accrued prior to April 1, 1978, except through a plan of arrangement or liquidation. Accordingly, the drawee bank dishonored the checks totaling XXXXXXXXXX which Yellow Cab had used as payment to Gulf for the March 29 and 31 deliveries of motor gasoline. Gulf, however, continued to supply Yellow Cab with its product allocation while demanding that the cab company make arrangements to pay the outstanding debt. On May 19, 1978, Gulf concluded that the necessary arrangements were not being implemented by Yellow Cab and therefore gave notice that all deliveries of motor gasoline would be terminated commencing May 25, 1978.

At the request of Yellow Cab, the United States District Court for the Eastern District of Pennsylvania per a bankruptcy judge granted on May 25, 1978, a temporary restraining order against Gulf directing the firm to continue supplying gasoline to Yellow Cab. Subsequently, the order was amended to provide:

"At such time as a final response of the United States Department of Energy to the Request for Interpretation has been issued, it shall be filed of record and the parties hereto or either of them, shall then be permitted to seek such further action with respect to continuation or termination of this injunction as they deem appropriate."

In the request for interpretation filed jointly by Yellow Cab and Gulf, the taxicab company contends that the supplier/purchaser relationship between the two parties should be preserved since there has been no breach of the normal business practices rule. Yellow Cab further argues that upon approval by creditors of an arrangement of debts, Gulf may subsequently be compensated in whole or in part for the outstanding debt, depending on its position with respect to the other creditors. Gulf, however, maintains that Yellow Cab's failure to pay for the product delivered on March 29 and 31 was not in compliance with the normal business practices rule, thereby warranting suspension of deliveries of motor gasoline until such time as Yellow Cab makes payment for its outstanding debt.

Presently, in accordance with the order from the District Court, Gulf is supplying gasoline to Yellow Cab on a c.o.d. basis, and Yellow Cab is making payment by certified check.

ISSUE

Does Yellow Cab's failure to meet its payment obligations of March 29 and 31 constitute a breach of the normal business practices rule in 10 CFR 210.62 warranting a suspension in the delivery of motor gasoline by Gulf?

INTERPRETATION

For the reasons set forth below, it has been concluded that Gulf may not suspend its deliveries of motor gasoline to Yellow Cab since there has not been a substantial failure to arrange proper payment by Yellow Cab for deliveries of that product.

The Mandatory Petroleum Allocation Regulations, set forth at 10 CFR Part 211, were adopted on January 14, 1974, 39 FR 1924 (January 15, 1974), and were intended to apply to the allocation of "crude oil, residual fuel oil and refined petroleum products produced in or imported into the United States" (10 CFR 211.1). Those regulations were adopted to implement the statutory mandate of Section 4(a) of the Emergency Petroleum Allocation Act of 1973 (the EPAA), as amended, Pub. L. No. 93-159 (November 27, 1973).[2]

Subpart F of the Mandatory Petroleum Allocation Regulations provides for the mandatory allocation of "all motor gasoline produced in or imported into the United States." 10 CFR 211.101(a).[3] According to § 211.105(a) of that subpart, unless specified otherwise, the provisions of §§ 211.9-211.13 apply to supplier/purchaser relationships involving motor gasoline. Section 211.9(a)(1) directs the maintenance of certain supplier/purchaser relationships and provides:

"Each supplier of an allocated product shall supply all wholesale purchaser-resellers and all wholesale purchaser-consumers which purchased or obtained that allocated product from that supplier during the base period as specified in Subparts D through K of this part."

The applicable "base period" for motor gasoline as set forth in § 211.102 is "the month of 1972 corresponding to the current month." Thus, pursuant to § 211.105 (with its reference to § 211.9(a)(1)) suppliers of motor gasoline must maintain their supplier/purchaser relationships with wholesale purchaser-consumers in effect during the 1972 base period, utilizing the allocation levels provided in § 211.103.

However, the allocation regulations do not require a supplier to sell allocated products to purchasers who do not arrange proper credit or payment for those products. In that regard, § 210.62(a) provides in part:

"Suppliers will deal with purchasers of an allocated product according to normal business practices in effect during the base period specified in Part 211 for that allocated product . . . *Nothing in this paragraph shall be construed to require suppliers to sell to purchasers who do not arrange proper credit or payments for allocated products, as customarily associated with that class of purchaser during the base period* (for seasonal credit), *or on May 15, 1973* (for other credit terms)." [Emphasis added.]

In light of the goals and purposes of the Mandatory Petroleum Allocation Regulations, the issue of whether a purchaser's failure to pay a supplier for deliveries of allocated product will result in a termination of a supplier/purchaser relationship will be scrutinized on a case by case basis. That examination will focus upon whether or not there has been a "substantial" deviation from normal credit practices to the detriment of the supplier. In a situation where the supplier alleges that the purchaser has failed to properly arrange credit and payment for sales of an allocated product, great consideration will be given to the magnitude and duration of harm to the supplier. Minor and infrequent delays in payment over an extended period of time do not usually warrant a total cessation of product deliveries. However, where a purchaser has exhibited a pattern of late payments or has failed to make payments altogether to the disadvantage of the supplier, termination of the supplier's obligation to supply that purchaser may be permissible. See *Mack C. Colt, Inc.*, Interpretation 1978-56, 43 FR 40209 (September 11, 1978).

In the case presently under consideration, Yellow Cab failed to make proper payment to Gulf for motor gasoline delivered on March 29 and 31 as a result of an order by a Federal bankruptcy judge directing that the bank accounts of Yellow Cab, effective April 1, 1978, "shall be closed." That order originated from a proceeding for arrangement under Chapter XI of the Federal Bankruptcy Act with respect to the taxicab business operated by Yellow Cab in and around Philadelphia. The judge further ordered that Yellow Cab be designated a "Debtor-in-Possession," and from April 1, 1978, forward, be directed to handle all future obligations on a priority basis as expenses of administration. Since that time Yellow Cab has made all payments for its allocation of gasoline on a timely basis and in accordance with the normal business practices in effect between Yellow Cab and Gulf. Thus, although Yellow Cab's checks totaling $15,391.10 were not honored by its bank upon presentment by Gulf on or after April 1, 1978, on all other occasions before and after that date Yellow Cab has conformed substantially with the terms of its agreement with Gulf and has thus complied with the normal business practices rule of § 210.62.[4]

After evaluating the facts presented by Gulf and Yellow Cab, the DOE has concluded that there are insufficient grounds for allowing Gulf to terminate or to temporarily suspend deliveries of motor gasoline to Yellow Cab.[5] This conclusion takes into consideration the lack of previous disruptions in the business relations of the two parties, as well as the priority status assigned by the bankruptcy judge to all future obligations incurred by Yellow Cab for purchases of motor gasoline. So long as Gulf is delivering product to Yellow Cab on a c.o.d. basis and is receiving certified checks for its product, it is not in any way disadvantaged by the continuance of this supplier/purchaser relationship. In addition, Gulf is only temporarily prevented from obtaining compensation for the product it delivered to Yellow Cab on March 29 and 31 until such time as a plan of arrangement is agreed upon. At that point, Gulf may be compensated in full or in part depending upon the number of other existing debts and the amount of funds available to pay them.

Based on the foregoing, a termination of Gulf's supplier/purchaser relationship with Yellow Cab, whether temporary or permanent, is not in accordance with the goals of the EPAA and the Mandatory Petroleum Allocation Program.[6] To permit a suspension or cessation of product deliveries by suppliers for occasional payment delays or other minor business difficulties could foster instability and uncertainty among all purchasers as to the security of their supplies. Accordingly, based on the facts presented at this time by Gulf and Yellow Cab, Gulf may not suspend or terminate deliveries of motor gasoline to Yellow Cab.[7]

INTERPRETATION 1978-58

To: Campbell H. Elkins and El Ran, Inc.
Date: September 22, 1978.
Rules Interpreted: 10 CFR 212.54 and 212.72.
Code: GCW-PI—Definition of Property.

FACTS

In August of 1977, Campbell H. Elkins (Elkins), a crude oil producer, acquired the production rights to oil and gas leases from Westland Energy Corporation (Westland), in a single lease instrument.[1] The leased area had formerly been leased to Sinclair Oil and Gas Company (Sinclair), which obtained working interest rights in 1967 and 1968 pertaining to a tract of land of approximately 40 acres. Sinclair failed to drill any producing wells on the tract, and all rights thereto were released in 1972 by Atlantic Refining Company, successor to Sinclair.

In 1974, the undivided interest owners leased their interest in the subject tract to Macdonald Oil Corporation and its successor Adobe Oil and Gas Corporation. Both companies failed to exercise their rights in the lease, and in 1977, Westland, the present lessee of the tract, exercised the right to assign the lease to Elkins.

El Ran, Inc. (El Ran), a crude oil producer, will operate the crude oil wells which Elkins proposes to drill on the leased acreage.

According to Elkins, crude oil was not produced from the leased area in 1972, and is not presently being produced from the leased area.

ISSUE

1. May crude oil produced from a property that did not produce crude oil in 1972, be treated as "new" crude oil pursuant to 10 CFR Part 212, Subpart D?

2. When would the Elkins property qualify as a stripper well property pursuant to 10 CFR 212.54?

INTERPRETATION

From the information presented by Elkins, it has been determined that the leased acreage acquired by Elkins in 1977, is a single property which did not produce crude oil in 1972.

The term "property" is defined in 10 CFR 212.72, in relevant part, as "the right to produce domestic crude oil, which arises from a lease or from a fee interest." The meaning of the terms "property" and "lease" was reviewed in detail by the Department of Energy (DOE) in Ruling 1977-1, 42 FR 3628 (January 19, 1977), in which it was concluded that, for price control purpose in those cases involving an oil and gas lease, "property" is the right to produce crude oil from specific leased premises, rather than the right only as vested in a particular lessee. Thus, since Elkins acquired the right to produce on the leased acreage, which was historically treated as a single tract since the original conveyance to Sinclair, Elkins acquired a "property" for purposes of 10 CFR Part 212, Subpart D. *See e.g. Meridian Oil Corp.*, Interpretation 1977-46, 43 FR 1481 (January 10, 1978).

Moreover, all crude oil produced from the property is "new" crude oil subject to the upper tier ceiling price rule in 10 CFR 212.74. "New crude oil," defined in 10 CFR 212.72, generally consists of the incremental crude oil *production above the property's historic base production control level (BPCL)*[2] (if any), less any current cumulative deficiency. If *no* crude oil was produced from a tract in 1972, the BPCL is zero. Therefore, with respect to the Elkins property, all crude oil production will qualify as upper tier crude oil, as defined in 10 CFR 212.74.

"Average daily production" is defined in 10 CFR 212.54(c) as:

In its submission, Elkins also requests guidance concerning the qualification of the property as a stripper well property. "Stripper well property" is defined in 10 CFR 212.54(c) as:

"a 'property' whose average daily production of crude oil (excluding condensate recovered in non-associated production) per well did not exceed 10 barrels per day during any preceding consecutive 12-month period beginning after December 31, 1972."

"the qualified maximum total production of crude oil (excluding condensate recovered in non-associated production) produced from a property, divided by a number equal to the number of days in the 12-month qualifying period times the number of wells that produced crude oil (excluding condensate recovered in non-associated production) from that property in that 12-month qualifying period. To qualify as maximum total production, each well on the property must have been maintained at the maximum feasible rate of production throughout the 12-month qualifying period and in accordance with recognized conservation practices, and not significantly curtailed by reason of mechanical failure or other disruption in production."

Thus, the property would qualify as a stripper well property if crude oil is produced from the property at the stripper well levels of less than 10 barrels per well per day for 12 consecutive months. *See e.g. H.H. Weinert Estate*, Interpretation 1978-9, 43 FR 15620 (April 14, 1978); *Rustex Oil, Inc.*, Interpretation 1978-5, 43 FR 12852 (March 28, 1978). Upon its certification as a stripper well property, crude oil produced from the Elkins property is eligible to receive "exempt" prices as set forth in 10 CFR 212.54(a).

INTERPRETATION 1978-59

To: E. E. Ryall.
Date: September 26, 1978.
Rules Interpreted: 10 CFR 211.9; 211.51.
Code: GCW - AI—Supplier/Wholesale Purchaser-Reseller Relationship.

FACTS

---

[1] Wholesale purchaser-consumer is defined in 10 CFR 211.51 to mean: "Any firm that is an ultimate consumer which, as part of its normal business practices, purchases or obtains an allocated product from a supplier and receives delivery of that product into a storage tank substantially under the control of that firm at a fixed location and which * * * purchased or obtained more than 84,000 gallons of that allocated product in any completed calendar year subsequent to 1971."

[2] 15 U.S.C. § 751 *et seq.* (1976).

[3] Adopted January 5, 1974, 39 FR 1924 (January 15, 1974).

[4] Neither Yellow Cab nor Gulf has alleged any other difficulties with respect to their business dealings.

[5] The DOE has not addressed the issue of whether the facts presented would justify an alteration of credit terms since neither party raised that question in their interpretation request. The agency has previously considered that issue in *Crystal Oil Company*, 1 FEA ¶20,161 (November 8, 1974).

[6] It should be noted that in § 4(b) (1) (B) of the Emergency Petroleum Allocation Act, the Congress expressly directed that the mandatory petroleum allocation regulations "to the maximum extent practicable" provide for "maintenance of all public services * * * (including transportation facilities and services which serve the public at large)." The conclusion reached in this interpretation, with respect to the supply obligation of Gulf to Yellow Cab—a provider of transportation services to the public—is fully consistent with, and in furtherance of, this statutory objective.

[7] This interpretation relied upon the facts submitted by the parties on July 13, 1978, and does not constitute a permanent bar to any future termination of the supplier/purchaser relationship should it be warranted by a change in the facts.

[1] This leased acreage is located in the Southeast Quarter, Section 34, Township South, Range East in Roosevelt County, New Mexico.

[2] "Base production control level" means: * * *

"(2) with respect to months commencing after January 31, 1976, except as provided in § 212.76, either: (A) the total number of barrels of old crude oil produced and sold from the property concerned during calendar year 1975, divided by 365, multiplied by the number of days in the month in 1975 which corresponds to the month concerned; or (B) if the producer elects to certify crude oil sales for 1972 in accordance with § 212.131(a)(1) [sic], the total number of barrels of crude oil produced and sold from the property concerned during the calendar year 1972, divided by 366, multiplied by the number of days during the month in 1972 which corresponds to the month concerned." (10 CFR 212.72)

V 43/196 OCT 10 78

Vero Beach, Florida. Under the terms of the Consignment Agreement (Agreement), Ryall obtains motor gasoline and other products from Texaco storage facilities for delivery to retail outlets in and around Vero Beach at prices and terms fixed by Texaco. Title to the products remains with Texaco. The Agreement consists of Texaco standard Form S-82 as amended by standard Form S-368.

The Agreement provides that Ryall, as a consignee, is free to sell to any purchasers he selects for cash or properly authorized credit. Ryall may also extend credit to customers on his own account without authorization from Texaco, but in such cases becomes responsible to Texaco for the amount of the sale.

The Agreement further requires Ryall to keep records of all sales, deliveries, inventory, and receipts, which are subject to audit by Texaco. He is required to pay for any shortages of products consigned to him by Texaco if such shortages are disclosed in an audit by Texaco. He carries liability insurance on his business operations, which also covers the petroleum products consigned to him by Texaco, even though title to these products remains with Texaco. Ryall has a capital investment in trucks and operating equipment, and uses his own equipment to pick up and deliver Texaco products. He carries health and life insurance for his employees. Texaco does not withhold Federal income or Social Security taxes on the commissions it pays to Ryall.

Since June 1973, Texaco has made direct deliveries to three stations which were served by Ryall during each month of 1972—the base period for motor gasoline.

ISSUE

Is Ryall a wholesale purchaser-reseller as that term is defined in 10 CFR 211.51?

INTERPRETATION

It has been concluded that Ryall, a consignee agent of Texaco, operating pursuant to the Consignment Agreement mentioned above, is a wholesale purchaser-reseller as defined in 10 CFR 211.51.

Wholesale purchaser-reseller is defined in 10 CFR 211.51 as:

"any firm which purchases, receives through transfer, or otherwise obtains (*as by consignment*) an allocated product and resells or otherwise transfers it to other purchasers without substantially changing its form." (Emphasis added.)

The use of the term "as by consignment" in the definition of wholesale purchaser-reseller was interpreted in Ruling 1975-8, 40 FR 30037 (July 17, 1975). In that Ruling, it was determined that firms which obtain and resell or otherwise transfer allocated products are not automatically excluded from the definition of wholesale purchaser-reseller solely on the ground that they fail to take legal title to the allocated product. Those consignees which have a substantial degree of operational independence in conducting their business of transferring and selling a supplier's products (rather than merely providing a distribution service between a supplier and the supplier's customers or functioning like an employee of the supplier) fully qualify as wholesale purchaser-resellers pursuant to § 211.51. These firms are subject to the same benefits and obligations of the Mandatory Petroleum Allocation Program which apply to other wholesale purchaser-resellers.

According to Ruling 1975-8, a consignee that qualifies under 10 CFR 211.51 as a wholesale purchaser-reseller will generally have most (but not necessarily all) of the following characteristics: (a) Appropriate facilities and equipment for the conduct of the business of selling and distributing its supplier's product; (b) responsibility, independent of its supplier, for its internal financial management and physical and administrative operations; (c) responsibility to its supplier and others for expenses and liabilities arising from and connected with the business of transfer and sale of its supplier's products; and (d) independent control over the disposition of the allocated product, including the right to enter into and terminate relationships with customers rather than being restricted to distributing products solely to customers designated by the supplier.

The pertinent facts in this case are identical to those in another Texaco consignee case, *Warren Stevenson*, Interpretation 1978-46, 43 FR 34437 (August 4, 1978). In *Stevenson* it was noted at 34438:

"Although the Agreement specifies the status of its distributors as that of 'consignee-agent,' this nomenclature is not determinative of Stevenson's status. It is only necessary that the consignee meet most of the four qualifications contained in Ruling 1975-8 to satisfy DOE that the 'consignee' is in fact a wholesale purchaser-reseller as defined in 10 CFR 211.51."

Ryall, like Stevenson, has appropriate facilities and equipment for conducting his business, is responsible for the internal financial management and physical and administrative operations of his business, is responsible for certain of the expenses and liabilities arising from and connected with the business of transfer and sale of the products, and has independent control to enter into and to terminate supply relationships.

An additional element discussed in *Stevenson* which has a bearing on this case is the fact that Texaco's consignee agreement with Ryall, like that in *Stevenson*, is substantially the same as agreements analyzed in *National Association of Consignees, Inc.*, Interpretation 1975-19, 42 FR 23736 (May 10, 1977) and *John Hattenhauer*, Interpretation 1977-20, 42 FR 39963 (August 8, 1977). In those two interpretations, also involving Texaco consignee agreements, it was determined that under the terms of the consignee agreement, the Texaco consignees retained sufficient functional autonomy in the distribution and sale of Texaco products to qualify as wholesale purchaser-resellers.

In light of the standards set forth in Ruling 1975-8, as interpreted in *Stevenson*, *National Association of Consignees, Inc.*, and *Hattenhauer*, and the facts presented by Ryall, it has been determined that Ryall is a wholesale purchaser-reseller as defined by 10 CFR 211.51 of the Mandatory Petroleum Allocation Regulations.

In addition, Ryall's request for interpretation raises questions involving Texaco's direct supply of three motor gasoline retail outlets that were supplied by Ryall during the base period. Although, based on the facts presented by Ryall, it is clear that pursuant to § 211.9 Ryall is the base period supplier of the three retail outlets (since Ryall supplied them with motor gasoline during each month of 1972), it is also clear that the retail outlets need not purchase their base period allocation of product from that firm. *See Swann Oil, Inc.*, Interpretation 1974-19, 42 FR 25657 (May 18, 1977). Thus, the three retail outlets having a supplier/purchaser relationship with Ryall may elect to purchase motor gasoline from Ryall, Texaco, or any other supplier (subject, of course, to the provisions of § 211.10(g)(7) concerning surplus product). However, the only assured source of supply for these three retail gasoline stations is their base period supplier, Ryall. Texaco's supply of the three retail outlets that are not its base period purchasers does not unilaterally shift the § 211.9 supply obligation for those outlets from Ryall to Texaco. Texaco must continue to supply or offer to supply Ryall with its entire base period allocation of motor gasoline, including an amount representing base period entitlement of product for the three retail stations. *See John Hattenhauer, supra.*

Accordingly, Ryall is a wholesale purchaser-reseller as defined in § 211.51, and is entitled to receive its entire adjusted base period allocation of product from Texaco.

INTERPRETATION 1978-33M

To: The Independent Oil Compounders Association.
Date: August 8, 1978.
Rule Interpreted: 10 CFR 212.31.
Code: GWC-PI—Definitions of Refiner, Reseller, and Retailer.

FACTS

The Independent Oil Compounders Association (IOCA) is an association representing "independent compounders," that is, firms engaged in the sale of finished lubricants produced by blending and compounding lubricant oil base stocks. For purposes of this interpretation, IOCA has defined independent compounders as those firms which: (1) Have less than $75 million in annual sales of finished lubricants; (2) are neither owned nor controlled by a firm which is a producer or refiner of crude oil and which also refines lubricant base oil stocks; and (3) blend or compound lubricant oil base stocks purchased from crude oil refineries to produce finished lubricants, repackage and resell lubricants previously finished by crude oil refineries, or simply resell such previously finished lubricants without repackaging them.

In its request for interpretation, IOCA seeks a determination of whether the refiner price rule, contained in 10 CFR Part 212, Subpart E, or the reseller/retailer price rule, contained in 10 CFR Part 212, Subpart F, applied to sales of finished lubricants by independent compounders during the period when finished lubricants were subject to the Mandatory Petroleum Price Regulations.[1]

This determination turns on the definitions of "refiner," "reseller," and "retailer"

[1] Finished lubricants and lubricant oil base stocks were deleted from the definition of covered products effective September 1, 1976, in 41 FR 30096 (July 22, 1976). A previous interpretation was issued to IOCA dealing with the extent to which finished lubricants were subject to the price regulations prior to September 1, 1976. *See Independent Oil Compounders Association*, Interpretation 1977-50, 43 FR 1484 (January 10, 1978). This interpretation, however, did not reach the question of whether independent compounders were refiners or resellers and retailers for purposes of the price regulations

in 10 CFR 212.31. Pursuant to these definitions, it must be determined whether independent compounders "substantially change" the form of the lubricant oil base stocks they process, in order to determine which price rule is applicable. This is because refiners are those firms which blend and substantially change covered products, whereas resellers and retailers do not. To assist in this determination, IOCA has supplemented its request for interpretation with technical information on the basic processes by which the two main forms of finished lubricants—lubricating oils and greases—are produced. This information is summarized below.

In producing finished lubricating oils, independent compounders purchase various lubricant oil base stocks[2] from crude oil refineries, and blend and compound these stocks with various oil-soluble additives to achieve specified lubricating qualities for each finished lubricating oil. Industrial and commercial demand for various lubricating properties varies greatly, and independent compounders may produce as many as 100 different lubricating oils, each one blended to meet the specifications for a particular use.

The process of blending and compounding lubricating oils does not involve physical separation or chemical reaction processes. It is a mixing operation where lubricant oil base stocks and additives are mechanically mixed together in blending tanks. In some cases, heating is required to facilitate the blending process. In such cases, the materials are heated in an open (i.e., atmospheric pressure) kettle to temperatures less than 200 degrees fahrenheit.[3]

The second category of finished lubricants, greases, are produced by the interaction of three basic materials: Animal or vegetable fats, alkalies, and lubricant oil base stocks. Normally, lubricant oil base stocks and fats are combined in a pressurized kettle and heated and mechanically mixed until the fat dissolves in the oil, forming a colloidal mixture. An amount of alkali sufficient to neutralize the fat is then added, and the mixture is heated to approximately 350–400 degrees fahrenheit at pressures up to 100 psi for the required amount of time. The mixture is then blown into an open reduction kettle, where continued heating removes moisture. Next, the mixture is forced through a colloidal mill to complete dispersion of the fats. Finally, the mixture is placed through a deaerator/dehydrator, a vacuum device which removes air and moisture from the mixture, a process known as "polishing."

Although IOCA recognizes that the operations of independent compounders are more limited than those of crude oil refineries,[4] it nonetheless seeks a determination that the processes used to produce finished lubricating oils and greases substantially change the form of the lubricant oil base stocks, and that independent compounders are therefore refiners within the meaning of that term in the price regulations. IOCA makes this contention on behalf of all of its member firms, regardless of whether the firm actually blends and compounds lubricating oils and greases, apparently on the theory that it would be more equitable to apply one rule uniformly to all independent compounders.[5]

ISSUE

Prior to exemption from the Mandatory Petroleum Price Regulations, were sales of finished lubricants by independent compounders governed by the refiner price rule, 10 CFR 212.83, or the reseller/retailer price rule, 10 CFR 212.93?

INTERPRETATION

For the reasons discussed below, it has been determined that those independent compounders which blend and compound lubricating oils by a simple mechanical mixing process, and those independent compounders which merely repackage and resell, or simply resell, lubricants previously finished by crude oil refineries, are resellers or retailers for purposes of the Mandatory Petroleum Price Regulations, and are subject to the provisions of 10 CFR Part 212, Subpart F. Independent compounders which produce greases, however, are refiners for purposes of the price regulations, and are subject to the provisions of 10 CFR Part 212, Subpart E.

The starting point for an analysis of whether independent compounders are governed by the refiner price rule or the reseller/retailer price rule under the Mandatory Petroleum Price Regulations is the regulatory definitions of the terms "refiner," "reseller," and "retailer." 10 CFR 212.31 states that:

"Refiner means a firm (other than a reseller or retailer) or that part of such a firm which refines covered products or *blends and substantially changes covered products*, or refines liquid hydrocarbons from oil and gas field gases, or recovers liquefied petroleum gases incident to petroleum refining and sells those products to resellers, retailers, reseller-retailers or ultimate consumers. * * *

* * * * * *

"Reseller means a firm (other than a refiner or retailer) or that part of such a firm which carries on the trade or business of purchasing covered products, and reselling them *without substantially changing their form* to purchasers other than ultimate consumers.

* * * * * *

"Retailer means a firm (other than a refiner or reseller) or that part of such a firm which carries on the trade or business of purchasing covered products and reselling them to ultimate consumers *without substantially changing their form.*" [Emphasis added.]

The use of a "substantial change in form" test originated in the Phase II price controls under the Economic Stabilization Act of 1970, as amended, Pub. L. No. 91-379 (August 15, 1970).[6] The test was used in the definitions of manufacturer, wholesaler, and retailer, defining a manufacturer as a firm which uses processes that involve a substantial change in the form of its products. *See* 6 CFR 300.5 (Phase II); *see also* 6 CFR 150.31 (Phase IV).

These definitions under the Economic Stabilization Program were the forerunners of the present definitions of refiner, reseller, and retailer. Refiners, who were previously grouped with manufacturers,[7] continue to be classified as firms which substantially change the form of their products. Neither the regulations under the Economic Stabilization Program nor the present Mandatory Petroleum Price Regulations, however, discuss what constitutes a "substantial change" in the context of petroleum refining.

Prior to analyzing the application to the present case of the substantial change in form test, it should be pointed out that the term "independent compounder" as used by IOCA incorporates some firms which only engage in repackaging previously finished lubricants, or simply reselling already finished and packaged lubricants. IOCA concedes in its supplemental submission that these "two categories of independent oil compounders do not 'substantially change' the lubricant base oil stocks * * *." It is clear that such firms are either resellers or retailers, and, during the period when finished lubricants were covered products,[8] such firms were governed by the reseller/retailer price rule.[9] The question which remains, then, is whether independent compounders which blend and compound lubricant oil base stocks to produce finished lubricants "substantially change" those stocks, and are thus to be treated as refiners rather than resellers or retailers.[10]

The question of what constitutes a substantial change in the context of blending

[2] These stocks are produced from the heavy fractions of crude oil, and include, but are not limited to, bright stocks, neutral oils, pale oils, and red oils.

[3] A second mixing process for lubricating oils, the "continuous in-line method," uses proportioning pumps to inject appropriate amounts of base stocks and additives into a stream, which is passed through a mixing unit. Where additives are highly viscous, they are injected through heated lines or by high-pressure pumps.

[4] It should be noted that many crude oil refineries produce finished lubricants by processes similar to those outlined above, as a final step in refining crude oil.

[5] As is apparent from IOCA's definition of independent compounder, some firms merely repackage and resell, or simply resell, lubricants previously finished by crude oil refineries.

[6] 12 U.S.C. § 1904 note (1976) (expired April 30, 1974).

[7] *See* 6 CFR 300.5 (Phase II); 6 CFR 150.31 (Phase IV).

[8] *See* n. 1, *supra.*

[9] As noted earlier, in its request for interpretation, IOCA seeks uniform price rule treatment for all of its member firms. The treatment to be accorded an independent compounder, however, must be determined on a case-by-case basis, with the activities of each firm being judged against the regulatory definitions of refiner, reseller, and retailer. The determinations reached in this interpretation with respect to certain blending and compounding processes, however, will provide valuable guidance to IOCA and its member firms in assisting them to determine whether their activities constitute refining rather than reselling or retailing.

[10] Any independent compounder which employs processes significantly different from those discussed in this interpretation may apply to the DOE for a determination of whether it is to be classified as a refiner or a reseller/retailer. Also, any firm which believes that it works a substantial change in the form of the products it produces may request an interpretation based upon the specific base materials and processes used by that firm, and the final products which that firm produces. Each such determination, of course, will depend upon the facts and circumstances of that case.

V 43 / 196 OCT 10 78

and compounding processes was recently addressed in *Tristate Oil and Asphalt Sales, Inc.*, Interpretation 1978-22, 43 FR 25079 (June 9, 1978). Tristate is a firm which primarily produces asphalt products and road oil, but which also processes reduced crude oil and other unfinished products to produce residual fuel oils.

In *Tristate*, the DOE concluded that the blending and compounding processes used to produce the residual fuel oils were refining activities. This determination rested upon three factors. First, the residual fuel oil production was undertaken in the context of the manufacture of various asphalt products, which processes clearly involved substantial changes in form from the base materials. Second, Tristate significantly altered many characteristics of the unfinished base materials used to produce residual fuel oil. Third, the processes used by Tristate, which involved heating, secondary blending ingredients, and sophisticated technical control of the various changes effected, indicated that more than mere blending was taking place. The combination of all of these factors required that Tristate's activities be deemed refining activities within the meaning of § 212.31. The DOE cautioned, however, that:

"The determination that Tristate 'substantially changes' as well as blends covered products is based upon the unique factual situation presented in this case. Other firms which blend covered products do not necessarily 'substantially change' them, by virtue of the blending operation. In doubtful cases DOE will determine whether a firm is more appropriately classified as a refiner or reseller/retailer based on the particular facts and circumstances in each case."

Tristate makes clear, then, that determining whether a blending and compounding process substantially changes the form of the base materials requires an evaluation of all the factors surrounding the process. The first such factor is the context in which the process occurs. In the present case, independent compounders are engaged solely in the production of finished lubricants, and do not produce refined petroleum products other than lubricating oils and greases. This differs significantly from crude oil refineries, which may also produce finished lubricating oils and greases, but do so as a final step in the full range of refining processes, commencing with crude oil and ending with numerous refined petroleum products, including finished lubricants.

Second, it is important to note that lubricant oil base stocks are a form of finished petroleum product which does not require further distillation or related processing. The Federal Energy Administration (FEA), a predecessor agency to the DOE, recognized this in *Preliminary Findings and Views Concerning the Exemption of Naphtha, Gas, Oil, and "Other Products" from the Mandatory Petroleum Allocation and Price Regulations* (*Preliminary Findings*), a report issued June 4, 1976. The report noted that "[l]ubricating base stock oils are refined petroleum products which are primary components used in the compounding and blending of lubricants and greases." *Preliminary Findings* at 23. The report also stated that "• • • lubricating base stock oils • • • are finished products produced at the refinery • • •." *Preliminary Findings* at 182. "The fact that lubricant oil base stocks are deemed finished petroleum products suggests that further processing of those stocks would normally not involve a refining process.

A third factor which must be taken into account is the process used in blending and compounding the lubricant oil base stocks. As was noted earlier, lubricating oils are produced by a mechanical mixing process which occurs at atmospheric pressure and may be accompanied by heating. Greases are produced by dissolving fats and alkalies in lubricant oil base stocks under pressure and at high temperatures. The greater the scope of the process, and the more drastic the operation, the more it is likely that the process will substantially change the form of the lubricant oil base stocks.

Finally, and most important, a comparison between the condition and qualities of the lubricant oil base stocks and the finished lubricating oils and greases will indicate the degree to which the blending and compounding processes have changed the form of the lubricant oil base stocks. The important consideration here is a comparison of the degree of change from the lubricant oil base stocks, for, as the definition of refiner indicates, the change must be substantial in order to be considered refining.

Applying these four factors to the present case, of course, the first two factors mentioned above are identical in evaluating the production by independent compounders of both lubricating oils and greases. Independent compounders do not process crude oil or produce refined petroleum products other than lubricating oils and greases, and the beginning materials for both, lubricant oil base stocks (which are themselves a form of finished petroleum products), are the same. Both of these factors tend to indicate that the activities of independent compounders are not refining activities. Evaluation of the remaining two factors, however, reveals fundamental differences between the production of lubricating oils and greases, differences which compel the conclusion that a substantial change in form occurs in the manufacture of greases but not in the production of lubricating oils.

In considering the third factor as applied to lubricating oils, that is, the processes used to produce those oils, it is apparent from the outset that mere mechanical mixing of similar oils, resulting in a finished oil which is similar to its component parts, will not work a substantial change in the form of those component parts. For instance, in *Albina Fuel Co.*, Interpretation 1975-74, 42 FR 23787 (May 10, 1977), a retailer loaded light (PS 300) and industrial weight (PS 400I) residual fuel oil into a truck. By the time the truck reached its destination, the oil had become sufficiently mixed to permit the retailer to sell the oil as medium (PS 400M) residual fuel oil. There was no suggestion in *Albina* that this activity substantially changed the form of the residual fuel oil.

Similarly, the recent rulemaking entitled *Resellers and Retailers—Blends of Covered and Non-Petroleum-Based Products*, 43 FR 24265 (June 5, 1978), indicates that the blending of materials as diverse as gasoline and non-petroleum products such as ethyl alcohol is not a refining activity. In that amendment to the reseller/retailer price rule, there is no suggestion that firms engaging in such blending are substantially changing the form of the gasoline or otherwise acting as refiners.

Further, the condition and qualities of lubricant oil base stocks and finished lubricating oils do not differ substantially. The stocks are themselves lubricating oils which need only to be altered in relatively minor respects to achieve the precise lubricant qualities desired. The beginning and end products are similar in that they are both lubricating oils. The DOE concludes, therefore, that, taking all of the factors discussed above into consideration, the processes by which various lubricant oil base stocks are mixed, together with additives, to produce finished lubricating oils do not cause a substantial change in the form of the lubricant oil base stocks, and that independent compounders which produce lubricating oils are resellers or retailers for purposes of the Mandatory Petroleum Price Regulations.[12]

Greases, however, fare differently under an analysis of the third and fourth factors than do lubricating oils. First, the processes used to produce greases differ greatly from those used to produce lubricating oils. They involve the high temperature, pressurized dispersion of fats and alkalies in the lubricant oil base stocks, followed by milling and polishing. These processes, which involve a degree of chemical change, and are more extensive and technically more complicated than those used in blending lubricating oils, are indicative of the more substantial changes that lubricant oil base stocks undergo when being processed into greases.

Second, there is a dramatic difference between the condition and qualities of lubricant oil base stocks and finished greases. The stocks are transformed into a viscous lubricant with properties quite different from the base stocks. The DOE concludes, therefore, that the manufacture of greases brings about a sustantial change in the form of the lubricant oil base stocks, and that independent compounders which produce greases are refiners for purposes of the Mandatory Petroleum Price Regulations.

[FR Doc. 78-28336 Filed 10-6-78; 8:45 am]

"In this connection it should be noted that "unfinished oils" are defined in 10 CFR 212.31 as "all oils requiring further refining, i.e. any operation except mechanical blending or use as an additive."

[12] In reaching this conclusion, the DOE has also considered the decision and order in *Ryder System, Inc.*, 1 FEA ¶20,742 (December 16, 1974). There, a subsidiary of Ryder operated a "gasoline blending facility" at which it blended various chemicals, natural gasoline, and motor gasoline to produce different grades of motor gasoline. The decision and order found that Ryder's subsidiary was a refiner, noting that the "gasoline blending facility substantially changed the composition of the various products which are used to produce motor gasoline • • •." 1 FEA at 20,947. The decision and order, however, provides no discussion of the processes used to produce the motor gasoline, and apparently relies on a change in *composition* rather than a change in the *form* of the base materials. Accordingly, it is impossible to meaningfully apply the result in *Ryder* to the present case.

[4910-13]

Title 14—Aeronautics and Space

CHAPTER I—FEDERAL AVIATION ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket No. 78-SO-46; Amdt. 39-3313]

PART 39—AIRWORTHINESS DIRECTIVES

Gulfstream American Corp., Model G-1159

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: Since the issuance of AD 78-14-06, additional information has been obtained on the cause of the outer cabin window pane failures. This amendment revises AD 78-14-06 to require: (1) Compliance with the applicable Customer Bulletin, and (2) that an applicable Airplane Flight Manual Revision be incorporated. Since the issuance of AD 78-14-06, the manufacturer has issued service instructions dealing with this problem.

DATES: Effective October 9, 1978. Compliance schedule—as prescribed in body of AD.

ADDRESSES: The applicable GAC Customer Bulletin and Airplane Flight Manual Interim Revision may be obtained from Gulfstream American Corp., P.O. Box 2206, Savannah, Ga. 31402, telephone 912-964-3000. A copy of these documents is also located in Room 275, Engineering and Manufacturing Branch, Federal Aviation Administration, 3400 Whipple Street, East Point, Ga.

FOR FURTHER INFORMATION CONTACT:

Curtis Jackson, Aerospace Engineer, Engineering and Manufacturing Branch, FAA, Southern Region, P.O. Box 20636, Atlanta, Ga. 30320, telephone 404-763-7407.

SUPPLEMENTARY INFORMATION: Since the issuance of AD 78-14-06, additional information has been obtained on the cause of the two cabin window outer pane failures so that the inspection and/or cabin pressure differential limitations are required only for aircraft which have any reduced thickness outer window panes installed, and have 600 or more landings on those window panes. Although only outer cabin window panes which have a reduced outer flange are affected; it is difficult to determine in the field, even with the frame assembly and window removed, whether that window has a reduced flange. A customer bulletin in now available which defines the inspection and replacement procedures. A requirement has also been added to incorporate an Airplane Flight Manual Interim Revision (AFM Interim Revision).

With respect to the requirements for the AFM Interim Revision, the FAA believes that since the operational limitations referenced in that Revision were required by AD 78-14-06, notice and public procedure hereon are unnecessary and the amendment may be made effective in less than 30 days. The other provisions required by this revision relieve a restriction on some aircraft and impose no additonal burden on any person; therefore, notice and public procedure hereon are unnecessary and the amendment may be made effective in less than 30 days.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13), Amendment 39-3261, AD 78-14-06, is amended to read as follows:

GULFSTREAM AMERICAN CORP. (GAC) (Formerly Grumman American Aviation Corp.): Applies to GAC Model G-1159, serial numbers 1 through 229, and 775, airplanes certificated in all categories.

Compliance is required as indicated, unless already accomplished.

To prevent cabin window pane failure and possible engine damage, accomplish the following:

1. Prior to the accumulation of 600 landings on any window, or within the next 10 landings after the effective date of this AD, whichever occurs later, accomplish the following:

A. Inspect and replace all outer cabin window panes in accordance with GAC Customer Bulletin 270A, dated September 18, 1978, or later revision approved by the Chief, Engineering and Manufacturing Branch, Federal Aviation Administration, Southern Region, or in an equivalent manner approved by the Chief, Engineering and Manufacturing Branch, Federal Aviation Administration, Southern Region. The visual checks for cracks required by Customer Bulletin 270A may be performed by the pilot. The remaining provisions of this AD apply to aircraft with any reduced thickness outer cabin window pane installed with 600 or more landings.

B. Restrict airplane operations to a maximum cabin pressure differential of 8.0 psi and install one of the following placards on the instrument panel in full view of the pilot, or in an equivalent location approved by the FAA, utilizing a minimum of one-eighth inch high letters with the wording:

1. DO NOT EXCEED A MAXIMUM CABIN PRESSURE DIFFERENTIAL OF 8.0 PSI. THE TABLE CONTAINED IN GAAC LETTER DATED JUNE 20, 1978, MAY BE UTILIZED. COMPLY WITH THE INSPECTION REQUIREMENTS OF AD 78-14-06 PRIOR TO EACH FLIGHT.

2. DO NOT EXCEED A MAXIMUM CABIN PRESSURE DIFFERENTIAL OF 8.0 PSI.

C. Incorporate G-1159 Airplane Flight Manual Interim Revision No. 19-5 dated September 21, 1978, in the Basic Airplane Flight Manual dated April 1, 1969.

2. Repeat the inspection and replacement requirements of paragraph (1)(a) of this AD prior to each flight.

3. The inspection requirements and restrictions on operation may be discontinued, and the AFM Interim Revision removed once all affected outer cabin window panes are either replaced with full thickness outer panes identified in accordance with GAC Customer Bulletin 270A dated September 18, 1978, for later revision approved by the Chief, Engineering and Manufacturing Branch, Federal Aviation Administration, Southern Region; or replaced with windows with less than 600 landings.

4. For the purpose of complying with this AD, subject to acceptance by the assigned FAA maintenance inspector, the number of landings may be determined by dividing each airplane's hours' time in service by the operator's fleet average time from takeoff to landing for the airplane type. Alternately, if an operator has recorded pressure cycles, the number of pressure cycles may be used in lieu of landings.

Amendment 39-3261 became effective July 20, 1978.

This Amendment 39-3313 becomes effective October 9, 1978.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); 14 CFR 11.89.)

Issued in East Point, Ga., on September 26, 1978.

GEORGE R. LA CAILLE,
Acting Director.

[4910-13]

[Docket No. 78-GL-8; Amdt. 39-3314]

PART 39—AIRWORTHINESS DIRECTIVES

Taylorcraft Corp., Model F-19 and BC-12D Series Aircraft

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD) which requires inspection and possible replacement of the aileron control sprocket (Taylorcraft Part No. A-230) on the left control wheel. The AD is needed to prevent unsatisfactory aileron stops from working loose and possibly resulting in excessive aileron travel or jamming of the aileron controls.

DATES: Effective October 16, 1978. Compliance schedule—As prescribed in the body of the AD.

ADDRESSES: The applicable service information may be obtained from Taylorcraft Aviation Corp., 14600

V 43/196
OCT 10 78

Commerce NE., P.O. Box 243, Alliance, Ohio 44601.

A copy of the applicable service information is contained in the Rules Docket, Office of the Regional Counsel, 2300 East Devon Avenue, Des Plaines, Ill. 60018; and at FAA Headquarters, Room 916, 800 Independence Avenue SW., Washington, D.C. 20591.

FOR FURTHER INFORMATION CONTACT:

T. Fahr, Engineering and Manufacturing Branch, Flight Standards Division, AGL-212, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, Ill. 60018, telephone 312-694-4500, extension 425.

SUPPLEMENTARY INFORMATION: It was recently determined that unsatisfactory aileron stop pins may have been installed on the aileron control sprocket (Taylorcraft P/N A-230). There is a possibility that these stop pins could work loose and allow excessive aileron travel or jamming of the aileron controls.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following airworthiness directive:

TAYLORCRAFT: Applies to Model BC-12D, Serial Nos. 6923, 8378, 8444, 8570, and 10538, and Model F-19, Serial Nos. F-080 through F-105, F-107 through F-112, and F-115 through F-126 certificated in all categories.

To prevent malfunction of the aileron controls, accomplish the following:

(a) Inspect the two aileron stop pins (Taylorcraft P/N A-235) of the aileron control assembly (Taylorcraft P/N A-A231) prior to next 10 hours time in service after the effective date of this AD or by December 1, 1978, whichever occurs first. The assembly is located on the left side of the control column at the forward end of the control shaft and univeral joint. Determine whether the stop pins are AN393-9 clevis pins as follows: Remove the deck panel (above instrument panel) and set control wheel in neutral position. In this position aileron stop pins will be on top. The proper pins (2) are identified by the flat head of the pins against front face of the sprocket. The flat head is cut partially to clear chain and obtain smooth operation of control. The shank of the stop protrudes approximately ¼". If the sprocket has AN393-9 clevis pins, no further action is necessary.

(b) If the pins are made from 3/16" diameter rod (no head), inspect for the following:

(1) Bent pins,

(2) Loose pins, and

(3) Inadequate protrusion (less than ¼") of pin through aft of sprocket or improper functioning.

(c) If any of the conditions identified in (b) above are present, replace the sprocket prior to further flight.

(d) If the AN393-9 clevis pin is not installed and none of the three conditions in (b) are found, replace the sprocket within 50 flight hours or by May 1, 1979, with a sprocket in which clevis pins (AN393-9) have been installed. Until the sprocket is replaced, reinspect within 10 hours time in service from last inspection. A proper sprocket may be obtained from Taylorcraft Aviation Corp., 14600 Commerce NE., P.O. Box 243, Alliance, Ohio 44601.

Taylorcraft Bulletin No. 78-002 dated September 19, 1978, also applies to the subject matter of this AD.

This amendment becomes effective October 16, 1978.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c); and 14 CFR 11.89.)

NOTE.—The Federal Aviation Administration has determined that this document involves a proposed regulation which is not considered to be significant under the procedures and criteria prescribed by Executive Order 12044 and as implemented by interim Department of Transportation guidelines (43 FR 9582, March 8, 1978).

The incorporation by reference in the preceding document was approved by the Director of the Federal Register on June 19, 1967.

Issued in Des Plaines, Ill., on September 25, 1978.

WAYNE J. BARLOW,
Acting Director,
Great Lakes Region.

[4910-13-M]

[Airspace Docket No. 78-SO-60]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Picayune, Miss., Transition Area

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This rule alters the Picayune, Miss., transition area. The name of the Picayune Municipal Airport has been changed to Picayune-Pearl River Airport. This action of the city of Picayune, officially changing the name, requires this to be reflected in the transition area description.

EFFECTIVE DATE: 0901 G.m.t., December 28, 1978.

ADDRESS: Federal Aviation Administration, Chief, Air Traffic Division, P.O. Box 20636, Atlanta, Ga. 30320.

FOR FURTHER INFORMATION CONTACT:

William F. Herring, Airspace and Procedures Branch, Federal Aviation Administration, P.O. Box 20636, Atlanta, Ga. 30320, telephone 404-763-7646.

SUPPLEMENTARY INFORMATION: In a regular meeting, the city of Picayune officially changed the name of the Picayune Municipal Airport to Picayune-Pearl River Airport. Therefore, it is necessary to alter the description of the Picayune transition area to reflect the name change. Since this alteration is editorial in nature, notice and public procedures hereon are not necessary.

ADOPTION OF THE AMENDMENT

Accordingly, subpart G, § 71.181 (43 FR 440) of part 71 of the Federal Aviation Regulations (14 CFR 71) is amended, effective 0901 G.m.t., December 28, 1978, as hereinafter set forth:

In subpart G, § 71.181 (43 FR 440), the Picayune, Miss., transition area is amended as follows:

"• • • Picayune Municipal Airport • • •" is deleted and

"• • • Picayune-Pearl River Airport • • •" is substituted therefor.

"(Sec. 307(a) of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1348(a)) and sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).)

Issued in East Point, Ga., on September 25, 1978.

GEORGE R. LACAILLE,
Acting Director,
Southern Region.

[4910-13-M]

[Airspace Docket No. 78-SO-50]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Designation of Transition Area, Jamestown, Tenn.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This rule designates the Jamestown, Tenn., transition area by lowering the base of controlled airspace in the vicinity of the Jamestown Municipal Airport from 1,200 feet to 700 feet above ground level. This action provides necessary airspace for accommodation of IFR operations at Jamestown Municipal Airport.

EFFECTIVE DATE: 0901 G.m.t., November 2, 1978.

ADDRESS: Federal Aviation Administration, Chief, Air Traffic Division, P.O. Box 20636, Atlanta, Ga. 30320.

FOR FURTHER INFORMATION CONTACT:

Ronald T. Niklasson, Airspace and Procedures Branch, Federal Aviation Administration, P.O. Box 20636, Atlanta, Ga. 30320, telephone 404-763-7646.

SUPPLEMENTARY INFORMATION: A notice of proposed rulemaking was published in the FEDERAL REGISTER on Monday, July 31, 1978 (43 FR 33257), which proposed the designation of the Jamestown, Tenn., transition area and change of the airport operating status from VFR to IFR. No objections were received from this notice. Accordingly, the airport operating status is changed from VFR to IFR.

ADOPTION OF THE AMENDMENT

Accordingly, Subpart G, § 71.181 (43 FR 440) of part 71 of the Federal Aviation regulations (14 CFR 71) is amended, effective 0901 G.m.t., November 2, 1978, by adding the following:

JAMESTOWN, TENN.

That airspace extending upward from 700 feet above the surface within a 5.5-mile radius of Jamestown Municipal Airport (lat. 36°20'56" N., long. 84°56'47" W.) • • •

(Sec. 307(a) of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1348(a)) and sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).)

Issued in East Point, Ga., on September 26, 1978.

PHILLIP M. SWATEK,
Director,
Southern Region.

[4910-13-M]

[Airspace Docket No. 78-RM-17]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Denver Terminal Control Area; Correction

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Correction of final rule.

SUMMARY: In the rule published in the FEDERAL REGISTER of September 11, 1978, volume 43, page 40213, the geographical coordinates of the Denver Stapleton International distance measuring equipment (DME), latitude 39°45'51" N., longitude 104°53'54" W., were incorrectly stated in the sixteenth line under, "Adoption of the Amendment," paragraph on page 40213. This correction reflects the correct geographic coordinates as latitude 39°45'21" N., longitude 104°53'54" W. Additionally, under "Adoption of the Amendment," boundaries, area A, thirtieth line, page 40213, 1.5 miles was stated incorrectly. This correction reflects the correct mileage as 3.5 miles

EFFECTIVE DATE: November 2, 1978, at 0901 G.m.t.

FOR FURTHER INFORMATION CONTACT:

Mr. Joseph T. Taber, Operations, Procedures and Airspace Branch, Air Traffic Division, ARM-500, Federal Aviation Administration, Rocky Mountain Region, 10455 East 25th Avenue, Aurora, Colo. 80010, telephone 303-837-3937.

SUPPLEMENTARY INFORMATION: FEDERAL REGISTER Document 78-25441 was published on September 11, 1978 (43 FR 40213) with an effective date of November 23, 1978, and altered the Denver Terminal Control Area, Denver, Colo. Incorrect geographical coordinates for the Denver Stapleton DME antenna were inadvertently published. The correct geographical coordinates should have been latitude 39°45'21" N., longitude 104°53'54" W. Additionally, area A, thirtieth line (43 FR 40213) a mileage was incorrectly published as 1.5 miles. The correct mileage should read 3.5 miles.

DRAFTING INFORMATION

The principal authors of this document are Mr. Joseph T. Taber, Operations, Procedures, and Airspace Branch, Air Traffic Division, and Mr. Daniel J. Peterson, Office of Regional Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, FEDERAL REGISTER Document 78-25441, as published on September 11, 1978, on page 40213, is amended in the coordinates of the Denver Stapleton International DME antenna by deleting the sixteenth line under the "Adoption of the Amendment," paragraph to § 71.401 on page 40213 and substituting latitude 39°45'21" N., longitude 104°53'54" W.

Additionally, by deleting the mileage of 1.5 miles on the thirtieth line of the "Adoption of Amendment," paragraph, boundaries, area A, § 71.401 on page 40213, and substituting 3.5 miles.

(Sec. 307(a) Federal Aviation Act of 1958 (49 U.S.C. 1348(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c); and 14 CFR 11.69).)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Aurora, Colo., on September 29, 1978.

M. M. MARTIN,
Director,
Rocky Mountain Region.

[4910-13]

[Airspace Docket No. 78-SO-61]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Revocation of Transition Area, Apalachicola, Fla.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action revokes the Apalachicola, Fla; 700-foot transition area as it is no longer required.

EFFECTIVE DATE: 0901 G.m.t., December 28, 1978.

ADDRESS: Federal Aviation Administration, Chief, Air Traffic Division, P.O. Box 20636, Atlanta, Ga. 30320.

FOR FURTHER INFORMATION CONTACT:

Donald Ross, Airspace and Procedures Branch, Federal Aviation Administration, P.O. Box 20636, Atlanta, Ga. 30320, telephone: 404-763-7646.

SUPPLEMENTARY INFORMATION: The Apalachicola, Fla., transition area, described in § 71.181 (43 FR 440), was designated to provide controlled airspace for instrument operations at the Apalachicola Municipal Airport. The nondirectional radio beacon which supported the approach procedure at the airport has been decommissioned and the approach procedure has been canceled. Therefore, it is necessary to revoke the transition area as it no longer serves a useful purpose. Since this amendment lessens the burden on the public, notice and public procedure hereon are unnecessary.

ADOPTION OF AMENDMENT

Accordingly, Subpart G, § 71.181 (43 FR 440) of part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, effective 0901 G.m.t., December 28, 1978, by deleting the Apalachicola, Fla., transition area.

(Sec. 307(a) of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1348(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)).)

V 43/196
OCT 10 78
LIMI

Issued in East Point, Ga., on September 28, 1978.

PHILLIP M. SWATEK,
Director, Southern Region.

[FR Doc. 78-28327 Filed 10-6-78; 8:45 am]

[4910-13]

[Airspace Docket No. 78-SO-58]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Fort Stewart, Ga., Control Zone

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This rule alters the Fort Stewart, Ga., control zone. It is necessary to revoke a portion of the control zone since the need for airspace protection no longer exists.

EFFECTIVE DATE: Immediately.

ADDRESS: Federal Aviation Administration, Chief, Air Traffic Division, P.O. Box 20636, Atlanta, Ga. 30320.

FOR FURTHER INFORMATION CONTACT:

Harlen D. Phillips, Airspace and Procedures Branch, Federal Aviation Administration, P.O. Box 20636, Atlanta, Ga. 30320, telephone: 404-763-7646.

SUPPLEMENTARY INFORMATION: This amendment will reduce controlled airspace by revoking the control zone extension northeast of the Wright TVOR and remove from the description reference to the TVOR, which the U.S. Army decommissioned on August 11, 1978.

The aforementioned action will reduce the constraints and, in effect, the impact on the public. Therefore, notice and public procedure thereon are unnecessary.

ADOPTION OF THE AMENDMENT

Accordingly, part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended effective immediately, as hereinafter set forth:

In Subpart F, § 71.171 (43 FR 355), the Fort Stewart, Ga., control zone is amended as follows: "• • •; within 3 miles each side of the Wright TVOR 059° radial, extending from the 5-mile radius zone to 8.5 miles northeast of the TVOR • • •" is deleted.

(Sec. 307(a) of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1348(a)); and sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).)

Issued in East Point, Ga., on September 28, 1978.

PHILLIP M. SWATEK,
Director, Southern Region.

[4910-13-M]

[Docket No. 18319, Amdt. No. 1121]

SUBCHAPTER F—AIR TRAFFIC AND GENERAL OPERATING RULES

PART 97—STANDARD INSTRUMENT APPROACH PROCEDURES

Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAP's) for operations at certain airports. These regulatory actions are needed because of the adoption of new or revised criteria, or because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, addition of new obstacles, or changes in air traffic requirements. These changes are designed to provide safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

DATES: An effective date for each SIAP is specified in the amendatory provisions.

ADDRESSES: Availability of matters incorporated by reference in the amendment is as follows:

FOR EXAMINATION

1. FAA Rules Docket, FAA Headquarters Building, 800 Independence Avenue SW., Washington, D.C. 20591;

2. The FAA Regional Office of the region in which the affected airport is located; or

3. The Flight Inspection Field Office which originated the SIAP.

FOR PURCHASE

Individual SIAP copies may be obtained from:

1. FAA Public Information Center (APA-430), FAA Headquarters Building, 800 Inependence Avenue SW., Washington, D.C. 20591; or

2. The FAA Regional Office of the region in which the affected airport is located.

BY SUBSCRIPTION

Copies of all SIAP's, mailed once every 2 weeks, may be ordered from Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. The annual subscription price is $135.

FOR FURTHER INFORMATION CONTACT:

William L. Bersch, Flight Procedures and Airspace Branch (AFS-730), Aircraft Programs Division, Flight Standards Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591, telephone 202-426-8277.

SUPPLEMENTARY INFORMATION: This amendment to Part 97 of the Federal Aviation Regulations (14 CFR Part 97) prescribes new, amended, suspended, or revoked Standard Instrument Approach Procedures (SIAP's). The complete regulatory description of each SIAP is contained in official FAA form documents which are incorporated by reference in this amendment under 5 U.S.C. 552(a), 1 CFR Part 51, and § 97.20 of the Federal Aviation Regulations (FAR's). The applicable FAA forms are identified as FAA Forms 8260-3, 8260-4, and 8260-5. Materials incorporated by reference are available for examination or purchase as stated above.

The large number of SIAP's, their complex nature, and the need for a special format make their verbatim publication in the FEDERAL REGISTER expensive and impractical. Further, airmen do not use the regulatory text of the SIAP's but refer to their graphic depiction on charts printed by publishers of aeronautical materials. Thus, the advantages of incorporation by reference are realized and publication of the complete description of each SIAP contained in FAA form document is unnecessary. The provisions of this amendment state the affected CFR (and FAR) sections, with the types and effective dates of the SIAP's. This amendment also identifies the airport, its location, the procedure identification, and the amendment number.

This amendment to Part 97 is effective on October 10, 1978, and contains separate SIAP's which have compliance dates stated as effective dates based on related changes in the National Airspace System or the application of new or revised criteria. Some SIAP amendments may have been previously issued by the FAA in a National Flight Data Center (FDC) Notice to Airmen (NOTAM) as an emergency action of immediate flight safety relating directly to published aeronautical charts. The circumstances which created the need for some SIAP amendments may require making them effective in less than 30 days. For the remaining SIAP's, an effective date at least 30 days after publication is provided.

Further, the SIAP's contained in this amendment are based on the criteria contained in the U.S. Standard for Terminal Instrument Approach Procedures (TERP's). In developing these SIAP's, the TERP's criteria were applied to the conditions existing or anticipated at the affected airports. Because of the close and immediate relationship between these SIAP's and safety in air commerce, I find that notice and public procedure before adopting these SIAP's is unnecessary, impracticable, or contrary to the public interest and, where applicable, that good cause exists for making some SIAP's effective in less than 30 days.

The principal authors of this document are Rudolph L. Fioretti, Flight Standards Service, and Richard W. Danforth, Office of the Chief Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me, part 97 of the Federal Aviation Regulations (14 CFR part 97) is amended by establishing, amending, suspending, or revoking standard instrument approach procedures, effective on the dates specified, as follows:

1. By amending § 97.23 VOR-VOR/DME SIAP's identified as follows:

• • • Effective December 28, 1978:

Battle Creek, Mich.—W. K. Kellogg Regional, VOR Rwy 4 (TAC), Amdt. 12.
Battle Creek, Mich.—W. K. Kellogg Regional, VOR Rwy 22 (TAC), Amdt. 9.
Battle Creek, Mich.—W. K. Kellogg Regional, VOR Rwy 31 (TAC), Amdt. 7.

Bradford, Pa.—Bradford Regional, VOR/DME Rwy 14, Amdt. 6.
Lancaster, Pa.—Lancaster, VOR Rwy 8, Amdt. 13.
Lancaster, Pa.—Lancaster, VOR Rwy 31, Amdt. 10.

• • • Effective November 2, 1978:

Hilo, Hawaii—General Lyman Field, VOR/DME or TACAN-A, Amdt. 2.
Kahului, Hawaii—Kahului, VOR Rwy 2 (TAC), Amdt. 4.
Kahului, Hawaii—Kahului, VOR Rwy 20, Amdt. 7.
Kahului, Hawaii—Kahului, VOR/DME or TACAN Rwy 20, Amdt. 1.
Kahului, Hawaii—Kahului, VOR/DME or TACAN-A, Amdt. 1.
Chicago (Wheeling), Ill.—Chicagoland, VOR-A, Amdt. 3, canceled.

• • • Effective September 25, 1978:

International Falls, Minn.—Falls International, VOR/DME or TACAN Rwy 31, Amdt. 1.

• • • Effective September 21, 1978:

Charlotte, N.C.—Douglas Muni., VOR Rwy 36R, Amdt. 8.

2. By amending § 97.25 SDF-LOC-LDA SIAP's identified as follows:

• • • Effective December 28, 1978:

Battle Creek, Mich.—W. K. Kellogg Regional, LOC BC Rwy 4, Amdt. 9.
Kalamazoo, Mich.—Kalamazoo Municipal, LOC BC Rwy 17, Amdt. 11.

Title 18—Conservation of Power and Water Resources

CHAPTER I—FEDERAL ENERGY REGULATORY COMMISSION

SUBCHAPTER A—GENERAL RULES

[Docket No. RM78-24]

PART 1—RULES OF PRACTICE AND PROCEDURE

Freedom of Information Act Requests and Appeals

AGENCY: Federal Energy Regulatory Commission.

ACTION: Final rule.

SUMMARY: The Commission's regulations implementing the Freedom of Information Act (FOIA) (5 U.S.C. 552) are revised to provide a uniform manner of addressing and marking FOIA requests and FOIA appeals with the Commission. The purposes of this revision is to insure expeditious handling, routing, consideration and disposition of FOIA requests and appeals within the Commission.

EFFECTIVE DATE: October 2, 1978.

FOR FURTHER INFORMATION CONTACT:

Herbert C. Rice, Office of General Counsel, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, telephone: 202-275-4788.

SUPPLEMENTARY INFORMATION: The processing of Freedom of Information requests and appeals has been delayed in the past due to confusing designations on the documents or the envelopes in which they are enclosed. Requests for information or administrative appeals, taken pursuant to the FOIA, supra, require expeditious response by the Commission's staff. If initial requests for access to Commission records are not clearly labeled, they do not give the Staff adequate notice so that the documents can be forwarded to the appropriate office without delay for processing in accordance with statutory time limits.

This rulemaking addresses this problem by requiring all FOIA requests and appeals to be clearly marked as such. If the request or appeal is not clearly marked, the Commission's staff will mark it upon identification and immediately forward it to the appropriate office. In any event, initial FOIA requests for access to records shall be considered to be received upon actual receipt by the Director of Public Information; appeals from denials of request for access shall be considered to be received upon actual receipt by the Chairman of the Commission.

A general notice of proposed rulemaking has not been published for this rulemaking pursuant to 5 U.S.C. 553, et seq., because it is a rule of Commission procedure and practice and affects only the Commission's management. Pursuant to 5 U.S.C. 553, the rulemaking also will be effective as of the date of issuance since the rule affects only Commission practice or procedure, and management and personnel, and therefore does not abridge the effect of any requests or appeals filed pursuant to the regulations prior to amendment.

(Administrative Procedure Act, 5 U.S.C. 553; Freedom of Information Act, 5 U.S.C. 552.)

In consideration of the foregoing, it is proposed to amend § 1.36, part 1, chapter 1 of title 18, the Code of Federal Regulations, as set forth below.

§ 1.36 [Amended]

1. Section 1.36(f)(1) and (f)(2) are amended by designating the present subparagraphs as § 1.36(f)(1)(i) and (f)(2)(i) and adding new subparagraphs § 1.36(f)(1)(ii) and (f)(2)(ii) to read as follows:

• • • • • •

(f) • • •

(1) • • • (i) • • •

(ii) Requests filed pursuant to this section shall be in writing, addressed to the Director of Public Information, and clearly marked "Freedom of Information Request". Any request for information received by the Commission not addressed and marked as indicated in this subparagraph will be so addressed and marked by Commission personnel as soon as it is properly identified and forwarded immediately to the Director of Public Information. Requests made pursuant to this paragraph shall be considered to be received, upon actual receipt by the Director of Public Information.

(2) • • • (i) • • •

(ii) Appeals filed pursuant to this section shall be in writing, addressed to the Chairman of the Commission, and clearly marked "Freedom of Information Appeals". Any such appeal received by the Commission not addressed and marked as indicated in this paragraph will be so addressed and marked by Commission personnel as soon as it is properly identified and forwarded immediately to the Chairman. Appeals taken pursuant to this paragraph shall be considered to be received, upon actual receipt by the Chairman.

• • • • • •

By the Commission. Commissioner Holden dissenting.

(5 U.S.C. 552, 553.)

KENNETH F. PLUMB,
Secretary.

Title 24—Housing and Urban Development

CHAPTER VIII—LOW INCOME HOUSING, DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. R-78-517]

PART 888—SECTION 8 HOUSING ASSISTANCE PAYMENTS PROGRAM—FAIR MARKET RENTS AND CONTRACT RENT AUTOMATIC ANNUAL ADJUSTMENT FACTORS

Fair Market Rents for New Construction and Substantial Rehabilitation

AGENCY: Office of Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Final rule.

SUMMARY: This final rule adds fair market rents for three and four bedroom units in elevator buildings of five or more stories for the San Juan, Ponce, Mayaguez, and Arecibo, P.R., and New York, N.Y., market areas.

EFFECTIVE DATE: October 10, 1978.

ADDRESS: Rules Docket Clerk, Office of General Counsel, Room 5218, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-7603. This is not a toll-free number.

FOR FURTHER INFORMATION CONTACT:

Henry F. P. Cassagne, Chief Appraiser, Office of Technical Support, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, D.C. 20410, 202-472-4810. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: Notice was given on March 31, 1978, at 43 FR 13758 that HUD was proposing to amend title 24 of the Code of Federal Regulations by incorporating in part 888, subpart A, a revised schedule A, "Fair Market Rents for New Construction and Substantial Rehabilitation (including Housing Finance and Development Agencies program)" for all market areas. The final rule was published on June 13, 1978, at 43 FR 25604. The final rule stated that comments received in response to the March 31, 1978, publication received after April 14, 1978, would be carefully considered and additional amendments would be published at a later date if appropriate.

The fair market rents for three and four bedroom units in elevator buildings of five or more stories for the San Juan, Ponce, Mayaguez, and Arecibo, P.R., and New York, N.Y., market areas were included in the March 31, 1978, publication, but were omitted from the June 13, 1978, final rule. They are being published for effect in response to comments received from the Caribbean and New York area offices at the levels proposed in March.

A finding of inapplicability respecting the National Environmental Policy Act of 1969 has been made in accordance with HUD procedures. A copy of this finding of inapplicability will be available for public inspection during regular business hours at the office of the rules docket clerk at the address set forth above.

Accordingly schedule A of part 888 is amended as set forth below:

(Sec. 7(d) Department of HUD Act (42 U.S.C. 3535(d)).)

Issued at Washington, D.C., September 27, 1978.

LAWRENCE B. SIMONS,
Assistant Secretary for Housing—Federal Housing Commissioner.

SCHEDULE A—FAIR MARKET RENTS FOR NEW CONSTRUCTION AND SUBSTANTIAL REHABILITATION (INCLUDING HOUSING FINANCE AND DEVELOPMENT AGENCIES PROGRAM)

These fair market rents have been trended ahead 2 years to allow time for processing and construction of proposed new construction and substantial rehabilitation rental projects.

NOTE.—The fair market rents for (1) dwelling units designed for the elderly or handicapped are those for the appropriate size units, not to exceed two bedroom, multiplied by 1.05 rounded to the next higher whole dollar, (2) congregate housing dwelling units are the same as for noncongregate units and (3) single room occupancy dwelling units are those for 0 bedroom units of the same type.

Title 29—Labor

CHAPTER XXVII—FEDERAL MINE SAFETY AND HEALTH REVIEW COMMISSION

PART 2700—PROCEDURAL RULES

Amendment of Interim Rule

AGENCY: Federal Mine Safety and Health Review Commission.

ACTION: Amendment of interim procedural rule.

SUMMARY: The Federal Mine Safety and Health Review Commission, having adopted on a provisional basis certain interim procedural rules (29 CFR Part 2700), notifies the general public that is is amending 29 CFR 2700.57 effective on date of publication of the amendment. The amendment revokes that section and substitutes therefor new § 2700.57 which clarifies procedures applicable to appeals pending before the Interior Department and transferred by section 301 et seq., of the Federal Mine Safety and Health Amendments of 1977, 30 U.S.C. 961 et seq.

DATE: Effective October 10, 1978.

FOR FURTHER INFORMATION CONTACT:

Philip Paschall, Attorney, Office of General Counsel, Federal Mine Safety and Health Review Commission, 1730 K Street NW., Washington, D.C. 20006, phone 202-632-4770.

The Federal Mine Safety and Health Review Commission has determined to continue in effect interim procedural rules until publication of final rules of procedure and amends effective upon publication § 2700.57 by revoking § 2700.57 and substituting therefor the following:

§ 2700.57 Appeals pending before Interior Department Board of Mine Operations Appeals on March 8, 1978.

With respect to any appeal pending before the Board of Mine Operations Appeals as of March 8, 1978, no further pleadings need be filed to perfect such appeal before the Commission.

(Sec. 113(d)(2), Pub. L. 95-164, 91 Stat. 1314 (30 U.S.C. 823).)

Issued in Washington, D.C., by the Commission on October 4, 1978.

JEROME WALDIE,
Chairman, Federal Mine Safety and Health Review Commission.

Title 32—National Defense

CHAPTER I—OFFICE OF THE SECRETARY OF DEFENSE

SUBCHAPTER M—MISCELLANEOUS

PART 242B—GENERAL PROCEDURES AND DELEGATIONS OF THE BOARD OF REGENTS OF THE UNIFORMED SERVICES UNIVERSITY OF THE HEALTH SCIENCES

Alteration of Number and Responsibilities of Officers Reporting to the Dean of the University (President)

AGENCY: Uniformed Services University of the Health Sciences.

ACTION: Final rule.

SUMMARY: This document amends the general procedures and delegations to realine certain functions of officers reporting to the dean of the university (president). It adds one officer, and revises titles and responsibilities to correspond to the realinement of functions.

EFFECTIVE DATE: November 9, 1978.

ADDRESS: Legal Counsel, Uniformed Services University of the Health Sciences, 4301 Jones Bridge Road, Bethesda, Md. 20014.

FOR FURTHER INFORMATION CONTACT:

Merel Glaubiger, Legal Counsel, 202-295-2113.

SUPPLEMENTARY INFORMATION: In FR DOC 77-36169 published in the FEDERAL REGISTER on December 20, 1977 (42 FR 63775), the Uniformed Services University of the Health Sciences published general procedures and delegations of the board of regents of the Uniformed Services University of the Health Sciences. The purpose of this amendment is to alter the number and responsibilities of officers reporting to the dean of the university (president). The rule changes the title of director of administrative affairs to director of resource management. It adds a new officer, the assistant dean for administration and sets forth the responsibilities of each.

Because these rules relate solely to matters of university organization and procedure, notice of proposed rulemaking and public participation in the rulemaking are not required by section 553 of title 5 of the United States Code.

Accordingly, pursuant ot the Uniformed Services Health Professions Revitalization Act, and sections 552 and 553 of title 5 of the United States Code, the board of regents of the Uniformed Services University of the Health Sciences, amends Part 242b.7, Chapter I, Title 32, Code of Federal Regulations by revising § 242b.7(a)(7) and § 242b.7(b)(3) and by adding § 242b.7(b)(4) as follows:

§ 242b.7 Officers of the university.

(a) * * *

(7) * * *

(iii) A director of resource management; and

(iv) An assistant dean for administration.

* * * * *

(b) * * *

(3) Director of resource management

(i) The director of resource management shall be responsible for the preparation of budget estimates and program submission presentations for the approval of the board.

(ii) He or she shall be responsible for:

(A) Accounting and financial management;

(B) Internal audit; and

(C) Manpower planning.

(iii) He or she shall make all books, records, and vouchers available for the inspection of any member of the board and shall report at each meeting of the administrative affairs committee.

(4) Assistant dean for administration

(i) The assistant dean for administration shall be responsible for:

(A) The management of the university property and facilities;

(B) Administrative support of the university educational and research programs; and

(C) Personnel management.

(ii) He or she shall report at each meeting of the administrative affairs committee regarding matters of importance in the university's administrative affairs.

Dated: October 3, 1978.

MAURICE W. ROCHE,
Director, Correspondence and Directives, Washington Headquarters Services, Department of Defense.

Title 33—Navigation and Navigable Waters

CHAPTER I—COAST GUARD, DEPARTMENT OF TRANSPORTATION

[OCGD3-78-7-R]

PART 165—SAFETY ZONES

Establishment of Safety Zone in Upper Bay, New York Harbor, N.Y.

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: This amendment to the Coast Guard's Safety Zone Regulations establishes a portion of the water of the Upper Bay, New York Harbor as a safety zone. This safety zone is established to protect vessels from possible damage due to the presence of a fireworks display at the southern tip of Governors Island, N.Y. No vessel may enter or remain in a safety zone without the permission of the captain of the port.

EFFECTIVE DATE: This amendment is effective on October 9, 1978, from 9:15 p.m., e.d.s.t., to 9:45 p.m., e.d.s.t.

FOR FURTHER INFORMATION CONTACT:

Captain J. L. Fleishell, Captain of the Port, New York, Building 109, Governors Island, N.Y., 212-668-7917.

SUPPLEMENTARY INFORMATION: This information is issued without publication of a notice of proposed rulemaking and this amendment is effective in less than 30 days from the date of publication because the short time between scheduling of the event and its occurence made such procedures impractical. Extensive local public notice has been given.

DRAFTING INFORMATION: The principal persons involved in drafting this rule are: Lieutenant Junior Grade Ristaino, Project Manager, Captain of the Port, New York, N.Y., and Commander James L. Walker, Project Attorney, Legal Office, Third Coast Guard District, New York, N.Y.

In consideration of the foregoing, part 165 of title 33 of the Code of Federal Regulations is amended by adding § 165.302 to read as follows:

§ 165.302 Upper Bay, New York Harbor, N.Y.

The water of the Upper Bay, New York Harbor, within 1,000 yards of the southern tip of Governors Island, N.Y., is a safety zone from 9:15 p.m., October 9, 1978, to 9:45 p.m., October 9, 1978.

(86 Stat. 427 (33 U.S.C. 1224); 49 CFR 1.46(n)(4).)

Dated: October 4, 1978.

J. L. FLEISHELL,
Captain, U.S. Coast Guard,
Captain of the Port, New York.

Title 38—Pensions, Bonuses and Veterans' Relief

CHAPTER I—VETERANS ADMINISTRATION

PART 14—LEGAL SERVICES, GENERAL COUNSEL

Recognition of Organizations, Attorneys, and Agents

AGENCY: Veterans Administration.

ACTION: Final regulations.

SUMMARY: These regulations provide for representation of Veterans Administration claimants, including recognition of organizations and their representatives, agents, and attorneys to assure qualified representation in the preparation, presentation, and prosecution of claims for veterans' benefits. The Veterans Administration hopes to accomplish more complete claims representation for all veterans and their dependents.

EFFECTIVE DATE: October 4, 1978.

FOR FURTHER INFORMATION CONTACT:

Joseph J. Lindekugel (02A1), Director, Management and Operations Staff, Office of General Counsel, Veterans Administration, Washington, D.C. 20420, 202-389-3730.

SUPPLEMENTAL INFORMATION: On pages 17482 to 17484 of the FEDERAL REGISTER of April 25, 1978, there was published a notice of proposed revision of regulations providing for representation of Veterans Administration claimants and recognition of organizations, accredited representatives, attorneys and agents. Interested parties were given 30 days to submit comments, suggestions or objections to the proposed revision of regulations. We received 25 comments, which are discussed in the following paragraphs.

Section 14.626

Two comments on the "Purpose" section of the proposed regulations suggested that the word "qualified" be changed to "competent," however, the "Purpose" section has not been changed since the Veterans Administration intended by the use of the word "qualified" to convey the meaning first given in Webster's New Collegiate Dictionary: "* * * (F)itted (as by training or experience) for a given purpose: competent." The Veterans Administration desires that those presenting claims on behalf of veterans and their dependents possess a skill sufficient to insure a high quality of representation and believes that the word "qualified" conveys that desire. It was also intended that representation be limited to those who can meet a standard of skill, thus, the requirement that representatives demonstrate their ability to present claims by either passing a test or showing some other ability which would enable them to effectively present claims. The word "qualified" conveys the intention of the Veterans Administration.

One group commented that the need to monitor an applicant's choice of representative was like other administrative agencies which do not so monitor claims representatives. No survey has been done by the Veterans Administration to determine that "no other administrative agency" requires regulation of representatives. However, because of the complexities of claims presentation related to veterans' benefits, we believe it is desirable to have a monitoring system to assure that veterans with valid claims receive the benefits to which they are entitled.

Section 14.627

One comment was that the definition of "National Organizations" should be altered to include the National Association of State Directors of Veterans Affairs. A national organization is not recognized to "improve the communication and flow of information between * * * (the State organizations) in assisting our mobile veteran population in the United States," as suggested, but rather to prepare, present and prosecute claims for veterans' benefits authorized by Federal law. Each State veterans' organization is recognized for this purpose in § 14.628(b).

Section 14.628

The previous regulations included "governmental services or organizations granted a charter or recognition by act of Congress" under "National Organizations." The proposed new regulation dropped the term "governmental services." One group was concerned that the new regulation appeared to preclude legal services organizations and their paralegals from presenting claims. It is not the intent of either the old or new regulations that legal service organizations, even though receiving governmental funds, be recognized as "National Organizations." However, legal service organizations and their paralegals may qualify to present claims under other sections of the new regulations.

Two suggested that there be more than one State organization recognized under § 14.628(b). This section remains unchanged because the Veterans Administration believes it is desirable to recognize only the one instrumentality set up by each State to handle veterans' affairs. County and city veterans' organizations may still qualify to represent claimants under other sections, however.

There were numerous comments on various aspects of § 14.628(c). The requirement for a paid-up membership of 1,000 in order to qualify as an "Other Organization" received 18 comments.

Of these, only one group commented that the 1,000 member requirement was too low. The rest stated that the requirement bore no relationship to qualified representation and was too difficult for small veterans' service groups to reach. The Veterans Administration agrees with this assessment and the regulation has been changed.

The intent was to insure that an organization recognized to represent claimants was stable, responsible and competent. The organization must now demonstrate this by showing organizational membership or by showing that it is a veterans' service organization primarily dedicated to helping veterans and their dependents with title 38, United States Code benefits and programs, or dedicated to assisting former armed forces personnel under other Federal and State programs designed for this purpose. The Veterans Administration considers that a veterans service organization which has a sizable membership or has served a sizable number of veterans in the area of the above programs has demonstrated that it is stable, responsible and competent. Prior experience in representation before the Veterans Administration or the Board of Veterans Appeals, or representation in a discharge upgrading proceeding may be examples of ability to represent.

Other groups may individually qualify their representatives as "agents" under § 14.629. One suggestion was that "the number of power of attorney forms filed by agents of an organization, the types of claims represented before the Veterans Administration and the percentage success rate before the Board of Veterans' Appeals" be considered. This type of criteria is reflected in the changes in § 14.628 (d) and (e) and will be considered when granting recognition.

Other suggestions of criteria which should be used to determine whether an organization can provide qualified representation have also been incorporated into the changes in § 14.628(e), information to be submitted.

Two groups commented on the requirement in the proposed regulations that "Other Organizations" be incorporated or chartered by a State. Both agreed with the Veterans Administration that this was indicative of a serious commitment by an organization seeking recognition. This requirement was kept in the final regulations. However, rather than being a prime requisite, it is now one item to be supplied, as appropriate, under information to be submitted.

Two critical comments were received on the requirement that "Other Organizations" have as their primary purpose the presentation of claims before the Veterans Administration. We agree and have changed the primary purpose for "Other Organizations" to providing services to veterans or to other former armed forces personnel and their dependents. We do not believe that organizations which primarily aid other individuals (elderly, etc.) would be as attuned to the specific needs and problems connected with Veterans Administration claims as veterans service organizations are. However, individual members of other groups who wish to deal with Veterans Administration claims may still be recognized under § 14.629(b).

Several comments were received concerning the provision in the proposed regulations requiring representation in some form before the Board of Veterans Appeals. Four commenters recognized the need for such a requirement but requested greater flexibility in affiliating with a national organization. One suggested that there be no requirement of representation before the Board of Veterans Appeals. The Veterans Administration believes the ability to provide representation before the Board of Veterans Appeals is an important aspect of claims' service. A claimant works closely with and becomes dependent upon an organization to provide representation at the local level, and if the nature of the claim requires representation beyond the regional office, the claimant should be guaranteed a continuous service. The changes in the final regulations reflect the importance of a complete claims service, yet provide the flexibility desired by the commenters. The organization now will not need to affiliate with a national organization, but instead, can affiliate with any organization recognized by the Veterans Administration to provide representation. Moreover, it will not now be mandatory that an organization provide representation before the Board of Veterans Appeals either directly or by affiliation, but instead such organization must make certain that the claimant is aware of the limited representation it can provide.

Four commenters suggested that the language "may be recognized" by the Veterans Administration gave too much discretion in granting recognition to an organization and should be replaced with "shall be recognized." "May" was not changed as this is an adoption of the statutory language used in 38 U.S.C. 3402-3404.

One comment stated that gratuities should be allowed. The word "fee" or "gratuity" is intended to refer to "fee or compensation" pursuant to statutory language. According to Webster's New Collegiate Dictionary, a gratuity is given in "return for or in anticipation of some service." If gratuities were allowed, the door would be open to an abuse which would completely circumvent the intent of 38 U.S.C. 3402.

Two comments on membership were received. One suggested that it be changed so that a showing of "(t)otal paid-up membership should only be required of membership organizations." The other, that the section would not be applicable to certain organizations. The section was changed to provide for nonmembership organizations.

Two groups objected to what they thought was a requirement that representatives of national organizations be full-time paid employees. This is not the case. The information requested here, and included in the final regulations as § 14.628(e)(6)(iii), applies only to those representatives who are also full-time paid employees. Nothing would prevent less than full-time paid workers from becoming representatives.

One group objected to requiring all recognized organizations to submit a copy of the last financial statement of the organization. Although the requirement has been modified somewhat in § 14.628(e)(3)(i), we believe it is important that the Veterans Administration receive financial information to determine the assets committed to veterans' services. This is indicative of a sincere purpose on the part of the organization to provide competent and qualified services. It also indicates that the organization is, indeed, one which provides the services outlined in § 14.628(c), i.e., that it is a veterans service organization.

Section 14.629

Two groups commented on the fact that representatives in § 14.629(a) and agents in § 14.629(b) must establish that they are "of good character and reputation," and expressed an unsureness of the meaning of the phrase. We do not believe that a definition is necessary, but instead have provided that if there is a challenge to the good character and reputation of a specific individual, the District Counsel, pursuant to § 14.629 will resolve the question of current qualifications of a representative, agent or attorney. The

V 4 3 / 1 9 6 OCT 10 78

statutory language of 38 U.S.C. 3404 requires agent applicants to show that "they are of good moral character and in good repute."

Many commenters approved of the provisions in § 14.629(a) requiring some sort of testing and training of representatives. One group suggested annual seminars and exams with mandatory attendance. Another suggested that everyone be tested, and another stated that currently operating representatives be tested to retain their status. Section 14.629(a) was left unchanged. Because of the affirmative action requirement of § 14.628(d)(5) and the certification required, representatives will be closely supervised by the recognized organizations or risk losing their status. (See § 14.633(c)(1) of the new regulations.) A training program conducted by the organization (and approved by the Veterans Administration), or a past demonstration by the applicant of ability to present claims should provide a basis equal to that of passing a test to ensure qualified representation. Currently qualified representative should have demonstrated their ability to present claims and, in the absence of complaints concerning their service, will be allowed to continue their representation without reaccreditation.

One group commented that there was no provision to permit paralegals or law students supervised by attorneys to represent claimants. This comment is related to the suggestions of two others that § 14.629(a)(2) be changed to include part-time paid employees and volunteers. The section remains unchanged as the Veterans Administration believes that there is enough flexibility to include these situations. The use of the term "member" in § 14.629(a)(2) is intended to establish that an accredited representative is functioning as a part of an organization and subject to some control by that organization. There must be some affiliation between the representative and the recognized organization so that the Veterans Administration can look to the organization in cases where there are questions as to the functions and capacity of the representative. Paralegals, law students, volunteers, and part-time workers so affiliated with a recognized organization may become accredited representatives.

One group suggested a type of limited representation where those with expertise in only a certain area of claims representation would be limited to that area. With the training and testing provisions of § 14.629(a), sufficient safeguards exist to insure quality representation and it was therefore not believed necessary to provide for limited representation.

One group pointed out the lack of information given prospective agents in § 14.629(b). The Veterans Administration was in agreement with the comment, and the section was changed so that applicants will know that they must file their applications with the Office of General Counsel.

One suggestion was that attorneys should not be exempt from the requirement of testing or otherwise demonstrating their ability to present claims. The Veterans Administration did not change the section to include attorneys in a testing or training program because it accepts the basic premise that attorneys who have been licensed to practice law are assumed to have been trained to represent clients (including Veterans Administration claimants) and to protect the clients' rights. There are provisions for removal after a hearing, if ability is challenged.

Section 14.629(c) has been changed to reflect a suggestion by the Controller of the Veterans Administration to clarify the extent of information an attorney may receive from a claimant's file without the signature of the claimant.

Section 14.631

One group commented that § 14.631 was unclear whether more than one person in the same organization could act on the claimant's behalf. Paragraph (c) of § 14.631 points out that "only one organization, agent, or representative will be recognized at one time in the prosecution of a claim for one specific benefit." This paragraph seemed clear enough and was not changed. In the case of recognized organizations, the organization is given the power of attorney. This would enable several members to review the claimant's file in preparation of the claim. It is not appropriate that, in the case of an individual such as an agent or attorney, more than one person at a time have the ability to review an individual's file.

One suggestion was that the word "field" in § 14.631(a)(2) be eliminated because power-of-attorney forms may be filed at other than Veterans Administration field offices. This suggestion was accommodated.

Section 14.632

One group commented that challenges to recognition should apply to attorneys as well as agents and representatives. There are provisions for removal after a hearing if ability is challenged. Moreover, formal training and oversight by a bar association provide some degree of safeguard.

Two groups suggested the Veterans Administration provide greater due process safeguards to those seeking initial recognition as representatives or agents. The section remains unchanged as it is the Veterans Administration's opinion that the safeguards provided prospective representatives and agents at this stage in the recognition procedure are sufficient.

Section 14.633

One group commented that this section did not set out clearly whether an accused person will be suspended from practice before a final determination has been made by the General Counsel. The paragraphs were rearranged in an attempt to make it clearer that the accused person will be suspended from practice only after the initial inquiry justifies further investigation and hearings on the matter. They also suggested that a standard of proof be included. In response, the standard of "by clear and convincing evidence" was added to be used as the standard of proof in determining whether recognition should be suspended or revoked.

Several comments were received on the reasons listed for suspension or revocation of recognition. Two groups commented on the willfully withholding of material evidence as an unlawful, unprofessional, or unethical practice subject to suspension or revocation of recognition. It was suggested, and the Veterans Administration agrees that this requirement may run counter to several provisions in the Code of Professional Responsibility for attorneys. An attorney should not be required to furnish evidence detrimental to the client's claim, therefore, that language was eliminated from the section.

Two comments were that incompetent representation should also be specifically listed as an offense subject to suspension or revocation. The Veterans Administration chose not to list this offense specifically as instances of incompetence would be covered under § 14.633(c)(4).

Two groups commented that the provision "failing to furnish evidence within 90 days of request by the Veterans Administration" was unclear. No change was thought necessary as the passage clearly refers to cases where the claims representative, agent, or attorney has failed to furnish the evidence due to his or her own fault.

One comment suggested that the hearing provided for in the proposed regulations be changed so that a board of at least three members should preside at the hearing. This section was not changed as it does in reality conform to the spirit of the suggestion. The District Counsel will have made an initial decision. The hearing at the regional level will be by a hearing officer who is not a member of the Office of District Counsel. These two, plus the additional review at the General

Counsel level will mean that three people have reviewed the case.

Proposed § 14.633(c)(4), now § 14.633(d)(1) was changed to accommodate the comment from one group that it appeared the District Counsel's recommendation, rather than the hearing officer's recommendation, would be sent on to the General Counsel. It was intended, and now clearly states, that the District Counsel will submit the entire case to the General Counsel, including the hearing officer's findings as well as District Counsel recommendations.

Section 14.634

One group suggested that a list of allowable expenses be included; however it was concluded that a list would be overly lengthy. Other minor changes are for the purpose of clarity.

Section 14.637

Two groups suggested that space and office facilities be furnished to others besides the national organizations. This regulation implements 38 U.S.C 3402(a)(2) which states: "The Administrator may, in his discretion, furnish, if available, space and office facilities for the use of paid full-time representatives of national organizations so recognized". Because of limitation on space and because of the statute, we elected not to change the regulation.

The proposed regulations are hereby adopted as changed.

Approved: October 4, 1978.

MAX CLELAND,
Administrator of Veterans' Affairs.

The centerhead preceding § 14.626 is changed, §§14.626 through 14.660 are revoked and §§ 14.626 through 14.637 are added to read as follows:

REPRESENTATION OF VETERANS ADMINISTRATION CLAIMANTS; RECOGNITION OF ORGANIZATIONS, ACCREDITED REPRESENTATIVES, ATTORNEYS, AGENTS; RULES OF PRACTICE AND INFORMATION CONCERNING FEES, 38 U.S.C. 3401–3405

§ 14.626 Purpose.

The purpose of the regulation of representatives is to assure that claimants for Veterans' Administration benefits have qualified representation in the preparation, presentation, and prosecution of claims for veterans' benefits.

§ 14.627 Definitions.

As used in regulations on representation of Veterans' Administration claimants:

(a) "Agent" means a person who has met the standards and qualifications outlined in § 14.629(b).

(b) "Attorney" means a member in good standing of a State bar.

(c) "Cancellation" means termination of authority to represent claimants.

(d) "Claim" means application made under Title 38, United States Code, and implementing directives, for entitlement to Veterans' Administration benefits, reinstatement, continuation or increase of benefits, or the defense of a proposed agency adverse action concerning benefits.

(e) "Claimant" means a person who has filed a written application for determination of entitlement to benefits provided under Title 38, United States Code, and implementing directives.

(f) "National organization" means an organization chartered by act of the U.S. Congress or previously recognized by the Veterans Administration.

(g) "Recognition" means certification by the Veterans' Administration of organizations, their representatives, attorneys, and agents, to represent claimants.

(h) "Representative" means a person who has been recommended by a recognized organization and certified by the Veterans' Administration.

(i) "State" includes any State, possession, territory, Commonwealth, or the District of Columbia.

(j) "Suspension" means temporary withholding of authority to represent claimants.

§ 14.628 Requirements for recognition of organizations.

Authorized officers of an organization may request recognition by letter to the Administrator of the Veterans' Administration.

(a) *National organizations.* An organization chartered by act of Congress may be recognized as a national organization in the presentation of claims under the laws administered by the Veterans' Administration.

(b) *State organizations.* State organizations created for the purpose of serving the needs of veterans of that State may be recognized. Only one such organization may be recognized in each State.

(c) *Other organizations.* Organizations other than State and National organizations as set forth in paragraphs (a) and (b) of this section may be recognized when the Veterans Administration has determined that they are veterans service organizations primarily involved in delivering services connected with either title 38, United States Code benefits and programs or other Federal and State programs designed to assist veterans. The term "veteran" as used in this paragraph shall include veterans, former armed forces personnel and the dependents of either. Further, the organizations shall provide responsible, qualified representation in the preparation, presentation and prosecution of claims for title 38, United States Code benefits.

(d) *Requirements for recognition.* In order to be recognized under paragraph (c) of this section the organization:

(1) Shall have as a primary purpose, services to veterans; and

(2) Shall demonstrate a substantial service commitment to veterans either by showing a sizable organizational membership or by showing performance of those veterans' services to a sizable number of veterans; and

(3) Shall devote an appreciable portion of its assets to veterans' services; and

(4) Shall establish either that complete claims service will be provided to each veteran requesting representation, or shall give written notice of any limitation in its claims service with advice concerning alternate service. Complete claims service includes the ability to assure representation before the Board of Veterans Appeals. However, representation before the Board of Veterans Appeals may be provided by agreement with another organization recognized by the Veterans Administration; and

(5) Shall take affirmative action, such as training and monitoring of its recognized representatives, to ensure proper handling of claims.

(e) *Information to be submitted.* In order to be recognized under paragraph (c) of this section, the following information shall be supplied:

(1) *Purpose.* A statement outlining the purpose of the organization, the extent of services provided, and the manner in which veterans would benefit by recognition.

(2) *Service commitment.* (i) The number of members and number of posts, chapters, or offices and their addresses; and

(ii) A copy of the articles of incorporation, constitution, charter, and bylaws of the organization, as appropriate; and

(iii) The type of title 38, United States Code services performed with an approximation of the number of veteran and dependent clients served by the organization in each type of service designated; and/or

(iv) the type of services performed in connection with other Federal and State programs which are designed to assist former armed forces service personnel and their dependents, and an approximation of the number of veteran and dependent clients served by the organization under each program designated.

(3) *Assets.* (i) A copy of the last financial statement of the organization indicating the amount of funds allo-

V 43/196 OCT 10 78

cated for conducting veterans' services; and

(ii) A statement of the skills, training and other qualifications for handling veterans' claims of paid or volunteer staff positions.

(4) *Complete claims service.* (i) The recofd of representation before a discharge review board or the Veterans Administration, or other proof of ability to present claims before the Veterans Administration; and

(ii) Some proof of capability to provide representation before the Board of Veterans Appeals; or

(iii) The proof of association or agreement for the purpose of representation before the Board of Veterans Appeals with another recognized service organization, or the proposed method of informing claimants of the limitations in service that can be provided, with advice concerning alternate service.

(5) *Affirmative action.* The organization shall execute an agreement which states that it shall take affirmative action, such as training and monitoring of its recognized representatives to ensure proper handling of claims.

(6) *Other.* (i) A statement that neither the organization nor its representatives will charge or accept a fee or gratuity for service to a claimant; and

(ii) The names, titles, and addresses of officers and the officials authorized to certify representatives; and

(iii) The names, titles, and addresses of full-time paid employees who are qualified to act as accredited representatives.

(f) *Recognition or denial.* A notice of recognition will be sent within 90 days of receipt of all information to be supplied. However, if recognition is denied an organization, the Veterans Administration will set forth an explanation of the reasons for denial. A denial of recognition may be appealed to the Administrator within 90 days of the denial. The Veterans Administration will consider the appeal within 30 days of receiving such request. The organization will have an opportunity to fully document its position, and the appeal will cover all aspects of the application for recognition and denial.

§ 14.629 Requirements for recognition of representatives, agents, and attorneys.

The District Counsel will resolve any question of current qualifications of a representative, agent or attorney. The claimant; the representative, agent or attorney, or an official of the organization for which they would act; or the appropriate Veterans Administration official may appeal such determination to the General Counsel.

(a) *Representatives.* Recognized organizations shall file with the Office of the General Counsel VA Form 2-21 (Application for Accreditation as Service Organization Representative) for each person they desire recognized as a representative of that organization. In recommending a person, the organization shall certify that the designee:

(1) Is of good character and reputation; and:

(i) Has successfully completed a Veterans Administration approved course of instruction on veterans' benefits; or

(ii) Has passed an examination approved by the Veterans Administration; or

(iii) Has otherwise demonstrated an ability to present claims before the Veterans Administration;

(2) Is either a member in good standing or a full-time paid employee of such organization, or is recognized and functioning as a representative of another recognized organization;

(3) Is not employed in any civil or military department or agency of the United States.

(b) *Agents.* Individuals desiring recognition as agents must file an application with the Office of General Counsel and establish that they are of good character and reputation. In addition, applicants shall pass a written examination concerning laws administered by the Veterans Administration which shall be prepared and graded in the Office of General Counsel. The examination may, however, be taken at any convenient District Counsel office under the supervision of the District Counsel.

(c) *Attorneys.* Attorneys shall state in writing on their letterhead that they are authorized to represent the claimant in order to have access to information in the claimant's file pertinent to the particular claims presented. For an attorney to have complete access to all information in an individual's records, the attorney must provide a signed consent from the claimant or the claimant's guardian. The consent shall be equivalent to an executed power of attorney. (38 U.S.C. 3401; 3404.)

§ 14.630 Authorization for a particular claim.

Any person may be authorized to prepare, present, and prosecute a particular claim. A proper power of attorney, and a statement signed by the person and the claimant that no compensation will be charged or paid for the services, shall be filed with the office where the claim is presented. A person recognized under this section shall represent only one claimant; however, in unusual circumstances, appeal of such limitation may be made to the General Counsel. (38 U.S.C. 3403.)

§ 14.631 Powers of attorney.

(a) A power of attorney, executed on either VA Form 23-22 (Appointment of Veterans Service Organization as Claimant's Representative) or VA Form 2-22a (Appointment of Attorney or Agent as Claimant's Representative), is required to represent a claimant, except when representation is by an attorney who complies with § 14.629(c). The power of attorney shall meet the following requirements:

(1) Contain signature by:

(i) The claimant, or

(ii) The claimant's guardian, or

(iii) In the case of an incompetent, minor, or otherwise incapacitated person without a guardian, the following in the order named—spouse, parent, other relative or friend (if interests are not adverse), or the director of the hospital in which the claimant is maintained; and

(2) Shall be presented to the appropriate Veterans Administration offiee for filing in the veteran's claims folder.

(b) Questions concerning powers of attorney shall be referred to the District Counsel of jurisdiction for initial determination. This determination may be appealed to the General Counsel.

(c) Only one organization, agent, or representative will be recognized at one time in the prosecution of a claim for one specific benefit. All transactions concerning the claim will be conducted exclusively with the recognized organization, agent, or representative of record until notice of a change, if any, is received by the Veterans Administration.

(d) A power of attorney may be revoked at any time and an attorney may be discharged at any time. A new power of attorney shall constitute a revocation of any existing power of attorney.

(e) The authority which a power of attorney provides may be continued for a reasonable time after the death of the claimant, to determine whether the claim will be continued by a new claimant and whether a new power of attorney will be executed. (38 U.S.C. 3402, 3403, 3404.)

§ 14.632 Letters of recognition.

If challenged, the qualifications of prospective representatives or agents shall be verified by the District Counsel of jurisdiction. The report of the District Counsel, if any, including any recommendation of Veterans Administration station directors, and the application shall be transmitted to the General Counsel for final action. If the designee is disapproved by the General Counsel, the reasons will be stated and an opportunity will be given to submit additional information. If the designee is approved, letters of recognition, or an identification card, will be issued by the General Counsel, and will constitute authority

to prepare, present, and prosecute claims in all Veterans Administration installations. Record of recognition will be maintained in the Office of General Counsel. (38 U.S.C. 3402.)

§ 14.633 Termination of recognition.

(a) Recognition may be canceled by request.

(b) Upon receipt of information indicating improper conduct, the District Counsel of jurisdiction will initiate an inquiry.

(1) If the result of the inquiry does not justify further action, the District Counsel will close the inquiry and maintain the record for 2 years.

(2) If the result of the inquiry justifies further action, the District Counsel shall take immediate action to suspend recognition. The notice of suspension will state the reason and will also advise that additional evidence may be submitted, or a hearing requested (or both), within 10 working days of receipt of the notice. The time may be extended for sufficient reason.

(c) Recognition shall be suspended or revoked upon a finding by clear and convincing evidence of one of the following:

(1) Violation or refusal to comply with the laws administered by the Veterans Administration or with the regulations or instructions governing practice before the Veterans Administration.

(2) Knowingly presenting or prosecuting a fraudulent claim against the United States.

(3) Demanding or accepting unlawful compensation for preparing, presenting, prosecuting, or advising or consulting concerning a claim.

(4) Any other unlawful, unprofessional, or unethical practice. (Unlawful, unprofessional, or unethical practice shall include but not be limited to the following—deceiving, misleading or threatening a claimant or prospective claimant; neglecting to prosecute a claim for 6 months or more; failing to furnish evidence within 90 days of request by the Veterans Administration; or willfully withholding of an application for benefits.)

(d) If a hearing is requested, a hearing officer will be appointed by the Director of the regional office involved. The hearing officer shall not be from the Office of the District Counsel. The hearing officer will have authority to administer oaths. A member of the district counsel's office will present the evidence. The suspended person will have a right to counsel, to present evidence and to cross-examine witnesses. The hearing shall be conducted in an informal manner and court rules of evidence shall not apply. Testimony shall be recorded verbatim.

(1) Within 10 working days after either the time allowed under paragraph (b)(2) of this section, or the close of the hearing if one is conducted, the District Counsel will submit the entire case to the General Counsel.

(2) The decision of the General Counsel is final. The records of the case will be maintained in the General Counsel's office for 5 years. (38 U.S.C. 3404, 3405.)

§ 14.634 Fees and expenses

Accredited representatives of national, State or other recognized organizations and individuals recognized for a particular claim shall not be entitled to receive fees. Attorneys and agents are entitled to receive fees as provided by statute. (38 U.S.C. 3404(c)).

(a) *Amount of fees.* For the successful prosecution of claims, attorneys and agents may receive the fee permitted by statute. The fee will be paid to the attorney or agent of record at the time of allowance, by deduction from the benefit allowed, after approval by the Veterans Administration. Questions concerning the amount or proper payee of fees allowed will be resolved by the District Counsel, or designee, who will consider the quality, nature, and extent of the services.

(b) *Expenses.* Without regard to entitlement to fees, an agent, attorney, or other person who incurs an expense in the prosecution of a claim, may submit a sworn itemized account of the expense to the Veterans Administration. It will be retained in the claims folder as part of the permanent record. Payment of expenses is the responsibility of the claimant; however, before demanding or receiving reimbursement from the claimant, the expense shall be approved by the District Counsel, or designee. Notice of the action taken shall be transmitted to the requestor by the service handling the claim. (38 U.S.C. 3404.)

§ 14.635 Reconsideration of denial of fees and expenses.

A request for reconsideration of a denied fee, or statement of expenses, must be received by the General Counsel within 1 year of the date of denial. If agreement cannot be reached and a hearing is requested, a hearing officer will be appointed by the Director of the regional office involved. The hearing officer shall not be from the Office of the District Counsel. The hearing officer will have authority to administer oaths. A member of the District Counsel's office will present the evidence. The complainant will have a right to counsel, to present evidence and to cross-examine witnesses. The hearing shall be conducted in an informal manner and court rules of evidence shall not apply. Testimony shall be recorded verbatim. Within 10 working days after the close of the hearing, the District Counsel will submit the entire case to the General Counsel. The decision of the General Counsel is final.

§ 14.636 Banks or trust companies acting as guardians.

Banks or trust companies, corporate entities, acting as guardians for claimants, may be represented before adjudicating agencies as authorized representatives of claimants by an officer or employee, including a regularly employed attorney, if the employee or attorney represents the corporation in its fiduciary capacity. No fee shall be allowed for such services under § 14.634(a).

§ 14.637 Space and office facilities.

The Administrator may furnish space and office facilities, if available, for the use of paid full-time representatives of recognized national organizations. (38 U.S.C. 3402.)

[FR Doc. 78-28528 Filed 10-6-78; 8:45 am]

[6560-01-M]

Title 40—Protection of Environment

CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

SUBCHAPTER E—PESTICIDE PROGRAMS

[FRL 983-7; PP 8E2102/R180]

PART 180—TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES

N-(Mercaptomethyl)Phthalimide S-(O,O-Dimethyl Phosphorodithioate)

AGENCY: Office of Pesticide Programs, Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule establishes a tolerance for residues of the insecticide *N*-(mercaptomethyl)phthalimide *S*-(*O,O*-dimethyl phosphorodithioate) on kiwi fruit. The regulation was requested by Stauffer Chemical Co. This rule establishes a maximum permissible level for residues of the subject insecticide on kiwi fruit.

EFFECTIVE DATE: October 10, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. Timothy Gardner, Product Manager (PM) 15, Registration Division (TS-767), Office of Pesticide Programs, EPA, 401 M Street SW., Washington, D.C. 20460, 202-426-9425.

V 43 / 196 OCT 10 78

SUPPLEMENTARY INFORMATION: On August 18, 1978, the EPA published a notice of proposed rulemaking in the FEDERAL REGISTER (43 FR 36655) in response to a pesticide petition (PP 8E2102) submitted to the Agency by Stauffer Chemical Co., 1200 South 47th Street, Richmond, Calif. 94804. This petition proposed that 40 CFR 180.261 be amended by the establishment of a tolerance for the cholinesterase-inhibiting residues of the insecticide *N*-(mercaptomethyl)phthalimide *S*-(*O*,*O*-dimethyl phosphorodithioate) and its oxygen analog *N*-(mercaptomethyl)phthalimide *S*-(*O*,*O*-dimethyl phosphorothioate) in or on the raw agricultural commodity kiwi fruit at 25 parts per million (ppm). No comments or requests for referral to an advisory committee were received in response to this notice of proposed rulemaking.

It has been concluded, therefore, that the proposed amendment to 40 CFR 180.261 should be adopted without change, and it has been determined that this regulation will protect the public health.

Any person adversely affected by this regulation may, on or before November 9, 1978, file written objections with the Hearing Clerk, Environmental Protection Agency, Room M-3708, 401 M Street SW., Washington, D.C. 20460. Such objections should be submitted and should specify both the provisions of the regulation deemed to be objectional and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

Effective on October 10, 1978, Part 180, Subpart C, § 180.261 is amended by adding a tolerance for residues of the subject insecticide on kiwi fruit at 25 ppm as set forth below.

(Sec. 408(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346a(e)).)

Dated: September 27, 1978.

EDWIN L. JOHNSON,
Deputy Assistant Administrator for Pesticide Programs.

§ 180.261 N-(Mercaptomethyl)phthalimide S-(O,O-dimethyl phosphorodithioate) and its oxygen analog; tolerance for residues.

Tolerances are established for the cholinesterase-inhibiting residues of the insecticide *N*-(mercaptomethyl)phthalimide *S*-(*O*,*O*-dimethyl phosphorodithioate) and its oxygen analog *N*-(mercaptomethyl)phthalimide *S*-(*O*,*O*-dimethyl phosphorothioate) in or on the following raw agricultural commodities:

Commodity:	*Parts per million*
Alfalfa	40
Almonds, hulls	10
Apples	10
Apricots	5
Blueberries	10
Cattle, fat	0.2
Cattle, meat	0.2
Cattle, mby	0.2

Title 43—Public Lands: Interior

CHAPTER I—BUREAU OF RECLAMATION, DEPARTMENT OF THE INTERIOR

PART 422—PROCEDURES FOR THE IDENTIFICATION AND ADMINISTRATION OF CULTURAL RESOURCES

Final Rule

AGENCY: Bureau of Reclamation, Interior.

ACTION: Final rule.

SUMMARY: These regulations establish policies and procedures to meet the Bureau of Reclamation's responsibilities in the identification, protection, preservation, and maintenance of cultural resources. These regulations fulfill requirements in Executive Order 11593 and applicable historic preservation laws and were developed in consultation with the Advisory Council on Historic Preservation pursuant to section 1(3) of Executive Order 11593.

EFFECTIVE DATE: October 10, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. L. David Williamson, Chief, Recreation and Lands Branch, Division of Water and Land, Bureau of Reclamation, telephone 202-343-5204.

SUPPLEMENTARY INFORMATION: On June 9, 1977, the Bureau of Reclamation published proposed rulemaking (42 FR 29682 regarding the "Procedures for the Identification and Administration of Cultural Resources." Public comments were invited through July 11, 1977. All comments received through August 31, 1977, were considered. Written comments were received from 26 sources, and verbal comments were received from 10 persons.

Twenty-eight persons and interest groups expressed general concurrence with the rulemaking. No opposition was expressed. Public comments are summarized as "Comments Leading to Changes in the Rulemaking" or "Comments Not Leading to Changes in the Rulemaking."

COMMENTS LEADING TO CHANGES IN THE RULEMAKING

1. In § 422.2(b) it was recommended that the term "architectural" should be included in the list of resources for whose identification, protection, preservation, and mainterance the Bureau of Reclamation is responsible.

It was also recommended that the statutory language included in the Historic Preservation Act of 1966 describing eligibility for the National Register of Historic Places should be substituted for the language used here. The substituted language should be consistent with the definition of "National Register" that was given in § 422.7(p). (The "National Register" definition is given in the final rules in § 422.7(o).)

2. It was suggested to change "only cover 10 to 20 percent" to "covering an adequate sample percentage" in § 422.3(b)(2). (This change is given in the final rules in § 422.3(b)(1)(ii).)

3. It was suggested to add "Necessary measures to protect the resources shall not be implemented until such notification and consultation procedures can be completed" in § 422.3(h). Similar language was adopted in the final rule.

4. In the discussion of mitigation, § 422.3(k), it was recommended that the following paragraph be included: "Mitigation measures must be appropriate to the nature of the significance of the resource in question. Appropriate mitigation of adverse effects on properties possessing architectural merit or heritage values will necessarily differ from that of adverse effects on properties significant only for the information they contain. Avoidance or preservation may be the only appropriate mitigative measure in some cases." Language similar to that suggested is used in § 422.3(g).

5. It was recommended that the last sentence of § 422.5(b) should be changed to: "All direct contracts, purchase orders, or transfers of funds for cultural resource studies and the selection of contractors may be reviewed by the Archeologist, E. & R. Center, prior to final, execution of contracts or transfer agreements if determined by the contracting officer to be beneficial from a technical standpoint. Copies of all actions shall be provided to the Archeologist, E. & R. Center. Language similar to that suggested is used in § 422.5(c).

6. If was suggested that phases I, II, and III surveys be changed to classes I, II, and III surveys in § 422.3(b).

It was also suggested to qualify "excavations" as "test excavations" in § 422.3(b)(3). (This change is given in the final rules in § 422.3(b)(1)(iii).)

7. It was recommended that professional artists and architectural historians be involved in the process of identification and administration of cultural resources. Throughout the rules such professionals are considered under the category of "other professionals." Such professionals were specifically named and added to the definition of "Professional Examination" in § 422.7(r).

8. It was suggested not to specify a particular dated edition of Bureau of Reclamation specification paragraphs titled "Preservation of Historical and Archeological Data" in appendix A(10).

9. It was suggested to add "or retains" to § 422.2(b), line 19.

10. It was suggested to specify that copies of technical reports would be sent to the Department of the Interior Library and the National Technical Information Service in § 422.6(b). In addition to this change, § 422.6(b) was modified to specify that copies of technical reports would also be sent to the Water Resources Scientific Information Center.

11. In § 422.7 it was suggested that the "Historic" resources category include district, object, site, and structure. It was also suggested that National Register definitions of the terms "district, object, site, and structure" be used and that the term "building" be defined. Definitions taken from the January 1977 edition of "How to Complete National Register Forms" are used.

12. It was recommended that in § 422.7(dd) the more extensive discussion of survey in § 422.3(b) should be cross-refereuced. The definition of survey in § 422.7(y) now references the discussion of survey in the main body.

13. The word "maintained" was recommended rather than "used" in § 422.3(i). This change is given in the final rules in § 422.3(i).

14. It was suggested that the regulations be made compatible with the procedures for "Determinations of Eligibility for Inclusion in the National Register of Historic Places" (36 CFR Part 63) and that 36 CFR Part 63 be referenced. 43 CFR Part 422 is compatible with 36 CFR Part 63 and the rule has been referenced in § 422.1 and appropriately throughout these final rules.

15. It was recommended that class III surveys in § 422.3(b) be accomplished during Reclamation's feasibility planning stage. Reclamation agrees to carry out class III surveys during the preparation of a feasibility report as explained in § 422.3(b)(2).

16. It was recommended that Reclamation not distinguish between primary and secondary impacts on non-Federal lands. In § 422.2(b), Reclamation recognizes its responsibility for potential impacts it may have on non-Federal lands. The definitions for and distinction between "primary" and "secondary" impacts have been deleted. A definition of "effect" was also added in § 422.7(i).

17. Many general editorial changes were suggested and the proposed rules were carefully rewritten throughout for clarity and consistency. Many sections, particularly §§ 422.3 and 422.5 were also almost totally reorganized.

COMMENTS NOT LEADING TO CHANGES IN THE RULEMAKING

1. It was recommended that the National Endowment for the Arts (NEA) and the National Endowment for the Humanities (NEH) have (a) staff member(s) involved when a project is eligible to make application for NEA or NEH funds. Cultural resources on Bureau of Reclamation projects are ineligible for NEA and NEH funds.

2. The question of whether the Bureau of Reclamation possesses the authority to promulgate a regulation regarding the implementation of portions of the National Historic Preseva-tion Act was raised. Although section 211 of Pub. L. 94-422 states that "The Council is authorized to promulgate such rules and regulations as it deems necessary * * *," it does not give the Advisory Council the exclusive right to do so. Section 1(2) of Executive Order 11593 requires that Federal agencies "initiate measures and procedures necessary to direct their policies, plans and programs * * *," and section 1(3) of the Executive order provides that Federal agencies shall "initiate procedures to assure that Federal plans and programs contribute to the preservation and enhancement of non-federally owned sites, structures and objects of historical, architectural or archeological significance."

3. It was recommended that Federal agencies be responsible for their construction impact (e.g., raw material sources) outside of the primary construction zone. These regulations include responsibility for such areas of impact.

4. It was suggested that State Historic Preservation Officers (SHPOs) and other qualified professionals be more involved in the review process outlined in the procedures. Reclamation believes that the procedures already allow for adequate involvement by and consultation with SHPOs and qualified professionals.

5. Suggestions for definitions were considered but it was determined that the existing definitions (other than those noted under "Comments Leading to Changes in the Rulemaking") are adequate for the Bureau of Reclamation's purposes.

It was also suggested to move the definitions section to the beginning of Part 422 but we have concluded that they should remain as § 422.7.

6. Comments on our survey phases (§ 422.3(b)) incorrectly included a belief that the class III surveys are an integral part of recovery, protection and/or preservation and should be accomplished under authority of the Archeological and Historical Preservation Act of 1974. The Bureau of Reclamation class I, II, and III surveys are an integral part of identification, protection, and/or preservation and are to be accomplished as part of the planning processes under the authority of the National Environmental Policy Act of 1969 and the National Historic Preservation Act of 1966; see provisions in § 422.3(b).

7. Comments on the delegation of authority were considered. For the purpose of this rulemaking, it was decided to remain with the language in Executive Order 11593 in reference to the authority of the Secretary of the Interior.

8. It was suggested that the "Procedures" should be organized according to three major types of tasks covered by historic preservation authorities. The separation of three major types of tasks would not be consistent with the Bureau of Reclamation's operational procedures.

9. Comments on program procedures and administration were considered. The program procedures and administration are organized to allow the Bureau of Reclamation to effectively integrate its cultural resource responsibilities into its planning, operation, and maintenance procedures and to be consistent with existing historic preservation legislation.

It is hereby determined that the publication of this regulation will not significantly affect the quality of the human environment and that no envi-

V 43/196 OCT 10 78

ronmental impact statement pursuant to section 102(2)(C) of the National Environmental Policy Act, 42 U.S.C. 4332(c), is required. For specific proposals requiring the Bureau of Reclamation to carry out its cultural resource responsibilities as set forth in this regulation, compliance with the National Environmental Policy Act will be accomplished on an individual basis.

The primary authors of this rulemaking are: Ward Weakly, Archeologist, Engineering and Research Center, Denver, Colo., telephone, 303-234-4348; Jean Kujawa and Diana Gelburd, Division of Water and Land, Department of the Interior, Washington, D.C., telephone, 202-343-5204.

NOTE.—The Department of the Interior has determined that the publication of this document does not contain a major proposal requiring preparation of an inflation impact statement under Executive Order 11821 and OMB Circular A-107.

Dated: October 3, 1978.

JAMES A. JOSEPH,
Under Secretary of the Interior.

Pursuant to the authority of the Secretary of the Interior contained in Executive Order 11593 of May 13, 1971, it is hereby established a new part 422 of title 43 to read as follows:

Sec.
422.1 Purpose and scope.
422.2 Responsibilities.
422.3 Program procedures.
422.4 Coordination with other Agencies and entities.
422.5 Administration.
422.6 Records and reports.
422.7 Definitions.

AUTHORITY: E.O. 11593 of May 13, 1971.

§ 422.1 Purpose and scope.

This part sets forth regulations of the Bureau of Reclamation with regard to the following Public Laws, Federal Regulations, Departmental Manual provisions and Executive Order:

(a) Antiquities Act of 1906 (34 Stat. 225, 16 U.S.C. 431)

(b) Historic Sites Act of 1935 (49 Stat. 666, 16 U.S.C. 461-467)

(c) Reservoir Salvage Act of 1960 (74 Stat. 220, 16 U.S.C. 469) as amended by Pub. L. 93-291, the Historical and Archeological Preservation Act of 1974 (88 Stat. 174, 16 U.S.C. 469)

(d) National Historic Preservation Act of 1966 (NHPA) (80 Stat. 915, 16 U.S.C. 470) as amended in 1973 by Pub. L. 93-54 and in 1976 by the Land and Water Conservation Fund Act, Pub. L. 94-422

(e) National Environmental Policy Act of 1969 (NEPA) (83 Stat. 852)

(f) Executive Order 11593, for "Protection and Enhancement of the Cultural Environment," May 13, 1971

(g) Preparation of Environmental Impact Statements Guidelines (40 CFR Part 1500)

(h) National Register of Historic Places (36 CFR Part 60)

(i) Procedures for the Protection of Historic and Cultural Properties (36 CFR Part 800)

(j) Determinations of Eligibility for Inclusion in the National Register of Historic Places (36 CFR Part 63)

(k) Protection of Properties in the National Register of Historic Places (426 DM 1)

(l) Preservation of Historic Property (519 DM 1)

(m) Environmental Quality (516 DM 1-3)

The scope of this part embraces the elements of Executive Order 11593, section 1, which states:

"The Federal Government shall provide leadership in preserving, restoring, and maintaining the historic and cultural environment of the Nation. Agencies of the executive branch * * * shall (1) administer the cultural properties under their control in a spirit of stewardship and trusteeship for future generations, (2) initiate measures necessary to direct their policies, plans and programs in such a way that federally-owned sites, structures, and objects * * * are preserved, restored, and maintained for the inspiration and benefit of the people, and (3) * * * institute procedures to assure that Federal plans and programs contribute to the preservation and enhancement of nonfederally owned sites, structures, and objects of historical, architectural, or archeological significance."

§ 422.2 Responsibilities.

(a) *Secretary of the Interior.* The provisions of referenced Acts in § 422.1 assign Governmentwide overview and consultative responsibilities to the Secretary of the Interior for performing the functions necessary to execute the policies prescribed in Executive Order 11593 and applicable historic preservation laws.

(b) *Bureau of Reclamation.* The Bureau of Reclamation is responsible for the identification and protection of historical, archeological, architectural, scientific, and paleontological resources, hereinafter referred to as cultural resources, affected by Reclamation actions or on Reclamation lands. Reclamation will manage the cultural resources on Reclamation lands in compliance with national policies in an effort to protect, preserve, rehabilitate, restore and maintain the properties, as appropriate. Reclamation is also responsible for identifying and considering cultural resources on nonfederally owned areas which are or will be affected by Reclamation actions (includes Reclamation funded, licensed, or proposed activities). It is the responsibility of the Bureau of Reclamation to identify, evaluate and nominate to the National Register of Historic Places (National Register) all districts, sites, structures, buildings, and objects significant in American history, architecture, archeology, and culture which may be eligible under National Register criteria (36 CFR 60.6) on all areas affected by a Reclamation action and on all Reclamation owned, withdrawn, or acquired lands or land in which Reclamation acquires or retains an interest. These responsibilities shall be fully considered in project planning, construction, operation and maintenance. Reclamation responsibilities also include notification to the Secretary of the Interior when it is determined that a Reclamation project will cause irreparable loss or destruction of cultural resources listed on or eligible for listing in the National Register and the preparation of an annual report of activities carried out pursuant to Pub. L. 93-291.

(1) *Commissioner.* The Commissioner of the Bureau of Reclamation is responsible for Reclamation's compliance with Executive Order 11593 and the applicable provisions of the laws and regulations referenced in § 422.1.

(2) *Regional Directors.* Each Regional Director is responsible for insuring that proposed and existing Reclamation activities under his jurisdiction are executed according to the provisions of these regulations (43 CFR Part 422).

(3) *Archeologist, Engineering and Research Center (E&R Center).* The Archeologist, E&R Center, Denver, Colo., is Reclamation's chief archeologist. This person is responsible for providing advice to the Commissioner's office and for furnishing technical assistance to and coordinating with the regional offices about Reclamation's cultural resources program.

(c) *Advisory Council on Historic Preservation (Advisory Council).* Under the provision of section 106 of the National Historic Preservation Act and Executive Order 11593, the Advisory Council must be afforded an opportunity for comment on Federal, federally assisted or federally licensed undertakings that may affect properties listed in or eligible for listing in the National Register of Historic Places. The procedures for consultation with the Advisory Council are outlined in 36 CFR Part 800.

(d) *State Historic Preservation Officer (SHPO).* The SHPO is the State official, designated pursuant to 36 CFR Part 60, responsible for liaison with Federal agencies in their implementing the National Historic Preservation

Act of 1966 and Executive Order 11593, and for the coordination of the Statewide survey of historic properties and the development of a comprehensive State historic preservation plan.

§422.3 Program procedures.

(a) *Policy.* In all matters related to cultural resources, the Bureau of Reclamation regulations (43 CFR Part 422) and policy memorandums in further implementation of these regulations from the Commissioner govern the actions of Reclamation.

(b) *Surveys.* Cultural resources surveys and inventory reports will be completed for all Reclamation lands and existing projects as well as for those areas which may be affected by a Reclamation action or where Reclamation actions and projects are currently being planned.

(1) *Levels of surveys.* The Bureau of Reclamation conducts three levels of surveys.

(i) *Class I survey.* A class I survey is primarily a literature search. It consists of consulting the National Register of Historic Places and supplemental National Register listings to determine whether any National Register eligible/listed properties exist in the area of a Reclamation action or on lands under Reclamation's administration. It also includes contacting the SHPO, State Archeologist, State Historian, State Historical Society, and/or other appropriate individuals, agencies, or institutions to determine what cultural resources may be present in an area and what kind of additional information may be needed for an adequate inventory of cultural resources. Regional records shall also be examined for potentially eligible properties on lands under Reclamation's administration.

(ii) *Class II survey.* A class II survey is a field examination of the area to be affected by a Reclamation action or on lands under Reclamation's administration in an attempt to determine the presence or absence of cultural resources. This type of survey might be an on-the-ground examination and/or an evaluation covering an adequate sample percentage of the total study area which may be studied more intensively during class III surveys. Class II surveys might include remote sensing techniques and/or sampling procedures. Class II surveys are designed to aid in determining the necessity for a class III survey and may be combined with a class I survey or bypassed in favor of a class III survey.

(iii) *Class III surveys.* A class III survey consists of an intensive on-the-ground examination of all the areas to be affected by a Reclamation action or on lands under Reclamation's administration. It is designed to locate and make a preliminary professional evaluation of all identified cultural resources. All cultural resources identified as signficant as a result of a class III survey will then be nominated to the National Register of Historic Places or a determination of eligibility will be sought. A class III survey may require test excavations for the purpose of evaluating the cultural resources.

(2) *Surveys during preparation of pre-authorization appraisal investigation and feasibility investigations.* Each planning investigation conducted by Reclamation shall include, in its initial steps, a survey of the cultural resources in the planning area. The type of survey shall be consistent with the level of detail of the planning investigation. Class I surveys are normally undertaken during the preparation of an appraisal report or the compilation of initial resource base information for the multiple objective planning (MOP) effort. Class I surveys should be undertaken at the beginning of a cultural resources evaluation in order to minimize the possibility of duplication of effort. The results of a class I survey may be used in the evaluation of alternative plans. Class II surveys are normally undertaken during the feasibility investigation. To complete the feasibility investigation, a class III survey is necessary to permit the completion of the identification, determination of eligibility and nomination process when potential National Register sites are located or indicated to be present in a class II survey. If the projected cost of a class III survey is unusually high, clearance will be obtained from the Commissioner's office before proceeding with the survey. A class III survey may not be possible during preparation of pre-authorization appraisal investigation and feasibility investigation when access to private lands is denied or when pre-authorization planning investigations are terminated because of Congressional action.

(3) *Surveys during post-authorization definite plan report preparation and/or construction.* Class III surveys should be completed before approval of a definite plan report. For those projects where completion of surveys required in § 422.3(b)(2) was not done because project implementation preceded passage of applicable cultural resource laws, or because access was denied, or because Congress authorized the project, class III surveys must be completed on Reclamation project areas or areas subject to a Reclamation action at the earliest possible date.

(4) *Surveys on completed projects and surveys on Reclamation-administered lands.* On areas not previously surveyed for cultural resources, investigations shall begin with a class I survey. Class III surveys of the area should then be conducted unless it is established that surveys by others, consistent with these procedures (43 CFR Part 422), have already been performed to determine the existence of cultural resources and their significance.

(c) *Determination of significance of cultural resources.* (1) Evaluation of cultural resources that may qualify for the National Register of Historic Places.

All cultural resources inventoried during a class I, II, or III survey, except those already eligible/listed on the National Register, shall be evaluated for their potential significance based on National Register criteria (36 CFR 60.6) and other local or State interest. Qualified professionals, including the SHPO, State Historian and State Archeologist, may assist Reclamation in this early assessment of significance process. When there is general agreement that a specific cultural resource property has little or no signficance, no further consideration need be given to the property under this part (43 CFR Part 422).

(2) Determination of Eligibility of Cultural Resources for the National Register of Historic Places.

Reclamation shall apply the National Register criteria for evaluation contained in 36 CFR 60.6 to each cultural resource found to be of some signficance in § 422.3(c)(1). If Reclamation and the SHPO agree that a property meets the criteria, the documentation (36 CFR 63.3) will be sent to the Keeper of the National Register of Historic Places. An official determination by the Keeper will be made within 10 working days of receipt of the documentation. If any question exists on whether a property meets the criteria, Reclamation will send the documentation required in 36 CFR 63.2(d)—including the comments of the SHPO—to the Keeper of the National Register. In these cases, the Keeper has 45 days after receipt of the material in which to respond (See 36 CFR 63.2(e)). If Reclamation determines that a cultural resource does not appear to meet the critiera and the SHPO agrees, or if the Keeper of the National Register determine a property is not eligible for the National Register, further consideration of the property shall be handled according to § 422.3(e)(2). The procedures in § 422.3 (d) and (e)(1) shall be applied to all cultural resource properties determined to be eligible for the National Register of Historic Places.

(d) *Nomination to the National Register of Historic Places.* Reclamation will apply the nomination process set forth in 36 CFR Part 60 to all cultural resource properties determined to be

V 4 3 / 1 9 6

eligible for the National Register. All regional level work will be conducted in consultation with the Archeologist, E&R Center.. Copies of the nomination forms will be sent to the SHPO for his comments. Information copies will be provided to the State Historian and State Archeologist. Regional Directors will submit completed nomination forms to the Archeologist, E&R Center, for review and processing in accordance with the Department of the Interior procedures.

(e) *Determination of project effect on cultural resource properties.* Each Reclamation action will be analyzed in consultation with the SHPO to determine its effect on identified cultural resources.

(1) For properties eligible/listed on the National Register of Historic Places.

(i) *Determination of no effect.* Determination that a Reclamation action will have no effect upon a National Register eligible/listed cultural resource must be adequately documented and shall be the result of a professional evaluation based on the application of the "Criteria of Effect" set forth in 36 CFR 800.6. Should such a finding ensue, Reclamation shall seek the concurrence of the SHPO in consultation with the Archeologist, E&R Center. Should the SHPO agree, the action may proceed without further consultation.

(ii) *Cultural resource affected.* Reclamation will apply the criteria of adverse effect, set forth in 36 CFR 800.9, to determine whether the effect of the undertaking is adverse.

(A) *Determination of no adverse effect.* Upon finding the effect not to be adverse, adequate documentation will be sent to the SHPO for his views. If the SHPO agrees, or if he disagrees but Reclamation still believes that the effect will not be adverse, the documented determination of no adverse effect along with the SHPO's comments will be submitted to the Advisory Council on Historic Preservation, after consultation with the Archeologist, E&R Center. Unless the Advisory Council objects to Reclamation's findings within 45 days of the Council's receipt of the documentation, Reclamation's action may proceed without further consultation.
